We regret that our stocks of YARRAWA and ANITA WEHRMAN are entirely exhausted, also many other good varieties, but we can still offer the following while stocks last. Order at once to avoid disappointment—remembering that our stocks are true to name and while a little higher in price, will save you money in the long run.

ROSE QUEEN "ROSE QUEEN" is Orchid-flowering, borne on long stems, extremely free and early and of pink color most attractive, is a decided acquisition, and like all meritorious novelties is sure to be in demand wherever grown. Prices: Trade pkt., \$1.00; 3 trade pkts. for \$2.75; 1 oz., \$12.00.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

New Interstate Seed Bill.

Our attention has been called by Curtis Nye Smith, counsel for the American Seed Trade Association to the fact that Mr. Cullop of Indiana has recently filed in the House of Representatives of the United States a bill (H. R. 18630) to make it unlawful to ship in commerce between the States any grain or seed which is falsely labeled or branded, or falsely represented, fixing a penalty for the violation of a fine of not less than five hundred dollars or by imprisonment of not more than one year, or by both such fine or imprisonment.

Notes.

The Holland bulbs which are arriving in this country are of exceptionally fine quality this year. Hyacinths, tulips and narcissus have never been better.

Sluis & Groot, Enkhuizen, Holland, express confidence of their ability to fill all flower and vegetable seed orders. They state that there has been much sunshine and dry weather of late so that they expect to harvest seeds of first quality.

We understand that certain German seed growers are advising their customers that they expect to be able to ship flower and vegetable seeds through Holland without any serious interruption of the usual trade relations with customers in this country.

CATALOGUES RECEIVED.

Peter Henderson & Co., New York City—Wheat, Grasses, Clovers, Etc., for Fall Sowing. A special list.

Otto Katzenstein & Co., Atlanta, Ga.—Price List of Seeds of American Conifers, Trees, Shrubs, Herbs, No. 22.

Vincent Lebreton, Trelaze, France—Wholesale Trade List of Nursery Stock. McHutchison & Co., New York, American agents.

Wm. Elliott & Sons, New York.—Autumn Catalogue and Price List of Giant Flowering Bulbs and Seeds, for the Trade Only.

American Forestry Co., Boston, Mass.—Special Price List of Little Forest, Shade and Ornamental Trees grown at Little Tree Farms, South Framingham, Mass.

Good & Reese Company, Springfield, O.—Fall Trade List for Florists, Nurserymen and Dealers Only. Strong on Roses, of which a useful ready reference table is given.

J. F. Noll & Co., Inc., Newark, N. J.—Bulb Catalogue, Autumn, 1914. Narcissi and Darwin tulips are attractively used as cover illustrations. A general selection of seasonable goods besides bulbs are listed.

Vaughan's Seed Store, Chicago.—

Bulbs and Hardy Plants for Autumn. Tulips, daffodils, lilies and choice perennials are the specialties in this well-compacted fall catalogue. Covers show narcissi and tulips and peonies in colors.

W. B. Whittier & Co., Framingham Nurseries, Framingham, Mass.—Trade Price List, Fall, 1914. For Nurserymen, Dealers, Florists and Landscape Architects Only. A useful list of standard material in ornamental tree, shrub and hardy herbaceous planting stock.

Carters Tested Seeds, Inc., Boston, Mass.—“Bulbs 1914.” A very attractive catalogue beautifully illustrated, several in colors. Dark covers bearing glowing illustrations in natural colors of Darwin tulip Clara Butt. This house is a branch of James Carter & Co., London, England.

Dean Iris Gardens, Moneta, Cal.—Illustrated Guide and Catalogue of Irises. This artistic publication lists over 200 species and varieties grouped under the various classes. A beautiful color plate of hybrid Iris Catarina forms the frontispiece. The price list comes in separate.

GERMAN POTASH SUPPLY.

The Department of State is in receipt of a telegram from the Netherlands legation, under date of August 31, to the effect that the embargo on the exportation of potash from the Netherlands has been temporarily removed. The world's supply of potash comes from Germany, and one of the chief routes for shipping it has been down the Rhine and through ports in Holland. Owing to the war in Europe this neutral territory would be the only outlet for German potash. Importations into the United States of this article in its various forms during the fiscal year ending June 30, 1914, have been as follows:

	Tons	Value
Kainit	541,846	\$2,579,619
Manure salts.....	261,342	2,717,211
Muriate of potash ..	237,916	7,915,523
Sulphate of potash ..	45,139	1,897,710
Total	1,086,243	15,100,123

PUBLICATION RECEIVED.

Growing Bulbs for Winter and Spring Blooming. By Maurice Fuld. Published by Knight & Struck Company, New York. This book emanating from the pen of this versatile author is written solely for the benefit and advice of the amateur and Mr. Fuld in his introduction disclaims any intention to instruct the professional grower. It fills its mission very completely and the trade can unhesitatingly recommend it to their amateur customers as a good guide to modern bulb growing in the house or garden. Price \$1.00.

NEW CORPORATIONS.

Los Angeles, Cal.—R. W. Saakes, 810 S. Broadway.

Portland, Ore.—German Floral Co., capital stock, \$1,000. Incorporators, Wm. Wesenberg, Otto Reuble and Karl Bamme.

**Of Interest to Retail
Florists**

The Overbrook Gardens and Strafford Flower Farm have been consolidated at Strafford, Pa., and will be under the supervision of Joseph Russell, who, for the past two years, has been in charge of Overbrook Gardens.

Forest Hills Cemetery, Chatanooga, Tenn., announces the opening of the first of a group of up-to-date green houses, scientifically built and fully equipped for first class floral work, under the special direction of G. A. Kimmel. Cut flowers, designs and potted plants will be for sale at the lodge inside the grounds.

FLORAL SHOW ROOM.

In our issue of August 8 we presented exterior views of the elaborate floral building just completed for F. R. Pierson Co., Tarrytown, N. Y., together with some descriptive notes of the structure and its uses. Our cover illustration in this week's issue shows the view looking out to Broadway from the reception or show room and gives an excellent idea of the grand plate glass windows, each 10 feet 6 inches by 14 feet.

A NEW DEPARTURE.

Mark Aitken, of Springfield, Mass., is opening a branch store at 418 Main street. It will be known as the Aitken Cash Branch, and while it is to be run in connection with the main store at 48 Main street, it will be conducted on an entirely different policy. Mr. Aitken announces that the business transacted there will all be done on a cash basis. One of the greatest items of expense encountered by the average florist is caused by the large demand for special deliveries, and it is Mr. Aitken's intention to do away to a great extent with this feature. Two deliveries will be made each day, the first one to take care of all orders received up to 11 o'clock in the morning, and the second one during the latter part of the afternoon taking care of all orders after 11 o'clock in the morning.

In doing away with this item of expense, and by the cash transactions Mr. Aitken announces that he will make a 10 per cent. discount from the regular price at the time of the purchase. Special sales will also be conducted at frequent intervals.

WREATH OF ASTERS AND ROSES.

For sale by Mrs. Woodrow Wilson By Gude Bros. Co.

Photo by Taylor, West & Co.

CHICAGO NOTES.

A. Henderson is receiving the congratulations of his friends on his safe arrival home from Europe.

The "Luxemburgers" gave their annual festival on the north side Sunday, Sept. 6, including a display of flowers and vegetables.

A new sign has appeared on N. Wabash avenue which has the distinction of being the first wholesale and retail florists' sign. It is that of Harry Rowe & Co., who will open the new store about Sept. 15.

The Columbia Flower Shop, 3101 Cotton Grove avenue, is now enjoying an established trade. During its short life it has almost outgrown its limited quarters and another year will probably make a larger place necessary.

A. L. Vaughan is one of the few optimists in the wholesale trade and largely because he always knows just how business stands. When asked his opinion of August trade he replied at once "just \$71.00 ahead of August, 1913."

Wm. J. Smyth, 3101 S. Michigan avenue, has returned from his summer home at Antioch, Ill. Mr. Smyth is looking remarkably well and is ready for the fall business which he predicts will be here soon. The summer trade has proven to be about normal, a good July balancing up the dull August at this store.

Retail florists are making as tasteful window displays as during the busier seasons. The asters, various kinds of lilies and early chrysanthemums are appealing to the passersby by their artistic arrangement and to look at the windows one would never

think that florists were pulling the duldest time of the year.

C. A. Samuelson is back from South Idaho, where he has a young apple orchard. This store is being decorated and put in readiness for the opening of the season. Mr. Samuelson does not anticipate loss of trade because azaleas and other winter stock will not be available, but plans to push harder for sales of roses, carnations, etc.

Dr. A. W. Hammer, aged 33, who lost his life by suffocation in a close bath room recently, was the son of the florist by that name in Washington, D. C. Recalling his years of faithful service in his store, Wm. J. Smyth says he considered him at once the most faithful and the most promising young man he ever employed. For years he worked, keeping on meanwhile with his studies and now, just as he had secured a good practice, lost his life through a poorly ventilated room.

PHILADELPHIA NOTES.

Mrs. Edward Campbell and Miss Jeanette Campbell, wife and daughter of Edward Campbell, Ardmore, arrived home from their European trip, Sept. 1. Their fellow pilgrims on the same trip, Mrs. William Ballingall and daughter also managed to make the same steamer. There had been some anxiety, of course, so the reunion all around was of the pronounced order.

The new Snellenburg flower department opened on the 4th inst. and the first day was a big success. Every purchaser at the various departments got a free posy. Bill Craig said it looked to him very much like a riot.

TARRYTOWN ON HUDSON, - N. Y.

Member of Florists' Telegraph Delivery

Messrs. Verona and Steinhoff, the promoters, have every reason to feel encouraged, and the trade gets a new outlet for its products which it is always badly in need of.

Frank M. Ross will start a force of fifteen carpenters at once remodelling his 52nd street store about which mention was made week before last. New bulk windows will be put in, tile floors, new cooling apparatus, and many other good notions to meet Mr. Ross's ideas of how to make a success in that particular neighborhood. Much depends on the man, in all cases, and here we have the man "who knows how" for this locality—even if it is radically different from his other stores in Kensington and 61st street. Frank M. Gaul started in on Friday as manager.

We lost another of our old-time friends on September 1, when John Grass passed on to his fathers. Mr. Grass was not a florist—he was a famous wood turner; but he was well known to the older generation of florists in Philadelphia. Among other things, he used to make extra special "ten-pin" balls for men like W. K. Harris, after they had graduated into the champion class. He was also affiliated with us in another way, being father-in-law to Phil. Breitmeyer of Detroit. His death took place in Detroit, where he had been on a visit. He was 76 years of age. Interment took place, Sept. 5, at W. Laurel Hill cemetery.

NEWS NOTES.

Philadelphia, Pa.—Van Waveren & Kruijff have opened a store at 9th and Market streets to retail Dutch bulbs.

Howell, Mich.—R. F. Clark has purchased the vegetable greenhouses formerly managed by Walter Hubbell.

During Recess

Florists' Club of Washington.

The September meeting of the Florists' Club of Washington took the form of a crab feast, an event annually given by Edward S. Schmid to the members of the club and friends. At this time there were more than 150 guests present and the milkman was well finished with his day's work before an adjournment was taken and the guests wended their way to their respective homes. There were more crabs present at this feast than one would believe could find accommodation on the bed of the ocean but after the attacking party ceased its labors nothing remained but a pile of empty shells. There were other good things too, in the way of edibles, and there were short talks, music, songs and recitations. The feast was given in the greenhouse at the rear of the store of F. H. Kramer. This was appropriately decorated and the long table was beautified with choice cut flowers. At one end of the conservatory was placed a piano and here most of the fun was staged.

A large sheet containing the words of songs new and old had been prepared for each guest and they amused themselves by singing several of these. Charles Stevens, I. S. Goldsmith, Leon Toon, Dave Wolf and a number of others did their share toward making the evening a success. The advent of Mrs. Clara Naecker was the cause of a great outburst for she is one of the most popular singers in the city, and the boys made her work overtime. Following the close of one of the local theatres an entire company of players, numbering more than twenty, joined in the merriment and sang several songs.

All thoughts of business was tabooed, for it had been decided to devote the entire evening to merriment. With this fact before him M. C. Ebel gave a humorous talk on "The Vicissitudes of the Washington Florists Under Misapplied Democracy." His entire speech was based on the language familiar to the florists' business and needless to say his remarks were well taken.

William F. Gude urged all present to do their utmost to further the cause of the William R. Smith Memorial, and was followed by Richard Vincent, Jr., who added his plea to that of Mr. Gude. Mr. Vincent invited them to make a visit to his annual dahlia and canna exhibition, this visit to take the shape of a club outing. His invitation was accepted by President Cooke on behalf of the members.

As a souvenir of a most successful evening Mr. Schmid presented each of his guests with a match safe, the box of which was formed from a grotesque representation of His Satanic Majesty. There was really no need of such a remembrance for none of those present will ever forget the September meeting of the Florists' Club of Washington.

Kansas City Florists.

The first picnic of the Kansas City florists, held at Chandler's Grove at Merriam, Kas., on August 27, was attended by 150 persons. The special car that carried the party to the

be fooled by imitations of MEYER GREEN SILK LINE. Order name, "MEYER GREEN SILK LINE," \$1.25 per lb., full 16-oz. to the can and box, not weighing in the can like what you are now buying, supposed to be MEYER GREEN SILK LINE. Try out the sample spools taken out at the convention, and don't forget to order of MEYER. It comes in sizes: F, fine; FF, medium; and FFF, coarse. All first class jobbers sell MEYER GREEN SILK LINE.

grounds was loaded with flowers, which were strewn along the way. Athletic events formed a part of the afternoon's program. There were six men's races, a tug-of-war, a women's horse shoe pitching contest, jumping and tree climbing contests and a fat man's race. The judge of the events was R. J. Parker, the western representative for Poehlmann Brothers' Company of Chicago. After a chicken dinner on the lawn a dance was given in the evening.

The Florists' and Gardeners' Club of Holyoke and Northampton had its annual picnic at the Gallivan farm in Smith's Ferry, Thursday afternoon, Sept. 3. The feature of the outing was the baseball game, in which the married men defeated the single men, 4 to 3. A luncheon was served.

KNOXVILLE NOTES.

Chas. L. Baum, president of the Knoxville Florists' Society has invited the members to meet at the suburban home on the Tazwell pike for the next regular meeting. After the regular business the meeting will be turned into a social affair, and refreshments will be served.

Weather conditions here are fine; contrary to the early part of the season we are having an abundance of rainfall and crops of all kinds are growing fine. Farmers of this section say this is the best season they have experienced in several years, and truck gardeners are supplying the market with a fine variety of vegetation. The melon crop is the best this year ever known, and they are hauled on the market by the wagon loads and sell wholesale at from 3c. to 10c. each.

The Knoxville Florists' Society was well represented at the S. A. F. Convention; out of the five florist firms, four were represented by the heads of the firms; namely, Mr. and Mrs. A. H. Dailey, Mr. and Mrs. C. W. Crouch, C. L. Baum and Addison J. McNutt; they all are very enthusiastic over the Convention. The fact that Knoxville was so well represented was highly commended, it having a greater percentage of attendance than any other city; not excepting even Boston itself.

In the florist line everything is looking fine. All carnations are planted out and are making a fine growth. Chrysanthemums are growing well and the prospects are good for an excellent crop. Roses are making a good growth although not blooming much at present. Up to the present time stock has been plentiful; enough to supply all local trade, and some has

been shipped to other markets. At the various stores business seems to be quiet, but when compared with the same period of last year it shows a decided increase. Everybody has returned from vacation seemingly much refreshed and ready to get down to business again when the busy season opens.

Addison J. McNutt reports business very dull in cut flowers; C. W. Crouch reports the supply of cut flowers as rather short, with the exception of dahlias, which are very fine. Mrs. Rosa Hall Ryno also reports business rather dull. Asters are all gone now, and gladioli and roses are about the only flowers blooming. Chas. L. Baum is starting to build a new potting shed, bulb cellar and garage combined. He was very fortunate when he laid in at least a year's supply of ribbons, chiffon, etc., just before the price advanced. A. H. Dailey reports business very quiet. He has a very attractive window for this time of the year using fine ferns and gladioli. Dahlias are coming in since the weather has cooled.

OBITUARY.

Henry Escher.

Henry Escher, a young man employed at Dreer's, died very suddenly while assisting in putting up the firm's exhibit at the Byberry Fair last Friday. He had been in delicate health for some time, and had just returned from a summer's recuperation at Riverton. He was stricken with a hemorrhage, and was dead before they could get him to the nearest hospital—Somerton. The sad affair was a great shock to all his associates, by whom he was much esteemed. Interment took place at Fernwood Cemetery on Wednesday.

Flower Market Reports

BOSTON A very backward and uninteresting condition dominates the trade, retail as well as wholesale. Roses are the chief occupants of the storerooms, after asters and gladioli, and they are fully as difficult to move as the last named. There are a few carnations of acceptable quality coming in, but they would not be greatly missed if they stayed on the farm, as there is nothing doing in the market. As before stated, gladioli and asters are a bad load for the wholesaler to carry just now. Lily of the valley has moved up a peg in price, this being probably due to the expected scarcity of pips later on.

A very dull market and very little business. Asters have come upon us in very heavy quantity and the outlet is practically closed for any ordinary or poor quality. Of course there are sales for the fancy stock though at this writing these are coming in very heavy. There has been no let up on gladioli and only the good varieties have any sale and at prices way below previous years. New crops of roses are coming on heavier each day and the sales have not been up to the mark. The weather has been warm and it has been a problem to keep anything in salable condition. With the amount of lilies coming in it resembles Easter and the prices have been and are so low that the growers can hardly realize the cost of the bulbs. An early reaction is hoped for.

There is no material improvement in trade conditions. The first week of September was considered fair till Friday, when all demand ceased and some report that day as the worst in their history. Saturday was also dull and the opening of the second week so far has been far from satisfactory. The shipping orders have fallen off materially, but as there is not a large supply of good stock coming in, there is no great accumulation. Chrysanthemums are more in evidence and Smith's Advance is furnishing the white with Golden Glow for yellow. Early asters are gone and some better ones of the later varieties are taking their places. Roses are in good condition and buyers have plenty of varieties from which to select. Taking the summer season as a whole, roses have been offered worthy of a larger demand. Carnations are improving daily but demand is light. Lilies are hard to move. Gladioli seem likely to finish the season without change, generally poor in money return but good in quality of stock. At E. C. Amling's, Manager John Michaelson says there is little good stock going to waste, for though demand is light, stock is coming in in comparatively small quantities.

Last week's market **CINCINNATI** was featured principally by a great influx of home-grown asters. Everyone about this city who grew this flower seemed to be in full crop and with

RIBBONS, BASKETS, CHIFFONS

If you want special ribbons to match any of the newer Roses, we have them. Our stock is complete. While there may be some shortage in Imported Ribbons and Chiffons, we are fortunate in having a good stock of American-made Ribbons that for quality cannot be surpassed, and while prices have advanced on some lines, we intend to stick to former quotations until forced to raise by the manufacturers charging us more. If you want the best in this line, send to us.

BASKETS—This line we annexed to our list about six months ago and offer an extensive assortment in plain and decorated Baskets in colors and shapes that are sure to please and at moderate prices.

These are American baskets and much superior to the poorly made imported stock—and offered at even lower prices.

Drop us a postal and our representative will call with full particulars.

We continue closing at 5 P. M. until Sept. 12.

their cuts helped to overload the wholesale houses. The demand remained about the same as at the last writing. Shipping business is picking up somewhat. Every seasonable variety of roses is in a heavy supply most of them very good but meet with only an ordinary call. Carnations are received in moderate supply. Gladioli are very plentiful.

Reports from all classes of dealers indicate a very slow business, the volume of trade being greatly shrunken from the average of recent years. The entire cessation of all steamer trade helped in the general downward trend. Last Saturday a little ripple of encouraging activity

struck the wholesale market and was a genuine surprise, pleasing the dealers who were almost afraid to show their delight for fear they would frighten it away again. The first part of this week shows a trifling improvement in demand over last week, but there is such an overwhelming deluge of material to be moved that this makes but faint impression on the general result.

Business continues very quiet. **PHILADELPHIA** as is usual at this season. The only little ripple was the opening of the Snellenburg flower department, which used up quite a bit of stock. Roses were plentiful last

Flower Market Reports

(Continued on page 2)

week, but the supply has fallen off considerably. American Beauty and Mrs. Chas. Russell are the leaders, the latter with good flowers but as yet only medium stems. The new ones, like Ophelia and Hadley, are in evidence, but are very short stemmed. Asters are at their best, splendid stocks of the Crego and Semple strains being available. New crop carnations have just commenced; the flowers are very fair but not much as to stem. The flush of the gladiolus crop is past, although these will be a feature for some time yet. They are selling a little better, as the cheap stuff from the nurserymen is not now in the way. A few of the very early varieties of chrysanthemums are to be seen—Golden Glow and others of that character. Dahlias are plentiful, but the demand as yet is very limited.

ST. LOUIS The cut flower market is in the same overcrowded condition as for the past month. The rose stock shows some improvement in quality and length of stem, but the demand is so slow that a lot of good roses go to waste. Prices are exceedingly low in all grades. Carnations are looking much better and the demand for the best is good. Other flowers that are in plenty are asters, gladioli, tuberose stalks and lilies.

WASHINGTON Business thus far this month has been very slack. Florists are anxiously awaiting the coming of cooler weather for it is expected that good business will prevail this fall. At the present time flowers of all varieties are practically without price. Large quantities are being received but the demand is not enough by far to take care of more than a small proportion. The new crop carnations are improving in quality. Both the quantity and the quality of gladioli seems to be decreasing. Some very fine asters, some of them as large as 4½ inches in diameter of bloom, are to be had at low prices. Lilies go a-begging.

VISITORS' REGISTER.

Washington, D. C.—P. W. Firth, East Boston, Mass.

Knoxville, Tenn.—Mr. McCabe, of A. L. Randall Co., Chicago.

Chicago—Mrs. Latshaw, Libertyville, Ill.; Otto A. Schroeder of Carl Meier & Co., Green Bay, Wis.; L. J. Larson of H. Larson & Son, Menominee, Mich.

Cincinnati—Mr. and Mrs. G. A. Beckman, Middletown, Ohio; Mr. and Mrs. Rasmussen, New Albany, Ind.; Martin Reukauf of H. Bayersdorfer & Co., Philadelphia.

Philadelphia—Harvey Scheaf, manager for Mrs. E. A. Williams, Pittsburgh, Pa.; E. W. Mayer, Green & Mayer, Crestmont, Pa.; Mr. and Mrs. Phil Breitmeyer, Detroit, Mich.

Los Angeles, Cal.—George W. Smith, formerly of Howard & Smith, and Jacob Dieterich, have formed a partnership in the nursery business.

PERSONAL.

A. E. Brown, Mrs. Burpee and her two sons, W. Atlee, Jr., and David, arrived home on the S. S. Minnetonka Sept. 7.

W. H. Elliott, Brighton, Mass., and Madbury, N. H., is home from his long vacation in the Maine woods, looking very fit for the fall and winter campaign.

Miss Ellen Cooke Stewart, youngest daughter of Mr. and Mrs. Wm. J. Stewart and Ralph Carlton Crouse of Copper Cliff, Ont., were married at Winchester, Mass., on Wednesday evening, September 9.

Clarence Watson is the new manager of the Pennock-Meehan store in Washington, vice Frank Gaul resigned. Mr. Gaul goes to manage the new store of Frank M. Ross, 52nd, below Market street, Philadelphia.

D. Iliffe announces that in order to secure larger storage room to take care of his increasing business in the construction and heating of greenhouses, he has moved his plant and office to South Weymouth, Mass.

Willis E. Light of Lowell, Mass., a well known landscape gardener, has been missing for the past five weeks. His relatives and friends believe that he has suffered foul play or else a lapse of memory. Light left his home five weeks ago last Sunday to visit friends camping at Hobb's Pond, and told his wife that he would return that evening before 8 o'clock. It has been learned that he did not visit the camp, and nothing of his whereabouts has been gleaned from a most exhaustive inquiry.

Royersford, Pa.—The greenhouses and retail flower business of R. E. Nace, near Fernwood, has been sold to Albert Bergentz and Mr. Tryball.

WASHINGTON NOTES.

Leapley & Meyer, are renovating their store at 905 G street, Northwest, in preparation for a strenuous fall business and have installed a large seed case. This firm is planning to increase its outdoor production next year to quite an extent.

The Florists' Club of Washington is planning to take advantage of the kind invitation of Richard Vincent, Jr., of White Marsh, Md., to attend his annual canna and dahlia show and the start will be made at 11 A. M., Thursday, Oct. 1, via the B. & O. R. R., which will furnish a special train for the local florists.

William F. and Adolphus Gude last week made a trip to Frederick, Md., to assist Frank C. Hargett in making a success of his proposed educational flower show at that place on September 17. Many of the leading growers as well as the government departments, have contributed flowers and plants for this purpose and his visitors expressed themselves as well pleased with the good work Mr. Hargett is doing to further a love for flowers. On their return trip they visited the plant of Jesse P. King, at Mt. Airy, Md., where they found considerable construction work and improvements going on, including the erection of two large iron and cement houses, about 50x160 feet and the installation of a new 100 h. p. boiler.

SOCIETY OF AMERICAN FLORISTS

Annual Report of Entomologist.

As entomologist to your society, I fully expected to receive from plant growers all over the country inquiries and specimens relating to insect troubles. Such inquiries during the past year have been given due attention, but they have been few outside of my own State of Connecticut.

Permit me to call your attention to a few troubles, which, though fortunately still uncommon, may at any time cause considerable damage.

General Injury From Mites.

The common red spider (*Tetranychus telarius* Linn.) of the greenhouse often causes considerable damage to plants outdoors, particularly coniferous trees and shrubs.

Choice specimen trees on the lawn and in the nursery are now frequently sprayed with such materials as kerosene emulsion, soap and water, and with nicotine solutions to kill the red spider.

A sister species, the two-spotted mite, (*Tetranychus bimaculatus* Harv.) also greatly injures Chestnut and other broad-leaved trees. Both are worse in dry seasons, as wet weather is unfavorable to mites. Nevertheless, during the present season in Connecticut, with an almost unprecedented amount of rainfall, certain kinds of mites have flourished outdoors.

These mites are not insects but belong to the family acarina, and, like the true spiders, have eight legs and belong to the order Arachnida. Many of the mites are pests of plants and animals.

Mite Attacking California Privet.

A short hedge of California Privet in my own garden this season was attacked by a mite of the genus *Phyllocoptes*. Apparently it is a new species, and it is doubtful if any mite has been previously recorded from California Privet unless, perhaps, red spider.

Nothing unusual was noticed on this hedge in 1913, but the first growth in 1914 had peculiar slender shoots with narrow leaves curled backward. On examining them with a hand lens the under side of each leaf was found to be literally covered with very small, elongated, crawling mites.

Up to July 1 apparently all terminal leaves on this hedge were infested and curled. On my return from a vacation late in July the hedge presented a changed appearance, as a number of the stronger shoots had the normal appearance, and the mites had disappeared from all the leaves.

A Mite (*Tarsonemus pallidus* Banks) Attacking Cyclamen, *Chrysanthemum* and *Snagdragon*.

This mite was first brought to my attention on Nov. 12, 1912, when an assistant who was inspecting imported stock at a florist's in Bridgeport, Conn., brought to the laboratory some *chrysanthemum* flowers which, though freshly cut, had many dead and brown petals scattered through the blossom. These flowers were carefully examined by both botanists and entomologists, and the only parasites found were numbers of very small white or transparent mites at the bases of the petals. These mites seemed to be the cause of the trouble.

On Dec. 12, 1913, another assistant, while inspecting imported stock at a

private place in Hartford, was shown cyclamens which had produced no blossoms, with leaves badly curled and buds distorted. These plants were also attacked, especially the leaves and buds, by this same mite, *T. pallidus*. Later, other infested cyclamen plants were received from Branford, Conn.

On Jan. 5, 1914, a New Haven florist brought to my laboratory some *snagdragon* plants, with leaves badly curled. His whole crop for the season was threatened. The plants were badly infested with *Tarsonemus pallidus*. Now these mites have a very primitive respiratory system and it is often difficult to kill them by fumigating, even with hydrocyanic acid gas. Consequently I arranged to carry on some spraying experiments in his greenhouse to control this pest, and on Jan. 7 Messrs. B. H. Walden and Q. S. Lowry, two assistants, made the first treatment.

These treatments were repeated on Jan. 14, 22 and 30. A portion of the plants were left untreated as checks; a portion was sprayed with tobacco preparation sold as "Black Leaf 40," in two dilutions, (1 teaspoonful in 1 gallon, and 1 teaspoonful in 1½ gallons of water), the remainder were sprayed with fir tree oil in two dilutions (2 oz. in 1 gallon and 3 oz. in 1 gallon of water).

To the tobacco preparation, naphtha soap at the rate of 1 lb. to 25 gallons of water was added for a spreader.

Evidence from these tests seems to show that this pest may be controlled by spraying the under surface of the leaves with the stronger mixtures herein mentioned, of either fir tree oil or "Black Leaf 40." The mites entirely disappeared from the treated plants, but continued to cause injury on the check plants even though they were cut back.

I am indebted to Mr. Nathan Banks, of the Bureau of Entomology, for the identification of these mites.

White Ants and Geraniums.

Another pest which may become serious is "white ants." On May 23 I received from a Hartford florist a letter describing a trouble of bedding geraniums, (*Pelargonium zonale*, or other species) in the field of a customer in New Rochelle, N. Y. More than 200 plants had been ruined by some insect which tunneled out the inside of each stem and root. The plants, of course, wilted and died.

As I failed to recognize the trouble from his description, I asked for specimens, and in due time received a stem from one of these plants together with some of the soil in which it was grown. White ants were the cause of this trouble. They had devoured the entire inner portion of the stem and main root, leaving only a thin layer of the woody tissue and bark.

The insects received were all immature, and have not yet been specifically identified, but probably belong to the genus *Termes*.

Termes flavipes Kollar is our most common species and often breeds in woodwork near the ground, such as construction timbers of bridges, trestles, buildings, fences, etc. We have even found it in old stumps, in the board walks of greenhouses, and the strips of wood along the edges of tar walks.

At New Rochelle, however, the white ants could not be traced to any wood-

work but seemed to be all through the soil. It may, therefore, be a different species. There are several destructive kinds in the tropics, and at least six species in the Southern United States. On a visit to the Bussey Institution, Forest Hills, Mass., on July 7, I was shown a geranium stem which had been hollowed out by white ants in exactly the same manner as those in New Rochelle.

A possible remedy is carbon disulphide used in the soil in the same manner as for ordinary ants, but many tests must be made of various materials, before any treatment can be recommended.

CHILDREN'S GARDENS EXHIBIT AT BOSTON.

The annual display of products grown by children was opened at Horticultural Hall on Saturday, Sept. 5. More room than ever before was taken up with flowers, plants, vegetables and fruits brought there by boys and girls in competition for a generous list of money prizes, including an appropriation of \$200 from the State toward the encouragement of agriculture among the children of the Commonwealth. The hall presented a beautiful appearance, not only by reason of the bright-hued specimens which Nature has brought forth, but because of troops of children, all eager to arrange their own specimens to the best possible advantage and on tiptoe of expectation while waiting for the judges to come around with the magical cards telling of the awards.

On the steps leading from the main hall to the balcony there was a very pretty arrangement giving an idea of what the South Bay Union has accomplished on its roof garden. Three little sisters, with their little brother who have developed a taste for gardening through the teacher at Elizabeth Peabody House, exhibited some fine things which they planted and tended on their own house top. The South End Industrial School was represented by a splendid collection of vegetables and flowers, also the Jamaica Plain Neighborhood House, the Roxbury Neighborhood House, Emmanuel House Garden and the children of Manchester by the Sea. Mrs. H. H. Kitson, chairman of the children's gardens work of the Quincy Woman's Club, had a long table filled with splendid specimens, besides quantities of cut flowers. The Women's Municipal League vacant lot garden, where nearly thirty boys work daily, was entered in several classes. One child had not only a large and varied collection of vegetables, but a glass-covered case divided into compartments filled with dried vegetables and spices, the work of her own hands. She had drawn a plan of her little plot which yields a wonderful crop. Another contributed 84 specimens of native flowers, plants and grasses, of which 70 were named. A boy from Arlington sent 194 specimens including berries and leaves. One table was taken up by 92 specimens of dried wild flowers made by a West Roxbury boy.

The public school gardens, Cambridge, Waltham, West Groton, Islington, South Natick, Brockton, Lynn, Marlboro, Milton and many more places sent an array of products well worth seeing.

LEMON OIL COMPANY, Dept. K

420 W. Lexington St., Baltimore, Md.

Directions on every package

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

CAMBRIDGE, MASS.
LONG ISLAND CITY, N. Y.**COMMERCIAL SURGERY FOR SICK
TREES.**

A cavity in a decayed tree is something like a cavity in a decayed tooth. If an unreliable tree surgeon who has been called in to save the tree only partially removes the diseased part of the wood, uses no antiseptic coatings in the cavity and fills it up with cement the tree is no more cured than is a person whose decayed tooth has not been properly filled by a dentist. The only difference is that after the tree cavity has been covered, if the work has not been properly done, the tree has no way of making its trouble known except by further decay.

Within the last decade there has been a great increase in demand for surgeons to repair decaying shade trees but the possibilities of practising fraud in this profession, like the instance just cited, have tempted so many unreliable people to dabble in the science that tree surgery has fallen somewhat into disrepute. The U. S. Department of Agriculture, realizing that commercial tree surgery should occupy a high place in the estimation of the public, has recently issued a pamphlet entitled, "Practical Tree Surgery," wherein suggestions are made for improvement along these lines.

As in all professions, there are reliable and unreliable men and firms competing for contracts in tree surgery and many individuals who have had faith in tree surgery have lost it through following the advice of unreliable tree surgeons who claimed to be able to diagnose a case, but whose main interest was to collect a good sum of money for their work.

Besides the careless filling of decayed cavities in trees, there are other practices of certain so-called "tree surgeons" that do the trees more harm than good. Many of these "surgeons," as well as the people who employ them, do not realize the danger arising from fresh injuries to a tree. Just as a person is subject to infection through cuts and scratches, trees are rendered subject to infection by having their living bark torn. Notwithstanding this, many tree surgeons use pruning hooks and climbing spurs and cut fresh gashes in the tree. The use of climbing spurs should be particularly avoided on trees in vicinities where there is a contagious infection.

The U. S. Department of Agriculture is suggesting a plan that may help put commercial tree surgery on a better

basis. Owners are urged to have a definite written contract with the tree surgeon they employ, and the following is suggested as a model for such contract:

1. No climbing spurs shall be used on any part of a tree.
2. The shoes worn by the workmen shall have soft rubber bottoms.
3. Ordinary commercial orange shellac shall be applied to cover the cut edges of sapwood and cambium within five minutes after the final trimming cut is made.
4. All cut or shellaced surfaces shall be painted with commercial creosote, followed by thick coal tar.
5. All diseased, rotten, discolored, water-soaked, or insect-eaten wood shall be removed in cavity work and the cavity inspected by the owner or his agent before it is filled.
6. Only a good grade of Portland cement and clean, sharp sand in no weaker mixture than 1 to 3, shall be used to fill cavities.
7. The contractor shall repair free of expense any defects that may appear in the work within one year.

If the owner prefers to have a cavity filled with asphalt or other material instead of cement, the contract can be altered accordingly. If it is desirable to substitute some other preparation for shellac, this can be done. Similarly, under certain conditions, various other modifications may be made, although alterations in Nos. 1, 2, 5 and 7 should be made with caution. It may so happen that if all insect-eaten wood is removed, the tree may be dangerously weakened; under such conditions the diseased matter can be removed to solid wood and the cavity fumigated. Other suggestions along these lines may be found in the pamphlet issued by the Department.

Wait Till You Get Our Special Offer Before You Order Any Sash

FOLLOWING our yearly custom, we are making a Special September Offer on our Sash That Last. It is good on either Single or "Double Lite."

The offer will be mailed some day next week, to all the names on our list.

Your name may be on that List, and it may not.

The only way to get the special price is to use the coupon attached to the Offer.

So the surest way to be sure, that your name is surely on our mailing list, is to fill in your name and address on the spaces below, tear off the coupon and slip it into an envelope, and mail to us.

Do that very thing right now before it slips your mind. Make sure of getting right in on the ground floor prices.

TEAR OFF HERE

When Writing to Advertisers Kindly Mention Horticulture

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be promptly received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Mignonette

Mignonette loves a cool and airy house where the temperature can be kept near 45 degrees at night. Never let mignonette suffer for water at the roots. Watch out for the green caterpillar as they often lay a late batch of eggs which are bound to cause trouble if not looked after. Give the plants proper support so the young shoots do not get all bent. When they are allowed to grow crooked no support will put them into shape again. Sideshoots should be carefully removed so the whole strength will be thrown into the spike. Give them a syringing on good days early in the morning. When the spikes show well give liquid cow manure once a week. These will enlarge the spikes and help the crop that is to follow.

Freesias

It is time to make a successional planting of freesias. A great quantity of these is not wanted at any particular time but a succession should be kept up; 55 to 60 degrees at night will suit them and plenty of sunlight. The freesia is worth a bench—such a bench as you would use for carnations or mignonette. Four inches of soil is enough. Plant one inch apart in rows, and the rows four inches apart, a few hundred at once, and the same every month. The bulbs will start into growth quickly after September and should have full light as soon as the shoots appear above the soil. In planting freesias we find that the long thin bulbs give far better results than the thick, heavy ones usually sold. These long bulbs are easily raised by sowing the small bulblets moderately thick in flats, not cutting any flowers they carry at all and letting them ripen off gradually on a sunny shelf.

Liquid Feeding for Chrysanthemums

When once beds are filled with roots you can commence feeding the chrysanthemums. Liquid fertilizers are easily applied and cover a wide range and in their proper use is where the skill and care of the operator counts for more than anything particularly in the use of chemicals. Of the chemicals those most generally used are nitrate of soda and sulphate of ammonia, though potash in the form of muriates, nitrates and sulphates, is used more or less. The grower should take up this feeding question more in detail in a few weeks, but for the present with a mulch as recommended, our plants will do well enough and only an occasional very light dose of any chemical should be given. One ounce to four gallons of water is plenty strong enough to begin with and it should always be borne in mind that lighter and more frequent feedings are very much to be preferred

to heavier doses. Cow manure and sheep manure are always preferable to any chemicals. A half bushel of the former or a peck of the latter to 40 or 50 gallons of water makes an ideal liquid feeding for chrysanthemums.

Summer Flowering Bulbs

Achimenes, gloxinias, gesneras, tuberous-rooted begonias, etc., as they pass out of flower should have water gradually withheld until they have had time to thoroughly ripen up. Place the bulbs in some dry corner of a cool house where they will not be liable to get too much water. Many bulbs are lost every year for the want of proper care at the right time. If there is not room in the houses they can be placed in a frame covered with sash and can stay until heavy frost makes it dangerous for them to remain out any longer, when they can be removed to a dry shed leaving the pots on their sides. Later on shake them out and store in boxes where the temperature does not fall below 50 degrees.

Violets

The amount of heat the violet house should have will have to be determined by the character of the weather. The main thing is that the temperature must not rise above 45 degrees with fire heat. During the daytime, even in cool weather, it will be necessary to withhold artificial heat and open all the ventilation possible. In a warm atmosphere the leaves will push out very rapidly although scarcely any flowers will appear. Continued warmth above the danger line mentioned is fatal to the production of flowers. Another precaution to be observed in growing violets under glass is to never water them after 10 o'clock in the forenoon. The soil should be well drained and kept only moist. In applying water do not wet the entire bed unless it is dry all over. In dry places involving only one plant, while the remainder of the soil is still moist, the dry places should be watered and the remainder of the bed left untouched. The violet house should be fumigated once every ten days or two weeks. If leaf spot appears pinch off all affected leaves and then dust with dry Bordeaux mixture. Another good remedy is to syringe the plants with a solution of potassium sulphide made by one ounce of the sulphide to a gallon of water.

Salvia

If you have not all ready lifted some of your dwarf salvia, such as Zurich, you should lose no time in doing so. Salvia Zurich comes much truer from cuttings than from seed. These can be potted up into 5-inch pots and grown on through the winter. Where given good care they will give one batch of cuttings after another.

Mr. Farrell's next notes will be on the following: Gardenias; Cocos; Orchids; Perennials for Pots; Snapdragons; Propagating Sand.

A Chance for Home Industries

In our last week's issue attention was called editorially to the possibility of the production in this country of various staples which the horticultural trade of America have been accustomed to purchase in Europe, particularly such material as lily of the valley pips, azaleas, rose stocks, etc., which are produced mainly in the countries now at war. Quite a number of interesting comments have been received from firms prominent in the American trade, all expressing hope and confidence that in the near future we might be relieved of our present dependence upon imported plant material. The following extract from a communication from the house of H. A. Dreer of Philadelphia will, we believe be read with much interest by the plant growers of this country.

Mr. William J. Stewart, Care HORTICULTURE, Boston, Mass.:

"Dear Mr. Stewart—To the best of our knowledge no one in this part of the country has been propagating manetti stocks for budding or grafting purposes, but we think some of the growers in the vicinity of Los Angeles, during the past two years, have been offering manetti stocks in a commercial way and were prepared to enter into contracts for the production of this stock in competition with European imports. Quite a few seedlings are grown, particularly in part of New Jersey of the Japanese multiflora rose, which is gaining favor as a stock for budding for outdoor planting. We, ourselves, have been experimenting along these lines and have at the present moment a number of thousands of seedlings growing for this purpose. We believe that manetti can be grown here more profitably than considerable of the nursery stock which is now propagated

here. As far as we know, no one in this country has been propagating azaleas extensively, but, we have been convinced, for the past twenty years that this can be done here. If someone were to adopt the Belgian method of growing these plants and locate in some section of New Jersey where peat and water were plentiful, we are positive that an article can be produced superior to the foreign stocks and at a price which will give a working profit on same."

L. A. Berckmans of Augusta, Ga., says:

"For many years we have grown Indian azaleas in large quantities, but we do not train the plants to heads like those imported from Europe. Our plants are grown from cuttings. As soon as they are properly rooted they are potted in azalea soil, and as soon as all danger of spring frost has passed, the plants are placed in lath-covered frames in open ground. During the summer the plants are pinched whenever necessary, so as to make them bushy. In October, before frost, the plants are lifted from the frames, potted and placed in the cold house. Sometimes these young azaleas can be left in the beds in open ground the entire winter, but as we usually shove them during the summer they grow very late during the fall, and sometimes an early freeze in November is apt to injure the young growth; hence we take the precaution of lifting the plants and placing them in the cold house. We grow very few of the double azaleas, the demand being mostly for the large-flowering single varieties, such as Indica Alba, Marie Louise, Crysterian, Perfection, Coccinea Major, Vervaeneana Duc De Rohan and about fifty other good sorts. We have never grown this plant for the floral trade, and they are usually sold to nurserymen, parks and private parties in the south for open ground planting.

Owing to the European war we are having considerable demand for these azaleas for forcing purposes, but the plants will hardly have sufficient bloom buds on them for forcing.

A Convention Garden Suggestion

Editor HORTICULTURE.

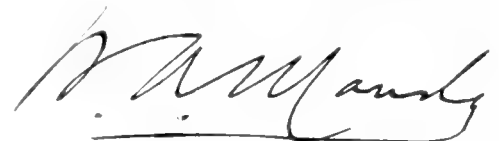

Dear Sir: I am pleased with your editorial on page 388 of the HORTICULTURE under "Convention Garden Possibilities." As this pet scheme of mine has finally, after twenty years, come to realization I would beg to suggest the following:

To fully justify the remarks and compliments that are thrown at us by the heads of the visiting municipality that by our presence there the interest for horticulture and floriculture in the community would receive a lasting impression, a better and more permanent monument to our visit in any city in this great country would be if we could leave behind us an American Florist Convention Garden, a garden designed and planted with stock which would be left after the close of the convention and in fact grow to its full maturity and beauty in years to come. This, as wisely stated in your editorial, it would take at least two years to accomplish, so that the right spot to make an entirely new Convention Garden or a section of a public park or land to be

devoted to Convention Garden purposes could be selected and planted a year or a year and a half in advance of the convention. If this had been done twenty-four years ago at the first convention in Boston what a grand monument would have been placed to the credit of American florists and how proudly we could have pointed to it this year as what we did twenty-four years ago!

Of course to accomplish this the sanction of the city authorities or park departments would have to be gotten first. The space allotted for it to be free of charge and mostly such material planted as would be permanent for which the exhibitor would receive at least part remuneration to cover freight and express charges, planting, care and perhaps a fraction of the value of the stock.

This is a simple suggestion which I trust will have a full discussion in your paper and receive the attention of the officers who are now guiding the destiny of our society.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communication should invariably be addressed to the office of HORTICULTURE.

Liquid Manure

We prefer not to use liquid manure on Beauties until after the new year sets in, but with teas it is different, and if their growth and stockiness will warrant it, a dose of liquid manure every now and then will prove of great value towards making them move right on. We would not advise using chemicals to make up the manure water, for these would be more like stimulants than the plant food that the plants need so badly to grow real good. Cow manure will make a good liquid manure, and a little bonemeal can be added to this whenever it is necessary. We generally take a bag of it, and empty half of it into another bag, and then throw the two bags into the tank where the manure water is mixed. It will dissolve the bone gradually and take it to the plants with the liquid. The same may be done with soot, but a whole bag of this had better not be put in all at once unless the tank is extra large, for the soot will dissolve a little faster than the bone, and there is some danger of getting too much of the soot into the liquid manure. In watering with the liquid manure, see that all the plants are plenty wet enough at the roots, and that none of the liquid is allowed to splash over the leaves. It might not burn the leaves, but would discolor them more or less and would show that someone has been careless. The best time to apply liquid manure is when the plants have started to produce a good growth. The manure will help this along, and the stems of the coming crop will be just so much longer. As soon as cool weather sets in, it will be safe to apply liquid manure in moderate doses.

Tobacco Stems

Now that the plants are well advanced in growth, it will be wise to stop using tobacco stems for fumigating, if these have been used all along. These are all right in the summer when the plants are not cutting, but as soon as the plants begin to cut, and the roses are of any value, it will be better to use some of the many papers advertised, or else use spray, even though the last two may be more expensive. Tobacco smoke is very bad for rose blooms, especially white, and if used when the crop is coming on the centers will be practically all burned out of the blooms. Never apply the smoke in very strong doses, as it is better to fumigate oftener and not use the smoke too strong. This is also true of the spraying.

Anthericum

Considering the great diversity in genera and species offered in hardy herbaceous plant catalogues the outsider is apt to take it for certain to find in modern American gardens adequate richness in variety, heightened by discrimination in selecting the material and subsequent originality in floral effects. As far as the average comes in question, I am afraid, in the main, we fail to come up to reasonable expectations. In looking over the contents we find ourselves confronted with a remarkable sameness both in plant material and its arrangement. Granted, we employ species of merit; we give proof of our sensitiveness in regard to harmony in color combinations, but after all, we remain loath to avail ourselves of anything beyond the well known traditional lines. This self-confinement to a very limited number of species deprives us more or less of our opportunities to exert individual ingenuity. The garden owner, as amateur, looks to the horticulturist for practical leadership and the rank and file of the latter apparently lack ambition. Certainly, we have as exceptions here and there—gardens testifying to the mastership of their originators in handling and taking full advantage of the present wealth of beautiful plant material at our disposal. These are examples which at a glance show the thorough familiarity with the practical growing part of designer and caretaker; examples testifying to an innate love for the work done. Without those qualities we are bound to fail. Love creates the enthusiasm necessary for extraordinary results; the experience as growers keeps us aware of the limitations set by the cultural requirements of plant species. Practical knowledge alone safeguards artistic ingenuity from indulging in mere fantastical exploits, which, as utter failures, bring discouragement, blocking our road for advance. Object lessons of this kind demonstrating the present need of experience in the field of practical growing are by no means rare.

At a recent visit to one of Philadelphia's most advanced herbaceous gardens your correspondent had the pleasure of enjoying the attractive old-time picture of a few clumps of *Anthericum Liliastrum*, the well known St. Bruno's lily. The narrow grass-like foliage and the long spikes of small white flowers, sweetly fragrant, awakened in the beholder's mind vivid reminiscences of the past. We have lost sight of this garden inmate of bygone days and are delighted to see it again. Similar impressions are gained when we find ourselves confronted with plantations of the St. Bernard's lily, *Anthericum Liliago*. But both species, of late, have been by far eclipsed by *Anthericum Liliastrum giganteum*. This new giant form of the old St. Bruno's lily, bearing stately spikes of large white flowers, resembling miniature Madonna lilies, represents one of the choicest materials for the refined garden of today. Plantations of the size shown by our illustration possess an irresistible charm. Perfectly hardy, a rather light, but well enriched soil with ample drainage is essential for thrifty growth. For northern districts the open sunny exposure is a necessity. In the Middle Atlantic States light partial shade seems to prolong the flowering season during June and early July. *Anthericum Liliastrum giganteum* may be raised from seed sown in early spring. To a limited extent we can propagate by division of the root-stocks. Leaf-covering during winter will prove the best material for protection.

A story is now going the rounds of the daily press that a beautiful new flower has been evolved by a resident of California who has succeeded in "budding a rose to a blackberry bush." That must indeed be a wonderful thing even for that State of prodigies and wizards in

horticulture. Why not make a convention garden for the edification of the S. A. F. visitors next summer, composed entirely of all these resplendent Californian marvels. Taking all that we have read of for the past few years they ought to make quite a respectable garden as to extent and amazing enough to attract an attendance from the ends of the earth.

An optimistic view

Unemployment and business depression already much in evidence—especially in export and import lines of the horticultural trade—have brought the gloomy side of the present situation home to the majority of our readers and the outlook seems to be decidedly blue for the coming season. But there seems to be a silver lining to hope for—at least in one direction—and that is in the retail flower business. One of the wise men in that line with whom we have been talking took exception to our pessimistic forecast and said that on the contrary he looked for a good season for the retail florists of this country as the wealthy people of America will stay at home this winter instead of going to Europe, will entertain here and spend their money here; that the flower business is bound to be prosperous, and that there is no cause whatever to feel in the least discouraged. We sincerely trust this diagnosis will prove correct—and it affords us much pleasure to pass along the cheering word.

The children's exhibition at Boston

The annual exhibition of the products of children's gardens held at Horticultural Hall, Boston, September 5 and 6, is worthy of more than a passing notice. It was a great success and showed the progress that has been made in recent years in the development of the interest in gardening among the children of Massachusetts. The large and side halls of the building were filled to overflowing with plants, flowers, and vegetables grown in school and home gardens in many cities and towns of the State. The exhibits showed marked improvement in quality and arrangement over any previous year and most of them would have been creditable to older exhibitors. The show was largely attended and the interest and enthusiasm of the young gardeners was a notable feature. Two hundred awards were made ranging from twenty-five cents to six dollars, aggregating three hundred dollars, of which one hundred dollars was the appropriation of the State of Massachusetts for the encouragement of agriculture among the children of the Commonwealth. The Massachusetts Horticultural Society was the pioneer in this country in the work of interesting the young people in horticultural pursuits. As far back as 1878 the first exhibition of the children's work was held, which has been continued in various forms without interruption to the present year. The seed thus early sowed has taken root and spread with great rapidity so that now the horticultural education of the children is demanding attention of our leading educators and already finds a place in many of our schools. The criticism of our public school system that it educates the scholars for a city life is doubtless true and the effort to call attention to agricultural and horticultural pursuits is worthy of the highest and most liberal encouragement.

THE S. A. F. AND THE F. H. A.

Editor HORTICULTURE:

I read with much interest your editorial for August 29. I had noticed indications coming from Secretary Esler that he felt the Society of American Florists had not given the Hail Insurance Association all the endorsement which the secretary thought was due to that very worthy child of the equally worthy parent organization, which is not an evidence of strength on the part of the secretary for, as it looks to all broad-minded persons, the Hail Association would not have come into existence had it not been for that grand organization the Society of American Florists.

It is quite true every member of the S. A. F. did not endorse with enthusiasm the coming of the Hail Association, and when on that Friday evening during convention week at Philadelphia 1886,—after the members had been having a good time during the afternoon at, "Wootton" the country estate of the late Geo. W. Childs, they did not at first take kindly to the serious work of considering the organization of the Hail Association, at an evening session and, indeed adjournment had actually taken place and quite a stampede was in progress to vacate Horticultural Hall, when the writer met J. C. Vaughan, who said "this is a put-up-job" (or words to that effect) and some of us proceeded to turn the tide and enough members were brought back to reorganize for an evening session. After some few differences of opinions duly expressed we eventually heard Mr. Esler read his plan, which with some alterations proposed by Mr. May was adopted and an organization devoted to Hail Insurance became a reality. This took place in connection with the second convention of the Society of American Florists, which was held in good old Philadelphia. Meetings have been held annually during the conventions of the parent society.

It would be better after all these nearly thirty-years to acknowledge the power of the Society of American Florists and make it still more powerful by a general affiliation. Everyone recognizes Secretary Esler's ability as the executive officer of the Hail Association, and gives him due credit for the good work he has done in making the association the success which it is.

Yours truly,

EDWIN LONSDALE.

MASSACHUSETTS AGRICULTURAL COLLEGE NOTES.

In the Floricultural Department there is an increased enrollment in each course. Professor Nehrling's effort to make floriculture a standard profession should receive earnest support. The chrysanthemums in the new houses are in fine condition, quite free from disease, and many fine blooms will be exhibited in Northampton at the Holyoke and Northampton Gardeners' and Florists' Club's exhibition.

The classes in landscape gardening are also increasing. Special attention is given landscape students in the course on Plant Material, which takes up the identification of trees, shrubs and herbaceous perennials.

No one has been secured as yet to take charge of the Market Gardening Department.

W. H. HATHFIELD.

BOSKOOP, HOLLAND, IN THE WAR.

The following communication has been received from the American Export Nurserymen's Society at Boskoop. We gladly give it space in our columns.

Editor HORTICULTURE:

Since the first of the month of August, the European war is raging with an intensity such as the world has never experienced before. The glorious discoveries of the times of peace, ingenious and practical as they are, are now misused for purposes of war, for killing and destroying and the more skilful the product of science became, the more effective they now prove to be. We are happy to state that Holland so far kept neutral and we have the most decided assurance that our government will keep this up with every might and power. This is for us a great consolation as we have no desire to mingle in the great fight against nations with which we have lived in peace for ever since we can remember and for which we have feelings of friendship only.

The neutrality of Holland places us in the happy position that we can ship to several countries. It may be that there will be some delay as we will depend upon the steamships available, but we are assured that the Holland-American Line will keep up its service and that there will be no increase in freight rates and insurance premiums except a little addition to the latter when molest is included. We can report that owing to the favorable weather all during the growing season the stock is in beautiful condition and there is plenty of help to keep it so. Packing and shipping will therefore find no or little delay. Prices have not changed materially on account of the war. The growers do not feel like sacrificing on same since it is certain that conditions may change soon. Nurserymen and florists who placed their orders with Boskoop houses can depend upon receiving their goods as usual without increase of cost. It is sincerely to be hoped that the war may soon be over and that the higher human motives may ultimately triumph in Europe.

VINCENT'S ANNUAL DAHLIA SHOW.

The Annual Dahlia Show at the establishment of R. Vincent, Jr., & Sons Company at Whitmarsh, Md., will open on Sept. 29, continuing five days, and promises to excel any of its predecessors in glory. The B. & O. R. R. will put on an extra special train each day and have promised a special through from Washington on Thursday, Oct. 1, which will carry the Washington florists, members of Congress, Department of Agriculture and Board of Trade of Washington. This train will stop at College Park to take on the party from the Maryland Agricultural College.

The stir is in our blood; the sap flows swift.

A pause—and then the autumn whirl of wings.

Youth flying south. See! Where the sharp frost stings

The trails blaze crimson! In the valleys lift

Mysterious purple mists! Through the wind's moans

The wonder songs of life's great overtones.

A. HENSLEY

BRITISH HORTICULTURE.

Some Effects of the War.

An indication of the changed conditions which have arisen as the outbreak of the war was afforded me when I recently paid a visit to the hall of the Royal Horticultural Society in London. The familiar scene of the leading floral exhibits now bore a severe military aspect, with the arms and accoutrements of a detachment of soldiers stationed there, whilst on an open space fronting the hall were all the hurry and bustle of a nation arming for conflict. The fortnightly shows of the Society are now suspended until happier conditions prevail. The autumn show of the National Rose Society has been abandoned, and the same thing has happened with regard to several of the leading provincial shows. One great change which will be made by the war is the stoppage of the seed supplies from Germany. Hitherto this has been an important feature in the horticultural trade. The absence of Germany as a competitor in the future should be advantageous to the British traders. Our own firms do not contemplate that there will be any serious shortage on this side owing to the cutting off of this source of supply. It was anticipated at the outset of the war that the shipments of bulbs from Holland would be seriously interfered with. Thanks to our command of the sea there have been several shipments lately. It is satisfactory to find that the Dutch bulb farmers are unlikely to have this important market cut off from them.

A Timely Caution.

W. Cuthberston and C. E. Pearson have issued a circular on behalf of the Council of the Horticultural Traders' Association of Great Britain and Ireland. They advise the members to avoid a pessimistic view of the situation as far as possible, and to continue their businesses on normal lines. The Council feels that anything in the way of a panic, resulting in the dismissal of employees would throw out of employment many thousands of one of the most deserving classes of workmen in the country. "It should be remembered," the circular adds "that gardens are not altogether a luxury, but minister largely to the food supply and health of our population, and garden owners will be doing public service by maintaining them in a good condition, and thereby providing private employment for many thousands of workmen. This will also prevent a large area of land from going out of cultivation, to the ruin of many of those concerned, and the reduction of the food supply of the country." W. H. ADSETT.

PERSONAL.

R. Vincent, Jr., of Whitmarsh, Md., who has been suffering with a severe attack of lumbago contracted on his way home from the Boston Convention, is now better.

William Ferre, a florist of 197 Ferry street, Newark, N. J., who is warbound in Europe, has been heard from by his brother-in-law, Louis Holzhauser. Mr. Ferre had cabled that he had reached Rome, but did not know how soon he could get away from there.

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

There was an excellent turnout of members of all ages and classes at the first meeting of the season, which took place, Tuesday evening, September 15. Two exceptionally good vases of flowers were shown a vase of Golden Glow chrysanthemums by Herman Bartsch of the W. W. Edgar Co., and one of gladioli by William Sim. Mr. Sim, being asked as to the best commercial varieties for cut flowers recommended Europa for white, America for light pink, Mrs. Francis King for scarlet, Niagara for yellow, Halley for orange red and Legerfurst for dark red.

A discussion on the question of reviving the landscape garden class for the coming season developed a strong sentiment in favor, several instances being mentioned where pupils of past classes are today occupying head positions which they could not have filled without the knowledge there acquired. Messrs W. N. Craig, F. E. Palmer and Wm. Downs were appointed a committee to consider and report at next meeting.

J. Heurlin who has just returned from the war country after some exciting vicissitudes, told briefly of the devastation in Belgium. He spoke enthusiastically of the rock garden at Copenhagen, where no less than 1400 varieties of alpine were in flower and advocated a greater use of this class of plants here. He had some interesting notes on new roses, irises, montbretias, phloxes, astilbes, etc., which he had seen in the various gardens and nurseries of Germany and elsewhere.

The "Question Box" occupied a good part of the evening. "What wisdom have we gained from the late Convention?" drew out remarks from many, all of whom acknowledged benefit in one or another respect. Robert Cameron, Duncan Finlayson, President Kennedy, Kenneth Finlayson, Wm. Downs, F. E. Palmer, A. P. Calder and W. N. Craig, all contributed their views, mainly appertaining to the Convention Garden in its local aspects. It was the general opinion that attention should be given to the Garden exhibits as they have progressed and matured and Mr. Craig's suggestion of a visit of judging committee to inspect its present condition was well received.

The consensus of replies to various other questions was that it is profitable to grow evergreens for cuttings during winter; that freesias should be grown in quantity during the coming winter; that Boston might wisely imitate New York in respect to a Spring Show; that cold nights and cold rains are responsible for much of the blight on outdoor melons and cucumbers; that fall planting is preferable for apples and pears but spring planting for stone fruits; that single violets should be housed from 12th to 15th of October. On the question of the value of the so-called everbearing strawberries, opinion was divided.

NEW YORK FLORISTS' CLUB.

There was an attendance of about 75 at the Club meeting Monday night. A report was made by Chairman Traendly of the Transportation Committee, many members speaking of the enjoyable time they had on the trip and the committee was discharged with the thanks of the Club. A vote of thanks was extended to Messrs. Sheridan, Smith, William Ford, Traendly & Schenck and the Growers' Cut Flower Co., for donating flowers for the purpose of decorating the tables and dining room of the steamer. William E. Marshall, chairman of the Outing Committee was unable to make his report, but promised to do so at the next meeting. The secretary was instructed to notify the officials of the Society of American Florists and Ornamental Horticulturists at the proper time that our club had the requisite number of members in the S. A. F. and would request representation in the next board of directors complying with the amendment adopted at the Boston Convention. John Donaldson captain of the bowling team, gave an account of how they captured the many bowling prizes. Max Schling made an interesting address requesting that a committee be appointed to outline a plan whereby our business could be improved; in other words, to better business conditions. This question seemed to be such an important one that President Duckham announced he would take it up at a future meeting of the club. A standing vote of thanks was extended to the Gardeners' and Florists' Club of Boston, and the Massachusetts Horticultural Society for courtesies extended at the time of the Convention. Julius Roehrs, who recently returned from Europe, gave an account of his exciting trip and the unfortunate conditions prevailing in Europe at the present time, but was under the impression that ultimately our business will be much bettered by the change in conditions and he had every reason to believe that we will have a good season the coming year.

The Committee on awards made the following report: Wm. Tricker, Arlington, N. J., Vase of *Buddleia variabilis magnifica*, vote of thanks; Bobbink and Atkins, Rutherford, N. J., Vase of *Canna* "Fire Bird," vote of thanks.

NEW LONDON (CONN.) HORTICULTURAL SOCIETY.

The September meeting was held on the 10th inst., when President Henry C. Fuller gave a talk on small fruits, going back in their history fifty years. There was a good attendance. It was announced that the Court House had been procured for the chrysanthemum show, which is to be held November 4th and 5th. There was a large display of flowers, a collection of roses from Reuter's, of Westerly, including Killarney Brilliant, E. C. d' Arenberg, Crimson Queen, J. L. Mock, Fire Flame, Mme. Elmond Rostand, Francis Scott Key, September Morn and Mignon. John Lewis Childs sent a large vase of gladiolus Snow King.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The attendance was fine at the monthly meeting of this society, Greenwich, Conn., Friday evening, Sept. 11. It was resolved at this meeting to extend thanks to the N. Y. Florists' Club for the hospitality and entertainment afforded to all those who traveled to the Boston convention on the same boat. A feature of this meeting was the competition for the prizes offered by Andrew Kennedy for three vases, three species of out-door flowers, for which there was a choice and interesting display. First prize was awarded to P. W. Popp and second to Fred Lagerstam. The thanks of the society was accorded to the other competitors for their very meritorious displays. Jas. Linane was highly commended for a fine vase of gladioli. Andrew Whitelaw was tendered a vote of thanks for musk melon The "Marvin." P. W. Popp, cultural certificate for display of 32 named gladioli. A feature of the next meeting, Oct. 9, will be a lecture by a prominent landscape gardener. There will also be an exhibition of dahlias for which prizes will be awarded.

P. W. POPP, Cor. Sec'y.

CONNECTICUT HORTICULTURAL SOCIETY.

The regular meeting of the Society was held in the County Building, Hartford, on the evening of September 11. The premium lists for the annual Dahlia Show, to be held on September 23-24, were circulated among the members, and the society anticipates one of the finest shows ever presented to the Hartford public. John Lewis Childs, of Flowerfield, L. I., N. Y., exhibited two large vases of Snow King gladiolus the name being very appropriate as the blooms are as white as the driven snow and of exquisite beauty. Each spike was covered with twelve to eighteen white blooms. The judges awarded a first-class certificate which was approved by vote of the members. President Huss gave an interesting report of his trip to the S. A. F. Convention and to the Convention of Park Superintendents. The next meeting will be held on Tuesday, September 22.

ALFRED DIXON, Sec'y.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club held its September meeting on the grounds of the Sanders Nursery on Thursday afternoon, September 10th. These meetings, when held at one of the members' homes, are always largely attended and this one was no exception to the rule; in fact, it was the largest attended meeting of the year, nearly fifty members being in attendance. State Vice-President R. J. Windler recounted the proceedings of the Boston Convention which were very interesting, especially as to the affiliation of the club with the S. A. F., and no doubt the club will soon have the required 100 members. The installation of the newly elected officers then took place with R. J. Windler and John

SUMMER HOME AND CONSERVATORIES OF ALBERT C. ELSER, NEAR MILWAUKEE, WIS.

This attractive combination of residence and greenhouses on elevated ground is the work of the Foley Manufacturing Company who have just completed the job much to the satisfaction of the proprietor.

Connon as installing officers: Jules Bourdet, president; W. S. Wells, vice-president; J. J. Beneke, secretary; W. C. Smith, treasurer; W. H. Rowe, trustee. The retiring officers were given a vote of thanks and the new officers took hold at once and proceeded with the meeting.

After adjournment Mr. Sanders asked the members to step into his home where they were entertained by Mrs. Sanders and her two daughters and a fine spread in the dining room. A rising vote of thanks was given the host and hostess just before leaving time. This meeting will go down as one of the best outdoor meetings the club has ever held.

CLUB AND SOCIETY NOTES.

The fifth annual flower show at Andover, Mass., was the largest and best thus far. Children's productions were largely shown. J. H. Playdon was chairman of the managing committee and G. D. Millett, George Piddington and other commercial florists also served.

The annual exhibition of the Medford, Mass., Horticultural Society was held on Saturday, Sept. 12, in one of the halls of the high school building. The quality of the various exhibits, which consisted of annuals, perennials, fruits and vegetables, was excellent. A very striking and interesting collection of the newer cannas, comprising 28 varieties, was staged by Hon. Wilton B. Fay. The centre pieces for dinner table were done by the society ladies, and I have seldom seen finer work in this line. The Massachusetts Horticultural Society would do well to secure some of these ladies when they have a similar competition. Mrs. Lester Williams was the winner over seven others. The whole was done with outdoor flowers and foliage. Excellent dahlias were shown by George Gill and J. W. Rockwell. Joseph J. Phelan had many prizes for well-grown annuals and vegetables. Miss

Gill was judge for the centre pieces and Messrs. Baler of Medford, Casey of Melrose and Johnson of Malden for flowers, fruits and vegetables.

GEORGE F. STEWART.

Medford, Mass.

A CALIFORNIA WELCOME.

To the Members of the S. A. F.: Welcome, thrice welcome to the Pacific Coast, Society of American Horticulturists. "Horticulture" and "Horticulturists" appeals to the undersigned as being broader than merely "Florists" or "Floriculture," and would seem to embrace all that is really necessary in a title to our good thirty-year-old S. A. F.

I do not believe it is necessary to have "professional" as part of that title, notwithstanding that fact that our capable and worthy president and my good friend—Theodore Wirth—has so recommended in his admirably written message to the fraternity. The fewer words used in a given title the better, provided same conveys all that is necessary. The "Ornamental Horticulturists" added to the Society of American Florists, has always appeared cumbersome. It may take some time to effect the desired change, yet come I feel it will, sooner or later. But no matter what the name the society comes under to the Panama-Pacific Exposition in San Francisco 1915, all the members composing same, will be welcome, WELCOME! Good accounts are spreading as to the progress in all the Departments being made towards having everything in readiness at the Exposition for the Opening Day, and the Horticultural Department is, I am assured, among those farthest forward.

Excursions to the Panama Exposition in its present state, are arranged at intervals by the Southern Pacific Railroad Company, and if my informant was not mistaken, as high as \$40,000 monthly are being taken in at the gates at 25c. admission. So far this writer has not had opportu-

ity of seeing for himself the progress made, but he hopes to do so when there are not quite so many details to look after on the Floradale Seed Ranch.

It is to be hoped a large gathering of the members can see their way clear to join in the trip, for it will be quite as easy for the leaders in horticulture, also the rank and file, to come to California, as it was for the same party to go to Cincinnati to the initial meeting thirty years ago. It goes without saying, we will welcome to the Burpee's "Floradale" Seed Ranch, all who will give us a call. At that season of the year, our sweet pea harvesting may be over, but we hope to have something worth inspecting at the time the convention will be held, namely in August.

Fraternally yours,

EDWIN LONSDALE.

Vice President for Southern California.

Lompoc, Cal.

MONMOUTH COUNTY (N. J.) FAIR.

This annual event, which took place at Red Bank last week was the equal of and in some respects superior to any previous record in the fruit, flower and vegetable departments. The tent for this section was 100x200 feet, of which the flower display filled fully one-half. The flower section was well set off by the exhibits of the Shrewsbury Nurseries, consisting of conifers and shrubs. H. A. Dreer also contributed much to the general effect with a fine display of aquatic plants and flowers. The prize schedule was divided into two distinct sections, for amateurs and professional gardeners, and both were filled to repletion, the list of winners being very lengthy.

Joseph W. Thompson was the director in charge of the vegetable exhibit. The judges in the professional class were W. H. Waite, Yonkers; John H. Johnson, Glen Cove, N. Y.; Thomas W. Logan, Jenkintown, Pa.; Alex. MacKenzie, Highland Falls, N.

Johnson, superintendent of Killenworth, Glen Cove, N. Y.; Thomas W. Logan, superintendent of Crosswicks farms, Jenkintown, Penn.; Alex. MacKenzie, superintendent of Cragston, Highland Falls, N. Y., and W. H. Waite, superintendent of Grey-stone, Yonkers, N. Y.

DAHLIA AND FRUIT EXHIBITION AT BOSTON.

The Dahlia and Fruit Exhibition of the Massachusetts Horticultural Society on Saturday and Sunday, Sept. 12 and 13, was a varied and glowing display. The crack dahlia specialists who abound in eastern Massachusetts were out in force and their exhibits were representative of up-to-date achievement in decorative, cactus and other popular classes. The number of flowers shown would have been larger had the show been a week later. E. W. Ela, E. W. Dwyer, W. D. Hathaway, P. H. Mansfield & Son, Sisson & Thurston, F. L. Tinkham, George H. Walker, Miss Fanny Foster, Mrs. L. M. Towle, Geo. L. Stillman, Mrs. F. G. Dodge, W. C. Winter, George B. Hill and Fottler, Fiske, Rawson Co., were all prominent contributors in the dahlia section. Fine displays of herbaceous flowers from Eastern Nurseries, H. T. roses from T. N. Cook, and seasonable flowers from other contributors were fittingly recognized. William Nicholson was awarded a certificate of merit for *Buddleia variabilis* varieties and honorable mention was given Thos. N. Proctor and Geo. L. Stillman for seedling dahlias.

The fruit exhibits were numerous

PEONIES

Fifteen fine named Peonies for \$2.50, or 25 for \$5.00, all different and truly labeled, a chance to obtain a fine collection at half price, comprising such varieties as Festiva Maxima, Felix Crousse, Delachet, Achillea, Lady L. Brumwell, Couronne d'Or, Procheta Tricolor, Louis Van Houtte, and various other fine sorts. With any order of above for \$5.00 I will include one plant of Baroness Schroeder, free. I have the largest stock in America of Lady Alexandra Duff absolutely true and many other fine varieties. Send for catalogue.

BODDINGTON'S "QUALITY" CHRISTMAS-FLOWERING SWEET PEAS WE ARE SUPER-HEADQUARTERS

All true stocks of Winter-flowering Sweet Peas will again be scarce this season. The winter-flowering Spencer types are almost a total failure owing to the exceptional season in California this Spring, and through the ravages of Aphis.

We regret that our stocks of YARRAWA and ANITA WEHRMAN are entirely exhausted, also many other good varieties, but we can still offer the following while stocks last. Order at once to avoid disappointment—remembering that our stocks are true to name and while a little higher in price, will save you money in the long run.

ROSE QUEEN "ROSE QUEEN" is Orchid-flowering, borne on long stems, extremely free and early and of pink color most attractive, is a decided acquisition, and like all meritorious novelties is sure to be in demand wherever grown. Prices: Trade pkt., \$1.00; 3 trade pkts. for \$2.75; 1 oz., \$12.00.

THIS ADVERTISEMENT CAN BE USED AS AN ORDER SHEET

Remember, you may deduct 5% if cash accompanies the order.

	Oz.	¼ lb.	½ lb.	Lb.
...BODDINGTON'S EXTRA-EARLY CHRISTMAS WHITE SNOWBIRD. An exceptionally early Sweet Pea for indoor flowering—Will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting.	\$0.25	\$0.75	\$1.25	\$2.00
...BODDINGTON'S CHRISTMAS PINK. This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in latter part of August, flowers can be cut from Thanksgiving on during the Winter months.	.15	.50	.85	1.50
...BODDINGTON'S CHRISTMAS WHITE. A companion to our Christmas Pink. Just as free and profuse a bloomer.	.15	.50	.85	1.50

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers.—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

California Seeds and Bulbs.

The California seed harvest is about over and shipments are being made on contracts, but it is evident that the deliveries in many lines will be very short. Many types of sweet peas are scarce, the crop in some lines being a complete failure; and onion seed, owing to the unusual prevalence of mildew in the principal districts, shows an extremely light yield. The cut-worm pest has seriously affected the lettuce output, and notwithstanding the curtailment of export shipments, there will not be enough to meet domestic demands. There is a stronger inquiry than usual for most varieties of California seeds ordinarily shipped east, but practically all new supplies are held under contract. For California bulbs there has been a good local demand in addition to a very heavy shipping movement of freesias to the east.

Notes.

Louisville, Ky.—Logan & Haggin have purchased the seed business of C. L. Seabee.

Louisville, Ky.—The Central Kentucky Bluegrass Seed Co., 111 Cheap-side avenue, has sold its field and garden seed department to C. Clay Goodloe, who will conduct the business under the name of the Goodloe Seed Co.

Hjalmar Hartmann & Co., Copenhagen have sent us a report stating that the harvest of their crops is proceeding very well, although there is a lack of help, as 60,000 men are called away for military service and will probably be kept under arms until the war is ended. As the Scandinavian Line has a regular bi-weekly service between Copenhagen and New York, it is hoped that shipments can be made promptly, if nothing unusual happens in the meantime.

PUBLICATIONS RECEIVED.

Morris County Gardeners' and Florists' Society, Schedule and Prize List of the 19th Annual Flower Show, to be held at Assembly Hall, Madison, N. J., on Wednesday and Thursday, October 28 and 29. A very neat and explicit program. Copies may be had from Edward Reagan, Secretary, Morristown, N. J.

School of Landscape Architecture, 114-15. This is No. III. Part 7 of the Official Register of Harvard College. It supplies complete details of the requirements, courses, etc., in this study as pursued at Harvard and general information of much value to anyone proposing to take up landscape work as a vocation.

The New York State College of For-

estry at Syracuse University has just issued three interesting bulletins. No. 1 (a) describes the reforestation of cut-over and idle lands in New York; No. 2 (b) is a very timely bulletin on rural and city shade tree improvement; No. 2 (c) tells about the state forest camp in the Adirondacks.

American Seed Trade Association—Proceedings of the 32nd Annual Convention at Hotel Raleigh, Washington, D. C., June 23, 24 and 25, 1914. Secretary Kendel is to be congratulated on the excellent and complete report he has issued. It will prove exceedingly valuable to the seed trade of America. A fine portrait of Ex-President C. C. Massie is used as frontispiece.

The Massachusetts State Forestry Department has just published a valuable 35 page volume, giving instructions for making improvement thinnings and the management of moth-infested woodlands. There are ten full page inserts of half-tone plates illustrating the text matter, which is by H. O. Cook and P. D. Kneeland under the direction of State Forester F. W. Rane.

Extension Circular, No. 8, of the Department of Floriculture N. Y. State College of Agriculture, furnishes some interesting information concerning the opportunities offered for young men in commercial floriculture in New York state and the equipment of the department of the college devoted to instruction in the art. Courses are outlined on the principles and methods of greenhouse practice, practical garden work, floral arrangement, store management, etc.

American Association of Nurserymen. The Proceeding at the 39th Annual Convention of this Association at Cleveland, Ohio, June 24, 25 and 26, 1914, has just been received from Secretary John Hall. It is characterized by completeness of detail and typographical excellence. A very large amount of valuable records, a useful nomenclature code and a complete list of the members give this publication a value of no small degree for anyone interested in the nursery business.

CATALOGUES RECEIVED.

P. J. Berckmans Company, Augusta, Ga.—Wholesale Trade Catalogue, for Nurserymen and Florists only. A fine select list of stock for both northern and southern planting.

Conard & Jones Co., West Grove, Pa.—New Floral Guide for Autumn, 1914. Golden daffodils, crocuses, forsythia and Persian yellow roses make a very bright pictorial cover effect.

Wm. Henry Maule, Inc., Philadelphia, Pa.—Price List of Fall Bulbs, Plants and Seeds, 1914. Brilliant reproductions of standard varieties of tulips, hyacinths and daffodils adorn the covers.

Stumpp & Walter Co., New York City.—Bulbs for Autumn Planting. This 1914 illustrated catalogue is an exceptionally beautiful production. The illustrations are very fine and the

**Of Interest to Retail
Florists**

IMPORTANT TO GROWERS, FLORISTS AND WHOLESALERS.

A Talk by Max Schling to the New York Florists' Club.

Mr. President and Brother Florists: In the past few years, we have done a whole lot of writing and talking to find a way in New York to improve business for the retailers, to get better prices for the growers, to clear the surplus stock of the commission dealers. With one word—to help all of us to have a broader field for our products, to get more in touch with the public—not with the public who do buy flowers (they are touched often enough), but with the public we are not in contact with.

Our publicity committee who had posters printed and sent to different stores, about Mothers' Day and other days is for this purpose not sufficient. The posters which they sent out, only very few stores showed in their window or in any other prominent place. It was a lost effort. This advertising of one day brings a certain kind of flowers high in price for that one day only and then lets the price drop that much lower directly after.

For these conditions to be improved you need as a special committee, men who are in contact with the public and who are in the midst of retail life; men who have feelings with the public and who are willing to give some of their valuable time for the general good, and for this committee, I would suggest that you elect three wholesalers, three growers and three retailers and I believe the following would be the proper men to handle the situation:

Wholesalers—John Young, Walter F. Sheridan, George C. Siebrecht.

Growers—Wm. H. Siebrecht, J. Miessem, John Donaldson.

Retailers—George E. M. Stumpp, A. T. Bunyard and Max Schling.

And with us the club shall give a man with knowledge of business life and human nature and well-known ability to handle any situation. Patrick O'Mara, to help us in this work.

The new movement with the New York Free Public Markets, is preparing the public just for this kind of work. One of the ways to improve our business would be the following:

That the surplus of the stock our growers send to the city be sent to the free markets, which no doubt they would gladly do. The florists of New York to volunteer for two or three hours a week a couple of their salesmen to handle this stock and to sell it at a low price to those who are willing to buy a few flowers but who cannot afford to go to a store, who would gladly have flowers but who have no access to this so-called luxury except that they get it at a ridiculously low cost. We not only can bring light and pleasure into many poor homes in this way, but we also can help our growers to get a little return for their work. Ourselves we help a great deal by keeping the market free of over-surplus, and the wholesaler will be open for new stock which will find a better market when there is no "leav-

ings over," and we shall all be more sat-
isfied with ourselves by accomplishing
something which helps not only our
brother florist, but also ourselves.
Therefore it is better that we start in
as quickly as possible to get some-
thing accomplished instead of sitting
comfortably in our chairs and waiting
for other people to work until the legs
of our chairs rot beneath us.

A novel and very attractive way to
use the young "birds' nest" ferns,
which are being grown now in large
quantities in pans with many per-
forations in the sides through which
the ferns are inserted. Penn, the Bos-
ton florist has a window full and they
take well.

CHICAGO NOTES.

The Kedzie Floral Co., 3401 West Madison street, has given up its large corner location and moved into a smaller place one door west.

Ernest Weinhoeber has the sympathy of the trade in the loss of his mother, Mrs. Emille Weinhoeber, who passed away on Sept. 12, aged 82 years.

The retail store of John T. Muir in the heart of the loop district has been closed. Mr. Muir said that the south side store paid much better and he will devote his time to it.

The J. C. Moninger Co. is going to try out winter greenhouse building this season. They propose to erect two more of the Gullett houses at Lincoln, Ill., 60 x 500 each. A message to the J. C. Moninger Co. announces the safe arrival in New York of Mr. and Mrs. E. T. Kurowski, Sept. 12. They were visiting relations in Germany when the war broke out.

A. Henderson has received advices during the past week that azaleas would be shipped to this country by way of Rotterdam. All his French bulbs are accounted for, but Mr. Henderson feels the impossibility of filling future orders, as he says that France was clearly stripped of all men between 19 and 49 years. He looks for a limited supply of lily of the valley from England where it is grown successfully, but never on a large scale. After his trip through Holland and later advices from there, Mr. Henderson states that he can see no reason so far why Holland bulb orders should not be filled with small delay. Also a letter to Poehlmann Bros. brings news from the Belgium growers that they still have hopes of filling their orders for azaleas, but cyclamen and begonias will help the retail florist out, however, if the azaleas should fail to arrive.

It is customary at Poehlmann Bros. to plant their carnation houses almost exclusively with varieties that have proven their value. This year three new ones are being tested and their records carefully noted. They are Philadelphia Pink, Gorgeous and Champion. Philadelphia is showing a very fair amount of blooms. The deep rich pink of Gorgeous is admirable and the finely formed flowers are large for so early in the season. Champion shows a mass of buds and blooms, clear bright red. Though the blooms are comparatively small, its color and freedom promise well for it as a commercial variety. All the carnation houses are looking exceptionally well and already the daily cuts of the standard varieties are large. It is evident that much lies in the growing of a rose, as well as in the variety. An example is the rose Mrs. Chas. Russell, where it almost reaches the length of an American Beauty and quite reaches the price of Beauty. Three large boilers are being installed to heat the newest range at Plant "C," and the amount of coal used last year, 35,000 tons, will have to be increased this year.

WASHINGTON NOTES.

Peter Bisset, of the Department of Agriculture, is at present traveling through California on business for the Department.

Miss Nellie Brueninger, with Gude Bros. Co., is in Atlantic City, N. J., where she will spend a two weeks' vacation with her mother. Miss Beatrice Moss, with F. H. Kramer, is also absent from the city on her vacation.

Speaking of the army worm, this terror seems not to have passed, for the pests were seen in large quantities in Rockville, Md., recently and it is believed that the first warm weather will bring them out of the ground in large quantities. The Department of Agriculture is urging owners of lawns to be ever on the lookout and not relax their vigilance. If proper precautions are taken at the start the danger from the worms is minimized.

John Duff, superintendent of the Capitol Park, states that the report recently issued to the effect the army worm made havoc with the beautiful lawns which surround the Capitol, is without fact. As soon as the pest made its appearance liberal doses of Paris green and Bordeaux mixture was distributed over the grass and shrubs and the heavy rollers were used to force the worms into the ground, thus killing them. The Capitol Park today presents a very beautiful sight and is very commendable. The tussock moth proposition was equally well taken care of.

Prof. S. W. Wollenwebber, expert on plant diseases in the Department of Agriculture, while working in the interests of the department, studying plant diseases in Germany, when hostilities began, was drafted into the German army, he being a native of that country. Prof. Wollenwebber has been in the employ of the Department of Agriculture for the past two years but he had failed to take out papers for citizenship or even to file a declaration of his intention. Nothing was heard of him at the Department for several weeks until the receipt of his letter of resignation which will be accepted.

There is little doubt that we will yet get in all of this season's seeds, bulbs and plants. Under the Treasury Department there is what is called the Bureau of War Risks Insurance, which Bureau will have something to say within a few days as to how we may bring across those things which we are so much in need of in the flower business. The government plans to place insurance upon all cargoes sent from Europe to the United States in vessels flying our flag. At present this matter of obtaining ships seems to be the greatest difficulty. England has stated that she will not molest neutral ships carrying wares to America, and Germany has placed no embargo upon the transportation of certain of its productions. The other great difficulty rests in making payment for such goods, but here again the Treasury Department is coming to the aid of the importers for it is planning the formation of an exchange carrying on hand sufficient gold to meet the obligations of Americans in this respect.

SAN FRANCISCO NOTES.

California florists are highly elated at the selection of San Francisco as the site of next year's national convention of the S. A. F., and also at the election of Daniel MacRorie of this city as vice-president of the society. They will do everything in their power to deserve the honor bestowed on them and can promise a royal good time to the visitors to the convention of 1915.

G. Rossi & Co. are preparing to bring out two roses, new in this vicinity, which they will begin cutting in November. They are now working on some large additions to their hot-houses both here and in Berkeley, and are putting in 20,000 Easter lilies. Mr. Rossi is taking a vacation at present, and will probably be away the rest of the month. H. Avensino, proprietor of the Fairmont Floral Company, has just purchased a second automobile for delivery service. Domoto Bros. are making an unusually heavy planting of lily bulbs for the winter trade.

During Recess

The "Old Guard" Association.

Friday, Saturday and Sunday, as HORTICULTURE's readers peruse these lines, history of the juicy, jubilant brand will be in the making at Waretown, N. J. "Who are the Old Guards?" you ask. Well, John Burton is president and George C. Watson is secretary and "Commodore" John Westcott donates the use of the camp on Barnegat Bay. That tells sufficient—everybody will know the rest. Twenty is the limit numerically of the party, but if they have a limit in any other respect we are not aware of it. We hope the fish and not the mosquitoes will bite freely, the waves dance merrily and the sun shine brightly on this closing frolic of the season at happy, care-free Waretown.

Newport Ball.

The 16th annual ball of the Newport Horticultural Society was held in Newport beach pavilion on the evening of September 8, the affair being one of the closing affairs of the Newport season. John T. Allen was floor manager, his assistant was Col. Herbert Bliss, and the aids William McKay, Hugh Meikle, John Urquhart, Frederick Carter and Alexander Fraser. On the reception committee were A. K. McMahon, James McLeish, Alex. McLellan, John T. Allen, William McKay, Richard Gardner, James Sullivan, Bruce Butterson and Andrew S. Meikle.

KNOXVILLE, TENN., NOTES.

Addison J. McNutt reports business better for the last week than any time this summer.

Crouch's are having both the interior and exterior of their store done over, getting ready for fall and it will present a very pleasing appearance when finished.

Chas. L. Baum has the agency for the Nicotine Mfg. Co., and sells Nicotine and Aphs Punk. He reports an extremely good trade in this line, shipping to most every point in his territory, which is good evidence that the bugs are busy.

The Howell Nurseries report more orders than usual for fall delivery. They have been notified that the chances are good to get stock contracted for in France and Holland. Bruce Howell spent a part of last week in Asheville, N. C. The Southern Nursery Convention at Chattanooga, Tenn., was a very successful meeting.

Chas. L. Baum, president of the Knoxville Florists' Society, entertained this body at his home Monday evening, Sept. 7. A large crowd was present, including all members and a number of friends of the society. A very pleasant evening was spent, the old as well as the young enjoying the different games, which were at times exciting and very enthusiastic. After the fun refreshments were served, and it was at a late hour when the crowd made its departure, all having enjoyed themselves to the utmost and wishing the evening had been twice as long. Dr. Sam Boyd, an honorary member of the society, won the applause of all when, approaching the house but still

A REMARKABLE GLADIOLUS EXHIBIT.

Our picture shows a partial view of the phenomenal display of gladioli, made by William Sim at Horticultural Hall, Boston, on the occasion of the visit of the S. A. F. to that city. The group of visitors introduced in the photograph serve well for purposes of

comparison by which to judge the unusual size and vigor of the flower spikes. This was the most wonderful display of gladioli ever staged in this country and, as with most things that this skillful grower does, has been the subject of interesting comment ever since the convention.

at a distance from the scene of merriment, he stopped and sang "Beautiful Star of the Evening," which was indeed very beautiful and appropriate. "Dr. Sam," as he is generally known among his friends, is not a florist, but is a very ardent admirer of flowers and a very close friend to all the florists, and has been an honorary member of the society for some time. Mr. Baum named his new white seedling carnation Dr. Sam (the registration of which was confirmed by the S. A. F. & O. H. this year), and during carnation season the doctor is known by the carnation he wears.

Asbury Park, N. J.—The suit of Wellington W. Kennedy & Sons of Red Bank, against the City of Asbury Park for \$115 was compromised last week by the city paying the Kennedy firm \$75 after which the suit, which had been started in the District Court at Asbury Park, was discontinued. Kennedy & Sons exhibited flowers at the Elberon Horticultural Society's third annual show at Asbury Park in July, 1912. The show was held under the auspices of the city. Through the pub-

licity Bureau, the city sent a letter to the secretary of the show, stating that the City Publicity Bureau would guarantee all prize money at the show, not to exceed \$1,910. The Horticultural Society printed this letter on their premium list. It is thought several other suits of like character will now be started against Asbury Park, as a number of prize winners at that show have not yet received their money.

Flower Market Reports

BOSTON A fairly satisfactory situation exists at present in the wholesale trade of this centre. Roses are in very heavy receipt but notwithstanding this fact they are moving off very well. Some of them, such as Mock, Shawyer and Taft are of nice quality for so early a date, color being particularly good. Carnations, too, are beginning to assert themselves, some excellent ones coming in. Cattleys are hard to find, as are gardenias, also, but there is no special call for either. The gladiolus harvest is about over and those that come in now find a better market. Asters are a troublesome factor—too many by far and of these a large part are inferior. In asters, as with roses and carnations the whites are selling best. Chrysanthemums are few, thus far, and only medium as to quality, in most cases. Lilies have stiffened up somewhat in market value. Lily of the valley is a bit easier than it was last week and prices are weaker, but there is no over abundance in prospect.

BUFFALO Very little can be said of the market only that asters and gladioli still have the swing and the quantities received are abundant. Choice stock has had a good sale, but the ordinary has a hard road to travel. There has been an exceptional lot of roses and a slight improvement on the sales. A hard problem is how to dispose of the lilies at a price that would be agreeable to the grower. Lily of the valley has a fair sale, also Beauties, but nothing has sold at any big prices.

CHICAGO Trade continues rather quiet, and as there is a wealth of out-door flowers at this time, a killing frost is the only hope of the small retailer. The market is particularly well stocked with roses, the new summer varieties proving a valuable acquisition. The low price, however, will make growers think twice before planting so many next year. It has only proven again this summer that flowers must be good in order to sell when demand is light. There are a great many American Beauties coming now, more than the market needs, and very low prices are made on large lots. Asters are here by the thousands that have no place on a florist's table except for design work or cheap bouquets. Large, finely grown asters are selling well, but the rest go for little or are dumped. There is a fair demand for carnations, as there always is when asters are poor. New York asters are coming in in quantity. As there are not sufficient first-class home-grown ones, it does not injure the returns of the home growers. There are more lilies than can be used, a condition that has prevailed all summer. Lily of the valley is more appreciated each day, as the growers cautiously hang on to the cold storage pips. There is not much of a variety of out-door stock offered. Chrysanthemums are rapidly increasing in number and move fairly well.

KNOXVILLE, TENN. Weather conditions continue good, with just enough rain to keep the ground in good working shape, and everything that should be, is growing fine. The indications are that florists will have a very prosperous season, as

stock of all kinds is making a vigorous growth and the prospects for business are good, although stock is rather scarce at present. Orchids, lily of the valley, lilies, roses and dahlias are plentiful.

NEW YORK It is a great pleasure to be able to say that business has improved all along the line. The cold snap has shortened up the supply and it is to be hoped that the present encouraging conditions will continue. The higher grade of roses, especially of the novelties, are finding spirited call and lily of the valley is meeting with good demand at \$5 per hundred. Lilies also have stiffened up in price.

No marked change in market conditions is noticeable since last report. The same dullness continues, perhaps a little more so if we are to believe reports from some quarters. From others we hear that it is in much better shape. There are fewer roses and fewer asters and the clean-up is far better. Some gladioli are still arriving. Lily of the valley is selling well, with demand good. Cattleys are very fair now, both as to supply and demand. Dahlias are just beginning to show form, although they are rather late this year on account of cold weather and lack

Flower Market Reports

(Continued from page 1)

of rain. Carnations are a little more plentiful and the quality is improving very rapidly. Mr. Charles Russell is one of the leaders in the rose world, very fine at present and very popular.

In general, business is picking up, but has not

yet gathered much headway. Probably the matter of most interest is the beginning of the chrysanthemum season, offerings in this line at the wholesale flower market being larger every morning. The earlier varieties are now quite plentiful, and October Frost is beginning to show up well. The demand is improving, but prices are low. Roses are rather "between seasons," and offerings of most varieties are not very attractive. Very few really good American Beauties can be had; Maryland, Killarney and Cecil Brunner, however, are beginning to show up fairly well. Large plantings of roses have been made, as growers believe that the winter demand here will be unusually strong; and there is always a good shipping business to the north Pacific states. Orchids are temporarily scarce, but few of them are needed. Violets are appearing a little more freely, but show the effects of the prolonged dry weather. Carnations have not yet developed very well. Lilies are abundant and very fine, album, giganteum and formosum being shown in all the shops, and there will be no shortage of lily of the valley for the next few months.

Trade has not as yet shown any improvement, as was expected at the commencement of the fall season. The retail business is very dull and the wholesale markets have great difficulty in disposing of their stock at anything like the prices they should bring at this time of the year, and it looks as if we need cold weather and a few frosts to stimulate the business. The market has anything the season affords and in great abundance. To quote correct prices is out of question. Roses are so plentiful that many have to be dumped daily at extremely low prices; the same may be said of all other stock. Chrysanthemums are beginning to arrive and a nice lot of Golden Glow were seen last week.

The coming of the cool weather had the effect of cleaning up the market of cut flowers. Where roses came in the previous week by the thousands they are now coming in by the hundreds and the quality necessarily suffers because of the sudden change. The only rose in the market of which there is enough to go the rounds is the American Beauty; the other varieties are sold down close, and the demand for the American Beauty is not very great. Prices have shown few advances. Chrysanthemums and dahlias are beginning to be seen in the stores and the quality is quite good. Although some very fine asters are still to be had, the season for these in this market is over. The gladiolus is also now practically a flower of the past and the cannas in the public parks are on the wane. Tri-tomas are seen in fair quantities and are being used mainly for display purposes.

SOME GOOD GROWERS.

We had the pleasure of a brief call at the Mathison Greenhouses at Waltham, Mass., recently and were pleased to find our old friend Jos. Lamb, formerly at the Hentz rose houses in Madison, N. J., "making good" in the management of this place. The roses certainly show that they have not an idle moment. The various Killarneys, most of them second-year plants, bristle with young buds and so does Richmond, but this latter is seeing its last year here, as Hadley is beating everything else in sight in vigor, stem, color, fragrance and all other desirable qualities and bids fair to become the reigning crimson.

One of the most rapidly developing establishments in the neighborhood of Boston is that of C. B. Johnson at Woburn. Mr. Johnson has had possession of the place only one year and it is already transformed. Two new houses have been built within that time, 40 by 200 feet., new heating apparatus installed and a 50 foot chimney of white pressed brick is now going up. There is some miscellaneous stock outdoors and in but carnations are the main crops. Here is a chance to compare the qualities of the several antirrhinums that are being exploited. Ramsburg's variety shows to best advantage, its color tint being decidedly preferable.

The Backer carnation houses at Billerica are again to the front as evidence of the skill of that clever carnation grower Gustav Thommen. We are safe in repeating what we have often heard asserted that Thommen has no superior in his specialty anywhere. Matchless, Champion and several other recently introduced sorts are here getting an opportunity to

demonstrate their good qualities. Two seedlings of more than ordinary merit now three years old, are worthy of special notice. One is soft pink, on the order of Fisher's Alice, and the other is bright dark pink.

PHILADELPHIA NOTES.

The Michell Seed Store announces a dahlia show Sept. 22 to 26 inclusive at 518 Market street.

Chas. Henry Fox arrived home on the S. S. Finland Sept. 14. He will address the Florists' Club on his European experiences first Tuesday in October.

Chas. L. Seybold, superintendent of parks, Wilkesbarre, Pa., passed through this city en route for Baltimore, accompanied by his wife, who goes there for medical attendance, having been quite ill since the Boston convention.

Visitors—Charles W. Edgar, B. F. Barr & Co., Lancaster, Pa.; James Brown, Coatesville; Mr. and Mrs. John Walker, Youngstown, O.; Sam McClements, Pittsburgh, Pa.; Mrs. Thos. McClintock, Scranton, Pa.; Mr. and Mrs. Bogart, Greensboro Floral Co., Greensboro, N. C.

Boston—Fire starting probably from spontaneous combustion in the floral wire design factory of J. Jansky on Province St. did a slight amount of damage and incidentally created a small panic in an adjoining cafe.

Who Reads Horticulture?

The man with a serious object in life, of progressive purpose and broad business aims; who is interested to know what the other successful men of the trade are doing and how they are doing it; who reads to learn and improve.

Find a regular reader of Horticulture and you will find he fits the foregoing qualifications.

If you have stock to sell, he is the man who wants to know about it; who is in a position to become a customer if you can suit him; who has the ability to pay for the goods.

Do you want to get in touch with him and do business with him?

If you do,

You Know the Answer

Your advertisement in Horticulture will get the attention of a larger percentage of such readers than in any other publication in this country.

TROUBLE WITH HOLLYHOCKS.

The great trouble with these plants is to have them come true to name. You plant the seeds of large double ones and they often come single; no matter how careful you are in saving the seeds you can not depend on them. What is the trouble? Watch them while blooming and see how the bees work on them; that accounts for it, the bees ruin the pollen.

To avoid the difficulty the different sorts should be put as far apart as possible. We had one patch isolated and they came true and this is the solution of the problem. Raising and selling them is fraught with difficulty. As they are mostly biennials, you can not prove their color by blooming and so there is no end of vexation. Customers order double ones and they come single, while the grower may be honest, knowing he sowed the right seed. Seeds of the largest double ones are small and of poor vitality, they are high-priced and you do not get a good stand. Expensive seed from abroad is about as disappointing as any. The surest way is to raise your own seed in isolated patches.

C. S. HARRISON.

AN IRIS MANUAL.

We have just received a beautiful booklet on the iris from Mrs. Dean of the Iris Gardens of Moneta, California. It is as beautiful as art can make it. We have visited Mrs. Dean. She is a charming lady. Besides understanding her business, she has ransacked Europe and America and has one of the world's choice collections. The iris I noticed was well adapted to the soil and climate of California. I am sure from our experience in hot and dry Nebraska that they would do well anywhere in California without irrigation. The winter rains would carry them through the blooming season and they

would go through the rest of the year with good cultivation. If you want a beautiful descriptive manual send to Mrs. Dean, Iris Gardens, Moneta, California.

C. S. HARRISON.

POISON KIL - WORM POISON

Destroys Worms, Ants, etc., infesting Golf, Cricket Grounds, Parks and Lawns. Sure death to Snails. Does not injure Grass; causes the insects to come to the surface to die. (Must not come in contact with fine plants.)

One gallon Kil-Worm makes 50 gallons liquid when mixed with water.

1 qt., \$1.00; ½ gal., \$1.75; 1 gal., \$3.00; 5 gals., \$13.50.

POISON KIL - WEED POISON

A scientific Weed Destroyer—free from odor. An unsurpassed preparation for the removal of Grass, Weeds, Vines and Bushes from paths, etc. Saves expense of several men; can be applied with an ordinary sprinkling can.

One gallon Kil-Weed makes 30 to 35 gallons liquid when mixed with water.
 1 qt., 35c.; ½ gal., 60c.; 1 gal., \$1.00; 5 gals., \$4.00; 10 gals., \$7.50; 1 barrel, per gal., 65c.

LEMON OIL COMPANY, Dept. K

420 W. Lexington St., Baltimore, Md.

Directions on every pkg.; write for circular.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
 \$4.00 per 112 lbs.; \$17.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

Obituary

J. B. Stuessy.

Joseph B. Stuessy a well known florist of Louisville, Ky., died September 2, aged 66 years. He was an active member of the Kentucky Society of Florists and served as its president last year.

J. Theo. Voorneveld.

We have just learned of the death on Aug. 10 of J. Theo. Voorneveld at Beverly Cove, Mass. Mr. Voorneveld, whose death was very sudden, was a well known and highly respected gardener of Beverly.

Harry C. Cook.

Harry C. Cook, a well known Philadelphia florist, who conducted a retail store at 1208 South Broad street, died suddenly on the 10th inst., and was buried at Fernwood Cemetery on the 14th. He is survived by a widow and daughter, who were actively associated with him in the business. Mr. Cook was a man of quiet, amiable disposition, and was greatly esteemed by a wide circle of acquaintance. For some years he had been a great sufferer from inflammatory rheumatism. He was about 50 years of age. The business will probably be continued by the widow and family.

GREENHOUSE GLASS

OUR PRICES WILL PROVE THIS.

CHICAGO, ILL.

IF YOU ONLY KNEW what a good leave the METROPOLITAN PATENT-ED is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the eave is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

For particulars address
John G. Esler, Sec'y Saddle River, N.J.

TO aim at a thing is one thing. To hit that thing is quite another thing.

For years all the greenhouse concerns had been aiming to reduce the shade of their constructions and at the same time increase its strength.

The first to really hit the spot, was the U-Bar, with its first all-steel frame, and the first curved eave.

And you know what has happened since the very day the U-Bar hit the spot.

Just as near as possible builders have been continually trying to make their houses look like U-Bar houses. But *looking* like them and *being* like them is quite a different matter.

No house can be like the U-Bar because no other

house can be constructed with U-Bars. Putting a silk hat on a day laborer doesn't change him into a bank president; any more than putting a curved eave on a house makes it a U-Bar curved eave house.

There is *only* one U-Bar curved eave house and that's the house made with the U-Bar curved eave.

Of course it's for you to say whether you want the real thing or the "near real."

Most people nowadays are not very keen for imitations. They gladly pay the little difference in cost between the real and "near real."

The real U-Bar excelling points are plainly pointed out on one page of our new catalog. Send for it.

Those of you who know the Dr. Allen place in Cleveland, know that everything about it is the very best money will buy. Nothing "near real", which accounts for his building this U-Bar show house with a range of parallel houses back of it.

Miscellaneous Stock

A few items every florist needs. For complete list send for catalog No. 5. Send us your list of wants.

CALADIUM ESCULENTUM—Good bulbs with sound centers: 5 to 7 in. circumference, \$2.00 per 100; 7 to 9 in. circumference, \$3.00 per 100; 9 to 11 in. circumference, \$5.00 per 100.

BEGONIA, TUBEROUS ROOTED—Bulbs large from one of Belgium's best growers: Single Separate colors, \$2.50 per 100, \$22.50 per 1000; Single Mixed colors, \$2.25 per 100, \$20.00 per 1000; Double Separate colors, \$4.50 per 100, \$40.00 per 1000; Double Mixed colors, \$4.00 per 100, \$35.00 per 1000.

GLOXINIAS—Fine sound bulbs in separate colors, \$4.00 per 100, \$35.00 per 1000.

RHODODENDRONS—A fine lot of hardy sorts, in plants full of buds and with good foliage, 18 in. high, 8 to 12 buds, \$9.00 per doz.; 24 in. high, 12 to 14 buds, \$12.00 per doz.

AZALEA MOLLIS—Bushy, well budded plants, 15 to 18 in. high, \$35.00 per dozen.

DUTCHMAN'S PIPE—Aristolochia Sipho, tops 4 ft. long, a grand vine for shade and cold exposure, \$3.50 per dozen, \$25.00 per 100.

MAGNOLIA—Fine well budded plants, with ball of earth, burlapped; all varieties, White, Pink and Red, 4 to 5 ft. high, \$1.50 each. Stellata or Halleana, early star shaped white, 2½ to 3 ft. high, at \$1.50 each.

ENGLISH IVY—Two or more shoots, 3 ft. long, \$12.00 per 100.

The Storrs & Harrison Co.
Painesville, O.

FERNS IN FLATS

All the popular and useful small ferns, including a specially fine lot of Pteris Victoricae, \$2.00 per flat. Guaranteed 200 plants to a flat.

CIBOTIUM SCHIEDEI

Fine plants in 8 in. tubs, \$3.00 and \$4.00. In 7 in. pots, \$2.50 each.

CYPERUS ALTERNIFOLIUS

3½ in. pots.....\$8.00 per 100

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be promptly received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Gardenias

As the days get shorter and the nights much cooler give ventilation with care so as not to give these plants a check. It will pay to run quite a bit of artificial heat through the gardenia house from this out. By this time they should have made a good many roots so will need a nice top-dressing of well rotted cow manure one part and new soil two parts, applied about half an inch thick, and repeated from time to time as necessary. During all good days they should be syringed early in the morning. It must be remembered that gardenias want lots of heat with a good amount of atmospheric moisture. For a night temperature give 68 to 70 degrees.

Cocos Palms

There is nothing to beat Cocos Weddeleana for the center of fern dishes. They are rather hard to grow, and there are very few palms that need so careful watering. They make roots slower than most palms and overwatering must be carefully avoided. These palms like a warm humid house, the night temperature never falling below 68, while 70 degrees would be better. Day temperature can run up to 85 or 90 degrees when sunny. Do not keep a too thick shade on the glass and be careful with ventilation, giving just a little at a time and reduce gradually the same way.

Orchids

Phalaenopses are warm blooded subjects so will not bear a cool temperature at any time and will take quite a brisk heat from this out. The night temperature should never fall below 65 degrees, and 70 would be still better. The day temperature should be kept at from 75 to 85 degrees with sunshines; during dull weather, about eight or ten degrees over the night temperature will do. Keep making the shade lighter until December when they should stand the full sun. They will need some shade by the end of January again. The atmosphere of the house should have a nice amount of moisture, but be

careful and do not over do this as it makes very soft growth. Give ventilation on all good days, avoiding cold drafts.

Perennials for Pots

There are quite a few florists who can handle hardy perennials in pots for spring sales. You can divide or transplant seedlings now anytime. Pot up a good batch of each which will be ready for early spring sales. Do not put them in too large pots as they are only intended to last in pots until the spring. Pot firmly and give a good watering so as to soak entirely through the soil in the pot. They will become well re-established before the severe freezing weather sets in. They can then be placed in a cold frame, plunged up to the rims so the frost will not break the pots. During very hard weather they will need some protection on the sashes.

Snapdragons

Of easy culture, and fairly profitable at that, are the improved strains of Antirrhinum. As a crop to follow chrysanthemums they possess merit which many other kinds of stock, expressly grown for the purpose, lack. A radical renewing of the soil is not required, nor any great or thorough going preparation of that in which the chrysanthemums were grown. Plants should now be in four or five-inch pots, quite bushy, and ready to bloom. All such flowers at show now must be nipped off. In benching this stock, care must be taken of the new growth which is now beginning to appear above ground, and which after being transplanted into the bench, will push its way up to the light astonishingly fast.

Propagating Sand

Now is the time to procure and place under cover some sharp sand for propagating purpose. Every florist has a certain amount of propagating to do and will need good clean sand. Do not attempt to use sand left over from the last propagation as it always harbors fungus that are fatal to all cuttings.

Mr. Farrell's next notes will be on the following: Care of Adiantums; Cyclamen for the Holidays; Poinsettias; Carnations; Shrubs for Forcing; Resting Fancy Caladiums.

Ceanothus

I shall only mention in the following paragraphs those varieties of Ceanothus which are considered as worth while to the ornamental planter. Doubtless I will neglect some which my reader will think fully as suitable, and for such omissions I crave pardon.

The Ceanothuses belong to the Rhamnaceæ and are ornamental shrubs which produce profuse white, blue or pink flowers in terminal panicles. The following varieties are hardy in New England: *C. americanus*, *C. ovatus* and *C. Fendleri*. Of the first mentioned there are several garden varieties but most of these are only half hardy and even when protected cannot be relied upon.

One of the advantages of the Ceanothus is in its late-flowering habit which renders them especially valuable. *Ceanothus americanus* has been recommended for use as a low hedge, as it never gets beyond bounds and

looks well at all seasons. The leaves appear early in spring and the plant is soon covered with a profusion of feathery blossoms. When the leaves have fallen the erect red stems are still handsome. In the north the young growth is sometimes killed back but at most only one shearing of the plant is necessary. Grown as a specimen or in mass planting *C. americanus* will attain a height of 3 feet, and is a rather compact-growing plant. Its flowers are crowded in dense panicles on the end of the branchlets and appear during July, August and September. It is a native of dry woods from Canada to South Carolina and Texas.

C. ovatus is generally smaller than the preceding and is found on rocks from Vermont to Minnesota. This plant is not so common as the ornamental varieties of the preceding variety. *C. Fendleri* is a western variety coming from the high altitudes of South Dakota. It is a native of New Mexico, Arizona, California, and Texas.

LIBRARY
NEW YORK
BOTANICAL
GARDEN

bushy shrub, covered in July with small spikes of white flowers.

Of the garden varieties, doubtless the best is *C. Gloire de Versailles*, a cross between *C. azureus* and *C. americanus*. A specimen of this plant has stood over the past winter at the Arnold Arboretum and is apparently undamaged. This variety is one of the best for grouping. Its flowers are of a rich blue color and appear from July to October. When grown as a bush the old wood should be cut back to the base in early spring and the plant given a little manure. *C. Gloire de Versailles* will afford a very pretty contrast planted amongst dwarf sunflowers in the herbaceous border.

There are many other garden varieties of *Ceanothus* such as "Carmine Gem," "Ceres," "Charles Detriche," "Indigo," and "Lustre," which would make very interesting and beautiful greenhouse specimens but unless used as tubbed plants on a terrace and kept in a storage pit or greenhouse, away from the cold during the win-

ter, I am afraid these plants would be of little use in outdoor work.

The readiest way to obtain stock of the species is by cuttings of the mature wood in the fall, which should be inserted in sandy soil in a cold frame. The process of layering, however, will yield the strongest plants most readily. The garden varieties can be increased by grafting on *C. americanus*.

The *Ceanothus* will thrive in almost any well drained soil, and in most cases prefer a position at least partially sunny. It is interesting to note that the dried leaves of *C. americanus* were at one time used for tea, from whence comes the common name, New Jersey Tea.

Jamaica Plain, Mass.

Two Useful Perennials for Garden and Rockery

NIEREMBERGIA RIVULARIS.

PLUMBAGO LARPENTAE.

The fact that the flowering season of hardy perennials is comparatively limited is sometimes still pointed out as a disadvantage weighty enough to question the advisability for extensive use. Closer acquaintance, however, removes the doubts of the skeptics as to real merit. Brief flowering periods necessitate a constant succession and everchanging variety in floral effects which intensifies our interest perceptibly. At a more intimate study of the material offered we discover as exceptions hardy herbaceous plant species bedecked with an astonishing wealth of blossoms for the most part of the season. *Nierembergia rivularis* begins unfolding its handsome white cup-shaped flowers in June and the plants remain covered with flowers throughout July and August. During September they gradually vanish away. Of dwarf creeping growth *nierembergias* prove excellent rock garden plants. Here they lend floral life and color at just that part of the season when we are most in need, for the majority of alpine plant species being vernal have previously stopped blossoming. I have also found *Nierembergia rivularis* of value for edging herbaceous borders as well as for covering bare spots on steep grassy slopes of the natural park.

The other subject of today's notes, the Lead-wort, *Plumbago larpentae*, distinguished by similar qualities, merits equally our attention. Of a growth not exceeding

six inches in height this handsome hardy perennial has proven well-nigh indispensable for floral midsummer and fall effects. Most valuable for the rockery, well adapted for the purpose of edging, the scope of its usefulness is an extraordinarily wide one. Last summer on one occasion I saw it employed on a narrow border bed around a cemented formal basin filled with some aquatics. The dark green of the very substantial foliage and the countless blue blossoms from early July until October literally covering the densely-built plants, presented a most fitting frame for the display of nymphaeas and water poppies. It is this intense rich deep blue which so forcefully appeals to us wherever we see it. *Plumbago larpentae* does not need special recommending. The practical garden designer is presumed to be fully aware of its merits and employs the lead-wort freely, but for the benefit of those who are not familiar with it I wish to say *Plumbago larpentae* prefers a rather light soil and seems to do best in open sunny exposure. High locations free from excessive moisture will be found an advantage. Plantations should be protected by leaf-covering during winter. The aforesaid also applies in full to the cultural treatment of *Nierembergias*.

Glenside, Pa.

Richard Rothe

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communication should invariably be addressed to the office of HORTICULTURE.

Broken Glass.

With the last month of warm weather, better see that all the glass that is to be repaired is put in, for once the cold wet weather comes there will be little chance, and it will be everything but pleasant to do it. Do over the houses well, and repair all glass that is loose, cracked or broken. By doing this now, there will be a big saving of time later on. It is not too late to paint any houses that need it; if done at once the paint will dry quickly. Make sure that all crevices are well puttied before the paint is applied. When a house is well painted there should not be very many leaks in it, and the less it leaks the better. Anyone growing stuff in an old leaky greenhouse will soon learn under what disadvantage he is working, it being almost impossible to keep the benches in a right state of moisture, and there will always be spots that are altogether too wet. Spot will generally start in these places, and it will be a hero's own job to rid the plants of it, and besides it will eat up a lot of money. Three men in a house all day means six dollars, and it will take some roses to make that.

Supplies for the Season.

Another item to receive attention now is supplies for the coming season. Twine, wire, boxes, paper, rope, all comes under this head. If the place is well organized, and the books well kept, it will not take long for growers to ascertain how much of each is wanted, and as a rule it will pay to get it all in a bunch, for generally a better price will be quoted on a large order than on a smaller one. A room should be built in one of the service buildings, and the supplies stored in this room, in charge of a good responsible man. As the growers need the supplies they can be taken, and the amount given each and when, can be recorded, so that it will be easy to ascertain how much each grower owes the firm, or rather how much it costs for supplies in the different sections.

The Propagating House.

On many places the propagating house is very badly neglected from the time that the last batch of cuttings leaves it until it is wanted again. This is a very poor practice for it enables weeds and all sorts of insects to flourish inside. Clean the house at once if it is not clean yet, and devote it to raising something, thus making each square foot of greenhouse earn its keep, if it will not make money. There are numbers of things that can be grown and sold at a profit, this generally depending on local conditions, which are seldom the same on two places. A little thought will generally find something that may be worth while growing, and thus keep the benches in motion all the time.

More About Curled Leaves on White Killarney

New London Inquirer—The leaves you sent to us by

mail in damp moss arrived in perfectly good condition, and as you stated in your first letter, they are free from all diseases, and insects, and in perfect shape and health, save for the curling. This is caused by scorching the leaves in some way, the brown markings on the upper side of the leaf proving this. You are right when you say that the leaves are not very soft. They are what we would call a good healthy growth. You do not say whether your plants are grafted or own root. If the former, see if the raffia around the graft or eye is not choking the plants. We had an experience of this kind and found that the grower in charge failed to cut the raffia that had been used in grafting, when the plants were planted, and there were a great many that were being choked, for the raffia proved too strong for the expanding stem to break. If your plants are own-root plants there is no danger from this, and we must look elsewhere for the cause, and remove this, for that will be the only cure. We would advise you to examine the soil three or four times a day, for we have had soils that would be dust dry two hours after watering, for the water would run right through the benches and leave the soil dry. If this would be the case, a mulching would help, using well decayed cow manure for the purpose. We would leave off the syringing as we advised at first, for this is what scalds or rather scorches the leaves, taking it for granted that no strong fumigants or sprays were used, or that there is no paint, no strong manure or other materials that would give off fumes poisonous to vegetation. A dose of liquid manure applied to the plants when they are quite dry would be apt to burn the roots quite badly so that they would not be able to supply the needed moisture to the foliage, and, this lacking, the leaves would burn with the syringing, not badly, but enough to give them the brown markings on the upper side, and cause them to curl. Up to this time we have been thinking of your plants as having been planted quite a while, and having made quite some growth. Should they be small plants that have not been planted very long, and are not established very well, scratch away the soil from several, and see if the original ball is wet enough. We have had plants that were shipped to us from places where the soil is very heavy, and these planted into loose light sandy soil, did not take well with ordinary planting, for the soil would not catch to the hard heavy ball. Should this be the case, firm the soil around each plant with a stick that has a flat end, so as not to go into the soil at all, for that would cut away a good many roots that are needed very badly. It may be too that the plants were not set deep enough if they happen to be grafted plants, and the wood around the joint of the root and scion may have become so hard as to make the flow of sap almost impossible. If this is the case a mulch right around each plant would help soften the wood, and make the sap flow more easily. You say you are sure the plants are not starved. Damp down as many times a day as you think necessary, but keep the water away from the leaves. Water well at the roots, and keep them wet for a while, but do not syringe the plants. Damp down under the benches too, if necessary. From the leaves you sent, we can see that your plants are free from spider, so that they will not suffer if not syringed. It will take a while for the new leaves to form, and prove whether the new treatment will work. All the foliage now has been damaged, and will curl as soon as conditions are right, even though it may open out normal at times. We are very much interested in this case, and would be pleased to hear from you again.

An interesting legal point

Our Chicago advices state that circulars have been received from Europe by plant and bulb importers quoting present prices as far below rates given when import orders were taken. Doubtless other places have also received quotations of a like character. Attention is called to the fact that many of the Holland

order sheets carry at the top the words "Prices Subject to Change." Legal advice obtained by some of the Chicago trade is to the effect that the circulars referred to are evidence that the market prices have changed and consequently the payment for previously ordered goods may be based upon the reduced figure now quoted.

"Price cutting"

Our friends, the members of the Lancaster Florists' Club, have brought forward the subject of "price cutting" as a topic for discussion. The subject is broad enough for plenty of discussion—in fact, too broad for profitable discussion unless there is some definite mutual understanding as to what is meant by "price-cutting." When the motive of the party doing the cutting is merely to seduce trade away from a rival dealer on the ground of cheapness there is, of course, a limit to the wisdom of such a practice as a business-building proposition and, as a matter of ethics, simply, the practice of price-cutting cannot be said to take high rank. Yet, it has ever been acknowledged that "competition is the life of trade" and "best quality at lowest price" is a slogan that any business man may honorably adopt without any fear of reasonable criticism and with every prospect of a successful outcome, while, on the other hand, those who go too far in the direction of fixed and unvarying prices are sometimes liable to have the anti-trust people taking an interest in their affairs!

If, however, the disposition to distribute the surplus flowers, when such exist, at a figure below the standards arbitrarily set by the regular first-class flower stores for such goods (and which rarely have any fixed relation to the cost of production) is what is meant by price cutting, then we should say that the sooner some places get at it the better for the business. In fact, we might put it much more strongly and say that such a course is inevitable in every flower market centre in the country. It is apparent to everybody that the production of flowers for commercial purposes has, in recent years, far outdistanced the development of avenues for their consumption, and the vital question of the hour in such centers of production as New York or Boston, for example, is how to secure for the rapidly increasing product an equally rapidly increasing demand. Growers may well stand aghast at the enormous quantity of their goods which, in the oft-recurring "gluts" under present conditions, are thrown away, and all the while very little is being done in a practical way to open up new avenues of distribution. Under such conditions, price cutting, as a debatable proposition, becomes a joke.

The forcing plant industry

It will be consoling to the plant and bulb forcing trade to find that, as means of transportation through neutral European ports are gradually gotten into working order the outlook for receiving a considerable part of the normal imports of azaleas, pips and bulbs is gradually assuming a much more hopeful aspect than any one had dared to expect. But the situation this year is not the only cause for concern. It is easy to see that, at best, the production abroad for next year and the next is a very grave uncertainty, and it seems too much to hope for the adjustment and re-establishment of former conditions for several years. We have received from L. A. Berckmans of Augusta, Georgia, a sample of the Indian azaleas they are raising there, as told in their communication in our previous issue. As

previously stated, the style of plants they are putting out will not do for forcing, having been pushed along into late growth without any attempt to ripen up the wood. But, nevertheless, they are healthy sturdy plants and such stock could, by special culture and attention, be brought into shape for forcing purposes one year or two years hence. Among the many letters which have come to us from various parties interested in this problem of home production is one from Antoine Wintzer of the Conard & Jones Company. Mr. Wintzer tells of the extensive propagation of azaleas at Flushing, N. Y., fifty years ago by the late J. R. Trumpy. At the time of the outbreak of the civil war Mr. Trumpy had no less than 100,000 home grown azaleas in different sizes but as a large part of the then demand for these plants came from the South the growing of this specialty was discontinued. Mr. Wintzer further reminds us that the

Camellia japonica was also grown here in large quantities half a century ago and the quality of the plants was not surpassed by any produced in Europe. James McHutchison contends that the prestige employed by European grown goods of this class is not that they are cheaper than can be produced here—which they are not—but is due to the intelligence, loyalty and patience of the foreign growers, who love their plants and watch over them as they would over their children. The care and attention thus lavished upon the plants in their production is the great factor in their superiority and unless growers here take the same devoted interest in the work, even a Chinese wall will avail us but little towards capturing the market on these specialties. The communication from Otto Katzenstein on the tree seedling industry, which appears below, will no doubt prove interesting to our readers, in this connection.

HOME GROWN TREE SEEDLINGS.

Editor HORTICULTURE:

There are but very few nurseries in the United States which have, thus far, paid any attention to the raising of tree seedlings or rose stocks commercially, and a small number of these, only, have produced near enough to make the least impression on the grand total used.

The uniform explanation given us was that land was too expensive and labor too inexperienced to undertake the growing of seedlings. We never could see just how this figured out. It may be true that the labor generally employed in nurseries is not as well trained as growers of young stuff as are the European workmen. The short-coming could be easily remedied as knowledge is gained by experience. It is undeniable that our own workmen are much more adapted to acquaint themselves with new methods and there is no reason why very soon seedlings could not be produced at as low a cost as imports.

Our seed has to be exported now and the seedlings have to be returned to this country. Freight, duty, and commission have to be paid thereon and other expenses have to be met. Adding them to the general prices paid European growers doubles the cost of the plants, and we really cannot see why plants grown here systematically could not be put on the market for at least the same price the consuming nurserymen pay now.

We do not believe that every nursery and every nurseryman will lend themselves to the growing of seedlings. This branch will always be a specialty and those who find it possible to make it a success will have opened a way to themselves for large profits.

We cannot grow bulbs everywhere, but there are some growers in this country now who compete most successfully with the exporters. Not every section of this country is adapted to the growing of wheat for macaroni, but those which are produce flour and a finished article equal to that imported from abroad.

We might go on indefinitely enumerating articles which we thought in former years would have to be imported but which now are made here. There is no reason why we must con-

tinually depend upon Europe for tree seedlings.

Now is the most opportune time to break away, especially as the entire supply of our European friends will probably have to be used for their own replanting, and there is no reason why the tables might not be turned and, instead of paying importers, our nurserymen would become, in time, exporters of at least certain kinds of young nursery stock.

We have gone into this rather more in detail than we had anticipated ourselves when we started this letter, but the subject is one very near to us, and one to which we have given a great deal of thought for a number of years.

We have not the least intention to step on the toes of any of our foreign friends, whom, in the past, we have supplied very largely with tree seeds and whom we hope to continue to count among our valued customers in the future.

There will always be imports of seedlings, but there should also be some home production.

Very truly yours,

OTTO KATZENSTEIN & Co.

Atlanta, Ga.

REMEDIES FOR POTASH SHORTAGE.

Various suggestions have been made in regard to the steps to be taken by farmers in reference to the shortage of potash in their fertilizers, caused by the greatly reduced shipments of potash from Germany since the first of August. Most of the fertilizer companies have endeavored to make the potash on hand go as far as possible by selling for the present brands of complete fertilizers containing only 2 or 3 per cent of potash and withholding from sale brands containing larger amounts.

The suggestion that some or all of the potash be replaced by phosphoric acid is absurd, for every school boy knows that one plant food cannot take the place of another. There are some indirect fertilizers, such as lime, gypsum and salt that can release a limited amount of potash from some soils that contain hydrated silicates of alumina and potash. But if these soils have already been treated with lime or have received repeated dressings of the usual forms of fertilizer containing soluble phosphate with its

accompanying gypsum, then the potash in the hydrated silicates has to a large extent already been replaced and the use of more lime or gypsum or salt could not be expected to release much additional potash. Ground limestone or oyster shells act too slowly to be used as potash releasers.

The residue of soda left in the soil by nitrate of soda is more effective in releasing potash than is gypsum and hence goods in which the nitrogen is largely in the form of nitrate of soda, may have a special value in the present emergency.

It is often stated that decaying organic matter releases potash from the soil but there seems to be no direct evidence of this. On the contrary, Dr. S. Peacock states in the American Fertilizer of Sept. 5, 1914: "Several thoroughly competent researches have shown that decaying organic matter has little effect on converting inert mineral plant food in the soil into available form."

In any soil the amount of potash capable of being released by these indirect means is a very small fraction of the total potash in the soil, most of which exists in a form about as soluble as window glass. There is no known profitable method for rendering this inert potash of the soil available fast enough to provide for profitable crops. Whatever temporary expedients we may employ in the present emergency, we must keep in mind that the potash thus removed from the semi-available soil reserves must later be replaced if we are to maintain the soil's productiveness.

There is danger in the statement that farmers have been using an excess of potash. Crops use on the average about two and one-half times as much potash as phosphoric acid, while the average fertilizer sold contains only half as much potash as phosphoric acid; yet no one claims that we are using too much phosphoric acid. The potash remaining from previous fertilization is practically nothing except in the limited areas where a ton or more of fertilizer has been used per acre on truck crops. Very rarely is half as much potash applied to the wheat, oats, corn or cotton crop as the crop removes.

The potash mines are so numerous and the stocks on hand so large that supplies can be promptly sent forward, as soon as European conditions permit freight shipments to be resumed.

H. A. HUSTON

CLUBS AND SOCIETIES

LANCASTER COUNTY FLORISTS' CLUB.

Sept. 17th found a goodly number at the usual meeting place, to hear Chas. F. Edgar tell how to conduct the retail business and A. M. Herr tell of his trip to Boston as the sole representative of this club. In the discussion it was pretty unanimously agreed that we should support with more loyalty the work of the S. A. F. although this club has done I believe more than any other one club, by donating as a club a prize for the S. A. F. sporting events and giving \$10 toward the Smith Memorial.

In discussing Mr. Edgar's paper the question of price cutting seemed to take precedence and it was pretty well agreed that the selling of any article too cheap to the consuming public was neither advantageous to the buyer nor the seller, and that the sales of flowers were smaller in quantity where the price was cut than where a fair price was maintained. Getting from cut flowers to plants it was the consensus of opinion that the majority of growers did not know that their plants often cost more than they get for them and that with others the price is too close to the cost of production to make any allowance for the unavoidable misadventure our stock is sometimes subject to.

The Flower Show to be held in Lancaster Nov. 6th and 7th was freely discussed and as we are likely to get the entire building of the Heimenze Auditorium we anticipate plenty of room for a few trade exhibits to educate our public into the buying of some things they now do without. We are promised the cooperation of a number of the civic bodies and as Lancaster has not had a show for a number of years it is becoming almost a public event for the city.

The Programme Committee reported for next meeting a paper on Greenhouse Construction by Elmer J. Weaver, of Ronks, and a paper on Chrysanthemums by Willis Girvin of Leola.

The visiting committee reported a trip to see the new houses built by Willis Girvin of Leola, for Thursday, Oct. 15th, leaving the square at 3.30 P. M. and returning in time for the meeting in the evening.

ALBERT M. HERR.

AMERICAN DAHLIA SOCIETY.

The seed meeting of the dahlia enthusiasts for the purpose of adopting by-laws and regulations in connection with the new American Dahlia Society about to be formed, will take place at the Dahlia Show in the New York Botanical Gardens on Sept. 26 at 4 P. M.

I further wish to state that nearly forty charter members have already been enrolled and at the beginning of the society, which will be Jan. 1, not less than one hundred members are expected. The election of officers will take place in December, giving each charter member the opportunity to vote by mail, on a list submitted to them by me.

MAURICE FULD.

TEXAS NURSERYMEN'S ASSOCIATION.

The fifteenth annual meeting of the Texas Nurserymen's Association will be held in the Chamber of Commerce auditorium, Fort Worth, Oct. 14 and 15. Tentative program has been prepared by the committee on program, which consists of John S. Kerr, of Sherman, president; Will B. Munson, of Denison, vice-president, and J. M. Ramsey, of Austin, secretary-treasurer.

Following the address of welcome by J. B. Baker, of Fort Worth, a response by F. E. McGinnis, of Dallas, the president's address and the appointment of committees, these addresses on subjects of interest to Texas nurserymen are to be given:

"The Probable Effect of European Wars on Southwestern Tree Planting," J. R. Mayhew, Waxahatchie.

"The Most Important Subjects Solved at the National Convention of Nurserymen, in Cleveland Last June by Those Who Attended," J. B. Baker, C. C. Mayhew, W. B. Munson, John S. Kerr.

Special report of committee on State Botanical Garden for Texas, J. S. Kerr, chairman.

"In What Way Can Our Association Render a Better Service," Mr. Locke, Jr., New Braunfels; G. A. Schattenberg of Boerne.

"The Benefits to Our Citrus and Ornamental Industries Afforded by the New Freight Rate on Balled Evergreens," W. D. Griffing, Port Arthur.

"The Leading Classes and Varieties of Nursery Stock to Be Grown in the Lower Rio Grande Valley," Eltweed Pomeroy, Donna.

"In Case Burlap Becomes Prohibitive in Price and Supply, What Substitutes or Methods of Packing May Best Be Used," John F. Sneed, Tyler; C. C. Mayhew, Sherman.

"The Value of a Publicity Organization in the Education of the People in the Work of the Nurserymen," J. M. Ramsey, Austin; R. E. Hall, Sherman.

"Co-operation of the Florists and Nurserymen of Texas," R. C. Kerr of Houston, C. E. Papworth of Fort Worth.

NATIONAL ASSOCIATION OF GARDENERS.

At the summer meeting of the National Association of Gardeners, held in Boston, August 19th, 1914, a committee was appointed to draft a resolution conveying the sympathies of the members of the organization to the European horticulturists on the terrible calamity which has befallen them.

The committee reports its resolution as follows:

WHEREAS, Our fellowmen engaged in the pursuit of horticulture in its various phases in the European countries are now surrounded by the horrors of a terrible war, many of whom may be suffering from sorrowing anguish for loss of kin on the battlefields; be it

RESOLVED, That the members of the National Association of Gardeners convey to their brother horticulturists in Europe afflicted by the war, their heartfelt sympathies on the catastrophe which has so suddenly overtaken them; and that our prayer be that the Almighty God in His infinite wisdom will guide the instigators of the appalling conflict now raging, to a speedy termination of it, and to everlasting peace; be it further

RESOLVED, That copies of these resolutions be forwarded to the various national horticultural bodies in the several countries now at war, and spread on the records of the N. A. G.

WILLIAM N. CRAIG,
DUNCAN FINLAYSON,
MARTIN C. EBEL.

RHODE ISLAND HORTICULTURE SOCIETY.

The annual September show of the Rhode Island Horticulture Society, held in the parlors of the Mathewson Street M. E. Church, Sept. 15-16, Providence, R. I., was the most successful that the society has ever held. The attendance was the largest that ever attended a September show and the quality was superior to all previous exhibits. Features of the exhibition were the American Beauties from the Newport estate of R. Livingston Beekman, and the display of foliage plants from the William Appleton greenhouses. Both of these exhibits were not offered in competition, but the society awarded prizes on the same merits as in open competition. There were 48 exhibitors all told. H. V. Mayo exhibited a hybrid cactus dahlia of orange pink named Ethel Mayo. A seedling dahlia named Mrs. Sellow, yellow base, shading to scarlet, was entered by Arthur Sellow.

Most of the awards in the commercial growers' professional gardeners' class went to Sisson & Thurston, W. D. Hathaway, Lewis A. Jillson, G. H. Walker and A. E. Johnson.

On Wednesday, the closing evening, a lecture was given by Prof. C. F. Adams of the R. I. State College.

CLUB AND SOCIETY NOTES.

At the Newark (N. J.) Industrial Exposition Hahne & Co., had a handsome flower booth and orchids were a special attraction. The Newark Shade Tree Commission also had an attractive exhibit.

The Indiana State Florists' Association are making elaborate preparations for the reception of the Chrysanthemum Society of America on November 6, 7 and 8, at which time a superb exhibition will be staged free to the public at the German House, Indianapolis.

The fall show given by the Paterson (N. J.) Floricultural Society at the Second National Bank last week was a pronounced success, it being estimated that nearly 5,000 people visited the show. P. S. Van Melle of the landscape department of Bobbink & Atkins and R. B. Stoutenborough acted as judges.

An interesting exhibition of dahlias will be made at the Museum Building Botanical Garden, New York, in co-operation with the Horticultural Society of New York, on Saturday and Sunday, Sept. 26 and 27. There will be a discussion on "Dahlias" in the lecture hall at 2.30 P. M., and at 4 o'clock Dr. N. L. Britton will give a stereopticon lecture on Wild Flowers of Autumn.

The Fortieth Annual Exhibition of the Houghton Horticultural Society, at Odd Fellows' Hall, Lynn, Mass., last week was by far the best in the Society's history. The exhibits were in the main by amateurs, but Gibbs Bros., the florist, contributed a fine

HOUSE OF ARECA LUTESCENS, AT DREER'S, RIVERTON, N. J.

display and there were excellent dahlia groups by Wilbur Moon, E. F. Dwyer and other professionals and the A. W. Preston estate of Swampscott showed superb vegetables.

At the monthly meeting of the Nassau County Horticultural Society on Sept. 9th at Pembroke Hall, Glen Cove, N. Y., the judges for the monthly exhibits, J. W. Everitt, James Duthie and Angus McGregor, made awards as follows: Asters, Harry Jones; gladiolus, Alfred Walker; muskmelon, Geo. Ashworth. Cultural certificate to Harry Jones for a vase of gladiolus America. The schedule for the chrysanthemum show, Oct. 29th and 30th was read and adopted. John W. Everitt was appointed manager of the Dahlia Show to be held Tuesday, Oct. 6. Exhibits for next monthly meeting Oct. 14th—three bunches outdoor grapes in three varieties; twelve apples in two varieties and six pears one variety.

HARRY JONES, Cor. Sec'y.

Despite the war it is stated that horticulturists of Belgium, France, Holland, England and Ireland are proceeding swiftly with their plans for exhibits at the Panama-Pacific Exposition. The Netherlands has assembled the most extensive horticultural exhibit ever sent here from a foreign country. It will be placed in a garden 800 feet long and containing 52,500 square feet.

An increase in the horticultural exhibit space for Japan gives the Nipponese 8000 square feet for competitive plant and flower exhibits and displays of economical horticulture. The various Japanese exhibits in 1915 will be the most extensive ever sent out from that country.

Obituary

Mrs. Frank Zuber.

Mary Zuber, wife of Frank Zuber, florist, of Whitestone, N. Y., died on September 12, at the Long Island College Hospital, Brooklyn, following a long illness.

John McMichael.

John McMichael, for thirty years in the employ of C. B. Thompson & Co., florists, died on September 8, aged 47 years, at the Waverly Hill Hospital, Louisville, Ky. He was a plantsman and decorator of good repute and highly regarded by the trade of Louisville.

Peter J. Krug.

Peter J. Krug, retired florist, died September 17 at his home in Wallington, N. J. He was born in Liverpool, England, November 9, 1847, of German parentage, and came to America when a young man and started a greenhouse in Wallington. He fought through the Civil War with the Thirty-third New Jersey Volunteers.

Peter Bolander.

Peter Bolander, a well-known nurseryman, died at his home in Tippencanoe City, O., on September 8, aged 77 years. Mr. Bolander was born in Allenbaugh, Bavaria, of gardening ancestry and came to Dayton in 1843. He was looked upon as the father of the nursery business in that section and was one of the founders and ardent promoters of Arbor Day.

Otter River, Mass. Fred R. has bought of C. C. Speare two greenhouses, 23x125 and 25x123 respectively and will engage in cucumber forcing.

Thorburn's Seeds and Bulbs

To the Trade:

TO the Florist who depends for his profits upon reliability of his seeds and bulbs a bargain is not of the first importance.

Yet we often have an over stock of popular seeds and bulbs which we are able to supply below the market.

This Month We Particularly Recommend the Following:

Freesia Purity Bulbs

1 in. diam., 1 1/2 in. long
Per 100, \$2.00 Per 1000, \$10.00
Extra Mammoth Bulbs,
\$3.00 per 100

Refracta Alba

2 1/2 to 3 inch \$3.00 per 1000
1 1/2 to 2 1/2 inch 5.00 "
3 1/2 inch and upward 8.50 "

Pansy Seed

Finest Strains

	Per oz.

BODDINGTON'S "QUALITY" CHRISTMAS-FLOWERING SWEET PEAS WE ARE SUPER-HEADQUARTERS

All true stocks of Winter-flowering Sweet Peas will again be scarce this season. The winter-flowering Spencer types are almost a total failure owing to the exceptional season in California this Spring, and through the ravages of Aphids.

We regret that our stocks of YARRAWA and ANITA WEHRMAN are entirely exhausted, also many other good varieties, but we can still offer the following while stocks last. Order at once to avoid disappointment—remembering that our stocks are true to name and while a little higher in price, will save you money in the long run.

ROSE QUEEN "ROSE QUEEN" is Orchid-flowering, borne on long stems, extremely free and early and of pink color most attractive, is a decided acquisition, and like all meritorious novelties is sure to be in demand wherever grown. Prices: Trade pkt., \$1.00; 3 trade pkts. for \$2.75; 1 oz., \$12.00.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. M. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

Crop Report of Hjalmar Hartmann & Co., Copenhagen.

Sept. 1st, 1914.

Cauliflower. "Erfurter Dwarf." The earliest and later varieties will probably give normal crops, and as last year's crop was large and of high quality the stock will be ample.

"Danish Giant." This variety, which is developing slower, has suffered much from the continued drought in June-July. The crop will be very small, about one-quarter of the normal.

Cabbages will, as far as we can see, give generally a little below normal crop; still some varieties will give more, especially on places where the attacks of insects have not been so serious. The seed will no doubt be of good quality.

Sprouts have given a rich crop.

Carrots. The summer has been rather favorable for this crop, even if the drought will possibly somewhat effect the quantity. We count on an earlier crop, and consequently an extra fine quality.

Beets. The result of this culture is rather doubtful. The roots planted out came very late in growth, and have, on account of the drought in June-July only developed rather weak seed stalks. Later on there have been strong attacks of insects, which checks the formation of the seeds. After the rainy period in the end of July, the plants came in growth again, and the formation of the seeds has, therefore, taken place twice, which will retard the harvest very much, and the result of this culture is not very promising. We will try by harvesting the seed at different times to procure as full ripened a quality as possible.

Turnips. The harvest is finished and gives a normal crop of very high quality.

Radishes. The cultures have been much checked by the drought and following attacks of injurious insects. Later on rain caused a new growing period. The plants are now standing with partly ripened seed of first flowering, at the same time the second flowering is not over. The harvest of this culture will therefore be rather difficult, as it may take place at different times. We dare not count on more than half the crop.

Swedes. The harvest is finished under the best conditions. The crop, however, is only about half.

Mangolds. The plants have had a very difficult growing period caused by drought. Furthermore, there have been unusually strong attacks of insects. Later on the rain, however, had ameliorated the outlook considerably, and we hope that the crop will be only little below normal.

Other seed cultures especially those of which the flowering and seed formation took place early in the summer,

LILIUM FORMOSUM

We are in a position to supply specially selected stock of this favorite type of Easter Lilies. Our bulbs have been grown from the original true type and none better can be obtained at any price. We advise immediate ordering, as the stock is limited.

HENRY F. MICHELL CO. 518 Market Street, PHILADELPHIA, PA.

or after the dry period, will evidently give good crops. This includes grass seed, of which Denmark exports large quantities, and which, owing to the high purity, has gained the first place in the trade. The varieties which are grown here on a large scale are: Orchard Grass, Meadow Fescue Grass, as well as English and Italian Rye Grass and Rough Stalked Meadow Grass.

Westchester Pryde is an elegant little tomato as seen in a basket of sample fruit shown by Burnett Bros., New York, who are introducing it. In uniformity of color and form it leaves nothing to be desired. It is suitable for garden culture or forcing and is said to be very prolific.

NEW CORPORATIONS.

Milwaukee, Wis.—Milwaukee Seed Company, increasing capital stock from \$25,000 to \$50,000.

New Rochelle, N. Y.—Wade Nursery Company, capital stock \$2500. Directors, Thos. J. Wade, Susanna Wade, Jos. J. Taylor.

Duluth, Minn.—Greysolon Nursery Company, capital stock, \$50,000. Incorporators, C. E. Roe, Louis Christensen, E. R. Cobb, J. A. P. Neal and T. W. Walker.

The Board of Trustees of the Missouri Botanical Garden have sent out invitations for the celebration of the twenty-fifth anniversary of the garden, under the control of the trustees and as a public institution. It was planned to have a representative from every botanical garden of importance in the world. The elaborate program which had been arranged will have to be altered because of the European war. Many eminent botanists who had accepted a place on the program will be unable to attend.

NEWS NOTES.

Fairhaven, Mass.—James Garthley, superintendent of the H. H. Rogers estate and his assistants have been presented with checks in appreciation of their long services. The estate is to be dismantled and sold. Mr. Garthley has been on the place 26 years. He intends to go into commercial floriculture.

Poughkeepsie, N. Y.—That the violet growing industry in Dutchess county is on the increase is evidenced in the fact that John M. Ham and Walter M. Van Steenburgh have formed a partnership for the conducting of a violet raising business with headquarters at Red Hook. The firm will erect a number of new violet houses in Red Hook, and it is expected will have a large output.

**Of Interest to Retail
Florists****THE FLORISTS' BUSINESS FROM A
RETAILER'S POINT OF VIEW.**

(A Paper by Chas. F. Edgar before the
Lancaster (Pa.) Florists' Club.)

The retail florist of today, to make his business a paying proposition and be successful, must be original, artistic and up-to-the-minute, there having been so many changes in this particular line the past ten or twelve years.

In the olden times the customer who made a floral purchase would, nine times out of ten, have his mind made up as to about what he would want, but things have changed. Today it is strictly up to the one behind the counter to make the suggestion and the one who can suggest something out of the ordinary is one who will win out in the long run. Clusters, baskets and wreaths of the various forms are becoming more popular every day and must be worked up in many different combinations and color schemes. Then comes the corsage bouquet of numerous types made up for street wear and dances. Flowers for the sick are made very presentable by being put in a basket with a water receptacle or packed loose in a box. All of these suggestions are looked for from a striving retailer as the public is becoming more educated every day as to the varieties and keeping qualities of many cut flowers that are now grown.

The appearance of one's shop and the courtesy shown by the clerks carry great weight with the prospective buyer. In other words one must act as if nothing is a trouble to satisfy his customer. The window should be kept up-to-the-minute with seasonable stock and new ideas as to the uses of our productions, as this is the main advertising medium, and should not be neglected under any consideration. Then it is up to him to turn out the best workmanship possible and give a dollar's worth for a dollar.

Right here might come in the cutting of prices. I would not maintain that a uniform price is the "proper caper" but I do maintain that to cheapen the price because there is a surplus on the market is of no benefit to any one. The sales are not increased to any appreciable extent and the person buying them does not properly appreciate what they buy from the fact that they are a cut-price article. This could be enlarged upon indefinitely but I want it well discussed from the different points of view of our members here.

The retailer who does not grow his own flowers or plants and has to purchase all of his stock, must look to the commission man or grower for his main support, and in this case the grower should work with his commission man and keep him posted. The commission man can advise his retailer just what stock to purchase and push and by all working together in the so-called co-operative way we all derive benefit. This city is without a doubt the most up-to-date town for its size on the map, not only in our line but in all enterprises.

CHICAGO NOTES.

A. Ringier is again able to be at his office at W. W. Barnard's, after a severe illness.

At A. Lange's, customers leaving the store are presented with three roses which is a timely form of advertising.

Dearborn street has not been a particularly good street for florists but Ronsley, Florist, is starting there and his friends wish him success.

Paul Reissig will operate the Riverside Greenhouses for the owner, who has not succeeded in disposing of the property which he purchased in the settling of the Reissig estate.

As usual Poehlmann Bros are exhibiting at the Illinois State Fair at Springfield. August Poehlmann is representing the firm; G. A. Anderson, the plant department; and A. F. Longren, the supplies.

The new flower department at Marshall Field's failed to open this week. The installation of the fixtures which are of mahogany like the rest of the store, is progressing as rapidly as possible. Another department will also be operated in the basement.

The azalea and bulb situation is summed up by the large dealers in Chicago as a great source of annoyance. The bulb orders now seem to be filled in full and in addition this market is likely to be demoralized by having the stock which usually went to the warring countries, dumped upon it at prices much below contract rates. Most growers had given up azaleas and a big stock of other import plants planned for, but during the past week bills have begun to come in from stock already shipped.

The past week saw two openings on Wabash avenue. Harry Rowe Co. ask for both wholesale and retail patronage, and have a very light and commodious place on the ground floor at 160 N. Wabash. The retail salesroom is nearly square, a good shape for artistic arrangement and for convenience. The rear room is large and much of it double decked. Frank Potocka is already doing business but will have a more formal opening next Saturday. The Frank Co. is a wholesale commission house and its basement rooms at the corner of Wabash Ave. and Lake street are very light. Frank is well known and liked in the market.

BUSINESS TROUBLES.

F. C. Viereck, retail florist, Columbus, O., is reported in bankruptcy.

Houston, Texas.—Receivership proceedings have been instituted against the Alvin-Japanese Nursery Co.

WASHINGTON NOTES.

As a result of an explosion of gas in a conduit on Twenty-second street, a horse owned by Charles H. Merryman, which was standing directly over a manhole, was so badly hurt that it had to be shot and several persons narrowly escaped injury.

Frank Belgiano, son of the head of the firm of F. W. Belgiano & Co., met with quite a severe accident last week, his right wrist being broken while he was cranking his machine. He was assisted to his home and while his arm will remain in a sling for some time he will soon be able to be about.

The business of the Washington Florists' Exchange at 1214 F street, Northwest, has been taken over by the Leo Niessen Company of Philadelphia. At this store hereafter much larger stocks will be carried and an effort will be made to secure a share of the southern business. Negotiations have already been entered into for the supply of seasonable goods. Albert Schnell will remain at the store as its manager.

The growers in and around Washington are complaining of a difficulty in the production of dahlias this season. It seems that the plants grow to unseemly height, some Brutons nine feet high, and the flowers mature only in spots. One of the large growers states that after staking and tying his plants he was forced to repeat the operation and at that the branches filled up the alleys left between the rows. There are a large proportion of blind eyes and the buds seem to have been injured in some manner and the stalks are very brittle. The intense heat of the summer cannot be blamed for this condition for the past two weeks have been very cool and this should have brought the dahlias out in large quantities. The trouble is not with any one variety or grower, for complaints are coming from all directions.

Mr. and Mrs. W. F. Gude, George W. Hess, Supt. of the Botanic Gardens, F. V. Mulford of the Dept. of Agriculture, Mr. and Mrs. R. Vincent, Jr., of White Marsh, Md., Jesse King, Mt. Airy, Md., Robert Creager, Thurmont, Md., and Peter Groff, Frederick, Md., were among the members of the receiving party at the reception tendered by Frank Hargett, of Frederick, Md., to the visiting horticulturists on the occasion of the opening of an exhibition flower garden at his home in that city.

The reception and exhibition form a part of Mr. Hargett's campaign for a public park and flower garden, and to show just what could be done by the people of Frederick to beautify their city, the Department of Agriculture, the Botanic Gardens, Gude Bros., W. Atlee Burpee, Henry F. Michell, Robert Craig Co., Peter Henderson & Co., R. Vincent, Jr., & Sons Co., Conard & Jones, A. N. Pierson, Inc., David Groff, John Cook, Henry Bester & Sons, and Jesse P. King, made large contributions of plants and cut flowers. Each offering was neatly tagged to show the name of the donor. The grounds were attractively decorated with electric lights and in the center of the main display was an electric fountain. Refreshments were served throughout

the evening and more than two hundred guests enjoyed themselves to the utmost. The presentation of a handsome collection of dahlias by Mr. Vincent proved quite a surprise to Mr. Hargett and these were placed on exhibition in the latter's home.

Among the speakers were Milton O. Urner, of Frederick, who introduced Mr. Gude as the master of ceremonies, the latter giving a very interesting talk on the good work done by Mr. Hargett; Messrs. Vincent, Hess, Mulford, Bert W. Anspen, of Maryland Agricultural College, Dr. Joseph H. Apple, president of Hood College; Oliver Wrenn, Dr. C. T. Forester, and Prof. Sidney Stabler.

NEWS NOTES.

Indianapolis, Ind.—Following a dispute over a transfer, H. W. Reiman was knocked from a street car by the conductor and badly bruised and cut. The conductor was arrested on a charge of assault and battery.

Pittsburgh, Pa.—The McCallum Company, wholesale florists, suffered a loss of about \$1000 on their stock, in a fire which caused heavy damages in the block in which their store is located, on the night of September 15.

Grand Rapids, Mich.—The Wealthy Street Floral Company is building a conservatory for the better display of flowering plants. The building will be 63x20 feet and about 20 feet in height, with plate glass front and distinctly ornamental in design.

Waltham, Mass.—James T. Sillman, florist, undertook to crank a motor truck as it stood at the curb before his shop on September 23. But the clutch was on, and the car ran over him. But ten feet ahead, Wm. C. Howe was cranking his small car, when the truck, running wild, hit it in the rear. Mr. Howe was knocked down and both his own car and the truck passed over him. Howe is on the dangerous list. Sillman is bruised.

POOR RICHARD CLUB AT FORDHOOK FARM.

"Hark! Hark! the dogs do bark,
The beggars are coming to town;
Some in rags and some with gold,
And some in velvet gowns."
—(Old Ballad.)

The ancient and honorable body of mendicants, known to the layman under the pseudonym of the Poor Richard Club, descended in force upon the beautiful estate of Fordhook, overlooking the Neshaminy Valley, near Doylestown, to once more enjoy the hospitality of the Laird o' the Manor, Mr. W. Atlee Burpee, or know the reason why.

Mr. Burpee, instead of "Mounting barbed steed to affright his fearful adversaries," met the invaders at Burpee's crossing and after parley with Chief Kolb, induced him to have his cohorts lay down bill hooks and cross-bows and accept in lieu thereof the peaceful corn stalk. Thus equipped, and led by three stalwart pipers, arrayed in full Highland costume of the

house, and promptly bowled over the catcher. Soon every pumpkin was being sent hurtling down hill, bowling over players and spectators alike, and in all likelihood, pumpkin bowling will become a feature in future outings, but "I hae me doots."

After dinner, at which Mr. Burpee presided, an original poem was read by

Photo Taken in Mrs. Burpee's Old Fashioned Garden by Geo. W. Kott

Royal Stewart Clan, they were taken peacefully into camp, the long line of marching cornstalks making one think that "Birnham wood hath removed to Dunsinane."

After refreshments had been served, the captured and captivated Poor Richards were taken a tour of the Burpee Farms, preceded by the aforesaid leather-lunged pipers, who by the wild skirling of their pipes, conveyed to the astonished and affrighted nations that the "Richards were coming Oh Ho! Oh Ho! or something to that effect.

On the return the outfit was duly "mugged" as they say in polite police circles, after which an impromptu "tug-of-war" was "pulled" between the city-bred folk and the country-bred folk, resulting in the most ignominious defeat of the city-bred team.

This seemed to fire the athletic prowess of other Poor Richards and a baseball game was soon in progress. Some low-minded person, "crabbed" the game by seizing one of the pumpkins used in decorating the Manor

Optimist Hodges. An unanimous vote of thanks was conveyed to Mr. and Mrs. Burpee, through the medium of Mr. Thos. A. Daly, for the perfect hospitality extended to the club, Mr. Burpee replying in a few well chosen words, with an invitation to each member who had either sweetheart or wife to take home a basket of peaches. (It was noted that some members took two baskets.) The bachelors were privileged to carry home a pumpkin and served a drink of "Scotch."

The outing ended by every one joining in the song of

"Good night, Burpee
We are going to see you."

For which I make no doubt Mr. Burpee was duly grateful.

WILLIAM BURPEE

THE OLD GUARDS' ASSOCIATION.

There was a good turnout of the "Old Guard" at Waretown on the 18th, 19th and 20th and everybody had a good time. The weather was ideal, the fishing outside good and there

propeller of the "Emily" five miles out to sea; but the U. S. came bravely to the rescue. Coming down the lane from the Post Office to the bungalow some foreign spy planted a cedar tree right in the middle of the road, and in the dark a member bumped into it. Being English, he apologized first and swore afterwards. Much fun; some excitement; and noise enough to drown the everlasting boom and roar of the old Atlantic. The oldest and staidest of them acted like a lot of bairns out for play. Which is just exactly as it should be. 'Nuff sed.

G. C. WATSON.

Flower Market Reports

BOSTON The market has sustained quite a set back this week, for which the unseasonable hot weather must take the responsibility. Roses, carnations, asters, chrysanthemums, etc., are all being piled up in the wholesale marts with the prospects for moving them out appearing very slim. Roses are quite good, especially in the higher grades. Carnations are steadily improving in length of stem but require cooler weather before the flowers are up to class. Asters run small and poor and unless more favorable weather conditions are had they will soon quit the game. There are still some gladioli but there is little or no demand for them. The call for lily of the valley has dwindled this week. Altogether it is a very tame and uninteresting situation at present.

BUFFALO We have experienced a week of severe hot weather which has tended to keep the flower business down to some extent. The supply has been heavy on everything, but the heaviest part of the aster and gladiolus season has past and some improvement may soon be seen in the condition of the market. Roses of new crop are coming in heavy and don't carry well these hot days. The same with Beauties, though the Beauty sales were much better than a week previous. Lilies have shortened up and have finally got back to regular prices. It may be said that, considering the amount of stock that comes into the market, something is realized, though no fancy prices.

CHICAGO Busy days are getting to be a little closer together and all that florists need to make business lively is the killing off of the outdoor flowers. The summer has been a particularly favorable one to the home gardens and flower lovers can gratify their taste without the help of the florist. Fall openings are taking place at the big stores and social events are well under way. Clubs are again called to order and all means the use, more or less, of flowers. Roses are not any too plentiful, for the demand would hardly stand the top prices, and practically all sell. Carnations are doing the same and good stock brings a fair price. Asters are in the last chapters of a rather poor story. Early asters did not sell well. Mid-season asters were small and poor and late asters are competing with eastern stock which outclasses them. There are just about lilies enough. Lily of the valley is scarce and high. Chrysanthemums are fast gaining ground. Quite a variety are now coming, including fairly big ones. Comparatively few out of door flowers, excepting asters are offered. Smilax is seen in long heavy strings. All other green seems abundant.

CINCINNATI Warm weather for the past fortnight has brought in a heavy cut and over supply of flowers and a considerable depreciation in quality. Roses and asters were the worst offenders. The former came in with a rush and met with a very poor market; the latter showed the end of

the season's cut and was very heavy. Cosmos, up to this time, has been selling readily and bringing a higher price than during the corresponding period last year. Carnations are still limited in numbers and do not have the good market they would have were it not for the influx of asters. The cuts of longiflorum and rubrum lilies are large and fully able to take care of every call for them. Lily of the valley meets with a steady request. Orchids are in a limited supply. Dahlias sell better than before but do not as yet enjoy a good market. Gladioli are plentiful. Wild smilax has been finding particular favor because of the store openings.

NEW YORK A very sluggish market has followed the spurt of activity which in the latter part of last week led to hopes of a permanent improvement. The unusually hot weather for this date has accelerated production and at the same time affected the quality to such an extent that there has been an unwieldy surplus of material in the markets, much of it in poor condition, especially the roses. Cattleyas are coming in rapidly, very high quality flowers, but the demand for these regal blooms seems to have gone to pieces this season and it does not require many of them to clog the

Flower Market Reports

(Continued from page 465)

movement and break down the selling price. Oncidiums of fine finish are also abundant. Chrysanthemums are increasing and improving perceptibly. Asters are in wretched shape, due in part to the lack of rain for the past three weeks. If some first-class asters could be produced they would probably sell well, but the stuff now exposed for sale is despised by all. Dahlias, probably because of recent weather conditions, are the worst we have ever seen. A few gladioli are still coming in. Cosmos is quite plentiful. Lilies have reached a good equilibrium. It would appear from the color proportions of the roses now coming in that many growers have been planting the yellow varieties to a larger extent than ever before. It is a question whether they may not have overloaded the market on this color. A larger proportion of white than is now in evidence, would seem safer.

PHILADELPHIA

Business continues to improve a little, but it is not yet quite up to the standard. Roses are getting better in quality and the oversupply is not so prominent. Carnations are also very much improved both as to stem and flower and they are selling very well. Dahlias are not as plentiful as usual at this season, as they have had very little rain in the growing districts for some time. The flowers are very good but stems are short. The demand is excellent. Gladioli are practically over for the season and these cease to be a factor until the indoor stocks begin to arrive. Orchids are more plentiful and a good supply of excellent cattleyas are available at moderate prices. Vandas, dendrobiums and oncidiums are also to be had in limited quantity. The supply of the early chrysanthemums is below normal—very few to be seen around. Bronze hydrangea heads add a pleasing note to the list of decorative material and these are in good supply, as are also eulalia plumes, the latter very graceful and useful.

ST. LOUIS

A slight improvement was noticed, but very slight, in the early part of last week, but the time for good steady business has not yet arrived. To say that the market has been glutted for the past week is putting it mildly, and when we say prices are low we could use the same expression. Of roses in all varieties there have been so many of late that many thousands were sold for near nothing. Among the many outdoor flowers coming in now are dahlias, gladioli, asters, tuberoses and cosmos. The carnation crop promises to be heavy in a few weeks and business will have to pick up greatly to consume half of the stock that will crowd this market for the next month or so. Never before has the market been so crowded up and business so slow as this season so far.

WASHINGTON

Cosmos, tritomas and other fall flowers are beginning to glut the market to the exclusion of greenhouse products and it will not be long before they cause the shelving of the latter stock. As is usual this is a very dull period with the stores and

the increased competition of this sort of stock is not meeting with the approval of the dealers. Stock is coming into the market in better shape. Carnations do not amount to much but chrysanthemums are improving greatly. The smaller varieties of asters are shorter in supply and dahlias are scarce. Roses are beginning to take shape worthy of commendation, more especially American Beauty roses which can be had with stems four feet or more in length at \$3, with the price shading down to \$1.50 per dozen for the less desirable. Orchids, singles and sprays, are to be had in larger quantities and very fine qualities. Good cattleyas are bringing \$6 to \$7.50 per dozen, although the call is limited. Ferns are beginning to sell better and several of the stores are holding large sales of these at odd prices. Business is expected to improve considerable within the next week or ten days and the dealers and clerks are preparing for a strenuous fall and winter trade.

PHILADELPHIA NOTES.

Samuel S. Pennock and family have returned to Lansdowne after a month's sojourn at Christmas Cove, Me.

Otto Bauer, late of the Washington Florists' Co., will be the new manager of the Washington branch of the S. S. Pennock-Meehan Co. instead of Clarence Watson as at first reported. Mr. Bauer will enter on his new duties Oct. 1.

William Kleinheinz and John H. Dodds have the honor to report: back home from their European sojourns and on their jobs. Wm. F. Dreer is expected about the 26th—via Marseilles. Mr. Dreer lost his automobile on the border as he entered Switzerland.

The Truckers' Convention will be held in Horticultural Hall, Oct. 6 to 9 inclusive. The program of the convention is as follows: Tuesday, Oct. 6, morning, business session; address of welcome by Mayor Blankenburg and response by Dean Watts, of State College, president of the Vegetable Growers' Association. Afternoon, automobile trip to Bustleton produce district. Evening, public meeting and questionnaire, led by Professor Clyde L. King, of the University of Pennsylvania. Wednesday, morning, discussion of soil problems by Professor Jacob G. Lipman, director of the New Jersey Agricultural Experiment Station, and Dr. Oswald Schreiner, of the U. S. Department of Agriculture. Afternoon, trip to Bridgeton, N. J. Evening, annual banquet. Thursday, morning, discussion on cooperation, led by Professor Paul Work, N. Y. State College of Agriculture. Afternoon, election of officers and business session. Evening, public questionnaire, led by Professor King. Friday, morning, visit to Philadelphia markets, under the auspices of William H. Ball, chief of the Bureau of City Property. Afternoon, final business and adjournment.

Cincinnati, O.—A. C. Heckman, Jr., and Alex. Ostendarp, proprietors of the Cincinnati Cut Flower Exchange, have dissolved partnership. Mr. Ostendarp will continue the business under the same name.

WANTS, FOR SALE, Etc.**HELP WANTED**

WANTED: An Under Gardener wanted to tend garden and keep up lawns. Permanent position. Address "E. H. B." P. O. Box 1723, Boston, Mass.

WANTED: First class man to take charge of end of a nursery in Alberta, Canada. Address "Beaver," care HORTICULTURE PUBLISHING CO., Boston.

SITUATIONS WANTED

SITUATION WANTED: A young man, 21, with private estate experience and two years' agricultural college training, wishes a position as an assistant, manager or caretaker on an estate. Earning \$50 and found now as a gardener, but wishes to change on account of getting married. Address "A," care of HORTICULTURE, Boston, Mass.

WANTED: A responsible position by a competent young man experienced in greenhouse management and private estate work. Chance for advancement valued above salary at start. Massachusetts Agricultural College graduate who wishes to better his present position. Address "G. A.," care of HORTICULTURE.

YOUNG MAN experienced in the greenhouse business, seeks a position in charge of a small place. Will accept commissions on result of his work as part of pay. Address "S.," care HORTICULTURE.

EXPERIENCED GROWER of carnations, violets and pot plants, wants position. Ample recommendations. Address "R.," care HORTICULTURE.

FOR SALE**MUST BE SOLD AT ONCE.**

Large Greenhouse Plant and Farm. Only plant of its kind between Worcester and Springfield. Five greenhouses, central heating plant, steam, two boilers, 150 H. P. Excellent local markets. Modern barn and dwelling house, town water, electric lights, bath, steam heat, piazzas, etc., all buildings in perfect repair. Sandy loam, free from stones, one-third mile frontage on beautiful lake. Can sell shore lots to pay for place. Price \$10,000, part cash. Address

PINE-CROFT GREENHOUSES,
E. Brookfield, Mass.

BOILER FOR SALE

No. 11 Coatsville Heating Boiler; cast iron base, steel plate fire box. Capacity 4,000 sq. ft. direct steam radiation; 6,000 sq. ft. hot water. Been used but little; removed to place a larger size. Requires no brick work, can be placed in position and connected up as simply as a kitchen range. Length, 12 ft.; width, 38 inches; height, 63 inches. 41, 3-in. direct tubes; 21, 3-in. return tubes. Address "C. W.," care HORTICULTURE.

TO LEASE OR SELL.

Two Greenhouses, 5,000 sq. ft. glass, 2,000 Carnations, Violets and other plants. Good location, growing retail trade near cities, eight trains to Boston daily; dwelling house heated and plumbed, fine condition. Special inducements to early occupant. L. A. BOYNTON, Pepperell, Mass.

FOR SALE OR LEASE.

ADAPTATION OF PLANTS TO SOILS.

A paper by George E. Stone, Ph. D., Prof. of Botany, Mass. Agricultural College, and Physiologist and Pathologist of Mass. Agricultural Experiment Station. Read before S. A. F. at Boston.

The greatest advance in knowledge concerning the adaptation of crops to soils has been achieved through practice and experience rather than by means of field and laboratory studies of the soil. There are many conditions aside from the surface texture which play a part in this adaptation, such as the nature of the substratum, depth of water table, etc.; and some insight into the subject may also be had by studying the distribution of plants as given in any flora. Where a region has been settled for many generations and deforestation and agricultural practices have been carried on extensively, we find many changes in our soils and consequent modification of the flora. Some of the many factors determining the distribution of plants are complex and difficult to eliminate from other factors, and at present not enough is known about them to determine their real significance.

On soils which only a half century ago supported certain types of vegetation we now find an entirely different flora owing to changes in the nature of the soil; lack of humus contributing largely to this modification. Some plants such as the Canada thistle, were more common forty years ago in some locations than at present, while some other plants which have been growing for some time under cultivation have recently escaped and become pests. It would naturally be supposed that this is due to a change in the environment, such as soil conditions or source of seed. But whether there is in plants as in races of men, a tendency to aggressiveness which sometimes unaccountably breaks out although usually lying dormant, we will not venture to say; still there is some evidence to support such a theory.

Some plants are confined to bogs, some to sandy soils, and others to heavy, compact soils, and many are adapted to a great variety of conditions. Others are limited to salt marshes, and still others to territory within a few miles of the seacoast. Elevation, humus and soil moisture play an important role in plant distribution, and some plants are restricted by what is termed "seed habit," the seeds of certain species retaining their germinating capacity for some time and others for only a few weeks or even days. For instance, the seeds of the willow, poplar, alder and other species native to wet locations remain viable only a few days or weeks, while others will do so for ten to twenty-five or more years. Seeds with a limited term of viability must therefore find suitable conditions for germination during this time, while the others can afford to await their opportunity.

Most garden seeds require a minimum of 2 to 3 per cent. of soil moisture to germinate at all, and for the best germination a higher percentage is required; therefore during dry seasons the seeds of some crops fail to catch. Purslane and pigweed seed,

however, will germinate with a very small amount of soil moisture and flourish when more desirable plants will not; therefore during drought periods we find purslane overrunning gardens and pigweed completely monopolizing newly sown lawns.

The percentage of air in soils plays its part in plant adaptation, as do also the chemical constituents and biological characters. The soil texture or mechanical properties, which are inseparably connected with the air and moisture of the soil, together with the capillarity, etc., are also very important factors in crop production and plant distribution. It should be stated, however, that the specific effect on plant distribution of any one of the factors mentioned is not known; still a great deal is known concerning the effects of chemical constituents on plants, much more study having been given to this subject. Soil differs materially in its chemical composition and mechanical properties, and the configuration of the plant is greatly modified by the different types. Even in a small territory there are characteristic variations in the soil which are of sufficient importance to justify specialization in farming.

The river valleys furnish typical soils adapted to the growth of special crops, the meteorological conditions of these localities also emphasizing the individual character of the crops. The coarse and more friable soils of the Atlantic seacoast (truck soils) are light and porous and are used largely for such market garden crops as lettuce, cucumbers, tomatoes, radishes, etc. The soil characteristic of the Boston district is admirably adapted to truck farming, being very loose and easily worked. It is especially adapted to head lettuce, which is grown more skilfully and successfully in that region than anywhere else. The texture of such a soil is characterized by a predominance of the coarser particles and a relatively small amount of the finer materials such as silts and clay. Except in some few localities the interior soils are not well adapted to the growth of head lettuce; therefore the curly or open type is grown in the heavier and more compact soils of the Middle West. In all its stages head lettuce requires a loose textured soil for perfect development. These soils are manured heavily year after year, and in the greenhouse are never changed; and the large amount of organic matter furnished by the decomposed horse manure renders the soil even better adapted to this particular crop.

A more compact soil is a Connecticut Valley soil, characterized by the large amount of very fine sand and silt. This soil has long been devoted to the growth of tobacco, onions and cucumbers and to some extent, melons. It contains little organic matter since commercial fertilizers are used entirely. The soil may even vary somewhat in its texture in a limited region, and this variation will alone affect the quality and value of a tobacco crop to a considerable degree, and onions to a less extent. The warmer, coarser textured soils are well adapted to melon culture, the crop growing vigorously and maturing early, with less liability to infection from blights, etc.

Asparagus is grown largely in some

sections in very dry, coarse soils having little water retaining capacity although not especially adapted to these conditions. The finer textured soils are much superior for asparagus, which sometimes yields at the rate of \$1,000 per acre. Besides, in light, sandy soils this crop suffers much more severely from rust than in the finer textured soils.

The florist must also consider his soil seriously to obtain the best results. The potting bed soil is usually a coarse soil, well supplied with organic matter to insure looseness of texture. Most plants respond more quickly in a loose textured soil than in one of fine texture because more air can be supplied to the roots, although seeds germinate better and the seedlings make better growth when the soil is slightly compacted. The total exclusion of air from seeds, however, as shown by experiments with a vacuum, prevent germination. A close textured soil tends to have this same effect, depending upon the nature of the seed as well as upon the amount of air received; therefore it becomes necessary to take into account the depth of the planting of seeds in practical agriculture. Certain seeds and plants are much more susceptible to air than others, and artificial aeration of soil is often beneficial. In one experiment where 1500 lettuce seeds were sown in two boxes, in one of which the soil was aerated for a few hours each day, there was a gain of 20 per cent. in germination and 46 per cent. of growth of seedlings in the aerated soil.

Lettuce or white clover seed planted in a close textured soil that has been firmly tamped will fail to germinate at all, while such seeds as plantain will germinate quite freely under the same conditions, showing that the plantain is better adapted to a close textured soil than the other seeds mentioned.

In the more intensive agriculture of the future, aeration of the soil may become practical. Aeration affects the respiration process in seed germination and increases growth, besides having a beneficial effect on the micro-organisms of the soil, which play an important role in soil fertility.

Of the florists' crops which are affected by variations in soil texture, the rose furnishes one of the best examples. This crop requires a heavy, fine textured soil for its best development.

In the Arlington soil, a typical truck garden soil, the coarser particles total 39.15 per cent. and the finer particles, 40.25 per cent. The best rose soils appear to be those possessing 8 to 12 per cent. or more of clay and which are well supplied with other grades of finer particles. The percentage of the very fine sand, silt and clay usually exceeds 75 per cent. in an ideal rose soil, but just how important are the clay and the two grades of silt and very fine sand in making up such a soil cannot at present be determined.

There are many native species of plants which show an adaptation to soil texture, and many species which are confined strictly to certain types of soils. We have our dry sandy soil species; also those dependent upon humus, but the latter type is continually disappearing in some localities. Variations in the chemical constitu-

LEMON OIL CO'S STANDARD SOLUBLE IN WATER INSECTICIDE NO ODOR NO POISON

Guaranteed under the Insecticide Act, 1910. Series No. 321
Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, Insects on Rosebushes, Carnations, etc., without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

Directions on every package

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt.

Sacks, at:

\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

ents also affect the distribution of species.

The chemical and biological properties of the soil constitute more important factors in plant growth than mechanical properties; but this phase of the subject is so extremely complex, notwithstanding the immense amount of research given to it, that the subject is very far from being exhausted.

All greenhouse soils contain more or less large quantities of plant food, and in all soils various subsidiary constituents and admixtures which plants can use, are found. It is possible, therefore, to grow good crops in most soils for years without the use of fertilizers or manures providing they have constant tillage.

The micro-organisms of the soil also play a most important role. In general, the richer the soil, the larger the number of micro-organisms found. Tillage stimulates bacterial activity, and the various modifications which these innumerable small soil organisms bring about in the soil are very complex and understood only in a general way. It is known that they decompose various substances in the soil; that some of them accomplish nitrogen fixation, some de-nitrification and others are nitrifying organisms. Besides the presence of a large bacterial flora in soils—the number of bacteria sometimes exceeding millions to the cubic centimeter—numerous forms of fungi may be found, besides algae and various types of active animal life. In a medium containing such a vast number of different types of organisms much antagonism and a severe struggle for existence necessarily exist. It is also known that many chemical substances such as formalin, carbon bisulfid, etc., affect the organisms in the soil and also act as a general stimulus to plants. Volatile chemical substances have a direct stimulative effect on the crops and in some cases probably improve soil conditions by destroying antagonistic species. In the same way soil sterilization produces exceptionally fine crops. Soils, however, differ so greatly in different localities that while some are greatly benefited by steaming, others are affected unfavorably by this process. It is known that the process of steaming soils to 212° F. greatly modifies their chemical composition, and in some cases produces toxic substances which act injuriously

to the crop. Russell and Darbishire found that crops obtain three times as much nitrogen and twice as much phosphoric acid and potash from steamed as from unsteamed soil. Steaming has a similar effect to aeration from the fact that an exchange of gases takes place.

(To be continued)

WHAT CONVENTIONS DO.

In a little talk before the Lancaster (Pa.) Florists' Club, A. M. Herr said some nice things about the Boston Convention and the Boston florists. He expressed especial appreciation of the glad hand that was extended to the visitors as they stepped from the gang plank of the steamer and thus corroborated the many testimonials to the efficiency of the committees entrusted with this work. In the Convention Garden he was particularly impressed with the two new geraniums My Maryland and Scarlet Bedder and the exhibition by the Massachusetts Horticultural Society in Horticultural Hall was a revelation. In chiding his fellow members for having neglected the opportunity to see these evidences of advanced horticulture he said that in taking advantage of these things "you get your subconscious mind filled with ideas that come out during the year into your working brain, and you get that accumulation of bile off your liver that has gathered there the preceding year through disappointments and too close application to work."

Garage and Greenhouse Combinations on N. D. B. Bonbright's Grounds at Rochester, N. Y.

Greenhouse and Garage Combinations Their Practical Side

ECONOMY was the first factor that prompted the linking of the two. Economy in construction. Economy in heating. There is always a saving when buildings for differing purposes can be adjoined when constructed. There's a saving in both labor and materials. No garage is complete that is not heated. The greenhouse, of course, must be; so the one heating plant answers the purpose of both, with much less coal consumption than for separate plants. Then there also enters the advantage of grouping your building as compactly as possible; and the planning for their location and treatment, so the least future alteration of your ground layout will be necessary—another economy well worth considering. In addition to the building and equipping of the green-

house, we will also erect the workroom and garage, and fully equip either or both, if you wish.

If you already have a garage and want us to build a workroom and greenhouse to adjoin it, we will be glad to do that for you.

All the materials are so far as possible prepared at our factory, so they will go together on your grounds quickly. This is particularly the case with the greenhouse.

Perhaps quite the most satisfactory way is to give us a blanket contract covering all the work, and then you can hold us responsible for everything. It simplifies matters and generally works out satisfactorily to all.

Before coming to any direct conclusion, however, it would be well to let us go into the details with you thoroughly. "We go anywhere for business." Or to talk business.

The workroom for the greenhouse should always be placed between it and the garage, so that the gasoline and oil fumes will not reach the plants. The cellar for the heating plant ought to be under the workroom so there will be no possibility of gasoline leaking down and becoming ignited.

Subscription, \$1.00.

Two Valuable Ferns

Asplenium Nidus Avis— The Bird's-Nest Fern And Cibotium Schiedeii— The Mexican Tree Fern

Having a larger stock of these two useful good selling varieties than we can conveniently find room for we are offering the sizes noted below at special prices to close out quickly. This is a prime lot of perfectly healthy plants in the best possible shape.

Asplenium Nidus Avis

2 1/2 inch pots... \$1.50 per dozen; \$10.00 per 100; \$ 90.00 per 1000
4 inch pots... 3.50 per dozen; 25.00 per 100; 200.00 per 1000

Cibotium Schiedeii

3-inch pots, fine single crowns... \$3.50 per doz.; \$25.00 per 100
5-inch pots, double and triple... 6.00 per doz.; 50.00 per 100

Pteris Parkeri

Another valuable decorative Fern of recent introduction.

4-inch pots... \$2.00 per dozen; \$15.00 per 100
6-inch pots... 4.50 per dozen; 35.00 per 100

Asplenium Nidus Avis. Bird's Nest Fern.

FERN FLATS

The following varieties can now be supplied in flats of about two hundred plants each at \$2.00 per flat. This is fine strong thrifty stock just in prime condition for potting and will make saleable pot plants quickly.

Adiantum Cuneatum
Aspidium Thuscumense
Blechnum Braziliense
Cytosium Tortuosa
Cytosium Crystallinum

Onychium Japonicum

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Adiantums

Now that the roots have become active through the bench adiantums should have a top dressing of good loam and well decayed cow manure equal parts. Give about half an inch at a time, and repeat about every six weeks. They will be better to have some artificial heat right along now. While these ferns like plenty of water at the roots the beds should not be in a saturated condition all the time. Make it a point to guard against extremes either way. They like a temperature of from 55 to 60 degrees at night.

Cyclamen for the Holidays

Around Thanksgiving and Christmas there is always a good demand for nicely flowered cyclamen. It is sometimes hard to have them heavily flowered at Thanksgiving, but where they have ten or twelve blooms open and backed up with good foliage they will find a buyer. Plants intended for early flowering should now be removed from the frame to a light and airy house. Do not keep them any higher than from 50 to 53 degrees at night, otherwise they will only draw and spindle up. After the middle of October they will not require any shading, excepting perhaps during a spell of exceptionally warm weather, in which case a little cheese cloth can be hung over them. On all good days give free ventilation, and when the pots are full of roots give them weak manure water once a week.

Care of Poinsettias

Do the watering early in the day so the house does not contain an excess of moisture at sunset. Avoid a stuffy atmosphere over night and keep the house just a little over 56 degrees. While the poinsettia is a greenhouse plant, it would be wrong to turn on too much heat at present. More poinsettias are spoiled during the months of October than before or after, by either overdoing the firing or waiting before firing until the stock suffers. One is as bad as the other. Attend to the staking and keep the stems straight for any other are worthless. Plants that have been grown in pots or pans long enough to be pot-bound or partly so appreciate an occasional dose of liquid cow manure and seem to prefer this to any other food I know of, so let them have it.

Mr. Farrell's next notes will be on the following: *Ardisia Crenulata*; *Orchids*; *Propagating*; *Preparing Fields for Next Year*; *Propagation*; *Potting Evergreens for Winter*.

Carnations

There will be many nights in the next few weeks when you will have to run steam around and keep the ventilators up a little. An experienced man will know how far to go with this. It would be wasteful to keep the steam around all night and keep the ventilators up six inches. Open them about an inch or two and then run the steam around often enough to keep the temperature right. On a damp night this will be better than to allow the temperature to drop very low. Supports should now be in place, the beds all mulched and everything in trim condition. When there is lots of sunlight they will want plenty of water and plenty of fresh air, but when the sun hides its face the plants grow slower, evaporation is slower and less water is needed. Fresh air is always beneficial, as it helps to keep the growth from becoming soft.

Shrubs For Forcing

Now is a good time to lift and pot all such shrubs as deutzia, spiraea, Japan quince, snowball, flowering almond, forsythia, lilacs, etc. Use just as small pots as will conveniently hold the roots, and be sure to use sufficient crocks in the pots so as to make good drainage. Potted now they will have sufficient time to make new roots before hard weather. Give them shade for about a week, after which they can stand in full sun. The only care they will need is some water and a syringing now and again. They can stand outside until there is danger of the pots breaking when they should be placed in some deep frame or pit, with some protection until wanted for forcing.

Fancy Leaved Caladiums

Withhold water from day to day from the caladiums, a little at a time until they have shed all their leaves. Do not place them in a cool house. They should have a temperature of not less than 60 degrees. When they have thoroughly ripened they can be placed in sand and put away in a dry place in the same temperature mentioned above. See that they are all newly labeled before storing away.

which these species are susceptible. To the excluded pines are now likely to be added the Scotch *P. sylvestris*, the Austrian *P. austriaca*, the Swiss Stone, *P. Cembra*, and the Swiss *P. Mughus* because of a newly discovered insect which attacks them. The larva is translucent brown with black head and thorax. This grub, *Evetria busliana* is found eating the buds in late summer and causing distorted growth. We have not yet heard of any proven remedy but it looks as if the raising of young stock of all the aforementioned species might become a quite remunerative industry in this country under the impetus of the foreign exclusion. Most of them are easily raised and the white pine especially is a very rapid grower, while there is absolutely no possibility of its being overdone. The Austrian, Scotch and *Mughus* are splendid for bleak seaside planting.

The secretary of the Horticultural Society of New York, in his description of the more interesting features of the recent exhibition of dahlias in New York City, refers approvingly to the innovation by one exhibitor who was not content to display the blooms in the customary formal manner but sought to make an artistic arrangement, blending the flowers and autumn foliage in effective harmonious groupings. This is in line with what HORTICULTURE has been preaching year after year and indicates clearly the lines which in our opinion must be followed in the further advancement and popularizing of all flower exhibitions. We fully agree with our correspondent that "it is surprising that the dahlia is not more frequently thus displayed." Not only the dahlia but the chrysanthemum, the carnation, the sweet pea, the rose and, in fact, the whole list of exhibition favorites might be enumerated as suffering for lack of just such attention. A very similar note will be found in the account of the New Bedford exhibition in this paper. The subject here brought forward is a vital one and the suggestions made by these writers are emphatically worthy of careful reading and thoughtful consideration by all who desire to see floriculture flourish through the dissemination of a better knowledge of the use of flowers and their arrangement.

If a man's trade has fallen off from normal volume or compares unfavorably in any way with that of the corresponding period last year he is not necessarily a pessimist if he should so declare. Should he, however, allow this fact to dishearten him and influence him to the conclusion that because of this the future is so dubious that he must relax his business activities and cut down his advertising "expenses," then he becomes a pessimist with suicidal tendencies. To recover lost ground in a time of diminished business there is no means so effectual as courageous, well-directed advertising. Whatever may be the cost of this it is an investment rather than an expense and, although the curtailment of expense accounts is a most excellent

It is generally known that the government has forbidden the importation of Pines as a home product into this country of the white pine *P. strobus* and the Japanese *P. parviflora* on account of the disease known as white blister to

Hardy Garden Pinks

The American florist holds the record of world's leadership in originating and growing the most perfect type of *Dianthus*, the greenhouse carnation of today. Of late, we notice an ever-increasing popularity of hardy garden pinks, particularly of the old-time *Dianthus plumarius* varieties, and they again begin to fill our garden atmosphere with that sweet fragrance our ancestors used to love. Aside from the single and double seedling plants in endless shades and tints conditions are turning our interest in the direction of distinct varieties. As such I mention Her Majesty, Diamond and Snow in pure white; Elsie in bright rose with maroon center; Juliette, white, laced crimson; Homer, rosy red with dark center, and William Hooper fringed white with purple lacings. Of comparatively low bushy growth their free flowering habit and diversity in colors gives us a chance to employ them on borders, particularly in cases where variety is desired.

The choicest material in this class producing perfect flowers in clear solid shades has been sent over to us from Germany. I wish to call special attention to the novelties: Bavaria, distinguished by a compact bushy growth and its abundance of delicate rosy-lilac flowers; Gloriosa in wonderful lilac mauve and Delicata producing large blossoms of a very attractive pale silvery mauve of remarkable lustre. For edging the straight border lines of formal gardens they remain unexcelled. Approaching the long even banks of those soft rosy-mauve flowers we find very few bursted calyxes. The bursted calyx, as the experienced of my readers know, is the weak point of some of the older double varieties of *Dianthus plumarius*. Distinct shades of this type of hardy garden pinks cannot be obtained by raising stock from seed. The consequence is we have to propagate by cuttings. With the importance of clear solid shades in first class floral garden effects in mind, the craftsman familiar with the practical part of growing the stock has the advantage. A perfect line of the new hardy garden pinks Delicata and Gloriosa in full flower is not only an object of rare beauty, but will be booked on the credit page of the grower or originator by his customer or employer.

In conclusion I wish to say a few words in favor of the diminutive class of mountain pinks. A low creeping, sometimes dense cushion-like growth, during May

Dianthus deltooides
Dianthus deltooides

and June bedecked with legions of charming little blossoms, sweetly fragrant, are the characteristics they have in common. As a rule designers of rock gardens treasure them highly. One of the prettiest in this class is *Dianthus deltooides*, depicted in the accompanying illustration. The blossoms of the original *deltooides* are carmine rose; the variety *deltooides albus* appears in pure white. *Dianthus caesius*, a species with glaucous foliage and a great abundance of very attractive pink blossoms, and *Dianthus alpinus*, in two distinct colors, red and white, draw attention at a glance. *Dianthus neglectus*, a compact growing species from the mountain regions of Central Europe, adorned with carmine red flowers and *Dianthus fragrans*, a very free pink bloomer hailing from the high altitudes of the Caucasus, complete the list of the best known rock garden pinks in cultivation.

The rock garden in its advanced state offers the widest scope for the enjoyment of the greatest variety in hardy perennials. True, it is with us in America still in its infancy, but we may rest assured that sooner or later we will be put to test, both as builders and as caretakers. As horticulturists we should be the first to welcome the revival of popular interest in hardy garden pinks. The renewal of our acquaintance with the both charming and interesting Alpine class means to prepare ourselves for near exigencies.

Richard Rötter

Gilenside, Pa.

medicine to administer when business begins to wane, to cut off advertising at such a time would simply tend to aggravate the trouble. We have talked with many representative men in various branches of the trade and find a wide divergence of opinion as regards the outlook for business this season and the causes for its falling off where such is the case. We are glad to find an almost uniform conviction that the trouble abroad will eventually serve to help and not to injure our business here. It is up to ourselves, largely, how soon this improvement shall come. It is right at our doors and we can accel-

erate it greatly by going out after it. The tendency generally for some time past has been to allow stocks to become depleted so it is reasonable to expect some good buying in the near future. Those dealers who keep their offers persistently before the trade will get the lion's share of this when it arrives.

"Here's to advertising, youngest of the arts;
Born of noble parents, in the world's great marts;
Lubricating business, champion of success;
There's no substitution, for our craft—we guess."

From "Poor Richard at Fordhook."

ARNOLD ARBORETUM BULLETIN No. 62.

The flowers of woody plants are not common in this climate at the end of September, but visitors to the Arboretum will still find a few interesting plants in bloom. The most conspicuous, perhaps, is the Manchurian and north China *Aralia chinensis*. It is a near relative of the so-called Hercules' Club (*Aralia spinosa*) of our southern woods and, like the American plant, it has stems covered with prickles, large, compound, dark green leaves, and immense clusters of small white flowers which are followed by small shining black fruits. The American plant is not quite as hardy as its Asiatic relative, but it is now well established here. The plants are just past flowering.

The Japanese *Hydrangea paniculata* and its monstrous form, on which all the flowers are sterile (var. *grandiflora*) are in bloom. The latter is one of the most generally planted shrubs in the United States, although it is a much less interesting and less beautiful plant than the still comparatively little known normal form. In the Shrub Collection, too, the handsome *Elsholtzia stauntonii* is in full flower and now at its best. This member of the Mint Family, and a native of northeastern Asia, has long erect spikes of rosy pink flowers and light green foliage. One of the comparatively recent introductions of the Arboretum, it is only beginning to appear in American and European gardens. Near it *Viter incisa* from northern China is in flower. Although this plant is a native of a cold region the stems are often killed back to the ground here in severe winters, but as new stems grow several feet tall during the season, and as the flowers are produced on the new growth, this killing back improves rather than injures the flowering of this shrub which at this time of the year is attractive with its finely divided leaves and slender erect clusters of small rose-colored flowers. The flowers of the true Heathers (*Calluna*) have already passed but flowers may still be seen on the Cornish Heath, *Erica vagans*, and the Trumpet Creepers from the central and southern states are still producing flowers.

Small plants of *Gordonia altamaha* are now in bloom and during several weeks will continue to open their white cup-shaped flowers which resemble those of a single-flowered Camellia. This tree is a native of southern Georgia where it was discovered late in the eighteenth century. Although often hunted for, it has not been seen growing wild for more than a hundred years, and has only been preserved by the cultivated descendants of the plants introduced by its early discoverers. This *Gordonia* flourishes in the neighborhood of Philadelphia but it is not very hardy in the Arboretum, and it is surprising that it was uninjured by the severity of last winter which destroyed so many hardier plants. *Indigofera amblyantha* which has been in flower for nearly three months, still continues to produce its slender erect spikes of rose-colored flowers. This is one of Wilson's discoveries in western China and

one of the most beautiful of the small hardy shrubs of recent introduction.

The name *Ulmus campestris* has been selected by recent writers on European trees for the Elm of the hedge rows of southern England, which was largely planted a century ago in eastern Massachusetts chiefly, no doubt, through the agency of a Major Paddock who established a nursery of this tree in Milton. The large English Elms which once flourished on Boston Common were of this species, and large specimens can still be seen in several of the Boston suburbs. The origin of this Elm is unknown. It does not produce seeds propagating itself by suckers, and is known to grow spontaneously only in some of the countries in southern England, and in a few parks near Madrid, in which it is now known to have been introduced from England many years ago. It is a noble tree, able to adapt itself to various climatic conditions, and well suited to those of New England; indeed no other exotic tree, with the exception of the European White Willow, has been here so long or grown to such a large size. Another English Elm, *Ulmus vegeta*, usually called the Huntington Elm, a supposed natural hybrid between two European species, *Ulmus nitens* and *U. glabra*, the so-called Scotch Elm, grows to a larger size than *Ulmus campestris* and is perhaps the fastest growing of all Elm trees. An Elm of this kind in the deer park of Magdalen College at Oxford, supposed to have been planted at the time of the Restoration, was blown down in April, 1911; it was one hundred and forty-two feet high, with a trunk circumference at four feet from the ground of twenty-seven feet. This was believed to be the largest tree in Great Britain and perhaps in Europe. *Ulmus vegeta* is a tree with paler bark than that of *Ulmus campestris*, large main branches spreading at narrow angles, giving the tree a vase-shaped form, rather pendulous branchlets and larger leaves than those of *Ulmus campestris*, and usually only slightly roughened on the upper surface. This tree is not rare in English parks and has been largely planted in Cambridge-shire where in the neighborhood of Cambridge there are many fine specimens. Brooklands Avenue in that city planted with this tree in 1830, shows its value for such planting, for in all England there is perhaps not a better example of an avenue of planted trees. The Huntington Elm was certainly introduced into New England much later than *Ulmus campestris*, and probably the oldest trees here are not more than sixty or seventy years old. This Elm is perfectly hardy here, it grows with surprising rapidity, and if exotic Elms are to be planted in the United States it may well be more generally used here than it has been.

Persons interested in the plants best suited for the parks and gardens of eastern North America can find much to learn in the Arboretum from this time until the end of the year, for it is the autumn that conifers are seen to the best advantage and that the mature leaves of the few broad-leaved evergreens which flourish in this climate best show the beauty and value

of these plants for the late autumn and winter garden. Perhaps nowhere else are so many different plants with brilliant autumn foliage and handsome and abundant autumn fruits assembled; and in no other garden can such plants be so easily and conveniently studied. Such plants give a character and beauty to the autumn garden which can be found only in eastern North America, and perhaps in Japan where the leaves of many of the native trees and shrubs assume brilliant colors before they fall.

The autumn color of a few plants is already brilliant. The earliest of the American trees to change the color of its leaves is the Red or Scarlet Maple, *Acer rubrum*. On specimens of this tree growing in swamps the leaves are now often bright scarlet, while on trees growing on higher and drier ground the leaves are still bright green or only slightly tinged with red. The so-called Water Willow, *Decodon verticillatus*, often known as Nesaea, is a native of all the region from Maine to Florida and Louisiana, and is a shrub with arching stems growing only in the wet, often submerged borders of streams and ponds where it often spreads into broad thickets. By the borders of the ponds in the Arboretum the leaves of this plant are already bright scarlet, and for a few weeks the plants will be conspicuous among the green sedges and swamp grasses with which they are associated.

The leaves of some of the forms of the so-called Virginia Creeper of eastern North America are already bright scarlet. The earliest to adopt its autumn dress and now in brilliant color is *Parthenocissus vitacea*. This plant rarely has adhesive discs at the ends of the tendrils, and therefore cannot attach itself to the trunks of trees or to brick and stone walls, like *Parthenocissus quinquefolia* which is often sold in nurseries as *Ampelopsis Englemanni*.

A few of the fruits which ripen in early autumn are already conspicuous. There is perhaps no shrub more beautiful in the autumn than one of the American Cornels, *Cornus rugosa*, or as it is sometimes called, *C. circinata*. It is a tall, broad, round-headed shrub with greenish branches and round, oval, dark green leaves; the flowers are not more showy than those of the other Cornels, but the clusters of light blue fruits on red stalks make them objects of much interest and beauty. The red Osier Cornel, *Cornus racemosa*, often called *C. stolonifera* or *C. candidissima* is also beautiful at this season, for the leaves are beginning to turn dark red and the plants are covered with abundant clusters of white fruits on bright red stalks. This plant has been largely used in the Arboretum; it spreads rapidly into large, dense clusters, and with its good foliage, abundant flowers and beautiful fruits, few shrubs are more desirable for park and roadside plantations.

The fruit of some of the new Chinese Cotoneasters is handsome and the autumn coloring of their foliage is often splendid. Most of these plants are perfectly hardy, and among them are certainly some of the most valuable garden shrubs of recent introduction.

HOLLYHOCKS.

To the Editor of HORTICULTURE:

I was very much interested in what Reverend C. S. Harrison had to say in a recent issue of HORTICULTURE about that useful biennial which heads these notes. Mr. Harrison did not say what was the percentage of those varieties of Hollyhocks which he has been raising from seed, which did not come true. This would have been interesting.

The reason I am writing at this time on this subject, is because my experience has been quite different; indeed, quite the opposite to Mr. Harrison's. For instance, we have quite a dozen varieties which came practically true to color and type, and this goes to show that W. Atlee Burpee & Co., have trained their Hollyhocks in the way they should go. It all depends, of course, where these stocks come from.

For my own gratification, I am this year securing seed from an entirely different source, for the purpose of comparing them with the stock that W. Atlee Burpee & Co. are growing out on their "Floradale" Seed Farm in California.

A good many years ago—yes, in the early seventies, the writer had some experience with growing Hollyhocks in the nurseries of the late and highly respected Thomas Meehan of Germantown, Philadelphia. At that time seed of a special variety was sown, which by the way was a beautiful shade of pink, and this as long ago as the time indicated, came absolutely true to color and manner of growth, and coming as it did, was an actual surprise because it was not expected. This matter was brought up in a small organization which was in existence in those days—I forget now the title, but it was something like this,—The Gardeners' and Florists' Improvement Society—and we had no hall rent to pay as we had the privilege of meeting at the home of Joseph Meehan, and John Burton was also a member of this organization, and W. E. Meehan, the elder son of the late Professor Meehan, who although at that time was engaged in the nursery work, is not now connected with horticulture in any way at all, but has charge of the Fish Commission in the City of Philadelphia.

Among the varieties which came absolutely true from seed with us at "Floradale" are rose pink, two shades of yellow, a white with blush on the outer edges of the petals, two shades of crimson, and some others which at this time I cannot call to mind.

Hollyhocks here, while we classify them as biennials, frequently are perennials, and we feel encouraged with the progress we are making, and hope for better things in the future.

EDWIN LONSDALE.

Lompoc, Cal.

GREENHOUSE GRAPES.

The growing of tender grapes under glass is on the increase in this country. We had the privilege of seeing the stock of vines advertised by R. & J. Farquhar & Co. in this paper and they are about the finest two and three-year-old pot grown stock that can be imagined. They are thick-stemmed, well-ripened up, and with plenty of fruiting eyes. The disturbances abroad should help the sale of home-grown fruit of this sort.

George H. Thompson, Jr., Designer.

THE NEWER COMMERCIAL ROSES.

Among the newer roses (commercial) of last year's and recent introduction, an especially good word must be said for Hadley. Everywhere we hear the same report—a wonderful grower—and in the market has the call among the crimson. One of its strongest points is its fragrance. Richmond cannot compare with it. Hadley and Russell are both good all the time, all of which counts on the square-foot return—which is the final test of any rose. What Francis Scott Key will do, among those reds, has yet to be determined. So far, this season, it is showing up pretty good. One of our prominent retailers—who knows nothing about new roses (please excuse)—until they are shoved under his nose commercially—said the other day: "Let me tell you, George, you are only a seedsman and don't know; but that Russell rose we get up at Pennock-Meehan's is the greatest thing yet in roses. Fragrant, and beautiful, and a great seller. Only we've got to get there early in the morning. By afternoon they are all gone."

At which outburst we said nothing; but had quiet, inward satisfaction—as we have been prophesying and preaching that very thing ever since we saw her (Russell) at Montgomery's five years ago. "Killarney Brilliant," seems to have borne out expectations pretty well—judging from the first cuts, which are just commencing to arrive, but we will know better four or five weeks from now.

GEORGE C. WATSON.

ILLINOIS STATE FAIR.

The State Fair at Springfield, Ill., was a success as usual this year. The plant awards were largely won by the local growers and several fine specimen plants which have done duty for several years were again successful in their classes. Pochlmann Bros. exhibited both plants and cut flowers, winning first on a collection of large cyclamen plants. In roses they won first prize in a majority of the classes. Their Mrs. Russell won out in the best fifty roses of last

year's introduction. Twenty-five each of six varieties were won by Milady, Ward, Hadley, Shawyer, Bulgarie and Sunburst. In carnations Ward won 1st in the dark pink class, White Perfection in white, Enchantress in flesh pink, Champion in red and Philadelphia 2nd in light pink.

COVER ILLUSTRATION.

Our front cover this week depicts a well-planned estate at Bryn Maur, Pa. The picture was taken under very trying conditions on a windy day from the top of a water tower where there was scarce clinging space for one of our long tailed ancestors, let alone a camera enthusiast. The artist took such a long chance in securing it, because it was such a strikingly fine example of the landscape architect's, Mr. H. W. Sonners, skill in making a compact grouped composition, as interesting as it is charming. It admirably reflects the increasing desire among owners to have their greenhouses intimately associated with their residence.

Another thing noticeable about this layout is the garden's snugness and irregularity. Neither property line or command of funds in any way limited its treatment—but the artistic conception of the architect did. The greenhouses and attached buildings were constructed by Hitchings & Co., Elizabeth, N. J.

CHRYSANTHEMUM SHOW AT CHICAGO.

The executive committee of the Horticultural Society of Chicago met on Tuesday, September 29, and arranged for a seasonal display of chrysanthemums to be held at the art institute November ninth and tenth, offering silver and bronze medals for the best displays of plants, cut blooms, floral arrangements and novelties. Premium lists will be ready shortly and may be had on application to L. M. McCauley, 418 Saint James Place, Chicago. Plants and cut blooms intended for this display should be addressed to C. W. Johnson, Art Institute, Chicago, all other clippings to the same address.

CLUBS AND SOCIETIES

HORTICULTURAL SOCIETY OF NEW YORK.

A very successful dahlia exhibition was held, in cooperation with the New York Botanical Garden, in the Museum building of that institution, on Saturday and Sunday, Sept. 26th and 27th. It was the first dahlia show given by the society. There was a fine display of this popular flower in all its diverse forms and colors. The most striking feature of the exhibition was the display of blooms arranged by Mrs. Chapman, of Westerly, R. I. Two tables, fourteen feet long, were artistically decorated by her. One of these tables was especially pleasing, all the tints associated with the foliage and flowers of autumn being so blended and arranged as to produce a most harmonious effect. It was the admiration of all. The dahlia is so much more striking thus arranged than in the formal manner customary in exhibitions, that it is surprising it is not more frequently thus displayed.

A meeting of the society was held on Saturday at 2.30, President T. A. Havemeyer presiding. Dr. Britton, director-in-chief of the New York Botanical Garden, gave a short talk on the origin of the name Dahlia, including a brief account of the distribution of the genus. Dr. H. H. Rusby followed with a short address on the home and environment of the dahlia, illustrated with lantern slides. At the conclusion of this a discussion of the present day methods of culture was led by Mr. P. W. Popp, in which many took part.

Following is a list of the awards:

Largest and best collection, flowers on short stems: Geo. L. Stillman, 1st; N. Harold Cottam & Son, 2d.
Vase of 12 blooms, cactus: Head's Bergenfield Nurseries, 1st; P. W. Popp, 2d; N. A. Miller, 3d.
Vase of 12 blooms, decorative: W. A. Manda, 1st; N. A. Miller, 2d; N. Harold Cottam & Son, 3d.
Vase of 12 blooms, show or fancy: N. Harold Cottam & Son, 1st.
Vase of 12 blooms, pompoms: Wm. Shillaber, 1st; N. Harold Cottam & Son, 2d.
Vase of 12 blooms, single or collarette: Geo. L. Stillman, 1st; Head's Bergenfield Nurseries, 2d; N. A. Miller, 3d.
Vase arranged for effect: P. W. Popp, 1st; Dr. M. A. Howe, 2d.

All of the above in open-to-all classes.

The following prizes were awarded in the non-commercial classes:

Collection of not over 50 blooms: P. W. Popp, 1st; Wm. P. Clyde, 2d.
Vase of 8 blooms, cactus: P. W. Popp, 1st; Geo. D. Barton, 2d; Wm. P. Clyde, 3d.
Vase of 8 blooms, peony flowered: P. W. Popp, 1st; Wm. P. Clyde, 3d.
Vase of 8 blooms, decorative: P. W. Popp, 1st; Geo. D. Barton, 2d.
Vase of 8 blooms, pompoms: Wm. Shillaber, 1st; Geo. D. Barton, 3d.
Vase of 8 blooms, single or collarette: P. W. Popp, 1st; Geo. D. Barton, 3d.

The following special prizes were awarded:

Wm. Shillaber, for a collection of annuals, bronze medal; Mrs. F. A. Constable, vase of *Conoclinium coelestinum*; W. Atlee Burpee, certificate each for the new dahlias "Mrs. Hugh Dickson" and "Mrs. W. E. Whineray," and special mention for "Mrs. Geo. W. Kerr;" Lager & Hurrell, for a collection of cut orchids; O. P. Chapman, Jr., for artistic display, silver medal

and a cash prize; Geo. L. Stillman, certificate each for the new dahlias "Geo. L. Stillman" and "Searchlight," and special mention for "Fire Girl;" P. W. Popp, for display of collarettes; W. A. Manda, Inc., certificate each for new dahlias "Josef Manda" and "Bohemia Garnet," and special mention for "Veronica Manda."

GEORGE V. NASH, Sec'y.

CALIFORNIA ASSOCIATION OF NURSEYMEN.

The fourth annual convention of the California Association of Nurserymen will be held in San Diego, on October 15, 16 and 17. Among the more salient addresses may be mentioned: "Treating Refractory Soils with Dynamite," by John G. Morley, of San Diego; "Some Phases of the Transportation Problem," by J. D. Meriwether, of Los Angeles; "Shall the State Destroy an Industry It Has Created," by John T. Sweet, of Martinez; "Present Quarantine Inspection: Methods and Suggestions for Improvement," by H. A. Weiland, of San Diego; "The Exposition Beautiful: Its Educational Values," by Frank P. Allen, Jr., of San Diego; "The Home Garden and City Beautiful in 1915," by Ernest Braunton, of Los Angeles; "Why Not Grow Seedling Stocks on This Coast," by E. Benard, of San Diego; several other addresses besides the standing committee reports, etc.

On Friday evening, October 16, the Association will be the guest of the San Diego Floral Association, on which occasion Alfred D. Robinson, editor of The California Garden, will deliver a timely address on "The Amateur Gardener and the Nurseryman," which will be briefly discussed by Miss K. O. Sessions and Theodore Payne, at the conclusion of which there will be a musical programme, dancing and refreshments.

On Saturday, October 17, the Association will be the guests of the Panama-California Exposition officials for a tour of the buildings and grounds of San Diego's "Exposition Beautiful." At noon there will be an informal luncheon at the Mission Cliff Gardens, and in the afternoon an automobile drive to points of interest in and about San Diego.

The railroads have granted a reduced rate of a fare and a third on the receipt-certificate plan, and there will also be reduced rates at the Grant and Brewster hotels.

The convention will appreciate exhibits of new and little known plants (or extra fine specimens), flowers and fruits; of machinery and appliances pertaining to the nursery business; of gardeners' and orchardists' requisites; in fact, anything that will appeal to the convention. All exhibits should be sent by prepaid express to E. BENARD, care Harris Seed Co., No. 1724 F Street, San Diego, Cal., so as to reach him not later than Wednesday, October 14, 1914. The exhibits will be beautifully staged in the assembly hall of the superb U. S. Grant Hotel, headquarters and meeting place of the convention.

CONNECTICUT HORTICULTURAL SOCIETY.

The annual dahlia and vegetable exhibition held at Unity Hall, Hartford, on September 23 and 24 was an exceptionally good one. One of the largest displays was shown by George L. Stillman, of Westerly. Mr. Stillman also exhibited four striking seedlings, namely: Stillman, Osceola, Queen Esther and Miantinomi. John H. Slocombe, of New Haven, had a superb display. C. Louis Alling, also of New Haven, made a fine exhibit. N. Nelson, of Hartford, entered many classes and won a number of first prizes. There were excellent exhibits of perennials by J. F. Huss, Warren S. Mason and W. W. Hunt & Co., each exhibit comprising in the neighborhood of 100 varieties.

The vegetable exhibits were good and unusually well staged. In the Arthur T. Boddington special the judges were nonplussed for some time before they finally arrived at a decision. The judges were G. X. Amrhy and John N. Champion, both of New Haven. Awards in the professional classes were as follows:

Show, 18 blooms, 18 named varieties—N. Nelson, Hartford. Show, 12 blooms, 12 varieties—1st, C. Louis Alling, West Haven, Conn.; 2nd, Alfred E. Doty, New Haven. Cactus, 18 blooms, 18 varieties—1st, C. Louis Alling; 2nd, Alfred E. Doty. Cactus, 12 blooms, 12 varieties—1st, C. Louis Alling; 2nd, N. Nelson. Fancy, 12 blooms, 12 varieties—1st, N. Nelson. Fancy, 6 blooms, 6 varieties—1st, N. Nelson; 2nd, A. E. Doty. Decorative, 12 blooms, 12 varieties—1st, N. Slocombe, Farmington, Conn.; 2nd, N. Nelson. Decorative, 6 blooms, 6 varieties—1st, C. Louis Alling; 2nd, A. E. Doty. Single, 6 vases of 3 blooms each—1st, N. Slocombe; 2nd, W. S. Mason. Peony, 12 vases—1st, N. Nelson; 2nd, J. F. Huss. Peony, 6 vases—1st, C. Louis Alling; 2nd, N. Nelson. Peony, best collection—John F. Huss. Pompon, 12 vases—1st, N. Nelson. Pompon, 6 vases—1st, C. Louis Alling; 2nd, N. Nelson. 50 varieties, 3 blooms each—1st, George L. Stillman; 2nd, Warren S. Mason, Farmington, Conn. Collection of Decorative—N. Nelson. Cactus—1st, N. Nelson; 2nd, A. E. Doty. Pompon—C. Louis Alling. Fancy—N. Nelson. Peony—G. L. Stillman. Collarette—1st, G. L. Stillman; 2nd, J. F. Huss. Vase of 25 blooms—1st, N. Slocombe; 2nd, W. S. Mason. Collection of seedlings—1st, J. F. Huss; 2nd, N. Nelson. Floral piece of dahlias—N. Nelson. Specimen seedling—1st, G. L. Stillman; 2nd, N. Nelson. Largest bloom—1st, Alfred E. Doty; 2nd, G. L. Stillman.

Open to all. Gladioli, 12 spikes—A. Righenzi. Six vases of gladioli, 6 blooms each—A. Righenzi. Six vases of asters—1st, W. S. Mason; 2nd, A. Righenzi. Asters, 25 blooms, one variety—1st, H. L. Metcalfe; Hartford, Conn.; 2nd, A. Righenzi. Collection of asters, 25 blooms of each—1st, A. Righenzi; 2nd, H. L. Metcalfe. Snapdragon—J. M. Adams, Hartford. Display of Annuals—1st, J. F. Huss; 2nd, N. Nelson. Fruit—1st, Louis Chauvy, Hartford; 2nd, J. F. Huss. Vegetables—1st, J. F. Huss; 2nd, Louis Chauvy. Exhibit of most general merit—George L. Stillman. Dahlias in pots—A. Righenzi. Dahlias, 12 blooms, one variety—1st, C. Louis Alling; 2nd, N. Nelson.

Specials. By Stumpp & Walter Co., New York. Ten varieties of Vegetables—1st, J. F. Huss; 2nd, Alfred Cebellus; 3rd, Louis Chauvy.

By Arthur T. Boddington, New York. Ten varieties of Vegetables—1st, A. Righenzi; 2nd, J. F. Huss.

By C. H. Sierman, Hartford. Display of Perennials—1st, J. F. Huss; 2nd, W. W. Hunt & Company.

Special diplomas were awarded to John F. Huss for arrangement of palms and stove plants; G. Minge for

group of Boston ferns; to John H. Slocombe, for display of seedling dahlias; to the Park Department for display of geraniums, dahlias and hardy perennials; to W. W. Hunt & Company, for exhibit of bay and boxwood trees.

ALFRED DINO, Sec'y.
Wethersfield, Conn.

NEW BEDFORD HORTICULTURAL SOCIETY.

The annual dahlia exhibition of the New Bedford Horticultural Society held in the Library Building on Tuesday, September 22 and 23, was very pleasing. Owing to weather conditions dahlias in this section have not done as well as usual, nevertheless the tables were well decorated with excellent specimens. The principal competition centered around the class for dahlias arranged for effect with any foliage, covering 30 square feet. Dahlia exhibitions as a rule, do not present as attractive an appearance as peonies, roses or chrysanthemums, so, to induce exhibitors to overcome the stiff, set look of such shows, the principal prize was given in this class. The result was very gratifying, the sameness of previous exhibitions disappeared and the hall looked very attractive. Arthur E. Griffin superintendent of the Galen Stone place, captured first prize with a stand of crotons, caladiums and ferns intermingled with large vases of dahlias in the rear and specimen blooms in the foreground. W. D. Hathaway, second with a display of the finest blossoms in the show, but lacking in effect enough to lose the coveted first prize. Wm. Keith, gardener for T. M. Stetson, third with a nice display of foliage plants, but lacking in number of flowers, the effect being good, but from the standpoint of a dahlia show, the main display was lost among the green. J. C. Forbes had a fine table comprising vases of single and peony-flowered dahlias. Among the amateurs J. A. Nolet of this city was high man capturing nearly all the first prizes.

Noteworthy seedlings were exhibited as follows:

Mrs. Frederick Grinnell—a deep rich pink peony-flowered variety of excellent form and fair stem. Exhibited by J. P. Rooney. Mrs. Henry Denison—cactus, clear pink shading lighter toward the centre, of massive build with numerous heavy petals. Exhibited by Forbes & Keith. Mrs. Lillie P. Hathaway, buff decorative of good size with strong erect stem and Miss Edna L. Hathaway a good addition to the list of orange decoratives. Exhibited by W. D. Hathaway.

W. F. TURNER.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

At the next meeting of this club, on October 20, L. W. C. Tuthill of New York will deliver a lecture on "Advertising, the Spark Plug of Business." Mr. Tuthill had arranged to give this lecture last spring and was unavoidably prevented from attending. There will be a large floral display on the exhibition table, including chrysanthemums from several places, and a large attendance is hoped for.

W. N. CRAIG, Sec'y.

Fine Ferns Ready for Immediate Retail Sale

We offer the following varieties of Ferns in the sizes specified, which we have in perfect shape at this time.

Nephrolepis muscosa, 3½-inch, 25c; 5-inch, 50c each.

Nephrolepis elegantissima, 6-inch, 50c; 8-inch, \$1.00; 10-inch \$2.00 each.

Nephrolepis elegantissima compacta, 3½-inch, 25c; 6-inch 50c; 8-inch, \$1.00 each.

Nephrolepis superbissima, 6-inch, 50c each.

Nephrolepis magnifica, 5-inch, 50c each.

Nephrolepis Piersoni, 6-inch, 50c; 8-inch, \$1.00 each.

Nephrolepis, Dwarf Boston, 8-inch, \$1.00 each.

Nephrolepis Harrisii, 6-inch, 50c; 10-inch, \$2.00 to \$3.00; 12-inch, very large plants, \$5.00.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Examining Committees.

President Wm. Kleinheinz announces the committees to examine new chrysanthemums for the ensuing year as follows:

Chicago—N. J. Wiator (chairman), George Asmus, Guy French. Ship flowers to chairman N. J. Wiator, 30 E. Randolph St., Chicago.

Cincinnati—R. Witterstaetter (chairman), James Allen, Henry Schwarz. Ship flowers to chairman Jabez Elliott Flower Market care of janitor.

Boston—Wm. Nicholson (chairman), James Wheeler, Alex. Montgomery. Ship flowers to Boston Flower Exchange, 1 Winthrop Square care of chairman.

New York—Eugene Dailedouze (chairman), Wm. H. Duckham, A. Herrington. Ship flowers to New York Cut Flower Co., 55 W. 26th Street, care of chairman.

Philadelphia—A. B. Cartledge (chairman), John Westcott, S. S. Pennock. Ship flowers to A. B. Cartledge, 1511 Chestnut Street.

Shipments should be made to arrive by 2 P. M. on examination days to

receive attention from the committee. Must be prepaid to destination and an entry fee of \$2.00 should be forwarded to the secretary not later than Tuesday of the week they are to be examined, or it may accompany the blooms.

Seedlings and sports are both eligible to be shown before these committees, provided the raiser has given them two years' trial to determine their true character. Special attention is called to the rule, that sports to receive a certificate must pass at least three of the five committees.

The committees will be in session to examine such exhibits as may be submitted on each Saturday during October and November, the dates of which will be October 3, 10, 17, 24 and 31 and November 7, 14, 21 and 28.

AMERICAN DAHLIA SOCIETY.

The constitution and by-laws of the new Dahlia Society started last week at New York are quite different in some respects from any similar document that has ever come to our notice. Among other innovations, the

entire list of officers must be selected from amateurs, with the exception that "when no amateur is willing to accept the burden of secretaryship a professional or commercial member may fill said office." The headquarters must be New York City and the secretary must reside there and among his duties is the preparing and publishing of a monthly "Dahlia Journal" which shall be distributed free to members. There will be no meetings and all the business, voting, etc., of the society shall be conducted by mail.

ST. LOUIS CLUB AND ASSOCIATION MEETINGS.

The Retail Florists' Association met on Monday, Sept. 21, at the Washington Hotel. It was voted that all meetings in the future would end up with a few games at bowling and a nice lunch.

The St. Louis Florist Club will meet Thursday, October 8th, at 2 o'clock. Secretary Beneke says the programme mapped out at the recent officers' meeting will be read to the members for their approval.

The Ladies' Home Circle were the guests of Mrs. Fred W. Brunning at Brunning's farm in Columbia, Ill., on Wednesday, Sept. 23. Mrs. E. Schray will entertain the Circle on Wednesday, October 7th, at her home, 4100 Pennsylvania avenue.

The St. Louis County Growers' Association will meet on Wednesday night, October 7th, at the Eleven Mile House at 8 P. M. President Vennemann and Secretary Joseph Duetschmann are making big efforts for a large attendance.

CLUB AND SOCIETY NOTES.

The 19th annual flower show of the Morris County Gardeners' and Florists' Society will be held in James Assembly Hall, Madison, N. J. on October 28 and 29.

At the Kentucky State Fair in Louisville, last week, some of the prominent exhibitors in the floral department were Nanz & Neuner Co., E. G. Reimers & Son, G. Robert Miller and Wm. L. Korb, all of Louisville.

BODDINGTON'S "QUALITY" CHRISTMAS-FLOWERING SWEET PEAS WE ARE SUPER-HEADQUARTERS

All true stocks of Winter-flowering Sweet Peas will again be scarce this season. The winter-flowering Spencer types are almost a total failure owing to the exceptional season in California this Spring, and through the ravages of Aphids.

We regret that our stocks of YARRAWA and ANITA WEHRMAN are entirely exhausted, also many other good varieties, but we can still offer the following while stocks last. Order at once to avoid disappointment—remembering that our stocks are true to name and while a little higher in price, will save you money in the long run.

ROSE QUEEN "ROSE QUEEN" is Orchid-flowering, borne on long stems, extremely free and early and of pink color, very attractive, is a decided acquisition, and like all meritorious novelties is sure to be in demand wherever grown. Prices: Trade pkt., \$1.00; 3 trade pkts. for \$2.75; 1 oz., \$12.00.

THIS ADVERTISEMENT CAN BE USED AS AN ORDER SHEET

Remember, you may deduct 5% if cash accompanies the order.

New Onion Industry in Bahamas.

(Consult W. F. Doty, Nassau, New Providence.)

Efforts to market onions grown in the Bahamas have hitherto proved futile, but the Florida representative of a New York commission house has arranged to dispose of all the onions which the planters will grow. He will leave an agent, and will arrange that the growers be supplied with seed, crate materials, nails, and paper, and will arrange transportation from the various islands to Nassau and thence to New York. This offer, together with local government encouragement, will probably result in the shipment of about \$100,000 worth of onions this coming season and much more in succeeding seasons. These onions will be marketed earlier than those from Texas.

THE TRUE SITUATION IN HOLLAND.

HORTICULTURE, Boston.

Gentlemen—There have been reports in some horticultural and other papers in your country about the bad condition in Holland stating that a 50 per cent. higher freight-rate on the ocean was expected; banks were closed and many people out of work. There is some truth in it but conditions are not so bad as described. The Holland-America Line contracted with all customers in the horticultural line on the same basis as before and for the same prices, with the exception of cheap trees which paid a freight of 12/6 per 40 cubic feet which price is raised to 15/-.

Money is hard to get, as customers living in those countries which are in war do not pay their bills, while checks occasionally received from those countries were not accepted by the banks. There are lots of people out of work, but as far as I can control the nurserymen employ their full staff with the exception of some men who are in the army now.

Holland is still neutral and the exporters will be able to fill all orders placed until now and many more which they expect from their American friends.

JACS SMITS,

Naarden, Holland.

Of Interest to Retail Florists

Royersford, Pa.—Burgentz & Tryball have purchased the florist business of E. R. Nace.

H. O. Miller of Minneapolis, Minn., will open a floral store this week on Broadway, St. Louis, Mo., in the new Boatman's Bank Building.

J. W. Howard has remodelled his store at Harvard square, Cambridge, Mass., and has installed a mahogany refrigerator 13 feet long and 10 feet in height.

Richard Umfried, 5th and Fairmount avenue, Philadelphia, has sold out his retail store to Miss Mary A. Brown. Miss Brown now has two stores—the original being at 5th and Rising Sun avenue.

Roxbury, Mass.—C. R. Dane's floral establishment has been broken into on two successive Sundays, the cash box emptied and furniture and stock generally turned topsy-turvy by the intruders.

Park Street Church in Boston is being remodelled so as to provide two stores fronting on Tremont street. One of these is to be occupied about November 1 by Houghton & Gorney, a new firm. F. H. Houghton has been doing business as a retail florist at 4 Park street for several years.

NEW FLOWER STORES.

Chicago, Ill.—Boulevard Florist, 337 East 39th street.

Hartford, Ct.—Coombs, the florist, 364 Asylum street.

Columbus, O.—Hellenenthal, Florist, 231 South High street.

San Francisco, Cal.—Union Flower Shop, 2179 Union street.

Painesville, O.—Wilson Flower Shop, 124 North St. Clair street.

Philadelphia, Pa.—Sherwood Flower Shop, 5537 Baltimore avenue.

Chicago, Ill.—The Flower Shop, C. J. Baker, proprietor, 1514 Thirteenth street.

NEWS NOTES.

Willimantic, Ct.—S. Catalano has purchased the Garrity greenhouses on Mansfield avenue.

Chicago, Ill.—Mrs. J. T. Lang has sold her store and greenhouses at 2010 Melrose street to Frank Evert.

Mt. Sterling, Ky.—David Harris has leased the Corbett greenhouses at Clay street and Corbett avenue.

Washington, D. C.—A. J. and L. R. Covert have opened an office at 1477 Newton street for the sale of high grade nursery stock.

Bermuda — Theodore Outerbridge has been called upon to part with some of his land in Hamilton Parish for military use on account of the war. Mr. Outerbridge states that Sunnylands never looked better than it does this year. Crotons have done splendidly and the night blooming jasmine is a sight and a perfume never to be forgotten. Owing to the heavy rains last spring cypas leaves have grown to nearly six feet long.

PHILADELPHIA NOTES.

Louis Burk will erect a new show conservatory for a collection of fancy flowering and foliage plants recently purchased in England. It will be 18 by 80 feet, Lord & Burnham, and located at his present range, Fishers Lane and Wyoming ave.

The Henry F. Michell Company's Sixth Annual Exhibition of dahlias and vegetables on September 22 to 26, was a grand success, drawing to the store large crowds of flower lovers as well as professional growers. About five thousand flowers were on exhibition and great rivalry was manifested among competing exhibitors. In the dahlia class William Robertson, superintendent for J. W. Pepper carried off most of the prizes, while Robert J. Morrow, superintendent for the estate of George I. Bodine was a close second. A display that was especially noted was one made by Mrs. J. Gardner Cassatt consisting of a set of twelve seedling dahlias, the like of which has seldom been seen before. They were produced by her gardener Thomas Holland, and were the center of attraction throughout the show. The exhibition was such a great success that the company will hold a second show on October 1, 2 and 3, at the Million Dollar Pier, Atlantic City, N. J.

Recent diplomatic events impressed us with the idea that there is a big difference between a diplomat and a genius. As is usual when we are puzzled we ask whoever may be at our elbow. In this instance it happened to be Doc. Lane. Said he: "A genius? Why, a genius is a fellow who can make something out of nothing." That sounded too much like the Creator of the Universe for us, so we next went to Little Tommy, the 70-year-old waiter at the Bellevue, who won the prize last year on the definition of a diplomat. Tommy answered right off the reel in a flash "A genius? Why, that's a man who has good thoughts and always gets left." That doesn't sound right either. McNab's definition of a genius—(under compulsion from Robert Craig):—"An editor who refrains from cutting out all the interesting parts from my masterpieces."

T. Claiborne Dobbins: "A genius is a man who is a wonder in his art."

William Burchard: "A genius is a man out of the ordinary." Commodore Westcott was listening and he thought Burchard was just right—so we shall have to wait until the Commodore has forgotten that before we get him. Now, just what is a genius? We offer a valuable prize for the best answer. The award will be made next Christmas. Twenty-five words the limit. Personalities barred. This has nothing to do with affiliation. Our idea is to try to keep them affiliated while we have them—and not to encourage seceders. So don't work affiliation into this contest.

G. C. W.

WASHINGTON NOTES.

Jack Philipps is spending several weeks visiting his relatives in Toledo, Ohio.

Frank Keefer has left the employ of Gude Bros. Company, to accept a position in the store of his uncle in Des Moines, Iowa.

The branch of the Flower Shop at 3211 Mount Pleasant street has been opened for the season and a new Ford delivery wagon secured for this store. C. A. Machen will look after this business.

Karl F. Kellerman has been appointed assistant chief of the bureau of plant industry, of the Department of Agriculture, to fill a vacancy caused by the resignation of L. C. Corbett which was submitted in order that he might become chief in the office of the bureau of horticulture.

The store of F. H. Kramer, has been redecorated and repainted and a number of minor repairs made in the conservatory. A small room has been built at the rear to provide accommodations for the bookkeeper and cashier and a small private office for Mr. Kramer. These improvements have greatly added to the appearance of the store.

George H. Cooke is preparing to move to the new store now undergoing construction next to the one from which he was forced to move several months ago. When the work is completed Mr. Cooke will have one of the finest stores in the city. Edward Niedomanski, with George H. Cooke, spent several days camping and fishing at Catocin, Md., where Mr. Cooke maintains a camp during the summer.

New heating arrangements are being made in the matter of heating the greenhouses at Gallaudet College. The old heating apparatus contained within the houses is being pulled out and new pipes run to the plant that takes care of the college buildings. The space formerly occupied by the boiler will be used for storage and other purposes. The work comes at a time when Mr. Mangum, the head gardener at the college, has just got his houses in shape for the winter.

The steamer Westerdick, which arrived at Baltimore last week, brought over a large consignment of bulbs from Holland for Fred H. Kramer and about completed the orders placed by him with the European growers before the war. Mr. Kramer states that he has had but very little difficulty in securing his shipments. On this boat were also twenty-three cases of Holland bulbs intended for planting in the parks and around the White House, and an order has been issued admitting these bulbs free of duty.

Otto Bauer, who for the past nine or ten years has been connected with the Washington Florists' Company, has accepted the position of manager for the S. S. Pennock-Meehan Company, at 1216 H street. Mr. Bauer will be succeeded as manager of the Washington Florists' Company by J. Harper Hetherington, who has been with the firm for nearly four years. Mr. Hetherington is a very energetic young chap and during his stay of nearly six years in Washington he has made a host of friends, all of whom wish him success in his new position. He is a graduate

of the Century Flower Shop, in Philadelphia, having learned the trade under H. H. Battles. Mr. Bauer is an ex-president of the Florists' Club, and has taken a prominent part in the work of that organization and of the S. A. F. and O. H. He, too, has the best wishes of his friends in the trade for his future success.

CHICAGO NOTES.

Carl Poehlmann, son of Mr. and Mrs. August Poehlmann, who graduated from Western Military Academy last June, has entered the Horticultural Department of the University of Illinois.

A new pink snapdragon from Chas. Rathjen's place, in Janesville, Wis., is being tested at Poehlmann Bros. It is not extremely large but is of a beautiful tint of pink and has splendid keeping qualities. The lower florets do not wither but keep bright and firm while the upper ones unfold.

Phil Schupp has lily of the valley pips sufficient to last until next June and does not expect to increase his price because of the chances of not being able to secure more. Recent letters received tend to confirm the doubts regarding this stock rather than to dispel them. There is no question now but what azaleas are coming over quite as fast as they are welcome. Holland bulb men are following up their letters in person. There will be plenty of explanations needed.

TENNESSEE GETTING BUSY.

A. H. Dailey, C. W. Crouch, Chas. L. Baum and Roy Baum attended the State Fair at Nashville. They noted but very few florists' displays and attribute this to the fact that the florists of the state are not organized. They spent a good portion of their time with the Nashville florists encouraging them to organize a society similar to the one in Knoxville. By getting several of the larger cities organized it will be an easy matter to form a state organization. The Nashville florists are all energetic and wide-awake and there is no plausible reason why they should not have one of the largest and best organizations in the South. Mr. Baum also solicited members for the S. A. F. & O. H. and was successful in getting several promises. They stopped in Chattanooga and called on the florists of that city also. Mr. Dailey who was one of the judges of the vegetable exhibit at the fair, says, "Everything came up to the usual high standard."

Flower Market Reports

For the past few days **BOSTON** this market has been nearly swamped with the heavy accumulations of flowers, but now the situation, following a sharp frost, is much improved and today, Thursday, has seen a very welcome spirit of activity. Roses are good, and not too plentiful. Carnations are received rather too heavily for the demand but they hold their price pretty well when good. Lily of the valley has eased up somewhat but longiflorum lilies are holding firm. Asters are plentiful, low grade and cheap. Chrysanthemums rapidly increasing in number and quality. Violets are in and bring 50c. a hundred. The outlook is for a rather overloaded market generally, should there be good weather.

Business seems to be

BUFFALO on the upward course.

The outdoor stock is gradually leaving us and the indoor material is more sought for. Chrysanthemums are coming on more each day and have taken well. Dahlia shipments from Eastern points have not arrived in good shape. Roses continue to come in quantity and there are any amount of the shorts, which are hard to move. Lily of the valley and lilies have sold well and the market has been fairly cleaned up daily. Carnations are coming on nicely. There are some excellent Enchantress and White Perfection and these have sold readily.

Summer weather pre-

CHICAGO vails and there has been

no frost to kill the outdoor flowers. The increase in demand which was slightly evident earlier in the month, has dropped off again and even some good flowers are wasted. The supply of roses is a little less, but there are still more than can be used. Quality is excellent and the buyer has everything in his favor. Asters are decidedly less in evidence; home grown ones are fast dwindling away and eastern shippers have about ceased to send to this market. Lily of the valley sales lag this week. Chrysanthemums are becoming an important factor in the day's sales, October Frost and Golden Glow comprising the bulk of the cutting. Smith's Advance is about gone. Carnations are more plentiful each day, the size of the flower and the length of stem showing up well for the last of September. Altogether business is far from good.

The market is still

CINCINNATI crowded by the large receipts of dahlias,

asters and roses. Business is picking up but not enough to cause an advance from the low prices. Dahlia receipts are generally of a high quality. Cosmos has a fair call. Roses are in a very heavy supply. American Beauties, however, are rather scarce. The lily supply has shortened considerably. Last week the first chrysanthemums

OCTOBER WEDDINGS

White Orchids and Valley in quantity and of splendid quality too. Also Cattleyas, Vandas, Oncidiums and Cypripediums.

	Doz.	100
Cattleyas	\$6.00	\$40.00

“ “ & Spreng. (100 Bchs.)	10.00	to 35.00	15.00	to 25.00	25.00	to 50.00

and violets of the season made their appearance. Carnations are increasing in numbers and include some very good blooms. Asters while still plentiful are near an end. The last gladioli, too, are coming into the wholesale houses. They are not very good. Both orchids and lily of the valley meet with a fair demand.

KNOXVILLE, TENN. Stock is a little scarce

although about enough to supply the local trade. Dahlias are good, carnations are beginning to bloom, roses rather scarce, chrysanthemums will be here in a short time. Trade is unusually good for this time of the year, and this month will show a large increase over September of last year. Local trade is sufficient to consume all stock with the exception of orchids.

Since our last report **NEW YORK** the cut flower market has had a fluctuating and unsteady career. At present writ-

ing conditions have settled down a little towards a stable basis, and prices are firmer on most specialties, due to the cold weather of the past few days, the shortening up of the product from under glass and the killing off of much of the outdoor garden stuff such as dahlias, asters, gladioli, etc. Violets are on deck once more but their status in this market for the coming season is not yet discernible to anybody. Orchids are not doing as well as they should in holding up their traditions as a high class and high price flower. Many cattleyas are moved out of the wholesale marts at prices which not many years ago would have given their growers heart disease. Carnations are improving in quality but are not yet up to standard. Cosmos is abundant. The gardenia is beginning to come out of the obscurity in which it has hidden for several months, and in fairly acceptable quality. Lily of the valley is holding its own right "in the middle of the road."

Flower Market Reports

(Continued from page 410)

Both roses and PHILADELPHIA customers suffered from the heat last week. American Beauty roses move fairly well at lower prices than last year. Most other roses seem to be in the same running, but the quality is all that could be expected at this season. A bright exception is Mrs. Charles Russell which is not only one of the most popular, but one of the few roses selling right up. Another bright spot is that popular little favorite Fire Flame of which new crop is just commencing and being taken up with avidity. Hadley, Shawyer, and Francis Scott Key are also showing up well for the early cuts. Carnations are a little better both as to quantity and quality, but buyers, while a little better satisfied, are not enthused. Orchids are better and cutting quite some figure in the market. There seem to be more of the spray varieties this year than usual. Dahlias are a little better all around and the demand is also better. Asters are still plentiful and good—long-stemmed and excellent flowers. In chrysanthemums Smith's White and Golden Glow seem to be all thus far. Bouvardia is one of the new comers.

Stock is very plentiful, of extra good quality and prices exceedingly low. This is especially so in roses; the wholesalers let you buy them at your own price in all grades except fancies and the same applies to all other flowers. Retail business is very dull. Chrysanthemums are coming fast. Golden Glow and Smith's Advance are in now, and other varieties will be coming soon. Carnation are fine, also dahlias and gladioli, lily of the valley and longiflorum lilies are the only flowers to hold up in price.

The warm days of WASHINGTON last week brought out thousands of roses, for which, there was no demand. Saturday saw a change in temperature and stocks have shortened up considerably. There is little business being done in the stores or markets, but orders are being received for many fall weddings and the future looks quite bright. There will be a marked falling off of large decorations, according to one prominent florist, on account of the war and also because of the recent death of the wife of the President. There will be few, if any, state affairs, and, of course, the presence of the President and of the diplomats of the foreign nations now at war will not be had at the social affairs of the four hundred. The season for asters in and around Washington is over, but yellow and white chrysanthemums are becoming more plentiful and are improving greatly in quality. With carnations in poor shape, although good for this season of the year, the demand for chrysanthemums is good. Dahlias are also improving in quality, although these flowers caused the growers a lot of

Adiantum	.50 to .75	.50 to .75
Smilax	8.00 to 10.00	8.00 to 10.00
Asparagus Plumosus, strings (per 100)	25.00 to 35.00	15.00 to 25.00
& Spreen (100 bunches)	15.00 to 25.00	15.00 to 25.00

worry because of the production of so many imperfect flowers and blind eyes. Catleyas are fine. The difficulty in exporting from abroad seems to have been the cause of a jump in the price of lily of the valley from \$4 to \$5.

PERSONAL.

H. I. Stein is manager of the flower department of Hahne & Co., Newark, N. J.

Ernest Carl, florist, of Providence is one of the recent arrivals home from the seat of war.

Wm. Westland has left Cotuit, Mass., where he was employed by Mrs. C. H. Parker and is now with Mrs. W. Austin Wadsworth at Geneseo, New York.

Clarence Peterson and Miss Mary Critchell of Cincinnati, are to marry this week. They have the congratulations and best wishes of their many friends in the trade.

L. Merton Gage, formerly of the firm of Chamberlain & Gage, has established himself in Natick, Mass., as a grower and dealer in high class gladioli. He has purchased from the old firm the famous pink seedling which has now been named Mrs. Dr. Norton and will be disseminated by him two or three years hence.

A bowling club is about to be formed with employees of the five wholesale houses in St. Louis and weekly matches will be rolled.

ADAPTATION OF PLANTS TO SOILS.

A paper by George E. Stone, Ph. D., Prof. of Botany, Mass. Agricultural College, and Physiologist and Pathologist of Mass. Agricultural Experiment Station. Read before S. A. F. at Boston.

As previously stated, the chemical processes in soils are extremely complex and what may prove beneficial as a fertilizer in one soil may not in another; therefore many of the fertilizer experiments conducted here and there are contradictory. It is often possible to grow good crops with fertilizers for a few years, but later it becomes impossible to grow the same crops successfully in these soils, indicating that some change of an injurious nature has taken place.

During the past decade various troubles arising from soil toxicity or overfeeding, resulting in a malformed crop, have been on the increase both in the greenhouse and in the field. The symptoms of mal-nutrition differ in different species of plants. Sometimes the roots are burned off owing to the presence of an excess of some caustic substance, but more commonly the leaves and stems are affected, the leaves becoming abnormally colored or they may become more or less contorted owing to the unequal development of the tissues of the leaves. Occasionally blisters are formed, and often wilting and dying of the edges of the leaf occurs. Mal-nutrition arises from the improper use of fertilizers and manures and is more commonly met with in greenhouses than elsewhere, cucumbers being one of the most susceptible plants to this trouble. The use of nitrate of soda, pig, hen and sheep manure, and occasionally strong cow and horse manure, accounts for most of this trouble.

Mr. H. D. Haskins,* who has made many chemical analyses of greenhouse soils with special reference to mal-nutrition, has found that in some cases where mal-nutrition was common there was considerably more nitrogen and phosphoric acid in the soils than in the best barnyard manure. The average analysis of some abnormal soils which produced symptoms of mal-nutrition to cucumbers, showed them to contain as high as 27,363 pounds of total water soluble salines per acre as compared with 7,520 pounds per acre in normal soils. He found that the soluble nitrogen was 1,156 pounds in the abnormal soils as compared with 444 pounds for the normal, while the potash was 6,743 pounds for the abnormal soils against 1,328 for the normal. The soluble phosphoric acid was 632 pounds for the abnormal soils as compared with 208 pounds for the normal, which shows a marked excess in the water soluble salines in the abnormal soils. Mr. Haskins' calculations show that to furnish this amount of nitrogen it

would require the application of $14\frac{1}{2}$ tons of a formula testing 4 per cent. nitrogen, 23 per cent. actual potash and 2.25 per cent. available phosphoric acid per acre.

From these observations on mal-nutrition, which is constantly on the increase, we cannot too strongly advise florists to go very slowly in their use of fertilizers or special manures on their crops. The practice of changing the soil each year obviates this trouble to a great extent; although such crops as lettuce can be grown in the same soil for years without change when decomposed horse manure is applied each year. Cucumbers and tomatoes, however, need an occasional change of soil to bring them to their highest perfection, while the high feeding usually given to carnations and roses renders the soil ill adapted to constant use. In one case where we grew American Beauty Roses in a soil composed of one-third loam, one-third pulverized sod and one-third fresh cow manure, together with the weekly use of liquid cow manure, we found it impossible to employ the soil the second year. When a new rose crop was planted the roots were abnormal from the beginning and died; but when the soil was washed out thoroughly it was found to contain innumerable toxic substances and no further death of the plants occurred. Market gardeners have found, and their observations have been borne out by experiments, that decomposed horse manure constitutes the best manure for their crops, and when commercial fertilizers are employed soil trouble may invariably be looked for. When we know more about the complex condition of the soils and the plant's requirements we may be able to make more extensive use of commercial fertilizers and special manures; but at the present time greenhouse managers must experiment cautiously.

To conclude, we may say that the highest conception of intensive agriculture has been realized by florists and market gardeners; and one reason why they do not receive more help from the experiment station is because their knowledge of plants and skill in handling them far exceed that of the men devoting their time to scientific research. When these workers begin to realize the great degree of skill possessed by the florists and market gardeners perhaps they may be able to suggest some ideas that will be of value.

* Mass. Agri. Exp. Sta., 25th Ann. Report, Pt. II 1913, p. 71.

PUBLICATIONS RECEIVED.

The Annual Report of the Wisconsin State Horticultural Society, a bound volume of 140 pages, is received. It is a carefully compiled and useful book, well illustrated, and as the membership dues are but fifty cents a year, every man and woman

BAILEY'S NEW STANDARD Cyclopaedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopaedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopaedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopaedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Two volumes have now been issued and the others will follow in succession. Order from

HORTICULTURE PUBLISHING CO.

11 Hamilton Place, Boston, Mass.

in the state should be a member. A "black list" of shrubs tested at the grounds of the experiment station at Madison and found unsatisfactory, looks to us very disheartening. We should almost hesitate about living in a climate where we could not have azaleas, daphnes, forsythias, deutzias, and other favorites in our garden, but there are other good things that are recommended as all right and no doubt Wisconsin is a fine place to live in.

Three bulletins dealing with orchard problems are Nos. 383, 387 and 388 of the New York Agricultural Experiment Station, Geneva. The first of these presents what is probably the final word of the Station on the tillage and sod-mulch discussion; the second announces methods by which the pear psylla has been successfully controlled by many orchardists; and the third discusses those little known but most interesting insects, the tree crickets. Any or all of these bulletins may be secured without cost by a request sent to the Station.

We learn from the bulletin of the Mt. Hermon School, department of agriculture, Mt. Hermon, Mass., that more than 150,000 fine seedlings have been planted on the school hillside. Fruit growing, harvesting and marketing and the care of lawns, shrubbery and forest, also vegetable gardening, outside and under glass are important courses in the regular instruction.

420 W. Lexington St., Baltimore, Md.

Directions on every pkg.; write for circular.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

are favoring 40% Nicotine solutions in their recommendations for fumigating and spraying.

To meet the demand this has created we now offer

"40% NICOTINE"

\$13.00 Gallon—\$3.75 Quart—\$2.00 Pint

Compare these prices with what you now pay.

NIKOTIANA

A 12% Nicotine solution properly diluted for vaporizing and fumigating.

\$4.50 Gallon—\$1.50 Quart.

The Recognized Standard Insecticide For green, black, white fly, red spider, thrips, mealy bug and soft scale. Can be used on tender plants.

\$2.50 Gallon—\$1.00 Quart.

FUNCINE

For mildew, rust and other blights. It is perfectly safe to apply to fruits and vegetables, as it is non-poisonous. An infallible remedy for rose mildew, carnation and chrysanthemum rust.

\$2.00 Gallon—75c. Quart.

VERMINE

For eel, cut and wire worms working in the soil. It can be applied to all vegetation.

\$3.00 Gallon—\$1.00 Quart.

SCALINE

For San Jose, Oyster Shell and all scale on trees and hardy stock. An effective remedy for red spider on evergreens.

\$1.50 Gallon—75c. Quart.

If you cannot obtain our products from your local dealer, send us your order with remittance and we will ship immediately through our nearest agent.

Obituary**George Rauchert.**

George Rauchert, a florist living at 11 East 125th street, New York, died suddenly from a stroke of apoplexy while walking on Ziedler avenue, Maspeth, on Sunday, September 13. He was 53 years of age.

Marshall F. Ewell.

Marshall F. Ewell died on September 23 at his home in Marshfield Hills, Mass. Mr. Ewell was a successful market gardener and gained wide prominence as the originator of the famous Marshall strawberry.

John Burr.

John Burr, engaged in the florist business in Freeport, Me., for over half a century, died at his home in that city on September 21, aged 78 years. Mr. Burr had charge of the flower beds on the Maine Central R. R. He leaves a widow one son and three daughters.

Wilfred A. Brotherton.

Wilfred A. Brotherton of Rochester, Mich., member of the Detroit Institute of Science and a collector of wild flowers, whose knowledge of the plants of this region was exceeded by that of few, if any, persons in Michigan, died Sunday, Sept. 20, in Harper hospital, Detroit, after suffering for several weeks from catarrhal jaundice.

Mr. Brotherton spent practically all of his life in Rochester. He planted the flowers and shrubbery which surrounded the Michigan building at the World's Fair. He was 56 years old.

Sole ownership in the Maryland Agricultural College is now vested in the State of Maryland following its sale by public auction for \$19,000. The State authorities have long been trying to obtain full control over this college and its inability to do so is said to have been the cause for the unwillingness of its legislature to make usual appropriations. The college was founded as a private institution and its stockholders contributed nearly \$50,000 as a gift to the State.

Some of the stockholders were loath to relinquish their holdings, but an agreement was reached which resulted in its sale.

GREENHOUSE GLASS

OUR PRICES WILL PROVE THIS.

CHICAGO, ILL.

IF YOU ONLY

KNEW what a good eave the METROPOLITAN PATENT-ED is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the eave is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

FRANK E. WOODWARD & COMPANY
19 Friend St., Boston, Mass.

Gable Framing Its Importance

GABLE framing has been slighted. Big houses require radically different gable construction from the smaller ones. This big house in its development is constantly bringing out points that must be met in special ways.

As a splendid example of recent gable construction the 80x600 "footer," completed this Spring for "The MacAlpin Boys," at Exeter, N. H., is well worth looking into.

The limit of our space does not allow us to describe the gable in detail here, but if you will look up our page ad. in *Florists' Exchange* of August 29th, you will get the full facts and figures.

If you don't take the *Exchange*, drop us a postal and we will gladly send you a proof of the Ad.

If you want a safe and sure house and are ready to talk it over—say when and where and we'll be there.

The two main gable rafters in the 80 foot MacAlpin house have steel angles bolted on each side to stiffen and strengthen them. The angle purlins are bolted direct to the angle stiffeners.

The other gable rafters are plain flat bar steel, to which the purlins are bolted by angle knees. The cypress bars are bolted (not screwed) to the purlins, and separated from them by steel spacers.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be promptly received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the editor of HORTICULTURE.

Ardisia crenulata

There are quite a few berried plants useful for the Christmas trade and one of the best is *Ardisia crenulata*. The plants should be elevated so that they can get all possible light and plenty of ventilation. The absolute maximum of temperature should be 58 at night and 55 degrees later on. Give plenty of fresh air. A careless hand at watering will quickly do lots of damage among them. Examine each pot carefully and only apply water where it is really needed. Any excess will cause loss of foliage even more quickly than an insufficient supply. In applying stimulants also use great care, for too much speedily causes a yellowing of the leaves. Soot water will color up plants with pale foliage. Any plants which do not now have berries well colored should be given a sunny place in a warm house, and an occasional syringing will keep them clean. Do not crowd them. See that they have plenty of room.

Poinsettias for Pans

Pans made up now will have plenty of time to grow into fine stock. Drain the pans well and use a friable loam with well-rotted cow manure added. Be careful not to break the small balls as this will mean a loss of foliage. Some small *Cyperus alternifolius*, ferns, *Asparagus Sprengeri* or *A. plumosus* used among the poinsettias will improve the appearance and increases the value of the pans and will help to conceal stems which have lost their foliage. Water with increasing care. Too much or too little means a loss of foliage. A really warm house is not yet necessary; 55 degrees at night is ample and in such a temperature the plants will be stocky. When the bracts show, 5 degrees higher at night can be given. Give ventilation with care, as they will not stand cold drafts.

Pandanus Veitchii

There are always some unsightly plants with a number of side shoots which will make fine material to increase stock. Do not take these suckers off too soon; let them gain size and substance first. It is always better to take them off with a "heel." Place them in a warm prop-

agator, and keep them in heat. Keep them shaded and moist and when they have made roots about half an inch long they will be ready to pot. Use fibrous loam three parts, leaf mold two parts and sand one part. Pot into 3-inch pots with good drainage. Keep in a night temperature of 65 degrees.

Preparing Fields for Next Year

It is a good plan to have all fields manured and plowed during the fall, which will leave less work to do in the spring. Do not forget to restore some organic and mineral matter that has been taken up with the previous crop. For this there is nothing better than a liberal dressing of barnyard manure. By plowing in the fall you leave the soil exposed to the freezing and thawing through the whole winter, which helps to free the soil from all soggy and acidity and leaves it in a finely pulverized state. Where you have plenty of land you can let the worn out fields go into grass which will help to reclaim their fertility, but if the area is limited there is nothing better for the land than sub-soiling with a sub-soil plow. Where this cannot be done a thorough trenching will help.

Manure for Winter

Make it an aim to have a good lot of manure hauled and placed under cover where it can be kept in a dry condition. Good growers agree that well-rotted barnyard manure should have first place above all fertilizers in growing our many crops inside. Should there be some difficulty in procuring it in a sufficiently decomposed condition for immediate use, lay in some fresh manure and this can be forked over and over until the decomposition has put it in proper condition for use later on.

Potting Evergreens for Winter

There will be quite a demand for potted evergreens for the holiday trade. They can be potted up now and will be in good condition at that time. Give them a shady place for about a week, after which they will bear full sun. Well-balanced little trees can be obtained from any of the nursery farms advertising in HORTICULTURE.

Mr. Farrell's next notes will be on the following: *Asparagus Sprengeri*, *A. plumosus*, *Carnations*; *Orchids*; *Sowing Stocks*.

of horticulture. Mark the man whose whole being is wrapped up in his plants—who is in the work, not alone as a purely commercial undertaking but because he is truly heart and soul in love with it and you will find him in the front rank, a recognized leader in his chosen field. Of such sterling material are our Dawsons, Craigs, Walsh's, Cooks, Burpees, Mandas and scores of others whose names come to mind, men "to the manner born," in whose make-up unquenchable ardor and enthusiasm are the dominant factors. We cannot have too many of such.

More than
holding its own

We are pleased to receive news of a more hopeful aspect in the various wholesale flower centres. The cheering feature of the situation is not simply that sales are livelier and prices better but that, upon the coming of a brief cold spell and a touch of Jack Frost, the market responds at once with a jump. This shows plainly that the "weary flat state and unprofitable" market which has figured so often in our weekly reports of late is not entirely a reflection of the business uncertainty and financial stress of which large commercial interests have been complaining for months, but is rather chargeable to the ordinary class of local and temporary vicissitudes of weather and crop with which the flower trade has long been familiar. Considering the largely increased production, due to the remarkable and uninterrupted growth of the flower producing industry and the steady influx of capital indicated by our weekly records of greenhouse building, the healthy stability of the flower business in these disjointed times is really wonderful to contemplate. And it is not unreasonable to conclude that a business which shows such virility at such a time must be well across the line between luxury and indispensability.

Much experimenting has been indulged in and many promising leads have been followed to an unsatisfactory outcome, in the effort to find a stock on which to graft forcing roses, which should rival or excel the universally used Manetti, but that old standby still holds the field against all comers. Next to the search for a substitute has been the endeavor to make commercial Manetti growing a paying proposition in this country. There seems to be no question but that Manetti stock of equal if not better quality than the European product can be grown here. It is argued by some that the greater amount of sunlight here makes the Manetti wood too hard. Good growers whom we have consulted, however, say that they have tried home-grown Manetti on a fair scale and found the wood in no way inferior to the best imported. The question, which has come to the front with the general import issue at the present time, resolves itself simply into one of cost. It is the opinion of those growers whom we have consulted that without some radical reduction in the standard of wages and other conditions here or a corresponding advance in same abroad, it will not pay to try to grow Manetti in America in competition with the stock from Europe. Yet they may be mistaken about that.

The key
to success

"Enthusiasm should run riot in this business to make it the success it should be," says Mr. Finlayson in his notes on the Convention Garden in this issue. No truer words were ever spoken concerning every branch

Vitex Agnus-castus

One of our best small trees for late flowering is to be found in *Vitex Agnus-castus*, the Chaste-tree, or Monk's Pepper-tree. While it is not quite hardy north it will be found an excellent plant for locations near Philadelphia and Baltimore.

The *Vitex* is a native of Southern Europe from whence it was introduced into England in 1670 and has since found its way to this country where it may sometimes be found in nurseries whose collection is varied. It forms a large shrub or small tree with wide-spreading branches and foliage which suggests, possibly, bamboo. The foliage is borne on long petioles and is mostly five-foliate. The leaflets are mostly entire or very finely serrate and whitish beneath.

The flowers of the Chaste-tree are lilac or violet purple in color and are borne in a terminal or axillary panicle from July to September. The individual flowers of the panicle are formed in cymes, subsessile, and in glomerate whorls giving a distinctive appearance to the plant.

Vitex incisa, a native of north China, will be found to be a substitute for *V. Agnes-castus* in the colder northern latitudes and is also a late bloomer. It is at present flowering in the Arnold Arboretum. This shrub has been found to kill back from the cold winters, but the damage done is so slight as to become unnoticeable, as the plant soon makes up for it and appears benefited by this natural pruning. *Vitex incisa* is not as showy as its warmer-blooded relative but is, nevertheless, a valuable addition to a garden or shrub planting.

The *Vitex* loves a rather dry and sunny situation and when so placed they seem to thrive with very little care. A little peat added to the soil is good for them. To propagate the best method is to place cuttings in a similar soil under glass in the autumn.

An agreeable aromatic odor is exhaled from all parts of the *Vitex* when bruised or crushed. In England, where protected, *Vitex Agnus-castus* is often employed as a wall plant with great success as it gives an effect not unlike wistaria but more striking on account of its spike-shaped flowers which stand out well away from the wall and do not droop.

Hubert H. Canning

Jamaica Plain, Mass.

GLADIOLUS GOLDEN KING.

This new yellow seedling was offered for sale for the first time in 1913. It has been well distributed and tested and has already won a certificate of merit in Europe and prizes and distinction in America.

Golden King resembles its parent, Golden Queen, but is much larger in flower and habit of growth. The color is a bright glistening yellow with a striking crimson blotch in the throat. Many good judges say that the dark

center makes the flower more beautiful than if it were all yellow. Golden King produces a large spike from mature bulbs and from 21 to 23 flowers are common. From six to eight of these are often open at one time. The flowers are large, round and broadly expanded and are well arranged on a strong spike.

Golden King is inclined to develop crooked stems during extremely warm weather, but many growers think that this is an advantage for display and decoration. If straight stems are de-

Convention Garden Notes

Editor HORTICULTURE:

Dear Sir: I thought it wouldn't be amiss to pen a few impressions as brought home to myself as to the merits of some of the exhibits in the Convention Garden, and under my personal care.

In this note I will confine myself briefly to the cannas, and the splendid display they have made. Ever since the latter end of the last week in August up to the 26th of September when an unusual cold snap destroyed their luster, they were simply grand, 75 to 80 per cent better than at convention time. What may be said of the cannas can be said of many other exhibits as to superior excellence after convention time, though the percentage could not justifiably be put so high as in the case of the cannas. In this connection and in another note which I fear would unduly lengthen this note I will describe briefly some of those varieties that impressed me as being A1 in their respective characteristics. In this way I may render a service to my professional brethren and others, in putting them on the track of good material should they yet not be acquainted with these. I am not unmindful, however, that tastes differ, and it is well thus—otherwise there would be a terrible if not a hideous sameness.

The public, as well as professional gardeners, have repeatedly declared to me that they have never seen any better or as good flowering cannas before, and I must say that they impressed me more than favorably as being eminently fitted for floral landscape decoration purposes. In large masses of self colors there are few subjects that surpass them for effective coloration schemes, provided the better kinds are employed. I cannot conceive of a more effective means of advertising goods of this nature than the "Convention Garden," inasmuch as it is under the public-eye inspection for a length of time, where merits or demerits, as the case may be, can be plainly beheld. Certainly, no catalogue or magazine advertisement, however adroitly or captivantly put together, can stimulate the desire to possess like the visual advertisement—that is, when you can see by your own two eyes that which you like best. Hence I wonder myself that so few participated in these exhibits. Enthusiasm should run riot in this business to make it the success it should be. I am perfectly satisfied by what has come under my observation that the participants in those exhibits must necessarily directly or indirectly benefit pecuniarily for their labors.

I am pleased to say that all classes of men and women have expressed themselves with much pleasure at what has been accomplished in this garden in so short a time, and without exception, trust that the Convention Garden will be kept as a permanent feature for Bostonians.

H. D. Imbison

ared, the crooked one may be broken off when one of the lateral branches will usually develop a straight stem with large flowers.

There are very few varieties indeed, that are as vigorous in growth as Golden King and small bulbs will throw a large flower spike and bulbets flower freely the first year if planted early.

Golden King was originated and introduced by G. D. Black & Co., Independence, Iowa.

CLUBS AND SOCIETIES

FLORISTS' CLUB OF PHILADELPHIA.

George Burton was elected president of this, the oldest Florists' Club in America, at its annual meeting held on the 6th inst., succeeding J. Otto Thilow, who had the unusual honor of having held the office for two successive terms. In relinquishing the gavel to Mr. Burton, Mr. Thilow made one of the most touching and inspiring speeches—in fact (as that past-master in eloquence Robert Craig confided to us after the meeting)—it was a real burst of eloquence and one of the finest things we have heard in many a moon. John C. Gracey was elected vice-president.

"But like King Ahasuerus I would reign,
And I would rule as he did—
I'd brook no rival to my lovely soul,
No rival on my throne!"

This well deserved compliment to our good friend Mr. Gracey will, we feel sure, be the means of bringing again within the wide all-sheltering arms of the mother, those foolish seceders who deserted the home nest without rhyme or reason. The Florists' Club is big enough and broad enough to embrace all branches of the business. The secretary and treasurer were re-elected. Mr. Thilow gave an account of his recent trip to California which was listened to with much interest. Reports for the year, financial and otherwise, were read and approved. The club has grown a little—and the little is perhaps better than a big growth of evanescent character.

ALBANY FLORISTS' CLUB.

The monthly meeting of this Club was held on Thursday, Oct. 1st, at the Albany Cut Flower Exchange. L. H. Schaefer asked for another month to settle up flower show report.

On motion of Thos. Tracey it was voted to have debates and essays at all the regular meetings, and F. A. Danker was selected to start the good work at the next meeting. The question box also will be taken up for the winter meetings. The secretary was instructed to send a letter of condolence to A. D. Wemple and family on the death of his father-in-law, Stephen Green, representing H. Bayersdorfer & Co., Philadelphia, who was present, was asked to give the members an idea of the effect of the war on florists' supplies for the future. He said many

of his firm's purchases had been held up but he believes they will yet receive some but at a possible advance in price owing to the difficulties of shipping and raise in freight rates. Edw. Tracey, F. A. Danker and L. H. Schaefer were appointed a committee to take up the trip to the S. A. F. and O. H. convention at San Francisco in 1915, and to induce the members who intend to go to start a pool and deposit a sum of money every meeting towards the expense of same, the money to be deposited in a savings bank so that it will draw interest. Remarks were made by Mr. Snyder, of Rhinebeck, N. Y.; Mr. Sanders; Fred Goldring, and others. After adjournment Chairman L. H. Schaefer of the Entertainment Committee invited the members to some refreshments. Next meeting, November 5th.

HORTICULTURAL SOCIETY OF NEW YORK.

The Fall Exhibition of this Society will be held at the American Museum of Natural History, New York City, from October 30 to November 3, inclusive. An invitation is extended to all to make exhibits. Prizes are offered for chrysanthemums, both plants and flowers, roses, carnations, foliage and decorative plants, new plants, and orchids, both plants and flowers. There are classes for both commercial and non-commercial growers.

Three prizes of \$50, \$35, and \$15 are offered for twelve vases of cut chrysanthemum blooms, in twelve varieties, three blooms of each, stems eighteen inches long. This should bring out keen competition. Schedules will be sent on application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, N. Y. City.

GEORGE V. NASH, Sec'y.

The leading horticulturists in Belgium, Luxemburg, France, Ireland, England and Holland are proceeding with their San Francisco exposition plans and the war will not mar the most wonderful horticultural display ever seen in one beauty spot. In a letter just received from Belgium to the officials of the Panama-Pacific International Exposition, notice is given of the early shipment of 10,000 bulbs. "We have not given up hope of visiting the exposition," said the writer.

AMERICAN CARNATION SOCIETY.

Secretary Baur is mailing to each raiser of one or more new varieties of carnations a list of his varieties, with a request for the data lacking of making the society register complete. There are some 300 carnation breed-

ers recorded, with a total of about 1500 varieties. There are several whose address Mr. Baur is unable to find. A list of their names and the varieties they raised is appended. Perhaps some of our readers might help to locate them.

Raiser	Variety	Color	Year
Kirk	Volunteer	White striped rose	1888
Muller	Springfield	Rosy pink	1876
Page	Victor	Red	1887
Pyfer	W. E. Rowlands	Pink	1886

Shuppelt	Marie	Scarlet	1893
E. J. Cloud	Trilby	Br. Cardinal	1896

CLUB AND SOCIETY NOTES.

The Garden Society of Montclair, N. J., held a dahlia show at the Old First Presbyterian Church on September 26.

At the first annual flower show of the Garden Club of Chester Valley, Pa., there was a fine display of flowers, fruits and vegetables.

The Northampton and Holyoke (Mass.) Florists' and Gardeners' Club will hold their annual chrysanthemum exhibit in the city hall, Northampton, November 10 and 11.

The Worcester County (Mass.) Horticultural Society held its regular autumn show on Thursday, October 8. A banquet was served at noon with guests from Boston and Providence present.

The Oyster Bay Horticultural Society held its third autumn show at Oyster Bay, Long Island, N. Y., on September 30. The displays of vegetables were especially good being really the most interesting feature of the exhibition.

The Oklahoma State Nurserymen's association met September 22 for its annual fall meeting, at the Lee-Huckins, Oklahoma City. P. W. Vaught, of Holdenville is president and Jim Parker of Tecumseh is secretary of the organization.

The fourth annual exhibition of the Paterson (N.J.) Floricultural Society on September 25, 26, was a big success in every sense. The judges were William Taney, David Miller of Tuxedo and Jacob Witlinger of Ossining, N. Y., and they had a long list of prizes to award.

A garden exhibit was held at the Froebel school, Muskegon, Mich., on Sept. 22. The pupils of the school exhibited flowers and vegetables grown in home gardens by themselves. There was also a table for exhibits of flowers, fruits and vegetables grown by adults.

The annual exhibit of the Wappingers Falls (N. Y.) Dahlia and Improvement Society originally scheduled to take place on Sept. 25 and 26 was held on Friday and Saturday, Oct. 2 and 3. The continued dry weather has retarded the growth and bloom of many flowers.

The fifth annual exhibition of the Elberon (N. J.) Horticultural Society will be held at the Asbury Park casino November 3, 4 and 5. The show is styled as a chrysanthemum exhibit but it will not be confined to this flower. In addition to flowers, fruits and vegetables will be shown.

The Battle Creek (Mich.) Horticultural Society held a dahlia show on September 29, in the Toeller-Dolling window. The idea of staging a flower exhibition in a show window is rather novel. But "big oaks from little acorns grow," and it all helps toward an increased interest in flowers.

The Preliminary Schedule of Prizes

for the Exhibitions of February, March and May, 1915, to be held in Horticultural Hall, Boston, has been issued and those who have not received a copy may secure same on application to W. P. Rich, secretary. There are some fine prizes for the big Spring Exhibition, March 18-21.

The Association of American Cemetery Superintendents is in session this week at St. Louis, Mo., with headquarters at the Planters' Hotel, M. P. Brazil, Calvary Cemetery, St. Louis, is president of the association; Thomas Wallis, Rose Hill Cemetery, Chicago, vice-president, and Bellett Lawson, Jr., Elmwood Cemetery, Chicago, secretary-treasurer.

The annual exhibition of the products of the school gardens was held on October 2, at the Town Hall, Ipswich, Mass., and was attended by a large number of parents and interested people. The display of flowers and vegetables was the best since the school gardens were started. The contest is conducted under the direction of the Civics Committee of the Ipswich Woman's Club. Cash prizes were awarded.

The annual fruit, vegetable and dahlia show under the auspices of the Field Naturalist Society was held October 3 and 4 at Central Falls, R. I., and was attended by hundreds of the residents of the city, as well as many people from the villages along the Blackstone. The exhibition was said to have surpassed anything in the same line which the society has ever attempted. The judges were Thomas Ashworth, John Standring and John Joyce.

The third annual flower show of the Hightstown (N. J.) Improvement Association was held Saturday, Sept. 19. The interest shown proves that this is a lively organization, the members of which are gladly giving their time, money and energy for the uplift of the community's ideals. In spite of the dry and unfavorable weather, it was by far the largest and best flower show the society has yet had. The committee in charge deserves much praise for its work in arranging the exhibition.

The fall show of the Floral and Civic Association of Merchantville, N. J., was characterized by the local papers as "a tremendous success." Although this was their first show it is said that not within the memory of the oldest inhabitant of the town has the hall ever been visited by so many people within twenty-four hours. On the evening of Sept. 26, the opening day, there was a jam of people waiting in line to gain admission as late as 9 P. M. Many Philadelphia florists, seedsmen and nurserymen were represented and received special awards.

The next annual meeting and exhibition of the New Hampshire Horticultural Society will be held at Antrim, N. H., on October 21, 22, and 23. In addition to approximately three hundred dollars in cash prizes for exhibits of fruit and vegetables, the

Society this year has six beautiful silver trophies and many special prizes, which will be offered. The New Hampshire State Grange has donated a silver cup to be offered for the best general exhibit of apples by any subordinate grange. Premium lists and entry blanks may be secured of the secretary-treasurer, Stanley K. Lovell, Goffstown, N. H.

The schedule of prizes for the annual fall show of the Menlo Park Horticultural Society to be held in Armory Hall, Palo Alto, Cal., on October 23, 24 and 25, has been received and it has a very enticing look for the growers of flowering and foliage plants, chrysanthemums, etc. There are 86 classes, open, private and commercial and among the trophies offered are nine silver cups and one gold watch. The officers are as follows: H. L. Goertzhain, president; J. M. Daly, vice-president; G. Nunn, treasurer; P. Ellings, secretary; exhibition committee, J. M. Daly, chairman, G. Nunn, D. Bassett, J. T. Lynch, P. Ellings; Manager of show, G. Ward.

AWARD OF THE WHITE MEDAL OF HONOR.

The Board of Trustees of the Massachusetts Horticultural Society has awarded the George Robert White Medal of Honor for the current year to Sir Harry J. Veitch of London in recognition of his distinguished services in promoting the advancement of horticulture both in Great Britain and in the United States.

This is the sixth award of this medal which was established by George Robert White of Boston in 1909 to be awarded annually by the Massachusetts Horticultural Society to the person who has done the most in recent years towards the advancement of the interest in horticulture in its broadest sense. The preceding awards have been as follows:

1909, Prof. C. S. Sargent, Director of the Arnold Arboretum.

1910, Jackson Thornton Dawson of the Arnold Arboretum.

1911, Victor Lemoine, Nancy, France.

1912, Michael H. Walsh, Woods Hole, Mass.

1913, Park Commission of the City of Rochester, N. Y.

WM. P. RICH, Sec'y.

SOLDIERS OF THE GOLDEN PLUME.

My soldiers of the golden plume
Are marching forth today;
The valleys of the autumn bloom
Are glorious all the way;
The asters flank them in the lane,
And round the world they run
Brave soldiers of the fall again,
Bright-plumed against the sun.

The ironweed's purple coronals toss
On tall stems by the road;
The meadow marvel's sunbeams boss
The path the storm wind strode;
And by the highways of blown dust,
And o'er the fields of dream,
My soldiers of the golden-rod
In ranks of splendor gleam

How stately and how brave they tread
The vestige of the year,
When summer leaves her fields of dead
For autumn's mothering tear!
How courtly in their conscious pride
They guard 'mid weed and grass
The highways of the countryside
Where ranks of dream must pass

—The Herald we Bore In Boston Post

TOPSFIELD NOTES.

What is said to be the finest example of rock-gardening in America is to be found on the Thomas E. Proctor estate in Topsfield, Mass. It is in many respects unique and in connection with the extensive arboretum established here, presents an attraction of engrossing interest for the advanced horticulturist and plant lover. The rock garden is constructed of boulders, many of them of enormous size, overlooking a small lake, and here seem to have been found the ideal conditions for a myriad of alpine plants. Rare conifers and ericaceous material are planted in endless variety and this most fascinating branch of ornamental gardening is here presented in its most flourishing aspect.

The Proctor estate comprises 3,000 acres, of which the arboretum occupies 300 acres. James Marlborough, the superintendent, points with pride to some specimens and groups of young sequoias and Cupressus Lawsoniana 4 to 6 feet high raised from seed from selected resistant stock with a view to securing trees hardy in Massachusetts, which give lusty evidence of adaptability in this respect. The oaks and other deciduous trees are being largely cut away on this estate and it is being reforested with white pine of which 60,000 young plants are set out each year. Although 25 miles north of Boston this place showed but little sign of frost damage, on a visit on October 2. Begonias and heleotropes in the flower garden were uninjured and in the rock garden the native Adiantum pedatum was also unharmed. Scotch heather (Calluna vulgaris) seems perfectly at home here. Mr. Marlborough has a very sweet-scented single white violet which he brought from the City of Mexico, a most robust grower forming great clumps of massive leaves and now flowering in frames. The flowers are inferior in size to those produced in Mexico, for some unexplained cause, but it is possible that under different climate conditions—further south or west—this would prove a valuable commercial variety and we should like to see it given a trial elsewhere. The ranges of plant and fruit houses on this estate are very extensive and, under Mr. Marlborough's care furnish shining examples of cultural skill. We hope to present some interesting notes later, on the system of peach training followed here.

Another estate of prominence in the Essex County galaxy is the Lawrence Farm where J. Wood is the attentive superintendent. This place comprising 135 acres is "still in the making" and although its principal activities thus far are agricultural rather than horticultural yet there is an elaborately built range of conservatories and additions are contemplated in the near future. Considerable forest planting is under way.

The Palmer estate where William Keith presides as gardener has many interesting features. The rhododendrons are a picture of health and vigor such as is rarely seen. Rose house, carnation house and gardens all show evidence of good care.

New England Nurseries, Bedford, Mass.—Evergreens, Herbaceous Perennials, Bulbs, Shrubs, Roses, Vines, etc., for Fall Planting. A very comprehensive and complete guide for the garden planter, attractive in arrangement and pictorial adornment.

Bargains in Shade Trees And Evergreens

Why We Are Offering Them So Low

Blue Spruce.

IT'S not because business is poor, for in spite of the war, we are keeping over a hundred men as busy as they can be, digging, packing and shipping orders.

This unexpected Fall business we attribute to two things. First, people are all at once getting awake to the fact that Fall is actually the best time for most planting. People, who before would not buy in the Fall, as much as a few hardy plants of us, when we have urged them; have come this season in their autos, and gone away with their running boards loaded with them, besides several good sized evergreens filling up the back seat space.

Both the big and little buyers have come just as we have been advertising for them to come, for the last ten years.

Henry Ford, the famous automobile maker, took four carloads of Evergreens, big and little, last Fall, and three more cars were shipped to him this season.

Reason Number Two for people buying more this Fall, is because they have found out the undebatable, superiority of our stock, as to growth, dense, shapely formed tops, and the advantages of transplanting trees with a compact mass of fine roots that can be dug and shipped entirely without injury to them.

So much for that side of our business; now as to why we have made certain reductions in our Shade Trees and Evergreens.

Briefly: Because some of them will be crowding each other in another year. When this has happened before, we have always

moved them to give all the room to grow, needed for making the expensive tops. But now we have this growing down to such a fine point, with more trees continually coming along, the line growing higher; we have figured it out that it is better for us to sell a certain number of our trees and cut right off their prices what it would cost to move them.

MAPLES.

The big maples, for instance, that used to cost the Pittsburgh steel man, \$90.00, you can buy today, for \$45.00.

Here are some other prices:

High.	Diam.	Spread.	Age.	
20 ft.	5 in.	13 ft.	16 yrs.	\$45.00; reduced to \$28.00
24 ft.	6 in.	14 ft.	18 yrs.	60.00; reduced to 35.00
26 ft.	7 in.	16 ft.	20 yrs.	80.00; reduced to 50.00

WHITE PINES.

4 ft. high.....	@.....	\$20.00	per 10; reduced to \$13.33
5 " " " " " "	@.....	30.00	" 10; " 20.00
8 " " " " " "	@.....	140.00	" 10; " 70.00

SEED TRADE

The European Situation.

Crop conditions have now become fairly clear excepting possibly the European situation, which is now, and promises to remain an enigma throughout the season. European dealers promise very freely that we shall get all goods ordered, but this is improbable, although no doubt we shall get a considerable percentage both those under contract and orders placed this fall. The great trouble however, will be the uncertainty of when the goods will arrive and what items will be omitted. This is a question that the future alone must answer, but this element of uncertainty will be very disturbing to the trade, and many are taking steps to supply immediate requirements on this side of the Atlantic, sufficient at least to meet early orders. This would seem to be good business, especially on the part of the mail-order houses, who begin to receive orders immediately after their catalogues are sent out. We have no wish to be pessimistic in this matter but simply wish to point out what may possibly occur.

Domestic Seed Crops.

So far as domestic crops are concerned, we may say in a general way that peas have been a fairly good crop, though the yield as well as the acreage were both smaller than a year ago, and the situation today is much stronger than last season at this

time. This applies not only to the garden varieties which are used mainly by the seed trade, but to those varieties used mainly by the canners. Good authorities estimate that in 1913, in the State of Wisconsin alone from 50,000 to 75,000 bushels of pea seed was involuntarily raised by the canners; that is, none of it was planted for seed purposes, but owing to the enormous crop and the weather conditions, the peas matured more rapidly than they could be handled for canning purposes, and a considerable percentage were allowed to ripen for seed. In the State of New York also not less than from 30,000 to 40,000 bushels were raised in the same way, while this year a very few thousand bushels in both states, probably not exceeding 6,000 or 8,000 would cover the entire quantity of seed grown by the canners.

The fact that the seed growers are already receiving many inquiries for quotations, particularly from the canners, is an interesting indication of the general requirements in this line. The demand for Alaskas is especially heavy, and they are already being quoted at \$4.00 and upward, which is a premium of at least 50c. per bushel over the prices at which futures were booked last winter. Good judges figure that Alaskas will ultimately sell at \$4.50 per bushel in car lots. There seems to be a much easier situation with regard to the later or "sweet" peas, but it is the opinion of leading growers that the market will be pretty thoroughly cleared up of all desirable pea seed before the meeting of the Canners convention, February next.

With reference to California seed crops, our latest information is that they have been fairly good with the exception of flowering sweet peas and one or two varieties of onion seed. Bush Lima beans, especially the Fordhook and Burpee's Improved are in short supply, and will bring a considerable premium over last spring's growing prices.

Owing to the warm open fall without damaging frosts until after October 1st, corn has generally matured well, even the late varieties. There will probably be sufficient to meet all ordinary requirements at moderate prices.

Vine Seeds and Beans.

Vine seeds of all kinds including cucumbers, melons, squashes and the fancy varieties of pumpkins are a little on the short side, but not sufficiently to cause any anxiety to buyers. The prices may be a little firmer than a year ago but not materially higher. The worst item on the list is the bean crop. Beans undoubtedly are in very short supply, and present indications are that prices will rule even higher than a year ago. It is pretty well understood that there was no carry over of beans, trade having to rely on this year's crops entirely. When we consider that the average on Wax varieties probably will not exceed 25 per cent and on the Green Pods from 25 to 40 per cent, some idea of values may be gained. We have heard it stated that even these low estimates are altogether too high, and that many of the Wax varieties will be returned practically crop fail-

BODDINGTON'S "QUALITY" CHRISTMAS-FLOWERING SWEET PEAS

WE ARE SUPER-HEADQUARTERS

All true stocks of Winter-flowering Sweet Peas will again be scarce this season. The winter-flowering Spencer types are almost a total failure owing to the exceptional season in California this Spring, and through the ravages of Aphis.

We regret that our stocks of YARRAWA and ANITA WEHRMAN are entirely exhausted, also many other good varieties, but we can still offer the following while stocks last. Order at once to avoid disappointment—remembering that our stocks are true to name and while a little higher in price, will save you money in the long run.

ROSE QUEEN "ROSE QUEEN" is Orchid-flowering, borne on long stems, extremely free and early and of pink color most attractive, is a decided acquisition, and like all meritorious novelties is sure to be in demand wherever grown. Prices: Trade pkt., \$1.00; 3 trade pkts. for \$2.75; 1 oz., \$12.00.

ures. We are inclined to regard these statements as a little pessimistic, and at least trust that conditions are not quite so bad.

Bean Prices for 1915.

It may be well to say just a word at this early date about the probable trend of prices on the bean crops of 1915. With white beans bringing from \$6.25 to \$6.75 per hundred pounds at this date, it is easy to conceive that farmers will not readily accept colored seed beans at \$1.75 or \$2.00 per bushel. In order to get the acreage which the growers will require, it looks very much as if they would have to pay not less than \$2.50 to \$2.75 for green and wax pod varieties another year. Should this prove to be the case, it will mean an advance of from \$.75 to \$1.00 per bushel to the seed trade; that is, prices another year will rule that much higher. The trade may as well get themselves prepared to pay these prices, because with the combination that exists a great shortage of seed stocks and the high prices that will have to be paid the farmers, growers of seed beans will be exceedingly foolish if they do not advance their growing prices from 75c. to \$1.00 a bushel as stated above.

Bulbs of High Degree.

It was predicted by some of the knowing ones when the European war broke out, that we should see some Dutch bulbs this fall such as had been rarely, if ever, sent to this country—bulbs that had invariably been reserved for the discriminating Russian and other markets abroad. On the suggestion of Messrs. R. & J. Farquhar & Co. we went to look over some bulb shipments just received from Holland by that firm and there saw evidence plain enough that the prediction above referred to was well founded. There were toproot hyacinths—Gen. DeWet, Grand Maitre, La Grandesse and other standard varieties perfect in every point and measuring 9 inches in circumference; Emperor narcissi of equal girth and, in fact, a marked superiority all through the select grades. Doubtless other importing houses handling high-class bulbs are enjoying a similar experience. Judging from the material available for them to work on, the exhibitors of forced bulbs at next spring's exhibitions will put up something well worth seeing. Having once got a taste of this sort of material it is not likely that the American trade will ever be satisfied to again play second fiddle.

British Seeds.

Editor HORTICULTURE:

Dear Sir:—We have recently noticed reference in the American Press regarding the war conditions which unhappily prevail in Europe at the present time.

These references suggest that the United States and Canada cannot look with confidence to Great Britain for the usual supply of seeds for the coming year. We shall be glad if you will intimate in your columns that there is no foundation for such fears.

This we feel is a matter of public interest and we in this country have every confidence that the British fleet will be able to safeguard the high road across the Atlantic and to ensure uninterrupted traffic which will maintain with regularity the commercial rela-

BUDDLEIA ASIATICA

A New Winter Cut Flower Plant

This new Greenhouse Shrub is without doubt one of the most interesting and attractive flowering plants in existence. It is of exceptional beauty, and wherever exhibited has been greatly admired by every flower lover. It grows about 3 feet tall, is of free branching habit and produces, in abundance, long spikes of pure white flowers, with a delicate fragrance, resembling lilac. They can be forced with little heat, a carnation house temperature being the most suitable, and can be brought into bloom by Christmas; used in combination with poinsettias, they are especially effective; valuable as a pot plant or for cut flowers. We predict a big sale for this novelty, and every progressive florist should try at least a few.

Strong plants in 2½-inch pots, \$2.00 per dozen; per 100, \$15.00. Extra large specimen plants in 6-inch pots, 50c each; per dozen, \$5.00. The supply is limited; order early.

Paper Whites, Romans, Freesias, Hyacinths, Tulips, Narcissus, etc.

Write Today for Our Wholesale Price List and Bulb Catalogue.

HENRY F. MICHELL CO. 518 Market Street, PHILADELPHIA, PA.

tions between the two Continents, and our American friends can look to British sources of supply with the same confidence as they have in times of peace.

We would also like to take the opportunity of referring to the many sympathetic communications which we have received from your side of the Atlantic.

Your obedient servants,
JAMES CARTER & COMPANY.

Chicago Seed Notes.

"Outlook never better," says the Leonard Seed Co. Seed crops grown on their home farms are practically taken care of. A small portion of the peas and beans still remain to be harvested. The crop of peas is not proving so large as at first predicted, while garden beans are in decidedly short crop, owing to early drouth and later cold weather. On the whole there is a shortage in many of the popular varieties of peas and the general crop of beans is much smaller than that of last year. Corn now promises to be in good crop, pleasant weather for harvesting being the only necessary condition. Radish seeds are of excellent quality and crop fairly good and the same may be said of carrots. This refers to American-grown seeds only. Advices from European growers are of a hopeful tone, but no definite information can be had. All American vine seeds as melon, squash, etc., also tomato seeds will be in about the usual supply. The crops that are likely to be shy on account of war are spinach, radish, beets, cauliflower and some varieties of cabbage and all kinds of garden seeds. Onion sets are in fairly good crop and are proving of excellent quality. Indications are that prices will remain steady through the season. At present prices on car lots to be delivered before Jan. 1, 1915, are \$1.50 per bushel on yellow onion sets, \$1.65 on red and

\$1.85 on white. Orders for spring delivery are \$2.25 for yellow and red, and \$2.50 to \$2.75 for white in 50 to 100 bushel lots. These are prices as quoted by the Leonard Seed Co.

The Commissioner of the Louisiana Department of Agriculture has stated that inasmuch as the last Legislature did not provide an appropriation for carrying into effect the new Louisiana seed law, the Department had as yet made no rules and regulations, and advised seedsmen to continue business as heretofore, until further notice.

**Of Interest to Retail
Florists**

Plainfield, N. J.—The contents and fixtures of the florist business, carried on for many years by Mrs. L. J. Denton, on Park avenue, were sold last week by auction and at good prices. Mrs. Denton is retiring from business. She has been carrying on the business since her husband's death, years ago, and has made a most of friends by her attention to the wants of her patrons and by her pleasant manner.

"Business," says William F. Gude, of Washington, "is about as good as usual at this time of the year. Some nice wedding decorations have been supplied during the past week, and a large number of inquiries have been received for receptions, debutante teas and banquets scheduled for the near future. The opening of the Laurel races a week ago created a demand for many flowers such as American Beauty and Mock roses, and for corsage bouquets. The clubhouse was profusely decorated. This is something of a start for the fall and with the number of requests for estimates for wedding and other decorations coming in more numerous than ever before, it augurs well for a good fall season."

**FLORISTS' TELEGRAPH DELIVERY
ASSOCIATION.**

The following names are reported as recent additions to the membership of the F. T. D.:

George Faber, 162 Washington Ave., Kan-
kakee, Ill.; Mrs. H. Alston, 2939 18th St.,
Tuscaloosa, Ala.; Evenden Bros., Williams-
port, Pa.; Welch, the Florist, 180 Asylum
St., Hartford, Conn.; Chas. W. Cronch, 523
Gay St., Knoxville, Tenn.; Weir's Elkhawn
Greenhouses, Jamesport, L. I., N. Y.; Fur-
row & Co., 120 W. Main St., Oklahoma City,
Okla.; W. H. Workman, 61 W. Bridge St.,
Oswego, N. Y.; Spear & McManis, 242
Asylum St., Hartford, Conn.; Wagner
Greenhouses, 622 Columbus Ave., Sandusky,
O.; John A. Salzer Seed Co., LaCrosse,
Wis.; Mary A. Hartnett, Ashton Bldg.,
Grand Rapids, Mich.; S. W. Coggan, 11 W.
Main St., Battle Creek, Mich.; McKenna,
Ltd., St. Catherine and Guy Sts., Montreal,
Canada; J. H. Playdon, Andover, Mass.;
Wm. Filene's Sons Co., 426 Washington St.,
Boston, Mass.; F. E. Selkregg, 19 S. Pearl
St., North East, Pa.

As a representative of every one of
these must first qualify as a member
of the S. A. F., it is evident that the
F. T. D. is a very productive propagat-
ing frame for the mother organization.

BOSTON NOTES.

E. J. Sullivan, buyer for Quinlan Bros., of Lynn, Mass., has returned from his wedding trip in Washington.

Street car advertising is to be an important feature of a publicity campaign by the Boston Cut Flower Co. this winter.

Francis L. Wheeler of Natick and Ethel M. Coulter were married Sept. 23. They have just returned from their trip to Seal Harbor, Me.

Harry Quint is busy rebuilding the front of his store, at 199 Tremont street. The change will give more glass space and easier entrance.

Frank P. Putnam of North Tewksbury, Mass., is cutting the first pompon chrysanthemums we have seen this season. This is unusually early.

Evening classes in agriculture and horticulture will be given each Tuesday, Thursday, Friday and Saturday, beginning Oct. 13, at the Massachusetts Institute of Technology, under direction of the Chamber of Commerce. The lecturers will be members of Massachusetts Agricultural College. The lectures will be popular in form, but scientific and comprehensive.

The New England Rose Conservatories of Exeter, N. H., are featuring a pink and yellow rose which McAlpine & McDonald are offering under the name of "Peaches and Cream." McAlpine & McDonald have enlarged their floor space, greatly improving the establishment.

The Black Beauty rose is being sold in large quantities by McAlpine & McDonald. Black Beauty is a prime specialty with this firm and also with the Budlong Rose Co. The color is very dark crimson, reminding somewhat of the old favorite H. P., Prince Camille de Rohan.

CINCINNATI NOTES.

Wm. Murphy has returned from the Chenaux Islands.

Eddie Schwartz and Miss Bertha Frelsh of Dayton, Ky., were married on Tuesday of this week.

The E. G. Hill Floral Co. have been displaying some very tasty basket arrangements in their show windows.

BUSINESS TROUBLES.

Los Angeles, Cal.—Los Angeles Flower Market, in bankruptcy; assets, \$4,505.92, liabilities, \$5,559.27.

Kenosha, Wis.—The failure of the Commercial Savings Bank caused the failure of the United Refrigerator & Ice Machine Company. The assets of the latter are given as from \$268,000 to \$700,000, liabilities, \$552,000. A meeting of the stockholders was held Sept. 29th at the office of the company to consider plans which would enable the firm to continue in business.

CHICAGO NOTES.

Mr. and Mrs. Jas. G. Hancock are taking a short trip through the south, stopping at Mobile and New Orleans.

Andrew McAdams, well-known former Chicago florist, has returned from Florida and is greeting his many friends.

Many improvements are now completed at Portage Park, and the committee is sending out lists of stock required, for prices on shrubbery, etc.

At Peter Reinberg's store, Manager Reichling states that the Hadley rose is not proving a good commercial variety and they will not grow it another year. That the flowers do not average of sufficient size seems to be the chief objection.

Frank Oechslin has received two car loads of azaleas and another is on the way to be followed by smaller shipments. Prospects are that all azalea orders will be filled in full, and it is quite possible that the market may suffer from oversupply the same as in the bulb situation.

The opening of the flower department in Marshall Field's took place today with Robert Koots in charge. He has had several years of experience, but the conditions are so different that his position will not be an easy one. All arrangements are made for doing a large business and a special delivery car will be for the use of the new department.

A twenty dollar bill was given in payment for \$7.50 worth of flowers Saturday, at the Schiller store on the north side. When the flowers were delivered it was discovered that the man was a fraud and the bill was counterfeit. He had his \$12.50 in change, but was caught and arrested. The man answers to the name of John Morton and comes from outside of Chicago. His case is now in court.

The Foley Greenhouse Mfg. Co. begin the erection of the greenhouses at Purdue University this week where they now have three car loads of material. The range for the University of Illinois at Urbana is now completed and the Foleys are putting in the heating system. Philip Foley, Jr., who spent the summer working on the Purdue job is back for his senior year in high school, where he rejoices in being the manager of the foot ball team.

The opening of the new Continental and Commercial National Bank afforded a veritable flower show to Chicago patrons and the public in general. The new 21-story building occupies the entire block from La Salle street to Fifth avenue and from Adams to Quincy streets, and is the home of three banks. The floral offerings were telegraphed from all over the country and the retailers all seemed to have their share. Harry Rowe captured probably the largest order which called for 2,100 American Beauties.

The broad walk around the "island" in the center of the banking floor was

a promenade, boarded with huge vases and baskets of long stemmed Beauties and large chrysanthemums. The table in the office of President Reynolds was covered over with bouquets of choicest orchids and roses and lily of the valley. About 150 bouquets and baskets were on this floor and about half as many were on the lower floor. If such events could occur each week Chicago florists would greatly appreciate them.

WASHINGTON NOTES.

Neighborhood flower shows are growing to be very popular in Washington and this love of flowers is being fostered by a number of the local florists who see a resulting increased demand for flowers of the hothouse variety. The show at Brookland is a big event in that locality and many good displays are made. This year a number of the members of the Department of Agriculture living in Brookland and who grow flowers as amateurs entered the lists. On the occasion of the first annual flower show of the Petworth Citizens' Association, exhibits were made by thirty-five amateur growers of flowers and potted plants. The hall was decorated by Wm. F. Gude, who holds membership in the organization. The judges were George H. Cooke, George W. Hess, C. W. Colliere and John Cotton Smith.

John R. McLean's residence will soon be equipped with as finely an appointed conservatory as is to be found in this section of the country. The George A. Fuller Company will construct the conservatory upon plans prepared by John R. Pope, of New York, and the work it is estimated will cost \$22,000. It will adjoin the banquet hall, and admission can be gained from that room and from the tapestry rooms through swinging doors of glass. Panels of cast stone are to be set in the walls and pillars within the room will be of the same material. It is planned to place a large statue of Neptune, with a pool of water supplied from a fountain at the base. Banks of moss will line the walls and the conservatory will be stocked with a large collection of rare plants.

Thomas Young, Jr., is again located on Fifth avenue, New York, on the east side of the avenue, two doors from the southeast corner. In the opinion of HORTICULTURE, this is a magnificent location.

Obituary

George T. Hodges.

Geo. T. Hodges, formerly a florist of Louisville, Ky., died at his home in that city on September 25, at the age of 74. He had been ill for about a year.

Luke Mahon.

Luke Mahon, for the past seventeen years in charge of the Henry Lee estate, Brookline, Mass., died suddenly on Friday, October 2, aged 65 years. He leaves a widow, one son and two daughters.

Joseph Cincotte.

Joseph Cincotte, a gardener, employed by Frederic H. Kennard, a landscape architect, died Friday night, Oct. 2, from burns received that afternoon when a tank filled with kerosene exploded in an outbuilding on the Kennard estate at 246 Dudley road, Newton, Mass.

Jesse Bell.

Jesse Bell, of Riderwood, Baltimore County, committed suicide on September 29, by shooting himself in the right temple in an outbuilding at his home. Mr. Bell had been grieving for some time over the ill health of his wife and this is given by his relatives as the reason for the deed. That he had planned his end was evident from the careful manner in which he laid out the clothing in which he wished to be buried. Mr. Bell was fifty-six years old and had for a number of years been employed by William Fraser, a florist of Riderwood. He formerly lived at Govans.

PHILADELPHIA NOTES.

McCrory a 5 and 10 cent store at 12th and Market streets, is the latest in the retail cut flower field.

Verona has added 15 feet to his ice box in the Snellenburg flower shop. Good sign. Smile a little, Mr. Grower.

The Wanamaker dahlia show was held on Oct. 1, 2 and 3. Same was staged with good judgment—not too crowded—correctly named—and of educative value. This is more than can be said of some more pretentious shows. It's a pity we could not have the public educated the same way on lots of other flowers. The dahlia gets far more than its share.

Aster Novae Belgii and others of the charming Michaelmas Daisies are conspicuous features of the cut flower market at present as they well de-

THE JOHN C. MEYER THREAD CO., LOWELL, MASS.
In writing advertisers kindly mention HORTICULTURE.

BE SURE that you get the MEYER GREEN SILK LINE, and do not take any other that is sold as an imitation of the MEYER GREEN SILK LINE, as they do not have the full weight, measure and strength of the genuine article. All our GREEN SILK LINE is guaranteed up to the high standard and mark. The sizes are F, fine; FF, medium; FFF, coarse. It is for sale by all the best jobbers. If you cannot get it of your jobbers, order direct of the manufacturer.

serve to be. If they were not so common—how we would prize them. Did you ever notice the beautiful lacy formation of that infernal weed—the wild parsnip. It's really fine if you can only bring yourself to look on it without prejudice.

Wonderful shapes and delightful colors vied with each other at the stores of Henry A. Dreer, 714-716 Chestnut street, October 6, during the exhibition of dahlias, entered in competition for the premiums offered. Many beautiful flowers were on exhibition, prominent among which was the variety "Kalif," a majestic flower, pure scarlet, immense size and a perfect cactus form. 1st Prize for this was awarded to John W. Pepper, Jenkintown, Pa.; 2nd to A. Burgess, Germantown. "Nibelungenhort," another mammoth dahlia, old rose with golden apricot suffusion, petals beautifully curled and twisted, 1st prize to Edmund S. Eddy, Mt. Holly, N. J.; second to George I. Bodine, Chestnut Hill. "Hurtulanus Flet" giant flowers, beautiful shrimp pink, with delicate tints of red and yellow, 1st prize to George I. Bodine; 2nd to John W. Pepper. "Rheinischer Frohsinn," large flowers with incurving petals, white suffused with carmine rose. 1st to Edmund S. Eddy; 2nd to C. D. Gill, Cynwyd, Penna. "Dreer's Giant Cactus dahlias," immense blooms in charming colors. Three varieties, "Nerthus," "Wodan" and "Wolfgang Von Goethe". 1st to George I. Bodine; 2nd to John W. Pepper. Dreer's Collette dahlia. 1st to John W. Pepper; 2nd to George I. Bodine.

Flower Market Reports

BOSTON The market is again in an unsettled condition. Business was very good at the first of the week, but buying has taken a rapid slump this Thursday. There is a poor demand for roses and carnations, although the quality of roses is very good. With the chilly weather at the end of last week receipts were rapidly decreased and carnations were decidedly scarce, but the reverse now is true. Chrysanthemums have had a good call. Lilies bring a better price than for a long time and the supply of lily of the valley being limited, this also holds a firm market value. There are large quantities of candytuft in the wholesale places, but it is not much appreciated by the buyers and large bunches of fine quality find few takers at 15 cents a bunch. Violets are in fair supply and, everything considered, are of acceptable quality, but are selling slowly. Snapdragons, pansies, etc., are plentiful.

BUFFALO Market conditions have finally taken an upward course and this is due to the fact that Jack Frost has been around this locality and put a crimp on asters and other outdoor stock. Of course there are still a few stragglers, but not enough to mention and this crimp of Jack's has turned the flower buyers toward carnations, chrysanthemums, roses, lilies and other indoor stock. The consequence is that there are not enough long stemmed carnations or chrysanthemums coming in to supply the demand. Roses are showing their winter form and some excellent special Killarneys in pink and white are had, also Richmond and other varieties. Lilies are now scarce and the price has advanced. Single and double dahlias are coming in also cosmos and these have taken well so far. Weather conditions have helped the sales wonderfully.

CHICAGO Summer weather is still bringing summer business and trade is very disappointing. This refers mostly to local trade for the larger shippers claim very good out-of-town business. The event of the week, the opening of the new bank, might be called the event of the summer from the standpoint of flowers used, and served to dispose of an enormous amount of high class stock. Three thousand American Beauties is probably an underestimate and chrysanthemums, orchids, etc., were sent in quantity. Carnations only were left out and not one was seen. Asters are about gone and no one is sorry. Gladioli, too, are getting scarce; Chicago White is seen but buyers are not attracted by them. Roses are almost, if not quite, a glut this week and it takes good salesmanship to move them at any price. Violets are coming to this market daily and the Hudson River ones are said to arrive in fair condition and are as much in favor as home-grown ones. Chrysanthemums are fast getting to be the queen of the market and quality is good. There is little call for orchids though cattleyas, oncidiums and dendrobiums are all to be had. American Beauties are sharing the fate of the rest and lower prices prevail and still

NEW ROSES

This year eclipses all past seasons in the number of varieties of Roses we are handling. Try a box including some of the 1914 introductions.

stock moves slowly. Altogether, florists are waiting for a hard frost and do not expect brisk business until it comes.

CINCINNATI Extraordinary heavy receipts in all lines. No let-up to the receipts of asters, dahlias and cosmos. The first named will undoubtedly be in heavy supply for the next week or so while the last two named are bound to bloom until the first killing frost comes. Rose receipts, including American Beauty, continue heavy and of a good quality. Lilium giganteum receipts are sufficient. Chrysanthemum cuts are larger but as yet are not a great factor in the market. Both lily of the valley and orchid

have a fair call. Prices throughout last week were very low.

NEW YORK The return of warm weather again has made a big change in market conditions this week. Roses, which had been selling remarkably well have taken a sudden drop and are being sold as low as \$5 per 1,000. Lilies also are very much more in evidence. Lily of the valley remains about the same. Violets, some of very good quality, are very plentiful at 25c. to 50c. per 100. American Beauties are also selling for less money. There are still some gladioli in the market. Chrysanthemums seem to be in

Flower Market Reports

(Continued from page 530)

three weeks late with many of the growers and those that are arriving in the market are meeting with fairly good sale.

We are glad to send a more optimistic report of this market. The weather has been cooler; there is less stock; the stocks are better; the demand is also improved; all of which taken together has toned things up considerably. Most people are home from their holidays and the season may now be said to have started in. If they would only stop talking so much about war-war, and hard times, things would be better all around. Folks seem to work themselves up into what the Christian scientist calls "a state of mind." They ought to stop it and go on about their business as usual. Prices on American Beauty roses have stiffened up a little but they still rule considerably below last year's quotations. All roses have improved in quality. Russell leads as the best seller and while there are big cuts arriving there are not nearly enough for the demand. Carnations are rather scarce. Dahlias are moving out in good shape. Asters are still pretty fair. Glory Pacific adds a note of variety to the white and yellow chrysanthemums. Cosmos is at its best and a good business is being done in that item. Lilies are in good supply and will probably sell well until the chrysanthemums get more plentiful.

Business is not yet as steady as it should be, still quite a big improvement is noted. Stock is moving much better than for some time and the glut is not near as heavy as it has been. Roses are still in heavy supply in all grades except Mrs. all varieties with White and Brilliant having the call. Beauties are not so many and are greatly off color. Chrysanthemums are as yet not any too many. Smith's Advance and Golden Glow are the only varieties in. Carnations could be better than they are. Only very few of the fancy grades come in now, but a big crop is coming soon. Violets are off color and don't sell well. Asters are through for this season. Lily of the Russell. Killarneys are supreme in valley and lilies hold their own.

There have been fewer flowers in the market and as a result prices have soared to some extent. There is a very noticeable

improvement in quality of roses. The Mock roses are well worthy of mention and American Beauty roses are constantly improving. Carnations are better but at present they are hanging fire. Thanks to the little difficulties in their production noted last month, dahlias have not come into the market in such quantities as to constitute a glut and spoil the sale of all other flowers. Chrysanthemums October Frost and October Yellow, came into bloom last week, and Smith's Advance are coming along nicely. Cosmos is now to be had, but not in such quantity as to be considered a pest by the store men. Lily of the valley is holding up well to a price of \$5 per hundred. There seems to be little or no demand for lilies. Violets are beginning, but it will be some few days before these are in the proper quality.

ST. LOUIS NOTES.

Carl Haltenhoff, of Gotha, Fla., well known in trade circles here, visited friends recently on his way to Marshall, Iowa, where he will engage in business with A. H. Smith in landscape work. Both are former graduates of Shaw's Garden.

Alfred Rehder of the Arnold Arboretum, Boston, Paul C. Standly of the U. S. National Herbarium, Washington, D. C., and Dr. David Griffiths of the Bureau of Plant Industry of the United States, Washington, D. C., recently paid a visit to Shaw Gardens and were guests of the directors.

Anton Haitoebben, 24 years, a tree-trimmer employed in the City Forestry Department, was seriously injured when a trimmer which he was using came in contact with a heavily charged electric wire. The steel of his pruning implement carried the voltage to Haitoebben and the shock threw him from the tree to the ground, 25 feet. He was taken to the City Hospital, where it was found he had suffered a fracture of the skull and numerous cuts and bruises about the head and body.

TRUCKERS' CONVENTION, PHILADELPHIA.

The seventh annual convention of the Vegetable Growers' Association of America was held in Horticultural Hall, Oct. 6, 7 and 8. The local arrangements were taken care of by the Philadelphia Vegetable Growers' Association. The sessions were well attended by a representative gathering from all parts of the country, and took place in the lower hall. The exhibition was in the upper hall. Among the most interesting of the exhibits to readers of Horticulture were the following:

W. Atlee Burpee & Co., an excellent collection of new large early-flowering gladioli raised from seed sown last May. For size and splendor the flowers were most sensational and to old timers who know the culture of the gladiolus only by way of the bulbs the exhibit was almost beyond belief. Trilliums and dahlias in the same connection were also shown. A great feature of this display was a beautiful trade-mark sign eight feet high and four feet across made from seeds of peas, beans, corn, etc. This was the work of Frank Therkildson and assistants. The floral triumphs were due to the cultural genius of George W. Kerr. Stokes' Seed Store made an excellent display of vegetables of the standard and newer varieties. Henry A. Dreer put up an excellent exhibit consisting mainly of seed samples and ferns and other foliage plants.

One of the finest of the non-professional vegetable exhibits was that from the farms of the Campbell Soup Co. This was the daintiest, neatest, most varied and artistic of anything we have ever seen in the way of a vegetable exhibit. Above all it was not too crowded. Every subject stood out separately as a distinct entity. Blue, green and purple Siberian kale made an excellent background center.

Lord & Burnham Co. were on hand with a fine lot of good salesmen—flanked by paint, putty and pictures. Fred Lautenschlager was there also—with an exhibit of pictures. Willard B. Kille showed his new everbearing strawberry "Superb." This proved a center of attraction and the results to the exhibitor must have been very gratifying.

Good displays were put up by the Pennsylvania State College, University of Oregon, Maryland State College, Philadelphia Vegetable Growers' Association, (Byberry) City Farms, Women's Horticultural Society (Ambler) Ohio State University, Cornell University, University of Illinois. The implement and fertilizer men were represented in a minor way, and of course our old Slug Shot friend, Ben. Hammond, was on hand with a good showing of his specialties.

The official program which was carried out with more or less completeness was as follows:

Tuesday, October 6, 9.30 A. M.

Call to Order. President R. L. Watts, State College, Pa., gave the Addresses.

On behalf of the City of Philadelphia, the Hon. Rudolph Blankenburg, Mayor. On behalf of the Philadelphia Vegetable Growers' Association, Mr. Howard W. Selby. Response.—Mr. C. W. Waid, E. Lansing, Mich. President's Annual Address. Report of Secretary. Report of Treasurer. Reports of Standing Committees.—"Nomenclature and Varieties of Vegetables," Prof. W. R. Lazenby, Ohio State University, Columbus, O., Chairman. "Weights and Measures," Mr. C. W. Waid, Michigan Agricultural College, E. Lansing, Mich., Chairman. "Seed Inspection and Certification," Dr. W. A. Orton, U. S. Department of Agriculture, Washington, D. C., Chairman. "Transportation Rates," Mr. E. A. Dunbar, Ashtabula, O., Secretary.

1.30 P. M.—Inspection Trip to Bustleton Market Gardens.

7.30 P. M.—Popular Open Meeting under auspices of Philadelphia Vegetable Growers' Association. Subject for Discussion: "Standardization," Prof. Clyde L. King, University of Pennsylvania, Philadelphia, Pa., Leader. Address.—Mr. Geo. W. Perkins, New York, N. Y.

Wednesday, October 7, 9.30 A. M.

Appointment of Committees. Subject for Discussion: "Soil Problems for Vegetable Growers," Dr. Jacob G. Lipman, Director, New Jersey Agricultural Experiment Station, New Brunswick, N. J., Leader.

1.30 P. M.—Inspection Trip to South Jersey Truck Farms.

7.30 P. M.—Popular Open Meeting under auspices of Philadelphia Vegetable Growers' Association. Subject for Discussion: "Marketing," Prof. Clyde L. King, University of Pennsylvania, Philadelphia, Pa., Leader. Discussion by Mr. E. T. Butterworth, Philadelphia, Branch, National League of Commission Merchants and others.

Thursday, October 8, 9.30 A. M.

Subject for Discussion: "Co-operation," Prof. Paul Work, New York State College of Agriculture, Leader. Addresses by Prof. T. C. Johnson, Director, Virginia Truck Experiment Station, Norfolk, Va., and others.

1.30 P. M.—Report of Committee on Resolutions. Report of Committee on Nominations. Election of Officers. Unfinished Business.

7.30 P. M.—Annual Banquet at the Bellevue-Stratford Hotel.

Friday, October 9.

Inspection Trips to Philadelphia Wholesale and Retail Markets, to Mr. C. W. Skinner's Farm at Newfield, N. J., and to other points of interest.

MASSACHUSETTS AGRICULTURAL COLLEGE NOTES.

The seniors in floriculture made a trip to the Botanic Gardens at Smith College, Northampton and under the guidance of Mr. Downer, who is in charge of the grounds, were shown through the greenhouses, herbaceous garden and shrubbery plantations.

A specimen Paulownia imperialis growing in a sheltered position attracted attention. This tree, a staminate form, has already set its flower buds for next spring. As it does not regularly flower north of New York City, this tree on Smith's College grounds is an unusual sight so far north.

A recent trip was taken by the juniors in floriculture to G. H. Sinclair's, Holyoke, Mass. Mr. Sinclair is putting up a new house, 60x400. Hitchings Co. is doing the construction. The students' trip was most valuable, as they saw the house in the midst of construction with all the modern, up-to-date appliances being installed, including a new recording ventilating apparatus. The house will be

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Two volumes have now been issued and the others will follow in succession. Order from

HORTICULTURE PUBLISHING CO.

11 Hamilton Place, Boston, Mass.

devoted to carnations and sweet peas. The spring crop will be lettuce.

French Hall is now completed and in it are the floricultural, market gardening and forestry departments.

The Horticultural Department has added a reflectoscope to its equipment. W. H. HATFIELD.

MOVING BIG TREES.

Our cover illustration this week shows a most interesting bit of tree moving and planting done by Isaac Hicks & Son. It is a conclusive evidence of the unqualified success of big tree moving when skillfully done. In this particular instance the owner's daughter wanted their new home to be built on top of a very slightly, treeless hill in Connecticut. She also demanded that the place should be surrounded with big elms and in two years' time have all the appearances of having been established by her ancestors.

Hicks successfully moved these fine old elms in from the country round about for twenty miles. That was over five years ago. The trees have been thriving, as you see them in the picture, ever since.

Hicks says that with his method of growing of big trees and root pruning, he can dig from his nursery and ship hundreds of miles, trees that are thirty feet high, and guarantee them to thrive and if they don't he cheerfully replaces them—a thing he is asked to do but seldom.

One of his tree movers will carry forty tons and is drawn by a traction engine, quite after the manner of the Germans in moving their big siege guns.

Directions on every package

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

Stumpp & Walter Co.

Miscellaneous Stock

A few items every florist needs. For complete list send for catalog No. 5. Send us your list of wants.

CALADIUM ESCULENTUM—Good bulbs with sound centers: 5 to 7 in. circumference, \$2.00 per 100; 7 to 9 in. circumference, \$3.00 per 100; 9 to 11 in. circumference, \$6.00 per 100.

BEGONIA, TUBEROUS ROOTED—Bulbs large from one of Belgium's best growers: Single Separate colors, \$2.50 per 100, \$22.50 per 1000; Single Mixed colors, \$2.25 per 100, \$20.00 per 1000; Double Separate colors, \$4.50 per 100, \$40.00 per 1000; Double Mixed colors, \$4.00 per 100, \$35.00 per 1000.

GLOXINIAS—Fine sound bulbs in separate colors, \$4.00 per 100, \$35.00 per 1000.

RHODODENDRONS—A fine lot of hardy sorts, in plants full of buds and with good foliage, 18 in. high, 8 to 12 buds, \$9.00 per doz.; 24 in. high, 12 to 14 buds, \$12.00 per doz.

AZALEA MOLLIS—Bushy, well budded plants, 15 to 18 in. high, \$35.00 per dozen.

DUTCHMAN'S PIPE—*Aristolochia Sipho*, tops 4 ft. long, a grand vine for shade and cold exposure, \$3.50 per dozen, \$25.00 per 100.

MAGNOLIA—Fine well budded plants, with ball of earth, burlapped; all varieties, White, Pink and Red, 4 to 5 ft. high, \$1.50 each. Stellata or Halleana, early star shaped white, 2½ to 3 ft. high, at \$1.50 each.

ENGLISH IVY—Two or more shoots, 3 ft. long, \$12.00 per 100.

The Storrs & Harrison Co.
Painesville, O.

FERNS IN FLATS

All the popular and useful small ferns, including a specially fine lot of *Pteris Victoricae*, \$2.00 per flat. Guaranteed 200 plants to a flat.

CIBOTIUM SCHIEDEI

Fine plants in 8 in. tubs, \$3.00 and \$4.00. In 7 in. pots, \$2.50 each.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Asparagus Sprengeri

All asparagus needs plenty of moisture around the roots especially when the roots are confined in a basket or pot. Trouble with *A. Sprengeri* is usually due to lack of water at the roots. Asparagus, when growing at all and proper drainage is provided, can stand feeding, and liquid cow manure—saw twice a week—is as good as anything. New growth is now coming up and a good top dressing for the plants whether in baskets or planted out on benches or beds, is of great help. They do very well in a 55 to 60 degrees night temperature. On all good days they like to be syringed.

Azaleas

Most of the azaleas are so heavily rooted that it is necessary to trim the roots so that they will go into a pot suitable for the size of the plant. If the ball is cut down with a big, sharp knife, I never saw the least harm come of it. Unpack as soon as received and give the ball of roots a good dipping in a tub of water for at least an hour, to soak them through. Pot firmly in 6 to 8 inch azalea pots using any good grade of potting soil and stand them in a cool, shady house and keep rather close for a week. Spray lightly two or three times daily. Those wanted for Easter should be stored in a cool pit where it will get sufficient light and where the frost can be excluded in zero weather. Those wanted for holiday forcing should be gradually inured in a cool house which will get them into shape for a warmer place in two or three weeks.

Begonia Lorraine and Cincinnati

What the larger specimen begonias—those in from five to eight pots—are most in need of now is room, plenty of it. They should be raised up closer to the glass, be placed on blocks of wood or inverted pots, and far enough apart to have every one of the overhanging branches fully exposed to the light. Tobacco fumigation in mild form before the flowers open will not harm, but after that it will. A layer of tobacco stems between and under the plants does much in keeping away insects. Temperature should not go below 55 nor rise above 70 degrees. Begonias of the smaller sizes, now making a rapid growth, also demand their full share of the grower's attention just now.

Mr. Farrell's next notes will be on the following: Callas; Christmas Plants; Tulips for Easter; Lily of the Valley for Holidays; Propagation; Night Temperatures

Care of Carnations

When syringing, special attention should be given to the ends of the benches where pipes may be nearer the plants, and dry walks should be damped down every day. If a general syringing is not given every day the plants should at least get a spraying through the bottom from every other walk. It must be done early in the morning, so that they will dry off before night. In the winter when the plants will not dry, the syringings have to be cut down to about one a week and even then they have to be shaken to remove the surplus moisture so that they do not remain wet over night. Disbudding is another thing which must be done at the right time. When the plants are growing fast, they should be gone over at least once a week. Apply a light dusting of bone flour, about 100 pounds to 2,000 square feet of bench surface. You can apply a top dressing of loam and cow manure in equal parts, putting it on about half an inch thick.

Orchids

Summer flowering orchids will now welcome a good rest. It is better to wait until the new growths begin to show with new roots just pushing before repotting. Taken in hand at this stage they soon become re-established. Use either clear osmunda fibre, or live sphagnum moss and osmunda in equal parts. Give the pots or baskets half their depth of crocks with some charcoal to insure good drainage. When potting bring the new compost well up to the base of the pseudo-bulb, potting moderately firm. Give them a shady part of the house for a little while and keep the floors and benches well damped down. Great care in watering will be necessary until the plants become well established. Give them a temperature of from 55 to 58 degrees at night.

Sowing Stocks

Now is a good time to sow some of this seed for pots and bench culture later on. Sow in pans or flats upon a fine sandy mixture, and cover the seed about three times their diameter. Keep in a temperature of about 48 degrees at night. When large enough they should be pricked out in other flats and later on they can be potted off.

"Anybody can sell the first class stuff; in fact, it sells itself," said our friend, "but it takes a genius to get rid of the leavings and that often represents our profits." Perhaps he was right, but there is another side to the question and that is as to the effect on the future patronage of the customer who, perchance, later on realized that he had been bitten. We acknowledge the "genius" part of it, when it comes to selling "lemons," in the critical disposition of the flower-buying public of the present day, but—what of the hereafter? Browning says:

"Genius has something of the infantine:
But of the childish, not a touch nor taint
Except through self-will, which, being foolishness,
Is certain, soon or late, of punishment."

About
"geniuses"

Having thus stumbled upon the subject of "a genius" in our rambles about town we must here disclaim any intention of "butting in" with a view to win that prize offered by George Cooper Watson for the best definition of a genius. The thing seems to be epidemic just now. In this issue our esteemed correspondent Richard Rothe is "hot on the trail" too, and he lauds the genius who is able to get away from the commonplace and traditional rule-of-thumb and do something fitting and appropriate in arrangement which was never done before. If, however, Dryden's belief that "genius must be born, and never can be taught," is well founded, then Mr. Rothe's educational efforts and our own frequent editorial exhortations are, indeed, futile excepting when they strike home to the man so born and perhaps serve to awaken his sleeping talents. Is the decorative talent displayed at our floral exhibitions, as they run on the average, to be considered a fair criterion of the number of floral geniuses in our midst?

The dump

Advices from many plant and bulb importers in all directions are to the effect that shipments from the disturbed European sources of supply are coming to hand, tardily but with a very creditable promptness considering the difficulties in the way. As predicted by some, there are evidences of an inclination on the part of foreign houses to unload on the American market not only our full legitimate needs but also more or less of the stock heretofore used in the countries now engulfed in war. This, in some instances, is superior stock but the opportunity has been evidently seized to throw in an enormous quantity of low grade bulb mixtures, often under deceiving names, and these find their way through all kinds of cheap-john channels, to the trade or the public—it matters not to the distributors who gets them—at whatever pittance they will bring. While we may have sympathy for the distressed growers of this material abroad this consideration does not extend to the parties on this side who are using the situation to demoralize the market here and injure the business of the legitimate dealers who paid regular market values abroad and now find their trade menaced by this deluge. The best protection against the invasion, however, lies in the unreliability of much of the stuff so offered and the wise buyer will stick to regular sources of supply or else buy nothing outside without a guarantee that goods are exactly as represented, coupled with a forfeit should they turn out otherwise.

A
question of
policy

Discussing with a store man recently the qualifications of one of his employees we were interested to learn that this particular clerk had especially endeared himself to his employers by his persuasive abilities in working off questionable or deteriorated material.

The Water Lily Pond at "Penbroke," Bryn Mawr, Pa.

It seems that floriculture as a vocation to a certain extent shortens our vision in regard to the beauty invested in flowers. We are prone to look at the product of ornamental plants and flowers as the shoe-manufacturer looks at his boots which is a serious short-sightedness. In order to be successful we should be able to transfer ourselves into the position of our respective patronage and endeavor to look at the matter their way. If we are imbued with a real innate love for flowers, how can we expect to be able to awaken and strengthen the appetite of others for a thing we do not relish ourselves? Evidence of narrow perception is shown in every case of poor staging of otherwise excellent material at our flower shows; also in the frequently neglected and ramshackle outside appearance of a florist's place. HORTICULTURE in its editorials has in the past repeatedly called attention to those weaknesses.

I am convinced it is time for many of us to make an honest effort to regain the wide perspective showing the urgent necessity of finding more telling ways and means to augment the general appreciation of floral beauty. Barring the specialist, our rank and file has every reason to strive for the attainment of taste and a better understanding of the decorative side of our calling. We cannot afford to be satisfied alone with perfection in our trees, shrubs, plants and flowers. If nothing more, prudence should prompt us to miss no opportunity for assuming the leadership by giving practical demonstrations and helpful suggestions of how to use and enjoy our product to the very best advantage. Once interested in this line of missionary work we will, by seeing what others have done, often discover things we should have done, too, and, perhaps done long ago.

In studying the ever-important problem of arrangement for effect in our gardens we find ourselves sometimes confronted by novel solutions of surprising simplicity. The waterlily-pond at "Penbroke" in Bryn Mawr, Pa., the subject of today's frontispiece of HORTICULTURE is an object lesson in this direction. To enliven the surface of the formal basin as part of a regular flower parterre with an appropriate aquatic vegetation is a comparatively easy task. The selection of material and the arrangement for an irregular pond or natural pool embracing naturalistic shore plantations offers more latitude for exertion of individual taste and talent. But the situation of the pond at "Penbroke" between two formal flower gardens made a naturalistic treatment well-nigh impossible. In this instance, by setting aside all rules laid down in standard works on landscape gardening and aiming solely for a gorgeous floral effect during the time the tropical nymphaeas were at their height the designer showed excellent judgment. The employment of the hardy hydrangeas with their immense white panicles as a relief and background for the rare classic forms of the *Nymphaea* varieties *dentata*, *O'Marana*, *rubra*, *William Stone* and *zanzibarensis*, resulted in an extremely fascinating picture. We wish here to congratulate Mr. Wm. Fowler, in charge of the

Penbroke estate, upon his skill as a grower of aquatics. His nymphaeas were the best we have seen in Philadelphia private gardens and we regret that the camera gives only a very vague idea of their exquisite beauty particularly in color effect which we were privileged to witness. The arrangement we believe is not of the type to be laid down in rule books of garden art, but it strongly impressed us as a design and execution testifying to the resourcefulness of an originator who, when necessity calls, is able to emancipate himself from cast-iron rules. It is the kind of work we may expect of a horticulturist living up to what Friedrich von Schiller in his "Song of the Bell" says:

"This forms a man's chief attribute
And reason is to him assigned,
That what his hands may execute,
Within his heart, too, he should find."

Richard Rothe

Glenside, Pa.

When to Plant Iris

A reader wishes to know when to plant these flowers. August is the very best time, especially in the north. Then they get well rooted for winter. You can plant them, however, any time until the ground freezes. But if you are far north you had better mulch them. Don't plant too deep. You will note that some kinds lift themselves out of the ground, to get into the sunlight. Some think because a few kinds grow in water they should be planted in wet ground. This is fatal to the German or rhizomatous iris; they cannot endure wet feet. This summer, I had a very vigorous row that were badly mixed. When in bloom I could separate them, so, as the weather was moist and the ground in good condition I dug them, cut off the tops and planted them, and all made a fine growth. The very worst time is just as they are about to bloom. I placed an order with a dealer and he was overcrowded and sent the stock very late and nearly every one died. Great care should be used in shipping early. You must send them dry; packed in damp moss they are sure to rot.

Diseases of the Iris

In our collection of 200,000 we have never noticed any trouble save occasionally the root rot, where the top joins the rhizome. And this trouble is due to too much manure and too much wet. Nebraska is an ideal place for iris. We generally have hot dry summers and if very hot and dry they seem to enjoy it. And in such a season they are always healthy. They should be planted on land high and dry with good surface drainage. If we have a very wet season on low ground we are sure to find some disease. Some sorts are immune and some are very subject to the rot. The Mori King is the worst of the lot, for it will get sick on the least provocation. They were so bad we dug up the whole row and threw them away in disgust. Had they been planted on a sandy ridge without manure they would have done all right but we didn't have the sand.

C. S. Harris

York, Neb.

CLUBS AND SOCIETIES

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

This club met on the evening of October 6, in the Fort Pitt Hotel, and the members thoroughly enjoyed the dahlia display which had been arranged. Carl Becherer, gardener at Dixmont Hospital, showed a notable collection of dahlias, many of them seedlings, strong in collarette varieties. The blaze of color in his varieties was remarkable, all of which were from tubers planted June 15. Among his exhibits were some flowers of the wild dahlia as found growing in the mountains of Mexico, single, long-stemmed and brick-red in color. Wm. Thomson, Jr., gardener for W. P. Snyder, Sewickley Heights, showed a well-grown collection of standard varieties. Cultural certificates were awarded to Messrs. Becherer and Thomson.

R. Vincent, Jr. & Sons Co., of White Marsh, Md., made a striking display of large blooms. Some of the outstanding varieties were: Beloit, Geisha, Hon. R. L. Borden, Jack's Discovery and Jack's Pink. H. C. Knauff of Pittsburgh, N. S., showed roses grown in the open, W. R. Smith, Gloire de Dijon and Bouquet d'Or thrifty and well-grown. The thanks of the club were given to the exhibitors. J. W. Jones spoke appreciatively of Dreer's Garden on the pier at Atlantic City and President McCallum told of a recent visit to Boston and the Arnold Arboretum. In Boston he was pleased with the bedding which achieved pleasing results by the use of unusual combinations, as for example Pandanus Veitchii, Ficus elastica with snapdragons between. Of the Arboretum and Jackson Dawson he could not say too much in praise. For a street tree adapted to Pittsburgh conditions, the Crimean linden was mentioned.

P. S. Randolph extended an invitation to visit his new plant at Sandy Creek on October 29 for a day's outing. The invitation was accepted with thanks. H. P. JOSLIN, Sec'y.

AMERICAN CEMETERY SUPERINTENDENTS.

The Association of American Cemetery Superintendents held a two-day session at the Planters Hotel, St. Louis, and the third day at the Missouri Botanical Garden last week. Discussions took place on floral decorations and landscape gardening features in cemeteries. "Flower Display Without Rain," a paper by W. E. Ohlweiler, general manager of the garden, and "Pictures in a Park Cemetery," by John Noyes, landscape gardener, were the features of the meeting at the Botanical Garden. Officers were elected as follows: President, Thomas Wallis, Rose Hill Cemetery, Chicago; Vice-President, James Warren, Providence, R. I.; Secretary and Treasurer, B. Lawson, Jr., Chicago; Executive Committee, H. S. Adams, Boston; W. P. Jones, Pittsburgh and J. A. Reed, Canton, Ohio. After the meeting the members were guests of the directors of the Botanical Garden at a luncheon. One hundred members were in attendance.

ST. LOUIS FLORIST CLUB.

A very interesting meeting of the Florist Club was held last week. A spring flower show was discussed and laid over until the next meeting for further consideration. H. W. Ohlweiler, Geo. H. Pring and C. W. Garrett, all of the Missouri Botanical Garden, were elected to membership.

Joe Hauser of Kirkwood had on exhibition his new single red dahlia which was highly commended by the committee. Mr. Hauser invited all to visit his dahlia farm. Neatly painted signs were ordered to be placed in all the wholesale houses inviting florists to join the club and advertise the meeting days and place of holding them. The next meeting will be held on November 12, at 2 o'clock.

GEORGE BURTON.

President-elect Florists' Club of Philadelphia.

NEW BEDFORD HORTICULTURAL SOCIETY.

At the meeting of this society, October 5, the subject "After the frost, What?" proved a drawing card, bringing out a good attendance and started a very pleasing and instructive discussion. Fall planting and winter protection were discussed so earnestly that the closing time arrived before we had half covered the ground and so the subject will be continued in our next. H. A. Jahn, the speaker of the evening, proved very versatile in answering questions, while his chronic good nature kept the members in a state of merriment.

Among the exhibits of the evening was a fine display of dahlias by Jose S. Figuerido of this city, easily taking premier honors. John P. Rooney showed his seedling peony-flowered dahlia—Mrs. Fred'k Grinnell. This looks like a good thing, color medium pink, form good with stems 2 to 3 feet long. The raiser claims exceptional keeping qualities for his seedling.

Arrangements for the coming Chrysanthemum Show were left to the executive committee. WM. F. TURNER.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

There was a large attendance at the October meeting of this Society. The fall show committee reported everything in readiness for a successful exhibition. Attractive prizes of cash, silver cups, cut glass and silverware are offered in the schedule which may be had from the secretary of the exhibition committee, Oscar Addor, Larchmont, N. Y. The show will be held in Germania Hall, New Rochelle, N. Y., November 4-5-6. A committee was appointed to draft resolutions of sympathy with the bereaved family of the late Henry Darlington, who was a life member of the society and whose interest in its welfare was appreciated by the entire membership. Nathan F. Barrett of New Rochelle, N. Y., lectured on "Landscape Architecture" in a pleasing manner and a rising vote of thanks was accorded him. A fine display of seasonable flowers, fruits and vegetables was on the exhibition tables. The special prize offered by Robt. Allen of Greenwich, Conn., for the best six varieties of vegetables was won by J. B. Andrews. Cultural certificates were awarded to the following: Robt. Williamson for collection of vegetables; E. Laurs, onions; P. W. Popp, dahlias all types, shown on long stems; Robert Williamson received honorable mention for peaches, melons and English walnuts. The thanks of the society was extended to John Conroy for seedling chrysanthemums (Mrs. H. Robinson × Cheltoni); Robt. Grunnert for carnations; Jas. Stuart, for hardy early flowering chrysanthemum "Normandie;" Carl Hankenson for Hadley roses and chrysanthemums; John Beck & Sons, Golden Glow; John B. Andrew, apples; Jas. Stuart, Conochlinium cœlestinum. The next meeting will be held November 13. P. W. POPP, Cor. Sec'y.

NEW YORK FLORISTS' CLUB.

About seventy-five members were present on the occasion of the October meeting of the New York Florists' Club, last Monday evening, and it was a very interesting meeting all through. Richard Vincent, Jr., of Whitmarsh, Md., was the lecturer of the evening, his subject being "Scotland." His talk was illustrated by handsome stereopticon views showing places of great natural beauty and historic interest, among which the haunts of Robert Burns were especially prominent, and the lecturer interspersed his remarks with quotations from Burns' poems. In this connection he urged the cause of the Wm. R. Smith Memorial to be erected in Washington, advising that it take the form of a garden school where young men could secure education in gardening.

Prior to the lecture various routine matters were disposed of. The report of the outing committee presented by W. E. Marshall showed a clean slate and no deficit, which was duly applauded. It was agreed that the November meeting be Ladies' Night. W. F. Sheridan, Emil Schloss and J. R. Lewis were appointed a committee to

prepare resolutions on the death of Lillian, daughter of J. Austin Shaw.

There was an unusually extensive display of flowers on the exhibition tables on which full report was made by J. A. Manda, chairman of the committee on awards. R. Vincent, Jr., & Sons Co., White Marsh, Md., Dahlias Geisha, Golden West, Sauv. de G. Dauton, Golden Gate, Hon. R. L. Borden, Beloit. Vote of thanks. C. H. Totty, Madison, N. J., a collection of early-flowering French Chrysanthemums, including Pomponette, Marie Dufour, Eden, Red Riding Hood, Debutante, Bronze Goacher, Normandie, A. Barham, and Chas. Jolly, pink. A fine new white Japanese exhibition variety, Antigore, was awarded a certificate of merit. Mr. Totty also showed a vase of White Shawyer, a sport of Mrs. Geo. Shawyer rose of the same habit of growth as the parent, which was given a preliminary certificate. J. Lewis Childs, Flowerfield, L. I., showed Celosia "Wool Flower," which was given a vote of thanks. W. A. Manda, S. Orange, N. J., displayed a fine collection of new dahlias, including the following varieties, among which are a number of seedlings: Perfection, Fire Flame, Minnie, Veronica Manda, Josef Manda, Sr., all of which were given a preliminary certificate; Albert Manda, which the committee desired to see again, and Resplendens, Tango, Bohemia, Garnet, Mrs. Gertrude Manda, Mrs. A. I. Du Pont, Excelsa, Frank Manda and Jos. Ehrlich. W. A. Finger, Hicksville, N. Y., showed Dahlias Kalif, Duchess of Brunswick and Golden Gate.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The Nominating Committee of the Massachusetts Horticultural Society has posted the list of candidates for the various officers of the society for the year 1915 to be voted for at the annual meeting November 14.

The list is as follows: President, John K. M. L. Farquhar; vice-president, Richard M. Saltonstall. Trustees for three years, C. S. Sargent, Thomas Roland, F. L. Ames, Thomas Allen. Nominating Committee, John L. Smith, Richard Hittinger, David R. Craig, George Page, Henry M. Howard. Delegate to State Board of Agriculture, Edward B. Wilder. In accordance with the by-laws of the society two weeks are allowed for further nominations should any be desired.

WM. P. RICH, Sec'y.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The annual meeting of the Chrysanthemum Society of America will be held at Indianapolis, Ind., at 9.30 Saturday morning, November 7. Papers will be read as follows: Pompon Chrysanthemums by Fred H. Lemon, Richmond, Ind.; Chrysanthemum Cut Blooms for Exhibition, by Wm. Vert Castle Gould, Port Washington, Long Island, N. Y.; Chrysanthemum Specimen Plants for Exhibition, by J. Canning, Sup't Heather Dell Farm, Ardsley, New York. Friday, November 6, the first day of the show, will be devoted to the staging of the exhibits and the judging.

The complete premium list for the annual exhibit of the Chrysanthemum Society of America, to be held at the

German House, Indianapolis, Ind., on November 6, 7 and 8, has been sent out and copies may be had on application to the secretary, Chas. W. Johnson, Morgan Park, Ill. In addition to the usual liberal cash prizes, there are twenty special trophies well worth striving for. This meeting will occur in conjunction with the celebration of the 25th anniversary of the State Florists' Association of Indiana.

CHAS. W. JOHNSON, Sec'y.

CHICAGO TO INDIANAPOLIS.

Arrangements have been made with the representative of the Big Four railroad to make reservations for the members of the Chicago Florists' Club and others desiring to attend the Indianapolis meeting of the Chrysanthemum Society of America, November 6-8, on the train leaving Chicago, Thursday, November 5, at 10.15 P. M., arriving at Indianapolis at 3.45 A. M., where the sleeper may be occupied until 7.30 A. M. The fare is \$3.70 each way, lower berths, \$2, upper, \$1.60. A car will be reserved for the exclusive use of the party if the number is sufficiently large.

MICHAEL BARKER, Chairman,
Transportation Committee.

CINCINNATI FLORISTS' SOCIETY.

The monthly meeting of this society was better attended than any for some time past. Rudolph E. Kurowski, vice president of the John C. Moninger Co., of Chicago, in a brief address told of the plans of his firm for their new Cincinnati branch office. After the meeting the members and guests enjoyed the hospitality of their host, Ray Murphy who had provided a "Dutch Lunch." Mr. Murphy's greenhouses are in good condition; they are well kept and he may well be proud of them.

CLUB AND SOCIETY NOTES.

Regular monthly meetings of the Rochester (N. Y.) Florists were resumed on Monday evening, October 12.

The Dayton Florists' Club held its monthly meeting on Thursday, Oct. 8, at the establishment of J. F. Young on Fifth street.

The Dobbs Ferry (N. Y.) Horticultural Society will hold its annual flower show in the Town Hall on November 7 and 8. The proceeds will be devoted to Red Cross purposes.

The Fall Exhibition of the Worcester County (Mass.) Horticultural Society was held on October 8. The showing of chrysanthemums was excellent for so early a date. Fruit and vegetables occupied most of the space.

The Chicago Florists' Club has invited the American Rose Society to hold its next meeting and exhibition in Chicago. The decision of the Rose Society will not be made until the meeting of its executive committee which will be held in the near future.

The Knoxville Florists' Society met at C. W. Crouch's store, Tuesday night, October 6; several important business

matters were discussed; the most important was that of setting aside and advertising a Chrysanthemum Day; on this a committee was appointed to get up the proper advertising, and to select a day suitable to all the florists.

The fourth annual convention of the California Association of Nurserymen will be held at San Diego on the 15th, 16th and 17th of this month. Several of the leading flower people here are taking an interest in the event, and while its chief concern is with the fruit nursery business, the ornamental department will receive some consideration.

The annual meeting and exhibition of the New Hampshire Horticultural Society will be held at Antrim, on October 21, 22 and 23. Many cash prizes for exhibits of fruit and vegetables, six beautiful silver trophies, and many special prizes will be offered. The State Grange has donated a silver cup for the best general exhibit of apples by any subordinate grange. The program will include many of the best speakers on agricultural subjects in the East.

The ninth annual flower and vegetable show of the New Jersey Floricultural Society was held October 5, afternoon and evening, at Orange. Mrs. Arthur J. Moulton, of Llewellyn Park, won first prize for the best miniature garden occupying a space of 5 x 5 feet; the Essex County Country Club was awarded second prize and Charles F. Rand, of Hutton Park, a miniature Japanese garden, received the third prize. Austin and Sidney Colgate captured first prize for display of fruits, and William Shilleber, Jr., of Essex Fells, second. The best exhibit of vegetables was by Dr. Daniel J. Mills-paugh, of Paterson, who was awarded a silver cup, and honorable mention was given Peter Hauck, Jr., in the same class. Mr. Hauck was awarded first prize in the gladioli exhibit. A prize for the best group of foliage plants, arranged for effect, was given to Sidney and Austin Colgate. W. A. Manda, of South Orange, had the best orchid collection and dahlias. The attendance was large. A chrysanthemum show will be given by the society in November.

ENTER, AUTUMN.

With breath slow chilled by coming cold,
The Summer breeze low whispers, sobs,
and dies!

The white clouds lose their warmth and
evening skies
Turn on a paler blue o'er sunset gold
Fair Autumn's here!

So, Summer's gone! The goldenrod
That rules the quiet of the waning
woods

Assumes its mellow sway, in varying
moods
And breezes come from Autumn's head
untrod,
Fair Autumn's here!

Give place! Give place! A new Queen
here!

Forget and Summer dreams can have
no place

When purpling Autumn comes with
quicker pace,

For in her train are mellow days and

When Summer's gone!

H. T. Sudduth, in N. Y. Tribune.

BOSTON CONVENTION GARDEN NOTES.

The Conard & Jones Company, West Grove, Pa., contributed the major display of cannas and all of them were splendid varieties. A brief description of same as they appeared to the writer follows:

Colossal, well named, as it has attained a height of 9 to 10 feet; flowers large deep orange, on massive spikes; notwithstanding its large proportions and striking appearance it is less practical than lesser varieties in my opinion for general landscape effects, being more useful for special purposes, as a back row for smaller kinds, the hiding of objectionable objects, such as fences and buildings, etc. Panama; this is exceedingly fine and attractive, of sturdy massive foliage and growth; grows three and one half to four feet high; flowers deep orange red mottled around the petal edges with yellow; individual petals 3 inches across; Al in every respect. Kate F. Deemer; a charming kind for color effects, especially for contrasting with scarlet and crimson kinds; grows to the same height as others (4 feet), but appears taller because it throws its flower-spikes much higher above its foliage. The flower spikes are much branched, not crowded, profusely flowered; this open habit adds great elegance to it; color light lemon to deep canary-yellow, with shading of pink at base of petals.

Wm. Sander is a coppery red foliage variety of most excellent habit; low, sturdy in growth, three to three and one half feet high; flower-spikes as well as individual flowers of ample size; color vivid scarlet. Meteor; this is an exceedingly brilliant variety, deep scarlet, very effective as a solid color sort; grows from four and one half to five feet tall; flowers and flower-trusses of large size.

Rosea gigantea grows four to four and one half feet high; light to deep rose in color; flowers and flower-spikes of massive proportions; a fine variety. Olympic; this is a superb variety for landscape effects, of more robust growth than most of the foregoing, yet finely proportioned; produces the largest and most striking flowers and flower-spikes of any; color deep vivid rose, its cheerfulness in this latter respect making it more acceptable for pronounced effects than R. gigantea; grows from five to five and one half feet tall. Mrs. Alfred F. Conard, a fine well balanced variety; growing from four and one half to five feet tall; color somewhat fancy and unique in the canna line, not easily described technically, light buff, shaded with deeper pink and orange at base of petals, distinct and attractive. Wyoming is another of the bronze-red foliage type having very large and broad leaves; growing five and six feet tall, commanding in appearance; individual flowers large; color, light to dark orange. Loveliness and other of the above company's varieties might be mentioned as desirable sorts, but the list given includes the best.

Vaughan, Chicago, showed a small number of Canna Fire Bird. For dazzling brilliancy of color this eclipses all of the scarlet sorts that have yet come under my observation. The individual flowers are very large. For

some reason or another this variety developed in the garden an undesirable trait of leaf scorch, the margins of the leaves scorching badly during the whole season which unquestionably militated against fine massive spikes of flowers being produced. This does not mean representative flower spikes were wanting, only that under more favorable conditions better might be expected. I trust that the trouble developed here is not an inherent one.

To prolong and enjoy the best possible display from cannas, an inflexible rule should be adhered to, of going over the beds once a week or ten days for the purpose of removing forming seed capsules. It would be well not to let them flower at all in the early season and until they are sufficiently strong to stand the flowering process. In this way a stronger plant is developed at an earlier period on which depends the larger number of succeeding growths, which in turn produces the largest grand total of flowering-spikes.

KENNETH FINLAYSON.

THE WASHINGTON ROSE GARDEN.

There seems to have been a misinterpretation in some quarters concerning the planting list of the Washington Rose Garden as included in the committee report read by Mr. William F. Gude at the meeting in Boston of the Society of American Florists and published in a recent issue of HORTICULTURE. The lists were simply to show where the plants were located and were prepared for the information of donors and the use of interested parties visiting the garden.

The arrangement of beds, as "yellow tea," "pink tea," etc., was tentative, but promises to work satisfactorily. The assignment to the beds was made entirely from catalogue description. This was taken from the donors' catalogues where practicable, and where not, from catalogues of other reliable firms. The breaks in the beds were caused by the inability of some firms to supply all the plants they had expected to send. The varieties with what might be called "mongrel descriptions" were distributed with the color to which they were most nearly akin as far as descriptions would suggest and space permit.

Places were only provided for teas, hybrid perpetuals and climbers, and other sorts were placed just wherever there happened to be room, as, for example, Dwarf Polyanthus, which are planted at several points. It is intended to transplant varieties as soon as practicable after it is found they are not properly placed in the scheme adopted.

The list must not be taken as a recommendation by the Department of Agriculture, either as to adaptability or color, but merely as a record of where the different varieties are growing. The Rose Garden has not yet been underway six months, so, of course, the studies have hardly begun. It will require several seasons' observations before any conclusions can be reached. Suggestions are at all times most welcome, as it is desired to arrange the garden so as to be as instructive as possible.

F. L. MULFORD,
Landscape Gardener,
U. S. Dept. of Agrl.

L. W. GOODELL'S SIGHT RESTORED.

L. W. Goodell of Pansy Park, Dwight, Mass., who has made the growing of pansies, asters, and verbenas specialties for over forty years is receiving the congratulations of his friends on the recovery of sight, after nearly ten years of blindness from cataract. A badly performed operation caused the loss of one eye five years ago. The other eye becoming affected a number of the best oculists in New England were consulted with the view of engaging the services of one of the most skillful that could be found for the operation on the other eye. The operation was performed Sept. 19, by Dr. David Harrower, who has had an experience of over twenty-five years and performed over seven hundred operations for cataract, ninety-eight per cent of which were successful. The operation was a perfect success and sight was restored as good as ever.

Mr. Goodell was a frequent exhibitor of cut flowers at the shows of the Massachusetts Horticultural Society, fifteen to thirty years ago and was one of the first to make large exhibits of water lilies and other aquatic plants. He has many old friends and acquaintances among the gardeners and florists in the eastern part of the state.

HOLLYHOCKS AGAIN.

In the issue of October 3 Mr. Lonsdale asks what percentage of hollyhocks come true. In our experience, there were hardly enough to say percentage. We had double ones of our own, from which we saved seed, and then we sent to the most reliable seedsmen and paid a high price for seed and planted them; most of them came single—hardly a double one in the lot. One year we saved seed of fine double red. A few came red, one or two nearly purple, two large double pure white. The only success we ever had was in planting seed from a clump about 80 rods from any other, and these I think were all double, some nearly purple, and one an immense pink—the largest and finest I ever saw. The bees are always very busy in the flowering season, and I think if the varieties are far enough apart, and the bees should visit them, that the flight shakes the pollen off so they come nearly true. It is a great vexation. We want everything true to name. We buy double ones, and they bloom single, and in selling them we sell a kick and have to replace.

-C. S. HARRISON.

Are you using Silkline for stringing up and tying your plants this fall? Or have you been induced by cheapness of price to buy some of the inferior green threads that are thrown on the market as substitutes for this standard article? Silkline is guaranteed full length and fast color and in serviceability far overbalances the few cents saved on cotton thread which quickly loses color and spoils the looks of everything on which it is used. Silkline is made especially for florists' use.

Fine Ferns Ready for Immediate Retail Sale

We offer the following varieties of Ferns in the sizes specified, which we have in perfect shape at this time.

Nephrolepis muscosa, 3½-inch, 25c; 5-inch, 50c each.

Nephrolepis elegantissima, 6-inch, 50c; 8-inch, \$1.00; 10-inch \$2.00 each.

Nephrolepis elegantissima compacta, 3½-inch, 25c; 6-inch 50c; 8-inch, \$1.00 each.

Nephrolepis superbissima, 6-inch, 50c each.

Nephrolepis magnifica, 5-inch, 50c each.

Nephrolepis Piersoni, 6-inch, 50c; 8-inch, \$1.00 each.

Nephrolepis Dwarf Boston, 8-inch, \$1.00 each.

Nephrolepis Harrisii, 6-inch, 50c; 10-inch, \$2.00 to \$3.00; 12-inch, very large plants, \$5.00.

MISSION OF BEAUTY.

Read by C. S. Harrison, before American Peony Society in Chicago.

(Continued from page 325)

Beauty is the ultimate, the finish of all things. Your apple orchard is a flower garden in spring time and more beautiful in the fall when the ripened and fragrant fruit done up in red and gold peers from its leafy covers. When God produced the best—the strawberry, he was not satisfied simply to minister to the taste. He wraps it up in a tissue of beauty no brush can reproduce. When he finished the various regions of the earth He spread His beauty over them. The great Sahara, though a vast reach of desolation is often adorned with matchless beauty. The morning is ushered in mantled in glory. The gates of the evening are painted with molten gems with exquisite skill. There is a play of varying tints and colors on mountain, hill and plain. Sometimes a weird and mysterious light is spread over the sands so you seem walking on floors of gold. So delightful and inspiring are these desert scenes the Arabs call the Sahara the Garden of Allah. In our own land we have vast desolations which are called the Painted Desert. There are surprises of beauty awaiting you on every hand. There are petrified forests, hills, mountains and plains over which the clouds cast their exquisite shadings and tintings, transforming sands and rocks into gardens of radiancy. In the vast tundras of the North are fields of flowers of millions of acres. Even the Arctic night is brilliant with those moving pictures of flashing splendor. In the Tropics what treasures of loveliness. There are the exotics which embellish our greenhouses. There are the famous orchids for which men have laid down their lives. All through our Northland how entrancing were our forests. In the East the kalmias, azaleas and rhododendrons. In the West the viburnums, and hosts of ornamentals. In the mountains the most beautiful trees on earth held in reserve for the supremest adornment. Even the oceans are not forgotten. The floors of the sea are embellished with surpassing loveliness. In the bay of the Catalina Island people go out in boats with glass bottoms so they can look into the deep where sea flowers are at their best. Some of you have heard of that wonderful feather of the Bermuda seas. The young man, William Phips, heard of a Spanish vessel bearing enormous wealth which struck a reef and went down. Phips saw one of the survivors 50 years after and determined to find the vessel. What a task, worse than finding a needle in a hay stack. But he went to England and secured a man-of-war and went on his quest of finding a vessel in a vast ocean. He anchored in that southern sea and sent a crew in a great canoe. The men were despondent. What show had they of finding a ship lost 50 years ago? One of the men looking down saw an immense sea feather, the largest ever seen. They sent an Indian diver down to tear it loose. He came up with bulging eyes. "What great guns there was down there." They found the sunken ship guarded by that sea feather. They took from

the vessel 300,000 pounds in gold, silver and jewels. The young man was knighted and afterwards appointed Governor of Massachusetts.

God has neglected no part of the earth. There is adornment of some kind even for the desolations. Who can describe the splendor of our mountains. What a play of light and shade when the clouds are shimmering over hill and plain. Often in my summer cottage the clouds would come over the summit of Nebe and come down like a flock of sheep to drive away my weariness by their reviving presence. One time I was in a valley hemmed in by the mountains and the clouds spread over it with fringes resting on the summits. It was like a vast umbrella and over it all shone a mysterious light so that it glowed like a vast opal. It was one of the most resplendent scenes I ever beheld.

Our Slogan Is "Beauty Is Wealth."

There are Eldorados and Golcondas in the fields of floriculture and horticulture as well as the mineral kingdom. I stood by the original Concord grape-vine in that quiet village where it was born and could but say "You grand old mother, you little know your worth or realize what you have done. Think of the trainloads on trainloads of fruit which have gone from your branches. You have been worth millions." Think of the discoveries in fruits. The Wealthy, Grimes Golden, Jonathan and Delicious and others which have come to reward the toil of the orchardist. These present successes are the promises of future discoveries. It seems to be a law of nature that the nearer a plant is to the original the greater the tendency to revert. Removed as far as possible from its primal parentage the greater the tendency to break out into a wild abandon of loveliness. Take the original single dahlia. What has been the results of the thousands of efforts for its improvement? So that at present we have several distinct species so divergent their own mother would not know them. The carnation was a demure and humble little flower but what changes have been made so that she now stands out in her queenly beauty. The phlox was like a wild Indian maiden, homely and hardy. But in the hands of the skilled florist of Europe she comes back to us as a princess fit to adorn the courts of kings. The canna was an insignificant flower mostly prized for its foliage, but by skill and patience, one man making 40,000 crosses, we now have a queen among our flowers. The single flower is the product of nature, the double flower the product of nature and art, joint victory of God and man. What gains have been made in the peony, 3000 named sorts and more to follow. The new creations give promise of ultimate successes. What a scene of splendor a field in bloom presents, billows of fragrance floating there until you seem walking in Elysium. There is a carpet for the touch of angels' feet. And there is the coming flower, the iris. "Oh nothing but the flag," cries prejudice, "that grew in the swamps." Sooner or later we are going to drag people away from the swamps and show them the grandest

family of flowers that God has yet given to mortals, a continuous bloom which glorifies two months of the year, reaching from the tiny and brave fumilla to the tall giant which brings up the rear. What superb blooms, with garments woven from the sunset and rainbow, combining all the beauty of sky and earth. Many of them have a delicious fragrance and some have a radiant and glistening reflex like that of the richest silk. New creations are coming fast. There are some of the newer sorts of immense flowers and there is a new one which grows from 5 to 6 feet tall. There should be a united campaign of publicity to push this royal flower to the front where it belongs. We want a united effort at publicity. Give the same attention to flowers that is now given to fowls and animals and you will glorify the earth. Among the Egyptians the cat was deified. With us it is the hen. In India they had the sacred bull and now we have the sacred cow which gives her 1000 pounds of butter a year. Thousands should be expended to proclaim the value of our ornamentals. Here we stand on fields won by others and it is our province to follow up their successes. Pleasure and cash invite you. Grand old Festiva maxima has been worth over a million. A carnation sold for a fabulous sum and that was the beginning of its value. How much is now invested in flowers and new greenhouses going up all the time.

What of the future? We spend most of our time over there. We do not get through with our work down here. Heaven is more than a divan and a song—a loafing place with a hallelujah attachment. "My Father worketh hitherto and I work." Up there His servants serve Him night and day. This world of ours has about 80 constituents. Nearly half of them have been thrown down to us by these heavenly tramps, the meteors. The spectroscope tells us what is burning in the distant suns.

When we stand on the margin of the glorified vastness of God and see as God sees, with no diminution of objects in ratio to the distance and the universe rises before us to give its salutations, as Caanan rose to the vision of Moses, then we shall feel that we have come to our own and the infinite within us touches the infinite beyond us.

PERSONAL.

Henry Gibson, formerly at Tuxedo Park, N. Y., has taken the position of gardener on the estate of Mr. Colgate Hoyt at Oyster Bay, N. Y.

Julius Koenig, City Forester of St. Louis, went to Terre Haute, Ind., last week and took upon himself a wife. The lucky young lady was Miss O. E. Miller.

Hartford, Conn.—Spear & McManus, No. 242 Asylum street, celebrated the opening of the fall season on October 8, by giving roses to everybody who would simply step inside the store, where the roses were handed out. This innovation met with instant success, and before 10 o'clock in the morning 5,000 roses had been given away, and this continued all day.

BODDINGTON'S "QUALITY" CHRISTMAS-FLOWERING SWEET PEAS WE ARE SUPER-HEADQUARTERS

All true stocks of Winter-flowering Sweet Peas will again be scarce this season. The winter-flowering Spencer types are almost a total failure owing to the exceptional season in California this Spring, and through the ravages of Aphids.

We regret that our stocks of YARRAWA and ANITA WEHRMAN are entirely exhausted, also many other good varieties, but we can still offer the following while stocks last. Order at once to avoid disappointment—remembering that our stocks are true to name and while a little higher in price, will save you money in the long run.

ROSE QUEEN "ROSE QUEEN" is Orchid-flowering, borne on long stems, extremely free and early and of pink color most attractive, is a decided acquisition, and like all meritorious novelties is sure to be in demand wherever grown. Prices: Trade pkt., \$1.00; 3 trade pkts. for \$2.75; 1 oz., \$12.00.

Arthur T. Boddington, *Seedsman*

342 West 14th Street, NEW YORK

CATALOGUES RECEIVED.

Kelly Bros., Danville, N. Y.—Wholesale Nursery Catalogue, Fall, 1914. "Direct from Grower to Planter."

Alonzo J. Bryan, Washington, N. J.—Illustrated sheet of special surplus plant stock. A big variety, at low rates.

J. Bolgiano & Son, Baltimore, Md.—Bolgiano's 1914 Bulb Book. Planting plans, planting instructions and practical pictorial illustrations make this a very useful publication.

Brookland Gardens, S. E. Spencer,

prop., Woburn, Mass.—List of choice gladioli for garden planting and for florists' special use. Portrait of Gladiolus Mrs. Frank Pendleton.

Royal Tottenham Nurseries, Ltd., Dedemsvaart, Holland.—Wholesale Trade List of Hardy Perennials, Rock Plants, Rhododendrons, Aquatics, etc. McHutchison & Co., New York City, are American agents.

A. T. Boddington, New York City—Garden Guide for Summer and Autumn, 1914. A study of Poetaz narcissus in green, red and gold makes a very enticing cover page design. The

list presented is a first-class one in all classes of spring-flowering bulbs.

R. & J. Farquhar & Co., Boston—Autumn Catalogue. The front cover illustration shows a bank of Trillium grandiflorum in bloom on the border of a pond in springtime. Spiraea rubens is the subject of a special illustration also. This 80-page catalogue is full of tempting suggestions for the garden planter who wants to have a spring display of choice things.

Howell Nursery Co., of Knoxville, Tenn., reports business good, and they making fall shipments.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

California Notes.

The California seed growers have by this time made practically all their shipments on contracts, with the exception of those for France and Germany, which had placed very large contracts. No difficulty was experienced in shipping to England, and it is expected that the French stock will soon go forward. There is practically nothing left that would be available for the eastern trade, though local requirements are pretty well covered. Planting of the root crops for seed is now under way, and is on a very conservative scale, growers being disposed only to cover their contracts. The leading local dealers are pretty well stocked with imported seeds, though the outlook for the future is doubtful.

The principal matter of interest is the arrival this week of the first shipments of Holland bulbs, about a week late. These are being distributed as fast as possible, and have found a lively demand wherever shown; though on the whole the retail trade in bulbs, as well as seeds, is still awaiting the first good rain. Owing to the Exposition, and the number of visitors expected next year, private gardens are receiving more than usual attention, and a heavy business is anticipated when the planting season once gets under way.

A Fair Exchange.

A good many people labor under the delusion that we are dependent upon Germany for Asters, but for ten years at least, I have never touched

anything but American grown seed, and when I am told by market growers and journalistic friends, that they never saw such Asters as I cultivate, I assume that I have something better than the average. * * * I might add that a well-known market firm has for several seasons been growing seed for a big American house, of the giant-flowered pink Antirrhinum that is so popular in U. S. W. A. T. in Hort. Trade Journal.

London, Eng.

Good Advertising.

As every seedsman knows, Burpee is a resourceful advertiser. The ac-

companying picture shows the trademark sign described in our issue of last week which was a feature of the Burpee display at the Truckers' Convention in Philadelphia. It was composed of seeds of beans and corn, 6 feet by 9 feet—the work of W. F. Therkildson and his assistants. The other picture shows a portion of the general seed and flower exhibit of the same house.

truckers was the biggest they have had. On October 7 a trip of inspection was conducted to Bridgeton, New Jersey, to the Seabrook Farms and the Minch Brothers' farms, and it was a very enjoyable affair, the entire party taking a ride through the South Jersey trucking sections, and being entertained by the Bridgeton Chamber of Commerce in their splendid little park. This excursion was given under the auspices of the Skinner Irrigation Co., of Troy, Ohio, who furnished a special train, and all were their guests.

Arthur T. Boddington is now in North Carolina, inspecting the canna and tuberose crops.

BUSINESS TROUBLES.

Chicago, Ill.—George A. Pieser, 3756 Cottage Grove avenue, liabilities, \$3,252.00.

Winthrop, Mass.—Eunice B. Belcher, florist, liabilities, \$3,453.28; assets, \$328.16. Voluntary bankruptcy.

The town of Scituate, Mass., is the winner in the tree contest conducted by the Massachusetts Forestry Association. Fifty-eight cities and towns entered the planting contest that began last spring and closed in July. In all, 12,498 trees were planted, which has added at least 60 miles of trees to the Commonwealth. West Tisbury had planted the greatest number of trees in proportion to population, but lost first place because the Scituate trees were of better quality and more carefully arranged. Marshfield won third place.

Florists**

SEEN IN MOBILE.

Florists in the "sunny south" have had rather a better summer trade than the northern florists. That oft-quoted cause of little summer business, the prevalence of garden flowers, does not seem to apply here where there are flowers everywhere practically all the year round. The writer visited Mobile, Ala., last week and found florists selling out-of-door flowers with a very fair supply of indoor roses to supplement them.

Miss Maria Minge, who has a downtown store and a range of glass farther out, and has an old established business says that she depends upon Radiance for her winter rose, with a splendid crop always on for Christmas. Bulgaria is just now coming into bloom. Cecil Brunner is a splendid little rose here the year round. Poinsettias, the mainstay of the northern florists for the home, is a vexatious problem here in Mobile. If the weather is fine, the plants are blooming out-of-doors in quantities and if not, then greenhouse stock is demanded by customers and the florists have to take these chances each year. All well-kept lawns have immense poinsettias that may or may not be in bloom at Christmas but no one can foretell in time to prepare indoor stock.

Claude M. Ravier came to Mobile forty years ago and his greenhouses were among the first erected here. At his death five years ago the business conducted under the name of Ravier & Sons was continued under the same name by the sons, Louis and Fred, who have a fine business. All four of the florists' papers are taken by these brothers which is proof enough that they are progressive. A box of roses came from Chicago while we were there and seemed as fresh as if just cut.

Azalea plants are not used largely for forcing here as the plants live to reach great size and bloom out-of-doors in February. A very graceful vine grows here in profusion, covering the porches and bearing a cerise flower similar in shape to a spirea. They call it Mexican coral here.

Mobile has little to boast of in city parks, but it has one square, right in the heart of the business district, which is ideal as a shady resting place. It belongs to the children of Mobile, having been given to them for a playground years ago and it is always filled on warm evenings. With its immense old trees, its fountain and its lights, it forms a picture never to be forgotten. With all credit to the northern landscape artist, nature can easily surpass his best efforts here for there is a grace and beauty in the palms that a lawn can get from nothing else and they give a dignity to railway stations and public buildings that no other plants can furnish. The Phoenix carnariensis, Latania borbonica and Cycas revoluta are perfectly hardy here and assume immense proportions.

M. B. HANCOCK.

NEWS ITEMS FROM EVERYWHERE

BOSTON.

J. B. McDonald, formerly with S. Hoffman, has joined the staff of Wax Bros.

The Boston Flower Exchange will have its annual meeting and dinner at Young's Hotel on Saturday evening, October 24.

Among the new stall-holders at the Boston Flower Exchange are J. J. McCormick, of Malden, and Robert Doherty, of West Medway, Mass.

Thomas J. Grey Co., have an attractive booth in the women's department of the big food fair now running at Mechanics Building. Artistically arranged by Peter M. Miller.

D. Iliffe is building a storage house for orange trees on the Brandegee estate in Brookline. He has just installed two boilers in the Back Bay conservatories of Thos. F. Galvin, Inc.

Penn, the Florist, states that he spent over \$18,000 in advertising last year, most of it in the newspapers. Results from the cards inserted in the trade journals were very satisfactory.

The new rose Ophelia has made a prompt and substantial place for itself with the Boston trade. As a popular light pink rose it has pushed all others in its class into the back-ground.

Carnation Day was observed by the charitable institutions in Winchester, Mass., Oct. 17. J. M. Cohen supplied 15,000 carnations to be distributed among the various hospitals and other institutions.

Harry Quint expects to open up his store at 199 Tremont street by October 19. The work of rebuilding the front has been held up by the "red tape" of the Building Commissioners, but it is progressing rapidly now.

As regards the Mrs. Charles Russell rose, H. M. Robinson & Co. state that they have been shipping over 6,000 blooms of this variety daily, which would seem to demonstrate its popularity in this market, at least.

Sweet peas have been a rarity in the market during the last few weeks and at this early date Wm. Sim, of Cliftondale, and F. Bell, of Stoughton, seem to be the only growers sending them in to this market in any quantity.

W. S. Phelps, of Marlboro, has leased Edward Wood's place at Lexington. Mr. Phelps intends to grow a general stock of flowers and plants. E. W. Austin, who formerly leased this range, left during the night some time last June.

A. M. Davenport, of Watertown, has received from Belgium several shipments of azaleas, about 10,000 in all. Other growers have experienced little difficulty in receiving their goods from Belgium, although several shipments are still on the way.

N. Fishelson, of Copley Square, has joined the firm of J. Kopelman & Co., of Providence. This firm is now making extensive additions to their range at Oaklawn, near Providence. Mr. Fishelson's son, Max, is now in partnership with his father and has charge of the Boston store. He has recently become engaged to Miss R. Lando, of Paris, France.

The announcement that President Farquhar has been unanimously re-nominated for a third term as president of the Massachusetts Horticultural Society will be read with pleasure and approval by all who know how earnestly Mr. Farquhar has labored for the interests of this great society. The rare honor which it has conferred upon him is a just and proper recognition of faithful service.

H. Huebner of Groton, Mass., who is well known as an intelligent experimenter on new flower specialties recommends the growing of *Acidanthera bicolor* for the Boston market. He has had much success with it this season. *Acidanthera bicolor* is a bulbous plant, with requirements similar to the gladiolus. The flowers are white with violet-maroon blotches, deliciously perfumed, borne on long stems and very lasting.

The new firm of Houghton, Gorney & Co., mentioned in a recent issue, is composed of F. H. Houghton, E. S. Gorney, Ellis Gorney and Samuel Krawitz. The new store is being rapidly brought to completion.

Among the features will be the decorations in white and violet, a new orchid and violet case with tiled bottom, and the novel arrangement of the refrigerator doors. Mary Elizabeth's Tea Room, next door, will be connected at the back of the store by a door and an eight foot show window.

WASHINGTON.

Gude Bros. Company furnished in the neighborhood of 2,000 bouquets of roses for free distribution by the shoe firm of Robert Beberich's Sons Co., of this city, on the occasion of the latter's forty-sixth anniversary celebration.

Large fern and palm sales are at present being held in all of the stores and it is reported that good business is being done in this line. The stock as a whole is as good as has ever been seen in the city and the people are taking advantage of the opportunity offered them.

All licenses issued by the assessor of taxes for the District of Columbia for the conduct of flower stores and stands expire the last day of this month, and a notice emanating from the assessor's office states that all florists who desire to continue in business after that time should promptly apply for a renewal of their licenses.

The announcement recently made that there would be a flower show this year in Washington not having met with any great enthusiasm on the part of the growers and storemen, it was decided at the October meeting of the Florists' Club of Washington, D. C., that it would be inadvisable to go ahead with these plans.

Following an informal report made by several club members who attended the recent dahlia and canna show given by Richard Vincent, Jr., at White Marsh, Md., a resolution was adopted extending a vote of thanks of the club to Mr. Vincent in appreciation of the many courtesies shown the local florists while his guests.

J. H. Small & Sons were the decora-

tors of the Red Room of the New Willard Hotel on the occasion of the Cotton Goods Show, which was given by a local society woman in connection with the buy-a-bale of cotton movement. The decorations included the use of large quantities of cotton bolls attached to branches and in festoons and huge palms and quantities of roses and dahlias backed the models and booths and lined the walls.

The increasing of prices on materials was the matter of an informal discussion by the Florists' Club of Washington. It was felt that some of these increases were unwarranted. A number of the local florists advocated the use of more flowers and smaller amounts of ribbons and chiffons. It was pointed out that there has always been a great waste of materials, that in a majority of cases two and three times as much ribbon or chiffon was used in the making of a bow than the price of the design warranted.

The new style of wearing flowers on the shoulders rather than in the shape of corsage bouquets should lead to the sale of the higher-priced stock such as orchids and gardenias. On the F street promenade in the afternoons are to be seen young ladies displaying a single blossom. It remains for some enterprising florist here to introduce the "Wilson Shoulder Knot" for it was one of the daughters of President Wilson who inaugurated this style. The wearing of the flowers on the shoulder rather than as corsage saves them from being crushed while the wearer tangoes or turkey trots.

CINCINNATI.

P. J. Olinger reports that his wife who is now visiting relatives in Aurora and Evanston, Ill., is greatly improved in health.

Mr. and Mrs. Gus Adrian returned a fortnight ago from their summer's stay in the north. Mrs. Adrian's health has improved greatly.

Elmer D. Smith & Co., of Adrian, Mich., exhibited his new yellow chrysanthemum Golden Queen in this city. The flowers were large, well formed, incurved and made a distinct hit with local florists.

John C. Moninger Co., of Chicago have opened a branch office at 2309 Union Central Bldg. Otto Hirschfeld is in charge. Mr. Hirschfeld and Rudolph E. Kurowski motored down from Chicago at the end of last week.

CALIFORNIA NOTES.

A. Mitting, of Santa Cruz, Cal., has gone east to arrange for marketing the bulbs produced by various growers in that district.

A chrysanthemum show is to be held at Willows, Cal., October 18 to 21. As far as is known here, no professional growers of any note have arranged to enter.

C. Moll, a landscape gardener who has done considerable work in the new residence districts around Sacramento, Cal., is starting a nursery in North Sacramento.

The San Francisco Park Commissioners have directed Park Superintendent McLaren to plant poppy seeds on all hillsides, ridges and barren spots in Golden Gate Park.

The first shipment of materials for the Japanese Government exhibit at the Panama-Pacific Exposition has just arrived on the Shinyo Maru. The exhibit will include a 4-acre garden, for which the top soil, rocks, trees, shrubs, etc., will be brought from Japan. This is expected to be one of the most beautiful features of the fair. The general landscape gardening of the Exposition grounds is now practically complete.

In writing advertisers kindly mention HORTICULTURE.

BE SURE that you get the MEYER GREEN SILK LINE, and do not take any other that is sold as an imitation of the MEYER GREEN SILK LINE, as they do not have the full weight, measure and strength of the genuine article. All our GREEN SILK LINE is guaranteed up to the high standard and mark. The sizes are F, fine; FF, medium; FFF, coarse. It is for sale by all the best jobbers. If you cannot get it of your jobbers, order direct of the manufacturer.

Obituary

Lillian A. Shaw.

Lillian Austin Shaw, eldest daughter of J. Austin Shaw of Brooklyn, N. Y., died on Friday, October 10, at Clarks-ville, N. Y., after a long illness. Miss Shaw was a very refined and lovable young lady and her heart and life and vivacity were always those of perpetu-

LILLIAN A. SHAW

al sunshine. HORTICULTURE joins fervently with the myriad friends of Mr. and Mrs. Shaw in sincere sympathy in their sorrow. The funeral took place at Brooklyn on Monday, when a great number of floral tributes almost filled one end of the church, including numerous tokens from the New York and Brooklyn florist trade, many of them being afterwards sent to the hospitals. Miss Shaw is survived by her parents and two sisters.

Henry B. Mouillerat.

Henry B. Mouillerat, for many years superintendent of the R. B. Dodson place in West Islip, N. Y., died suddenly of hemorrhage of the brain at the Ross sanitarium in Brentwood on Wednesday, Oct. 7. Mr. Mouillerat had been ill for about three months, but was able to attend to his duties until a few days before his death. He went to the sanitarium on Tuesday

and the announcement of his death came as a shock to his friends. He was born at Woodside, and was 34 years, 11 months and 12 days of age. He was highly esteemed by his employer and by a host of gardener friends. Besides his monther, Mrs. Victor M. Mouillerat, he is survived by his sister, Mrs. James J. Teeling, of Newark, N. J.; his widow and four children. He was a nephew of the late Mrs. J. F. Huss of Hartford, Conn.

Morgan Miles.

Morgan Miles, for more than forty years engaged in the nursery business at San Jose, Cal., died October 4, at the home of his daughter in Santa Cruz. Mr. Miles was 75 years of age, and came to California via Cape Horn in 1853.

John M. Griffith.

John M. Griffith, founder of the firm of Griffith & Turner Co., Baltimore, Md., died at his home in Lutherville, October 4, aged 77 years, apoplexy causing his death. He had been engaged in the seed business for over fifty years. His widow, one daughter and two sons survive him.

Considerable interest is taken in the announcement that a new retail flower shop is to be opened in the principal shopping district in San Francisco, at 233-235 Grant avenue, across the street from the old established store of Podesta & Baldocchi. The store is now being fitted up, and is expected to open about Nov. 1. It is reported that it will be conducted by Mr. Joseph, who has been for many years in charge of the art department of the White House department store.

Flower Market Reports

BOSTON Business has been very unsteady, fluctuating from day to day in response to the temperature, prices going to pieces on the advent of a warm day and swinging back into line again under the influence of a couple of cold nights. There is an abundance of material; too much, in fact, of some things, such as carnations and ordinary chrysanthemums. Violets are very poor as a rule, and figure among the accumulations of unsalable stock. Roses are not very good as a general thing but some exceptionally fine ones are seen here and there. The latter bring their price, but the average run of roses realize but little on a warm day. According to the statements of some of the leading wholesale and retail dealers, business has fallen off fully fifty per cent. as compared with the corresponding period last year. One retailer attributes this in part to the crippling of the steamer trade upon which he greatly relied.

A good hot summer **BUFFALO** week has made the trade feel that vacation days have returned again. Business was practically at a standstill and any sales that were made had to be forced. There was no shortage on any one line, the rose stock coming in very heavy and in open condition, and enough good carnations for all who wanted them. Dahlias, mostly not good, cosmos, lily of the valley and chrysanthemums are all in abundance. In chrysanthemums yellow only are in demand and these are but few. On Saturday the retailers sold roses at 25c. per dozen, and anyone may judge how conditions were for the week. A very discouraging week was passed, though improvements are looked for soon.

The market remains **CINCINNATI** crowded. Large receipts of dahlias and cosmos as well as the end of the aster crop have not given the market chance to lighten at all and, in spite of a good steady demand, prices remain at a very low level. Shipping business is good. The supply of roses is large and good, and includes an ample cut of American Beauties. Carnations are coming in much stronger than before. In chrysanthemums yellow has up to this time predominated, but enough white and pink are to be had for immediate requirements. Lilies continue plentiful. Lily of the valley meets with a fair market, but orchids are selling rather slowly.

We are having **KNOXVILLE, TENN.** fall weather now—warm days and cool nights—but so far no frost. Stocks of all kinds is looking good and some of the florists have been cutting a few chrysanthemums, but the main crop will not come in for a few days yet. Carnations are coming in and are very fine for the season of the year; roses are fair. This has been a very busy week and parties and receptions have demanded flowers every day; with a large number of weddings coming off this month, society has been on one continual round of parties, which have been cleaning up stock every day.

The market here is **NEW YORK** again flooded with flowers for which there is no adequate sale and values have taken another tumble in consequence. It does not take much in the present state of affairs to gorge the channels of the flower trade and things go to pieces on the first ripple of a flood. Chrysanthemums are coming in quite heavily and it is next to impossible to enumerate the many different varieties now on sale. Prices considered normal in past seasons are realized in few cases only and the outlook is not very reassuring. Lilies are again over abundant and violets are exceedingly plentiful although the weather is not conducive to their free blooming. Roses are the worst sufferers from the present redundancy. They are arriving by the thousands

and are being sold as low as \$5 per 1,000 by the box as they come in. The American Beauty market is in the same fix. \$10 per 100 for the finest specials being gladly accepted by the dealers. Carnations are having a much better reception and good stock sells out nicely. In the line of orchids there are plenty of cattleyas and oncidiums, \$2 per 100 flowers being about the average price for the latter. There is still an immense quantity of dahlias in the market, many coming from R. Vincent, Jr., White-marsh, Md., and these are really the best dahlias received in New York this season, but it is almost out of the question to move them at even \$1 a 100. From the foregoing facts it will be seen that market conditions this week are decidedly unsatisfactory.

Flower Market Reports

(Continued from page 561)

PHILADELPHIA A week of very warm, very sunny weather has had the effect of bringing in stocks with a rush. While the demand was as good if not better than the week before it was not sufficient to these abnormal conditions. The surplus Friday and Saturday was large and—to make things worse—the street men were too busy speculating in ball tickets to take their usual flyer in flowers. The chrysanthemum is much more in evidence, among the new comers being Unaka, Tint of Gold, Glory Pacific, and Polly Rose. They are selling even better than last year, probably because the dahlias are not such strong competitors on account of the dry season, as they were last year. The hot weather and sunshine sent in a big push of roses—more noticeable in these than in other flowers—many of them too open. Carnations show some improvement both as to size and stem. The late-flowering cosmos is now coming in—longer in stem and larger flowers than the dwarf early types. Orchids, rose-buds, and similar material for the debutante in good demand. There is also a lively call for tritomas, autumn foliage, and eulalia plumes.

The local cut-flower trade, though gradually gathering headway, is hardly up to expectations at present, being retarded by the paucity of important social events or theatrical productions. People seem to be saving up their money for the exposition. There is nevertheless considerable activity in a small way. The trade has been helped out materially by the abundance of fine chrysanthemums, which find a large demand in the retail stores; and values are fairly well maintained, as the Japanese growers have pooled their offerings, preventing any congestion of the market. The season is now about at its height. Among the most prominent varieties this week is Major Bonaffon, which is in great demand. Chrysolora has about had its run, and October Frost and Queen, after figuring very prominently in the market for several weeks, are on the wane. Roses are showing up much better, and in somewhat larger variety, though the season is still early and offerings will improve greatly next month, when several growers expect to spring surprises on the trade. Some very nice American Beauties are appearing, however; Marylands are quite plentiful, and

MISCELLANEOUS

	Last Half of Week ending Oct. 10 1914	First Half of Week beginning Oct 12 1914
Cattleyas	15.00 to 25.00	15.00 to 35.00
Lilies, Longiflorum	8.00 to 10.00	4.00 to 6.00
Rubrum	3.00 to 4.00	2.00 to 3.00
Lily of the Valley	3.00 to 4.00	2.00 to 3.00
Violets15 to .30	.15 to .25
Corn Flower
Chrysanthemums	15.00 to 50.00	10.00 to 40.00
Dahlias50 to 1.00	.50 to 1.00
Sweet Peas (per 100 bunches)
Gardenias	5.00 to 16.00	5.00 to 16.00
Adiantum50 to .75	.50 to .75
Smilax	8.00 to 10.00	8.00 to 10.00
Asparagus Plumosus, strings (per 100)	25.00 to 35.00	25.00 to 35.00
& Spren (100 bunches)	15.00 to 25.00	15.00 to 25.00

some very fine Mrs. Chas. Russell have appeared. Killarneys are less plentiful. The heavy shipping season for roses will not open for some time. Violets are now coming in freely, and are well received. The quality is very fair, but showers are needed to put them at their best. Good carnations are not yet plentiful. The supply of orchids appears to be ample for all current needs. Offerings of lily of the valley are rather light at the moment, and while no immediate shortage is expected, the outlook for future supplies is doubtful.

ST. LOUIS

The past week has shown some improvement as to the demand but the heavy receipts have continued, thus making it very hard for the wholesaler. Roses are so plentiful that not half of the consignments are sold. Carnations are becoming more plentiful each day. Violets are not yet of good quality and are somewhat off color. Chrysanthemums are plentiful but with nothing very fancy in yet.

WASHINGTON

Growers and retailers alike are praying for a killing frost which will rid the market of the enormous quantities of dahlias

and cosmos which are daily being received and which is almost completely killing the demand for indoor grown stock. Thousands of as fine roses as could be desired are being daily discarded and their movement cannot be effected at any price. Carnations are coming in much better form, the stems are longer and stiffer and the flowers are larger. Lily of the valley dropped to \$4 per hundred last week and it is believed that this will be the ruling price for some time to come. Cattleyas were offered at as low as \$25 in hundred lots, while in small quantities the price was \$3.50 per dozen and upwards. In chrysanthemums, October Frost, Yellow Frost and Unaka are now to be had in good quantities and qualities. Smith's Advance is at about an end in this locality. Sweet peas and yellow marguerites are new additions to the market.

FOR EXCHANGE

WILL EXCHANGE—Holland Bulbs and Trees for Evergreens, Perennials, foliage plants. **L. J. SMITH**, Merchantville, N. J.

In writing to Advertisers kindly mention Horticulture

WOOD ASHES AS SOURCE OF POTASH.

Office of Information, U. S. Dept. of Agriculture.

Washington, D. C.—If the European war should cause our large annual imports of potash to dwindle, many farmers will look to wood ashes among other substances to replenish the potash supply. While the amount of wood ashes that a farmer could accumulate on his own farm would hardly ever be sufficient to supply his need for potash, nevertheless, if they are carefully stored and not permitted to leach, they may be of considerable value to him. Wood ashes are now a factor in Canada, being considered a regular commercial commodity, and the large lumber mills and other plants using wood or sawdust for fuel in this country which at present make no use of the ashes from their furnaces or waste piles may find it profitable to store and sell them if the demand warrant it.

In New England where farmers have had to look more carefully to the renewing of old soils than in some of the newer sections of the country, wood ashes have long been appreciated. Ashes indirectly increase the available nitrogen of the organic matter in the soil, and have been known to do excellent service in Europe on drained moorland.

Besides the potash, ashes contain other ingredients which are of value to plants; namely, about 1 or 2 per cent. of phosphoric acid, a little magnesia, and a great deal of lime. The importance of these last-named elements is made plain by the esteem in which leached ashes are held by some of our farmers, although from leached ashes all but a very small portion of the potash has been washed out. The farmer who wishes to restore potash to the soil by the use of ashes should take great care that they are kept dry, and are not allowed to leach at all.

Ashes from hardwoods, (deciduous trees), are richer in both phosphorus and potash than those from pines and other softwoods (conifers). Ashes from oak, elm, maple, and hickory have more potash than those from pine. The ashes of twigs (faggots for example) are worth more for agricultural purposes than the ashes of heart-wood taken from the middle of an old tree. In general, the smaller and younger the wood burned, the better ashes. The ashes of coal do not contain enough potash to make them valuable in this connection.

Investigators have considered that there is enough potash and phosphoric acid in a bushel of ashes to make it worth 20 or 25 cents. Besides that, some 10 or 15 cents additional might be allowed for the "alkali power" of the ashes. This power is that which enables ashes to rot weeds and to ferment peat. Of

course prices vary with local conditions.

If wood ashes are purchased, the farmer should assure himself that they have neither been contaminated with coal ashes, nor adulterated with leached ashes. The place of burning has no effect on the value of the ashes as fertilizer. They are equally satisfactory whether taken from a stove, a fireplace, or a bonfire.

BRITISH HORTICULTURE.

The Trade and the War.

Many British horticulturists have followed with unfaltering interest the progress of events in Belgium. The Belgian place names now freely referred to in the press with terrible associations summon up recollections of former glad days spent in exploring the gardens and nurseries of this fertile little kingdom. Many British gardeners retain pleasurable recollections of visits paid to the Ghent international flower shows, where the brilliant floral marvels of the Belgian florists were to be seen radiating in their summer grandeur. Two years ago the Belgian growers exhibited some of their latest horticultural triumphs at the International flower show at Chelsea, where they renewed acquaintance with many British confreres who had visited the Ghent shows.

The Belgian nurseries are noted throughout the world for the excellence of their methods and an immense export trade has been created. Belgians have gained a high reputation as gardeners, causing their services to be constantly in request in Britain. The azalea owes its popularity largely to the remarkable developments which have been made by the Ghent growers. Van Houtte, a noted florist, was the first to raise the double flowered kinds. Belgian nurserymen likewise excel in orchid culture.

One result of the war will be to cut off our supply of German seeds. Hitherto a very formidable business has been done in Britain with flower and vegetable seeds from this quarter, the chief centres of this industry being Erfurt and Quedlinburg. In recent years there has been a considerable extension of the acreage devoted to this trade. The reliable quality of the seeds undoubtedly has been the principal cause which has led to the development of this business with Britain. It is expected that an increased impetus will be given to the British seed growing by the absence of the German competition. Essex is the leading centre for English seed growing; many small holders find this a very profitable crop. Some of the wholesale houses have big acreages under seeds in the neighborhood of Witham, Kelvedon and Coggeshall.

Owing to the Crystal Palace being required for war purposes it was not possible to hold the annual show of the National Dahlia Society which had

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Two volumes have now been issued and the others will follow in succession. Order from

HORTICULTURE PUBLISHING CO.

11 Hamilton Place, Boston, Mass.

been fixed to take place there. The usual dahlia show, however, was held by the Royal Horticultural Society at their headquarters in London, on Sept. 8th. The trade specialists made an excellent display. Awards were granted to the following new varieties: Loreley (decorative), Stella (collarette) Etoile Rose (cactus) by Charles Turner; Mrs. Edward Drury, Marguerite Phillips and Kismet (cactus), The Swan (garden), by Stredwick and Son; Eden (collarette) White Star and North Star (singles) by J. Cheal and Son. W. H. ADSETT.

NEWS NOTES.

N. Cimsted, O. — H. Christman & Son are the successors of Irving Dunford and are improving and enlarging the greenhouses.

Middletown, O.—Jas. R. Johnston of Greensburg, Ind., has leased the Bellemonte Greenhouses of Jos. R. Goldman. The business will be enlarged and conducted on the same broad lines as heretofore. Mr. Goldman will be retained to do the decorating and designing.

West Orange, N. J.—A fire, the origin of which is a mystery, completely destroyed the barn and greenhouses of Arend Stenken at Benvenue and Ridgeway avenues, St. Cloud, Saturday night, October 3. A horse and cow were saved by neighbors, but fruits, vegetables, hay and harness were destroyed. The damage is estimated at \$1,000, partly covered by insurance.

Directions on every package

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

Stumpp & Walter Co.

GREENHOUSE GLASS

OUR PRICES WILL PROVE THIS.

CHICAGO, ILL.

IF YOU ONLY KNEW what a good leave the METROPOLITAN PATENT-ED is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the cave is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

The Question of a Question Blank

IT'S not reasonable to expect you will take the trouble and bother to write us a letter, stating all the facts necessary for us to advise with you intelligently concerning the kind of greenhouse best suited for your particular place or purpose. Neither is it to be expected that you are going to scratch your head to be sure to let us know all the things we must of necessity know, before we can give you an estimate. But if you had before you a simple Question Blank, that you could, with comparatively little effort, fill in, you would willingly give us all the information necessary.

Of course, you don't want to be bothered with a lot of fool questions. Neither do you want to be

asked to answer a lot of questions in a second letter after you thought you had answered them all in the first.

So to overcome all these things, we have prepared very carefully a Question Blank, that is as easy to fill out as rolling off a log. It covers every point we want to know.

Send for our new catalog and we will enclose one of these blanks. Just fill it out and return. If you don't want to, you don't have to bother writing any letter. The Question Blank is letter enough.

Send for the catalog and let's get down to facts and figures.

Sitting on the residence stoop of Homer P. Knapp, at Painesville, Ohio, this is the charming glimpse you get of his U-Bar greenhouse.

A Rose Pergola in June

On the Proctor Estate, Topsfield, Mass., garden of James M. Proctor

Hicks' Special Trees and Shrubs

For Dry Ground and Seashore Planting

ONE of the most difficult of planting problems you have to solve may be the planting of sandy, dry and acid soils. These conditions occur both on the beach and the dry, sandy or gravelly sub-soils in the interior. The present drought where the rainfall in August was 2.15 inches, in September .27 inches, and the average for these months should be: August, 4.3 inches, and September, 3.6 inches, emphasizes the need of dry ground plants. We are making a specialty of them. We do not know of any other nursery that is. Our plants are cheap: \$20 per 1000 and upward. It is not possible to water everything. It is not possible to cart soil and prepare the ground two feet deep to withstand the drought. The best landscape gardening is that which fits the plants to the maximum drought and severest Winter.

Make a list of what Nature plants on the abandoned fields in the region where you are planting. If it is dry ground, there will be Oaks, Bayberry, Sumach, Cedar, etc. The Oaks are the principal drought-resisting trees. Try a few hundred or a few thousand of our Oak Seedlings. We dig them with full length roots. Make a hole

with a crowbar twenty inches deep, set the collar two inches below the ground. We will show you a uniform block of several thousand, planted this way in December, 1911. They can be planted from five to fifteen feet apart. Next Spring plant between them little Pine trees. For an under growth plant drought

- | | | |

| 1 Surf | 5 Beach Plum or | 11 Wild Rose, Vir- |
| 2 Beach | Bayberry. | ginia Creeper. |
| 3 Sand Dune. | 6 Holly. | 12 White Oak. |
| 4 Tips of new growth | 7 Chokeberry, Py- | 13 White Birch. |
| killed off by the | rus Arbutifolia. | 14 Privet. |
| salt resulting in | 8 Black Oak. | 15 Norway Maple. |
| dense growth like | 9 Cat Brier. | 16 Forsythia. |
| a trimmed hedge | 10 Wild Cherry | |

resisting shrubs as Bayberry or Wax Myrtle, New Jersey Tea or Ceanothus Americanus, Hazelnut, White or Gray Birch, or Betula Populifolia.

The picture shows Nature's methods of planting on the beach. This is a combination of sandy, acid soil with caustic action of the salt spray. The plants are much the same as on dry sandy hills or plains. Therefore, the same answer can be given inquiries for planting on the beach and planting in sandy soils. Close planting is essential to the best results in both cases. The accumulation and preservation of a layer of decaying leaves eight inches deep is the first essential and close planting is the second. Neither can be dispensed with.

Remember now is the time to make a profit on our guaranteed big Maples that save fifteen years and big Pines that save five years.

Here is a hint that may help you, as it helped us keep August and September sales up to the average. We have placed on the road in front of our nursery and on other important automobile routes, ten or twenty miles away, groups of evergreens with balls of earth and hardy flowers in pots. Sign—"Plants guaranteed to grow. Help yourself. Put your name in the box and we will send bill."

People like to be trusted. They like to look over plants as in a book store, without an attendant. They like to find it as easy to buy trees as to buy furniture.

Send for our fully illustrated catalog and printed matter, or ask us any questions where we might help you out with your planting problems.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

LIBRARY
NEW YORK
BOTANICAL
GARDEN

Callas

These should be making rapid growth, and will require quite a supply of water. They should also have a good syringing every morning during clear weather. Give as much air as possible, and damp down between the pots, floors and walks three times a day. They like a temperature of about 60 degrees at night, with about 15 to 20 degrees higher with sunshine.

Christmas Plants

It is a good time now to take a careful survey and estimate of all holiday stock. If short on any kind get them right away, not waiting until the last minute and having to take anything you can get. All plants will want very careful watering from now on, and be sure to give them plenty of room so the light and air can get around them. You can give all flowering plants liquid manure at least once a week, which will help to tone them up in great shape.

Tulips for Forcing

Tulips should now be boxed up as soon as possible. Don't use all worn-out soil as it never produces good blooms, but give a good compost and do not overlook providing the flats with good drainage. These flats can be placed outdoors where they can be got at handily, as they may be required. It should always be remembered that tulips and, in fact, all bulbs should not be exposed to zero weather; a little frost is a good thing for bulbs, but too much is sure to retard their growth and flowering qualities. So when the hard weather sets in give them enough protection to ward off the hardest weather.

Lily of the Valley for Christmas

If at all well-grown, a 6-inch pot of lily of the valley with several dozens of flowers, and trimmed with red waterproof crepe paper, always sells well at Christmas. If not on hand, order some cold storage pips now from your supply house. One can make use of the freshly imported stock, but it is too early yet to force them with as good results as the cold storage pips. A period of four

weeks—rather a little over from the day the pips are planted in the pots—and they are ready to sell. Take some 5-inch and 6-inch pots (or half pots will do). Fill them full of pips, allowing about a good inch of space between each pip. The planting is best done by laying about 6 pips in the palm of the left hand, the tops all even. On this space a thin layer of sandy soil, then more pips, another layer of soil, and so on until you have about as much as the pot will hold. Place these into the pot, and then space the pips properly, having the neck of them even with the rim of the pot, allowing the $\frac{3}{4}$ inch long pips to project above. Press the soil down firmly between the pips, and do it so as to have all the tops equally high. Perhaps the main thing is to be able to maintain about 85 degrees for bottom heat, with a few degrees less on top.

Propagation

Plants from which an early lot of cuttings were taken should now yield a good extra crop. Frosts have already occurred in some sections and if a sufficient stock of the more tender plants has not been placed in the propagating bench, it cannot be done too soon. Tender subjects such as coleus and alternantheras, should already be in, but there are few plants more easily rooted and they can still be propagated, as can acalyphas, crotons and other colored-leaved tropical plants. These latter like a bench where they will get the benefit of a genial bottom heat. Lobelias, ageratums and petunias should be propagated now, and of course geraniums can hardly be overdone. Heliotropes, salvias and other useful flowering bedding plants should not be overlooked. It is much more satisfactory to take cuttings now and pot them along, which will keep them growing. Plants so treated will later on produce plenty of cuttings.

Night Temperature

From this out the night temperature will play a big part. While it is not best to let a house drop too low, on the other hand it is just as bad to have it go too high. All cool-blooded stock can have a crack of air during nights which will harden up the plants so that when the winter weather sets in they will bear it better.

Mr. Farrell's next notes will be on the following: *Asparagus plumosus nanus*; *Begonia incarnata*; Carnations; Gladioli for Forcing; Marguerites; Sowing *Centaurea gymnocarpa*.

trade is carried on. \$20.00 a year is the amount to be collected from each commission dealer.

We would remind our readers of the offers of desirable and timely stock, to be found in the display advertisements and in the Buyers' Directory from week to week at this season. These in many cases represent the surplus stock of the best growers of various specialties and prices of such are placed low to insure a quick disposition of the goods before hard weather comes. Take a look through the Buyers' Directory in this issue and see what you find. Some genuine bargains are there and they will be quickly taken up.

Now that the unprecedented spell of rain-
 less weather has come to an end and wel-
 come showers have soaked the dry earth,
 the opportunity for successful fall planting of hardy material should not be allowed to pass by unused. The dry spell coming as it did, about the time that summer growth had been completed, has had the effect of ripening up the wood and buds for next year to perfection. The rain coming now puts the ground in good planting condition and just right to stimulate root action before it freezes up and without encouraging any top activity. If made to order the conditions could not be better for fall planting and all experts concede that under such circumstances fall planting is to be preferred for the majority of shrubs, trees and herbaceous stock, in addition to the very decided advantage gained by thus reducing the pressure of work in the busy and often inadequate spring planting period.

Frequenters of the wholesale flower mar-
 kets cannot but note the advancement
 from one year to another in quality of the
 stock produced. The reasons for these bet-
 ter results are many. Greenhouses and their equipment as formerly constructed are not to be compared to the scientifically planned structures turned out by the present day builders; hybridists have labored zealously to give us better varieties; hustling introducers have ransacked and sifted the productions of old-world experts; argus-eyed collectors have searched the untrodden wilderness for rare floral gems; enthusiastic growers have never tired in their efforts to perfect their cultural skill; clubs and societies have in their exhibitions encouraged emulation to excel, and an alert and ever-faithful trade press has, by its diffusion of knowledge, contributed inestimably to the sum total of achievement so impressively presented in the wholesale flower markets of today. But then what? Certainly, up to the time of the appearance of this product in the market its progress has been a triumph. It is fit to adorn a king's table. It may get there or it may bring up in the ignominy of the dump. So much science, so much skill, so much industry, applied to the perfecting of the goods, and this the outcome! Now that the great difficulties of production have been so splendidly mastered is it not high time that some counterbalancing effort were made to solve the greater problem of distribution and sale?

Should the Senate war tax measure pass the national House and become a law it will, if we interpret it correctly, lift about one thousand dollars per annum out of the wholesale flower district of New York and a proportionate amount from other cities where the commission

On many an office wall hangs a card bearing the inscription, "Don't talk war; talk business," or words to that effect. But there are certain phases of this horrible affair and its effect upon the trade with which we are concerned

Gordonia Altamaha

This is probably one of the least known of our small trees, and yet it stands among the most beautiful of our native plants. In habit of growth and in the leaf the *Gordonia*, or as it is sometimes called, *Franklinia*, is not unlike a magnolia, although in the flower it more nearly resembles a camellia. Furthermore, it is especially valuable on account of its late flowering period; plants being in bloom at the present time in the Arnold Arboretum.

The *Gordonia* is of a rather upright habit, forming a well shaped head. It is a member of the Tea family, Theaceae. Its finely crenate, lance-obovate leaves are of the color of the leaves of *Magnolia acuminata*, but are whitish-downy beneath. The fragrant flowers are borne on the ends of the branches on short, stout peduncles. They are pure satiny white, about two and one-half inches in diameter and bowl shaped at their best, later becoming flatter as the flower ages. The stamens are bright golden yellow and are placed directly on the petals, where they form a tuft perhaps a half an inch or more in diameter, making a beautiful combination of color against the pure white of the petals. The pod is globular, light green and covered with a whitish down.

This plant was first discovered in Southern Georgia, from whence it was introduced into Europe in 1744, and named by Dr. Garden in honor of his "old master Dr. James Gordon," and by Ellis it was dedicated to a London nurseryman of the same name. This nurseryman appears to have been a contemporary of Phillip Miller. It was called *Franklinia* in honor of Dr. Franklin. During the past hundred years it has not been found in a wild state, although much searched for. This fact makes it not only a rare and valuable tree, but one which should be more propagated and kept, lest it be lost entirely to future generations.

In the vicinity of Philadelphia there are several trees growing in the open without protection, but north of that point its hardiness cannot be wholly depended upon. In protected situations, however, I see no reason why we of the north cannot enjoy its exquisite beauty, provided, of course, we give it protection. In the Arnold Arboretum the plants receive part shelter from the other plants which are planted about them, and came through the winter of 1913-1914 when so many other beautiful things perished.

The *Gordonia* may be propagated from layers or from

GORDONIA ALTAMAHA

Blooming in Arnold Arboretum, October 11, 1914.

seeds, and will thrive in a peaty soil, or in leafmold and sand. It is well worth much care and devotion and it is to be hoped that as it becomes better known it will be more often used in the plantings on private and public estates and be more fully appreciated.

I would add that the photograph here shown was taken in the Arnold Arboretum on October 11th, 1914, after there had been one or two severe frosts which killed nearly all the annuals in this vicinity.

Hubert H. Canning

Jamaica Plain, Mass.

that are inseparable. These are legitimate subjects of discussion and to this extent it is not possible to talk business without talking war. We have been shown a communication from one of the leading azalea producers in Belgium stating that the last of his shipments to America had been packed and started, while fighting was going on all around, and that he and his family were then fleeing from their ruined home, to go they knew not whither. When or under what conditions these industrious people of "plucky little Belgium" will be able to return to their peaceful employments no one knows. But in the meantime what of the great horticultural industries which they have built up and what of our needs in this respect for the coming years? As far as we can learn, practically all the import orders for Belgian plants

for this fall's delivery are either already here or on their way, more or less delayed and in varying condition in consequence. The future can only be conjectured, but it must undoubtedly be some years before former systems are resumed, and at this juncture would it not be possible to induce these refugees—these skilled cultivators, to make their new home here, to re-establish their business in a country of peace, with the assurance of a market for their products, unlimited in its possibilities of development? Suitable locations and working capital would readily be found. There has been no end of talk in the past about the promotion of home industry in horticultural products. Here is a chance to do something besides talk and an equally promising opportunity may never come along again.

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

This club had an interesting meeting on Tuesday evening, October 20, a good attendance being present to listen to L. W. C. Tuthill's talk on "Advertising, the Spark Plug of Business." This was practically the same lecture delivered by Mr. Tuthill in New York last season. Advertising in its modern application is an amplification of the oldest form of publicity—word of mouth. The ultimate aim of floral advertising is to educate the public to the use of flowers. Continuity is an important essential but over-emphasis is as bad as under-emphasis. The advertising man's function is co-operation in the mechanical details and to crystalize attention to ideas and effectiveness of display. When you do advertising do it big and make it a heart to heart talk; don't merely fill space. Always aim for variety in advertising and lay out your campaign well ahead. Cut out the price item as a leader and feature the necessity of flowers. In the retail florist trade Penn was the first live advertiser and when he had set the example then they all followed. The lecture was much enjoyed and frequently applauded.

An interesting discussion took place on the desirability of increasing the representation of members in the S. A. F. to secure a position on the executive board of the national society. Patrick Welch, president-elect of the S. A. F., made an appreciation speech thanking the members for their Convention work and asking for enthusiastic effort in the coming year. By an unanimous vote a message of good cheer was sent to James Nicol of Quincy, who is quite ill. A committee was appointed to prepare resolutions on the death of Luke Mahon of Brookline.

The exhibition stand included splendid Chrysolora chrysanthemums and Mme Chantard hydrangeas from May cuttings from W. W. Edgar Co.; Carnation Alice in grand form from Peter Fisher; Ramopo chrysanthemums from Alex. McKay, and Lewis' "Dove-tail" Greenhouse Bench, a new patented cement bench just put on the market.

LANCASTER COUNTY FLORISTS' CLUB.

October 15, at 3.30 P. M., found fifteen of us on our way to visit the greenhouses of Willis B. Girvin, at Leola. The stock here consists of chrysanthemums, carnations, snapdragons and some 30,000 young *Asparagus plumosus*. The principal attraction was a new house 55 by 180 of King construction with some of Mr. Girvin's own ideas embodied therein, the principal one being the addition of a strong iron rod brace to keep the roof from going up in a storm. Six P. M., found the flower-show committee working hard over squabs on toast and the knotty problems of a first attempt at a flower show. At 7.30 P. M. the meeting was opened with the smallest attendance it has ever been our misfortune to have, probably due to the fact that a number of the

members were afraid of being appointed on flower show committees, and partly due to the fact that the past few meetings have been nearly all flower show affairs with very little else to attract members. George Marshall, representing the McCallum Co. of Pittsburgh, Pa., was with us on our trip as well as an attendant of the meeting.

These who stayed away this time missed a very interesting paper by Elmer Weaver on greenhouse construction, which was followed by remarks from D. T. Conner of Philadelphia, who represents the Lord & Burnham people, Mr. Wright of the same company having gone through to Harrisburg. Flower Show matters were discussed until 10.45, and we have every promise of having a very fine show and with a magnificent building in which to hold it. There is plenty of room for exhibits and any out-of-town florist who would like to exhibit any novelty should get into touch with the writer at once. The date is Nov. 6th and 7th; the address of the writer, simply Lancaster, Pa. The Lord & Burnham Co. offered a prize to value of \$25.00 which will be awarded the local grower making the best display. This is the only prize that will be offered in the florist's class outside of a blue ribbon for especially meritorious displays, but the amateurs will have a number of prizes to compete for.

ALBERT M. HERR.

HORTICULTURAL SOCIETY OF NEW YORK.

Do not forget the big fall show of this society which takes place October 30th to November 3rd, inclusive, at the American Museum of Natural History, New York City. Everything points to a fine exhibit, larger than ever. Schedules will be sent, upon application, by the secretary, George V. Nash, New York Botanical Garden, Bronx Park, New York City. Entries must be in the hands of the secretary not later than October 28th, so do not delay. Now is the accepted time. You can greatly facilitate the work of the secretary, and add greatly to the artistic appearance of the arrangements if you will get your entries in early.

John Young, 51 West 28th street, has been appointed manager of the exhibition. This means that the arrangements are in efficient hands, and exhibitors can greatly facilitate the work by sending entries to the secretary promptly so that they may be in the hands of the manager without delay.

The premiums for specimen palms have been much increased over those of last year, and it is hoped that this will bring forth a number of these large specimens. The schedule provides prizes for many kinds of plants, and if you have not large chrysanthemum plants, then bring smaller ones or cut flowers, for which liberal awards are made. Let us all put our shoulder to the wheel and push, and make of this the largest fall show New York has ever seen.

GEORGE V. NASH, Sec.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held on Tuesday evening, October 20, at Horticultural Hall, Philadelphia. Matters pertaining to the Annual Exhibition and Chrysanthemum Show to be held November 3 to 6, occupied most of the meeting. Arrangements have been made to decorate Horticultural Hall in an appropriate manner. This work to be done before the exhibits are brought in to make a proper setting in harmony with the exhibits. Chrysanthemum plants and ornamental foliage plants and chrysanthemum cut flowers will be staged on Tuesday, November 3. Cut flowers of roses and carnations will be staged on Wednesday, November 4. All growers who have new roses and carnations are requested to send flowers for this exhibition in care of David Rust, Secretary, Horticultural Hall, Broad Street, Philadelphia, and they will be properly cared for and staged. The exhibits of fruits and vegetables will be staged on Wednesday morning, November 4. The entire first floor of Horticultural Hall will be devoted to trade exhibits. All prominent seedsmen and plantmen will have exhibits in this section. Exhibitors present at the meeting stated that all chrysanthemums are in good condition and a good exhibition is promised.

Prizes awarded at this meeting were as follows: Chrysanthemums—vase of six blooms of an early flowering variety; 1st, Countess Eulalia, gard. Thomas Gaynor; 2nd, Mrs. Chas. Wheeler, gard. Wm. Fowler. Cosmos—three vases of giant-flowering; 1st, C. B. Newbold, gard. John Nisbet; 2nd, Geo. H. McFadden, gard. David Aiken. Cosmos—vase giant-flowering mixed; 1st, Mrs. R. B. Ellison, gard. George Annand; 2nd, C. B. Newbold.

DAVID RUST, Sec'y.

NATIONAL ASSOCIATION OF GARDENERS.

Bulletin Number One.

The National Co-operative Committee, appointed at the meeting of the National Association of Gardeners held in Philadelphia in April, 1914, to devise ways and means to make the proposed co-operative movement between the National Association and local gardeners' clubs and societies operative, submits to the local co-operative committees, appointed to work in conjunction with the National Co-operative Committee, the prime objects of the movement, which are as follows:

To establish gardening as a profession on a more firm foundation in America.

To develop a closer fraternity between those engaged in the profession of gardening and those interested in it.

To make known that the vocation of gardening is not acquired through one or two seasons of work in the garden, but through a thorough training which demands both a practical and scientific knowledge gained only through years of study.

To provide an educational course whereby those ambitious to gain a general knowledge of the different departments of their profession, and not in circumstances to secure it at college, may obtain it through their national association.

To make the Service Bureau of the National Association of Gardeners an institu-

tion to which those requiring the service of gardeners in their various capacities will turn with confidence for their requirements.

To encourage an exchange of views and the disseminating of reports of the doings and activities of the various local societies, whereby the experience of one society may aid in the development of the other societies.

To bring about more uniform conditions to govern flower shows, through the adoption of rules and regulations and an official scale of points for judging flowers, fruits and vegetables by the various horticultural societies; which could be applied to all shows conducted by clubs and societies participating in the co-operative movement.

To arouse the interest of estate owners, and others interested in gardening, in the activities of the local societies and the national association.

The foregoing are a few suggestions of what the plan contemplates. The National Committee recommends that the local committees submit these suggestions as a subject for general discussion at a meeting of their society, with a view of bringing out some thoughts which may aid the cause. It especially solicits suggestions and expressions of sentiment respecting the proposed establishment of flower shows on a uniform basis by the adoption of standard rules and regulations and a schedule of points for judging, to govern them.

It seeks advice on the establishment of an educational department for the benefit of those who may want to avail themselves of study courses, and suggestions on how the Service Bureau may be conducted to provide opportunities for the many rather than for the few. It should be national in scope, yet local in operation, in that the local societies shall have a voice in the filling of positions in their communities.

The National Committee asks that the local co-operative committees report to it any recommendations their societies may have to offer; also any suggestions the local committees may deem will further the movement. Make such reports not later than the middle of November to M. C. Ebel, secretary, Madison, N. J., so that the National Committee may submit its plans at the annual convention to be held in Philadelphia the first week in December next.

WM. H. WAILE,
J. W. EVERITT,
JAMES STUART,
M. C. EBEL.

National Co-operative Committee

CHRYSANTHEMUM SOCIETY OF AMERICA.

Work of Committees.

Exhibited at New York, Oct. 10, by Chas. H. Totty, Madison, N. J. Antigone, white, Jap. Inc., Com. scale 88 points, Ex scale 85 points.

Exhibited at Chicago, Oct. 10, by Elmer D. Smith & Co., Adrian, Mich., Golden Queen, yellow, Jap. Inc., Com. scale 90 points.

Exhibited at Cincinnati, Oct. 10, by Elmer D. Smith & Co., Adrian, Mich., Golden Queen, yellow, Jap. Inc., Com. scale 91 points.

Exhibited at Philadelphia, Oct. 12, by Elmer D. Smith & Co., Adrian, Mich., Golden Queen, yellow, Jap. Inc., Com. scale 89 points. Ex. scale 86 points.

CHAS. W. JOHNSON, Secretary.

MISSOURI BOTANICAL GARDEN.

Twenty-fifth Anniversary.

On October 15-16 the directors of the Missouri Botanical Garden celebrated

the 25th anniversary with a meeting of a number of noted botanists from all parts of the world. A feature of the meeting was the number of women botanists present. The meeting wound up with a banquet to the visitors by the directors of the garden at the Lilderkrantz Club, which was decorated with smilax and water lilies, favorite flower of Henry Shaw, the founder of the Garden. The affair was a great success.

CLUB AND SOCIETY NOTES.

A state-wide distribution of free tickets to the National Chrysanthemum Show, at the German House, Indianapolis, Ind., Nov. 6, 7 and 8, has been inaugurated, and it is expected that the attendance will be far beyond that of any other flower show ever held in Indiana.

The fall exhibition of the Germantown (Pa.) Horticultural Society took place Monday, October 12th, in the lecture hall of the Library Building, Vernon Park, the exhibits including dahlias, plants, collections of fruits, grapes and gentians, and specimen plants.

The Hyde Park (N. Y.) Floral Association at a meeting at the school house made arrangements for the annual exhibition, which will take place at the Town Hall on Saturday, November 7. The exhibitors are requested to make entries to the secretary before 8 p. m. November 6.

The annual exhibition of the Tuxedo (N. Y.) Horticultural Society will be held at the Tuxedo Club House on Friday, Saturday and Sunday, October 30, 31 and November 1. It is expected that this year's exhibits will outclass all preceding ones as this year's lists includes 105 classes. Competition is open to all and all entries must be made to Frederick Bentley, the manager, on or before October 27.

The Worcester County (Mass.) Horticultural Society will hold its annual chrysanthemum show, November 5th and 6th. The judges are: William Anderson, Lancaster; Herbert A. Cook, Shrewsbury, and Charles Greenwood. Committee on arrangements and exhibition, H. R. Kinney, chairman; Arthur H. Harts-horn, Albert H. Lange, William J. Wheeler, Mrs. Percy G. Forbes, Simon E. Fisher, H. Ward Moore, Arthur J. Marble and Miss Lucy P. Coulson.

The Oregon Dahlia Society held a dahlia show at Portland, Ore., on October 9 and 10. No less than 750 varieties were staged. In the professional division in which only Gill Seed Company and Willamette Dahlia Company were represented, the following awards were made:

Gill Bros., first on cactus novelties, decorative novelties, show novelties, single dahlia novelties, single dahlias, 12 varieties, collarette novelties, collarette, 12 varieties; pom-pom novelties and pom-pom, 12 varieties; second on 12 varieties show novelties, 12 varieties peony novelties. Williamette Dahlia Company, first on cactus dahlias, 12 varieties, 12 decorative, 12 varieties of show novelties, peony novelties and 12 varieties of peony novelties.

Final arrangements for the Morris County Florists' and Gardeners' annual flower show, which will be held in

James' Assembly Hall, Madison, N. J., on October 28 and 29, were made at a meeting of the members in Masonic Hall last week. The judges will be: John T. Burns, of New Canaan, Conn.; Eugene Bailedouze, of Flatbush, L. I.; Alexander McKenzie, of Highland Falls, and John Herrenhaus, of Princeton. A matter of interest was the exhibition of a new white rose, "White Shawyer," a sport from "Mrs. George Shawyer," grown by Charles H. Totty.

The monthly meeting of the Nassau County Horticultural Society was held October 14th at Glen Cove, N. Y. The judges awarded first prizes for grapes to Henry Gaut; apples, Herman Boettcher; pears, Frank Petroccia. A cultural certificate was awarded Herman Boettcher for 12 varieties of apples, and honorable mention for delphinium; honorable mention to Henry Gaut for quinces. John W. Everitt was presented with the E. M. Townsend cup for roses won at the dahlia show. It was decided to hold a social evening after the meeting on November 11th. James Gladstone was appointed manager of the fall show, October 29th and 30th. Exhibits for next meeting, November 11th, chrysanthemums: three white, three pink and three yellow. President Henry Gaut donated \$10 for prizes for the best table decoration of chrysanthemums, for assistant gardeners only. A motion was carried to send a letter of sympathy to Mr. W. E. Kimball on the death of his wife, an honorary member of this society.

HARRY JONES, Cor. Sec.

On the evening of October 20, Medford (Mass.) Horticultural Society had Mr. John Farquhar as lecturer on Bulbs and Bulb Growing, in Mystic Congregational Church and a large and appreciative audience greeted Mr. Farquhar, who spoke for over an hour in a very instructive and entertaining manner. The pictures of Belgium and Holland thrown on the screen were especially interesting, giving the hearers actually a trip through the bulb growing districts of these countries. Mr. Farquhar stated that the United States this year had been able to secure a much better grade of bulbs than formerly, owing to Russia being at war and their supply coming this way. He also mentioned, that many inferior grades were also arriving, the better ones being held back by some growers to strengthen their stock, while the war lasted, the market not being so good this year, owing to that cause. He made a strong plea for natural planting in woodlands, and in the shrubbery also, stating that much more artistic effects can be made by interspersing clumps in the herbaceous borders than massing in large beds. He showed a picture of the border at Harvard Botanical garden, illustrating this mode of planting. The writer has seen these borders in the springtime, and they are far more effective in my opinion than massing in beds. Mr. Farquhar thinks there will be a scarcity of bay trees and other trained subjects for topiary work owing to the destruction around the headquarters of that industry in Belgium. The storehouses used for wintering these plants being used for war purposes, the coming winter may see them all frozen up. GEORGE F. STEWART.

BRITISH HORTICULTURE.

New Dahlias.

Although it has not been possible to hold the National Dahlia Society's show this year, the society has had submitted to it a number of novelties. Awards have been made to the following new varieties: Lord Kitchener, orange scarlet; W. E. Peters, purple crimson; Melody, primrose florets pointed white; Neptune, bright rose, Lowfield Star, cosmea-flowered, satiny rose.

Items of Interest.

The British fruit show, usually organized in the autumn by the Royal Horticultural Society has been abandoned, and the same fate has befallen the National Chrysanthemum Society's show.—The Perpetual Flowering Carnation Society, however, is holding its show in London, on Wednesday, Dec. 2d, for whom an attractive schedule has been prepared. The secretary is T. A. Weston, Orpington, Kent.—The National Sweet-Pea Society is to hold a series of trials next year.—The Daffodil Year Book for 1914, which has lately been issued, forms a useful addition to the horticultural library.—About forty men have volunteered for active or home service from the Botanical Gardens, at Kew, and more will apply for leave. The number includes sub-foremen, gardeners, constable and laborers.—A 12 days' sale has been arranged, for disposing of a portion of the nursery stock of Messrs. Jas. Veitch & Sons.—Big supplies of bulbs are being received from Holland. One Dutch firm with headquarters in London announce that their supply is assured.

W. H. ADSETT.

Kelway & Son write us that they have just received a notification from the authorities of the Anglo-American Exposition, White City, London, that they have been awarded a gold medal for exhibit of hardy border plants and gladioli in the grounds; silver gilt medal for cut flowers of peonies and herbaceous plants; two silver gilt medals for cut gladioli; grand prize for the highest aggregate marks for the three exhibits.

Among the many other signal awards received this season by this firm were awards of merit for Gladioli, White Giant and Kelway's Abeland by the Nat. Gladiolus Society, and Lord Alverstone and Eldorado by the Royal Horticultural Society and certificates of merit for Gladioli Defiance and A. J. Macself by the Nat. Hardy Plant Society and eight gold and silver medals of various societies.

A ROSE PERGOLA IN JUNE.

There are pergolas and pergolas. Some are simply disfiguring blots on an innocent landscape, awful examples of architectural bad taste. Others, such as that depicted in our cover illustration this week are a delight to the eye. Now that the fall rains have begun hardy rose planting may be done at once and with a little extra winter protection they will give a good account of themselves the first season. Pictures such as the one we show are an inspiration and we refer those of our readers who may have an ambition in the direction of rose arbors, to the dealers in such material who advertise their goods in HORTICULTURE.

THE WAR AND OUR CALLING.

Translated from "Gartenkunst," by Prof. F. A. Waugh, Amherst, Mass.

No field of civilization more clearly requires for its development an undisturbed peace than do gardening and landscape gardening. For this reason our calling has enjoyed a splendid progress during recent years of peace. Constantly pressing forward in the solution of the artistic and constructional problems, garden art in Germany has accomplished much and given even greater promise for the future.

At the same time our profession has achieved the most friendly relations with the gardeners of all neighboring lands, for gardening like all other arts, knows no political boundaries. The next few years should have brought still further extensions of these friendly relations. The effort is not one sided. A Parisian friend only a few days ago was in correspondence with us arranging for a trip of French landscape gardeners through Germany for the study of gardens here, and we planning our heartiest support. And it was only a few weeks since in Copenhagen we exchanged most cordial courtesies with our professional friends of Denmark.

All that is now, by the outbreak of this world war, as by a cataclysm of the elements of nature, vanished if not indeed destroyed altogether. It is easily understood therefore, that we feel ourselves especially injured by the outbreak of hostilities.

But though we are gardeners and landscape gardeners we are above all Germans. Without reservation, and without quarreling with our fate, we are ready, like the men of other callings, to do and bear everything necessary in this sad moment for the good of the Fatherland. Very many of our colleagues, and amongst them our best friends and those on whom the future of our art depends, have responded to the call to arms. Who can say which of them we may see again! Others are listening hourly for the call. And all who may not be permitted at this dark time to save their country with gun in hand will gladly and willingly welcome every opportunity to make themselves useful in every capacity.

It remains for everyone in his place to do everything with all the members of our calling, during the next few months, to preserve for the future everything possible from what has been built during the past years of labor. We can only hope that this storm may prove a clearing shower which will bring with it some good, and that the brighter days will quickly follow the present unhappy times.

We may also express the hope that the most of those whom today with heavy but courageous hearts we see departing for the front, may come back to us hale and hearty to take up again with us the work of our beloved art. For the present away with all fears, and with upright heads and faces to the future, forward!

Editor HORTICULTURE:

Dear Sir—Enclosed you will find check to pay for my subscription. Your journal is clean, instructive and different from the rest. I am glad to renew my subscription.

Yours truly,

Boston.

HARRY QUINT.

COST OF TRANSPORTATION.

A perusal of the following copy of a freight contract such as is now in force for all Holland shipments to this country will give some idea of the costs and risks which importing houses are up against at the present time. Buyers should not find much fault with the unavoidable advance of a few cents per plant under these conditions which must be met.

FREIGHT CONTRACT

Between Julius Roehrs & Company, of Rutherford, N. J., hereinafter called the Merchant, and the Holland-America Line, of New York, hereinafter called the Carrier.

The Merchant agrees to forward by the steamers of the Holland-America Line all shipments of plants from Holland which he may import into the United States of America, during the period from Sept. 1, 1914, to Aug. 31, 1915.

In consideration of which the Carrier agrees to carry such shipments during the above mentioned period, from f. o. b. Rotterdam to the ports of New York, Boston, Philadelphia, Baltimore and Newport News at the following rates:

Spireas and lilies of the valley: 25/— per 40 cu. ft.

Plants and shrubs (including evergreens and conifers): 18/— per 40 cu. ft.

Young deciduous trees (not shrubs, evergreens nor conifers); Plants in hamper, tubs and canvas, each containing one plant; cheap standard trees (shrubs and young deciduous trees excepted), loose or partly packed; Cheap standard trees in cases above 12 feet in length; Cheap standard trees in cases above 12 feet in length when shipped in lots of over 200 tons measurement on one bill of lading: 15/— per 40 cu. ft.

For shipment to Philadelphia via New York 2/— per 40 cu. ft. is to be added to the above mentioned rates.

Under cheap standard trees in cases above 12 feet in length are understood; cheap trees of about that size, so that only one tree can be packed in the length of the case; under this heading only so-called high standard trees can be shipped.

The rate on young deciduous trees (not shrubs, evergreens nor conifers) and cheap standard trees in cases above 12 feet in length will be applied only if the goods are so declared in the bill of lading and provided the consular invoice is supplied for perusal to the steamship company, at port of sailing or arrival in the Company's option.

The freight on the above-named articles should be prepaid; if not prepaid the merchant hereby guarantees full payment of all freight regardless of condition of merchandise upon arrival or entire non-arrival of the goods, caused by seizure or otherwise.

The Carrier shall not be liable for delays in transportation, nor for any loss or damage occurring while the goods are not in its actual custody; all goods considered dangerous by it may be refused loading at its discretion and all shipments shall be subject to the terms of the Line's regular bill of lading now or at any time hereafter in force, whether actually issued or not. The Carrier shall be exempted from receiving and loading shipments hereunder during war, pestilence, strike, lockout and boycott.

IN WITNESS WHEREOF we have hereunto subscribed our names and affirmed to three copies.

Rutherford, Sept. —, 1914.

New York, Sept. 25, 1914.

HOLLAND-AMERICA LINE GENERAL

AGENCY,

W. T. Ruck, Manager.

NEWS NOTES.

Lebanon, Tenn.—On and after January 1st, 1915, the name of the Lebanon Floral Co. will be changed to the Anderson Floral Co.

Boone, Ia.—J. Loehrer lost over 5,000 feet of glass in the hailstorm which occurred October 6th. The loss on the glass is fully covered, but many plants were ruined.

ANTIQUATED PHILOSOPHY.

Twenty-eight years ago the standardizing of geranium prices started in Philadelphia. One dollar a dozen. The meeting was held away out about the Bull's Head, 40th and Market streets. They all agreed to \$1.00 a doz., yes; and so for a month or two they thought they had reached the millenium. Then they discovered that one of the signers was giving fifteen for a dozen! The combination busted right there and then, and the "fifteen for a dozen" man has never been able to see why. Some of our modern agitators seem to be starting at that very point—twenty-eight years behind the times, with the idea that it is possible to standardize prices in flowers.

It can't be done: Why, even the great United States Steel Co., cannot standardize prices; nor the sugar trust; nor even the United States itself. Take the gold standard for instance. The immensely increased production of gold in recent years makes our gold dollar of less purchasing power. The "high cost of living" proves that. Commodities accommodate themselves quicker to the decreased value of the dollar than salaries do. The only thing that can standardize a price is an absolute monopoly. Without that, the law of supply and demand works inevitably, and makes the price, no matter how powerful the bull, edict or proclamation may be; nor how powerful the individual, corporation, state or nation that may utter same.

By the way—if we must put up funds for the cotton growers, if they exceed their market, why not also for the American Beauty growers? or growers of anything else, for that matter. There's the apple crop this year—a drug—because Hamburg is closed. Why not a bounty to the apple men? Sounds ridiculous don't it, when you come to think it over. Paternalism run mad.

GEORGE C. WATSON.

ON THE GULF COAST IN DIXIE.

All along the gulf coast there are evidences that seeds and nursery stock are in good demand. The development of the South along the lines of citrus and other fruits has been very rapid and makes ready sale for the output of the many nurseries that are increasing rapidly in this land of sunshine. They are scattered all along the gulf and the larger nurseries have branches in several towns. It was interesting to note the degree of perfection to which the Japanese have brought their nurseries and their advice is eagerly sought by their neighbors and it is freely given.

The South is suffering more from the European war than are other parts of the country. With their market, which is largely a foreign one, cut off, nearly all lines of business are depressed. The cotton situation has been helped to a degree by the "Buy a bale" movement and the response given to it is everywhere evidenced by the bales of cotton placarded. "This is our bale, where is yours?" This has helped out the growers, but has only passed the solution of the problem on to the merchants, who are

WINTERING BAY TREES.

Bay Tree Storage House at Dreer's, Riverton, N. J.

Conditions in the bay growing districts in Belgium are not reassuring as to the continuance of the abundant supply of trees which has been coming to this country in the past, and, no doubt, those now in the hands of dealers will be carefully looked after.

A cool shed or a cellar where light and air are sufficient will keep these trees over the winter in good condition. They need a rather moist atmosphere and a temperature of 40 to 46 degrees. Our illustration shows the ideal way to winter bays, however.

advocating the growing of other crops next year instead of cotton. The seedsmen are busy and to sit in their stores and watch the people come and go, one could but be impressed with the idea that the seedsman is getting his full share of what business there is.

The planting of pecan orchards is working a revolution in this country too, and the nurseries are busy supplying the young stock of the many improved varieties. Ornamental stock is also grown, but the effort at beautifying the homes is far from general and public parks are extremely few. The South is like a new country with only a touch here and there showing what can be done in this land of fruit and flowers. Northern capital is going there to develop the land and in its development the seedsman and the nurseryman will play an important part.

M. B. HANCOCK.

The list of jurors selected to try Mrs. Carman in the famous murder case at Mineola, N. Y., includes two gardeners and one florist. The accused lady is said to have characterized the jury as "splendid." No doubt.

Jefferson, Ohio — The Jefferson Greenhouse Co., which was organized last May, has practically completed one of the most modern vegetable greenhouse plants in the country. Four thousand tomato plants, averaging four feet in height, under six houses, each house 15 by 200 feet. As soon as the tomato crop is disposed of, lettuce, cucumbers and other vegetables will be planted.

A modern packing house, 30 by 100 feet is on the property, being used also for the boiler room where two massive Erie City boilers of 100-horse power are stationed. A gas engine pumps the water used for irrigation purposes, and the office is located at the entrance to the building. A three-ton auto truck will shortly be put into commission, and a thousand barrel cistern has been constructed. Stock in this enterprise is all practically owned in Jefferson, the capitalization being \$10,000, paid up. L. J. McNutt is president; R. G. McNutt, secretary, and H. J. Warner, treasurer. A. V. Miller, of Ashtabula, is manager.

EFFECT OF CARBON BISULPHIDE IN SOIL.

Following the reading of the instructive paper on the adaptation of plants to soils, by Dr. George E. Stone at the Boston S. A. F. Convention, a question from the floor brought out some very valuable facts regarding the use of bisulphide of carbon. As we have in our previous issues published Dr. Stone's paper in full, it may be acceptable to our readers that we also give space to his remarks on the bisulphide subject and several other topics.

Being asked whether bisulphide of carbon in the soil would produce the same result as sterilizing the soil, the lecturer replied that some experimenters have reported remarkably stimulating effects on plants from the use of carbon; bisulphide; they claim that these effects are very similar to those produced by the use of steam in sterilizing. He continued—In soils with which we have experimented we get only a slight stimulation from the carbon bisulphide when applied to the soil. We would not consider, by any means, the application of volatile substances in general to the soil to be as valuable as steam. Steam not only accomplishes what carbon bisulphide does, but in addition renders the constituents of the soil more available for plant food.

It is a question whether bisulphide of carbon, which is an expensive chemical, would be cheaper than steam. Moreover, when using these chemicals the greenhouse must be empty and remain so for two weeks or more, and the soil constantly stirred in order to get rid of the volatile substances. In Ohio, where the soil is quite compact and where the steaming makes it soggy, they use formaldehyde for the purpose of killing various organisms. However, it has not the same fungicidal or bactericidal effect as steam, and is therefore more limited in value. In one or two instances in Ohio they have reported considerable increase in the crop by the use of formaldehyde. This increase is believed to be due to the destruction of the protozoa in the soil by the formaldehyde, but I believe that there is also a direct stimulating effect resulting from the use of formaldehyde. Personally, I prefer the steam method of treating soils, rather than the chemical method.

Carbon bisulphide, said Dr. Stone, is a chemical used for killing various forms of animal life, and when applied to certain soils it has a quite marked stimulating effect on the growth of plants. Many chemicals have this same effect; e. g., if willow cuttings, etc., are grown in water charged once in 3 or 4 days with illuminating gas, both the roots and stems are greatly stimulated. In some cases we have observed as much as 1,000 per cent. increase as the result of the gas treatment. As already stated, many chemicals are capable of stimulating plants whether grown in water, soil or sand. It is further believed by some that these volatile chemical substances such as carbon bisulphide, formaldehyde, etc., destroy the protozoa in the soil which are supposed to feed upon beneficial bacteria, as the result of which it is believed that a stimulated growth of the plant follows.

A question was asked concerning grape leaves covered with little nod-

AN ELEGANT SHOW CASE

In previous issues we have presented illustrations and description of the notable horticultural building of F. R. Pierson Co., at Tarrytown, N. Y. One of the richest accessories of this establishment is the flower show case a picture of which appears herewith. Passing through Broadway, Tarrytown, in the evening, the store being dark, and this show case flooded with light, one's attention is irresistibly drawn to the brilliant and unusual spectacle. It is certainly one of the most effective advertising devices in the florist trade.

Like all the features of the estab-

lishment this refrigerator show case is built of the most costly material and very beautiful in design and finish. It is 7 feet deep, 16 feet wide and 8 feet high. The frame work is steel and concrete, the exterior is marble, bronze and Caenstone, the floor moss-green tile, the ceiling quarry tile, the walls plate glass mirrors and opal the front double plate glass with air space between and the lighting is by two opalescent globes in the ceiling. The arrangements in the rear for the reception of ice, etc., are ingenious and practical. Mr. Pierson admits it cost lots of money, but as an advertisement alone it will soon pay for itself.

Like all the features of the estab-

ules on the underside, as to whether these were caused by over-feeding. Prof. Stone replied that these nodules may have been caused by over-feeding or insects, or mal-nutrition.

A member said: I would like to ask Prof. Stone relative to the use of arsenite in order to kill white lice. The moment the plants are sprinkled, the water from the sprinkling seems to unite with this arsenite and any leaves that the water, mingled with the arsenite, touches have an appearance as if they were burned.

Prof. Stone: It is not quite clear to me what chemical you used. Arsenite or arsenate of soda, however, is very poisonous to plants, and will burn foliage even in quite weak strengths. On the other hand, arsenate of lead is not so poisonous and is used for spraying trees. This is usually employed at the rate of 10 pounds to 100 gallons for spraying trees, and even this strength often injures plum trees. When used at the rate of more than 12 pounds to 100 gallons of water it is likely to injure various types of vegetation.

A Member: This seemed to have a burning effect. Does the uniting of the water and the arsenate produce any action?

Prof. Stone: No, except the soluble effect of the water and the greater distribution thereby over the surface of the leaves of the plant.

MASSACHUSETTS AGRICULTURAL COLLEGE NOTES.

The Landscape Art Club held its first meeting last Tuesday evening. Prof. Waugh, head of the department of landscape gardening, was the speaker.

The Florists' and Gardeners' Club has elected William L. Doran as president; Charles E. Hathaway, vice-president, and Miss Helen Burt, secretary-treasurer. The program committee is in charge of Charles Hathaway and Stanley Wright. Speakers will be secured to lecture on floriculture and allied subjects.

The senior class in landscape gardening made their annual trip to the Hartford parks, Hartford, Connecticut, on Saturday, October 10. The Elizabeth park features of special interest were the rose garden, rockery and herbaceous garden. In Colt park, the play ground is the feature, with home-made apparatus. Here is the statue of Colonel Colt well set off by a striking background of poplars. Keney park is the best in its naturalistic style of treatment. It is a park of wild scenery.

Obituary

Wm. L. Palinsky.

Wm. L. Palinsky, florist, of Chicago, died October 10, of quick consumption. Mr. Palinsky was one of the oldest and most enterprising florists in the city and had built up a big business from a very small beginning. His daughter, Sadie, will continue the business. The funeral was held October 13 from the residence at 2867 Palmer street.

Nelson B. White.

N. B. White, a well-known grape grower and occasional writer for *HORTICULTURE* on the subject of grape hybridization died on October 20, at his home in Norwood, Mass., in his 91st year.

For more than half a century Mr. White experimented with grape culture. His garden was his laboratory. Many years ago he offered his property to the Massachusetts Agricultural College, but the transfer was never effected. He originated several varieties of grapes that stood at the head for nursery lists for years. The original vines still live in the Norwood garden, though several of them were "sold out" for \$500 each to the nurserymen in various parts of the country, and Mr. White, years ago, was in the habit every fall of clipping, packing and shipping the buds to the owners. One of his last productions was the Early Bird, which Mr. White claimed should prove as rich and famous for Massachusetts as the Concord grape did for New York.

INCORPORATED.

Ashtabula, O.—J. H. Rice Co., nurserymen, capital stock, \$50,000.

Jackson, Miss.—Fain Seed Co., capital stock, \$10,000. Incorporators, J. B. Fain and L. C. Moorer.

Salisbury, Md.—W. F. Allen Co., nurserymen, capital stock, \$50,000. Stock held by W. F. Allen and family.

Boston, Mass.—MacMulkin, Incorporated; Edw. J. MacMulkin, James E. Henchey, F. J. Carney. Capital stock, \$30,000.

Corning, Cal.—The Northern California Nursery has been incorporated at Corning, Cal., with a capital of \$50,000, by W. V. Beresford, F. G. Beresford, C. E. Hazen, E. R. Balderston and E. E. Whitaker.

GREENHOUSES BUILDING OR CONTEMPLATED.

Silltown, Ct.—Harry Hoffman, one house.

Reading, Pa.—Chas. W. Wilhelm, one house.

Ambler, Pa.—Woman's School of Horticulture, one house.

Minot, N. D.—Geo. Valker, range of Garland houses.

Annapolis, Md.—Rudolph Kaiser, house 18 x 40.

Essex, Mass.—T. B. Gannett, Jr., conservatory.

Manchester, Conn.—Bon Ton Flower Co., one house.

Duluth, Minn.—F. C. Davis, 58th avenue, one house.

Chicago, Ill.—North Shore Floral Co., conservatory.

Weilersville, O.—Yoder Greenhouses, addition 80 x 125.

Sioux City, Ia.—J. N. Nordstrom, three houses, each 54 x 180.

St. Louis, Mo.—Leo Eberenz, Easton Avenue Heights, two houses.

Chambersburg, Pa.—Daniel S. Zearfoss, Curtin avenue, house 22 x 80.

Milwaukee, Wis.—Kummer Floral Co., 1261 Hopkins street, one house.

Jefferson, O.—Jefferson Greenhouses, six vegetable houses, each 15 x 200.

Seymour, Conn.—Thomas J. Mooney, a florist at Seymour, Conn., his wife and two children were thrown from a wagon on Friday night, Oct. 10, when an auto bearing Connecticut license 13,089 collided with it here. The autoists immediately drove away without ascertaining the extent of injuries to the occupants or damage to the wagon, not, however, until Mr. Mooney had torn the rear markers from the machine. Mooney received several scalp wounds and the others were somewhat bruised. The Connecticut register gives as the owner of the car Frederick H. Chase of South Kent, Conn.

BUSINESS TROUBLES.

Albany, N. Y.—Edmund S. Hazeltine, Central avenue, florist, assets, \$4,665; liabilities, \$29,722.

Poughkeepsie, N. Y.—Olson Sherwood, violet grower, assets, \$3,650; liabilities, \$6,364.

New York, N. Y.—Otto Burkard, florist, 1402 Madison avenue, assignment to Anna Burkard.

Baltimore, Md.—B. F. Bond Paper Co. and H. Bayersdorfer & Co., have asked for the appointment of a receiver for Forthuber Bros. Company, florists, 1905 Greenmount avenue, with greenhouses on Belair road.

The dropping of the leaves reminds us that the time for combating scale pests is at hand. We have heard nothing but good reports of the efficacy of Scalecide for this work in the past and large quantities of it will be needed this season, judging from reports on scale prevalence in many sections. B. G. Pratt Company guarantee that this remedy will do everything that lime-sulphur claims to do as a dormant spray, and some things that lime sulphur cannot do. They also guarantee that Scalecide, used according to the directions, will kill every scale hit with it, and some not actually hit, because of its crawling nature, without injury to tree or fruit bud.

Little Ads Bring Big Returns

Little ads. in our Classified Columns bring big returns to both advertiser and purchaser.

Anything that can be sold to florists, gardeners, park and cemetery superintendents, etc., can be sold through this medium in this department, and at very small cost. Don't fail to read them each issue, for you will find one or more that will prove profitable to you.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

General Prospects.

It cannot be said that the prospects of the American seed trade are altogether rosy, but it is safe to say that there will be no famine in the leading varieties the coming season. What next year may have in store is quite another matter, and we do not feel like hazarding our reputation as a prophet by making any guesses or predictions of what the future has in store for the trade of this country. Most of those with whom we have talked are of the opinion that standard stocks will be much shorter and higher in price another season than the one now beginning. Undoubtedly many of the seed stocks that are now imported can be grown successfully in this country. The trouble, however, is in the matter of biennials. It requires, as the term indicates, two years to secure a crop of seed, and as the roots necessary for this purpose have not been produced in this country this year, it will require two years at least to meet the demand. However, we may say "sufficient unto the day is the good or evil thereof," and as we have enough for the season's requirements we may live in hopes that next year's needs will be supplied from some source.

European Prospects.

The seed trade generally seems to be more or less at sea over the European situation affecting their business. We have remarked heretofore that most of the leading European dealers are not only promising that all orders thus far received will be delivered, but are advertising in American trade journals soliciting additional business. It is useless to go over the ground we have already traveled in previous issues, as we cannot but believe that those who are relying for their supplies on certain European countries are likely to be disappointed. No doubt many of the items ordered abroad will be received in time for the coming season's trade, but what makes the situation so doubtful is not being able to even guess what varieties will be received and what varieties will be omitted. This matter will doubtless be fairly well cleared up by the first of the year, and if none of the countries now neutral become involved in the war, it is more than probable that a considerable percentage of goods ordered from Europe will be received some time during the season.

Bean Crop Estimates.

We have called attention to the very short bean crop of the past season, and during last week many of the leading pea and bean growers have sent out their preliminary estimates and we may say that as a general rule deliveries of peas will average close

ARTHUR T. BODDINGTON

Seedsman

342 West 14th Street, NEW YORK

to 100 per cent. With reference to beans, however, the situation seems to be what we may term somewhat mixed. Most of the estimates we have seen show an average better than 50 per cent.; while two or three will hardly average 25 per cent. A number of leading varieties are classed as crop failures, while the percentages on many others are down to 10 and 20. If those making the high estimates are able to deliver what they now intimate, conditions will be much easier than appeared probable a few weeks ago; but to quote a popular song, "Tis a Long Way to Tipperary," and deliveries may fall considerably below present estimates. It seems strange that the majority of growers should be able to deliver an average of better than 50 per cent.,

while others will hardly equal half of that. Why this should be, we confess our inability to explain, but when deliveries are actually made and the beans are in the hands of the dealers we shall know which of these estimates is nearest to the true situation.

Onion Seed Crop.

It has been reported that the onion seed crop of California was not quite up to average the past season, but doubtless there will be enough seed to meet all demands. As the onion crop this year is large, prices at this date are ruling very low. It is generally understood in the trade that when onions sell at strong prices and are in ready demand the call for onion seed is usually very active. On the contrary, when onions are low in price,

the demand for seed is correspondingly small. Perhaps after all "the wind is tempered to the shorn lamb." As the onion crop is large we assume that the crop of onion sets is also large and that prices will rule low, though as yet we have no definite information on this point.

Effects of the Drought.

The long sustained drought which has prevailed over southern New York, New Jersey and portions of New England has at last been broken and we may now look for an abundance of moisture from this time on possibly a little more than will be appreciated. We learn that truck farmers in the districts named have had a rather bad year of it, and that collections from this source have been very unsatisfactory. This applies especially to renters. Most of this class of farmers have nothing but their crops to rely on, and when these are light they are unable to pay their bills, and the seedsmen who trust them are the sufferers.

An Innovation.

Many of our readers have doubtless seen Stokes' Seed News and have read the rather unique plan which Stokes' Seed Farms Company propose to operate under. While the main features of this plan are not altogether new, many of the details may be classed as quite novel. It will require quite a genius to successfully carry through the plans as outlined in Stokes' Seed News, but we extend our best wishes to the new organization and trust they may be able to realize the fulfillment of their plans.

New Seed House.

A new seed house has opened in Philadelphia under the title of the W. J. Stokes Seed Company. This company must not be confused with the Stokes Seed Farms Co., or the firm of Walter P. Stokes as there is no connection between them whatever. Mr. Stokes is a capable gentleman and is very optimistic and confident of making a success of his new business, and we extend to him our best wishes.

California Seed and Bulb News.

San Francisco wholesalers have had a very busy week with the shipment of Dutch bulbs, deliveries of which have been extremely large. The advance orders have practically all been filled, but additional business is coming out in good volume. There is plenty of stock so far, but it is moving off even faster than was anticipated. The retail trade in both bulbs and seeds is opening up in very good shape, especially in San Francisco and the Bay towns, and the first good rain is expected to bring unusual activity.

Personal.

Another distinguished seedsmen has entered the political arena in the person of W. Atlee Burpee, who has been appointed treasurer for the Union League Club of Philadelphia, to raise funds for the Republican state campaign. It may be putting it a little strongly to say that Mr. Burpee has entered the political arena and if he resents the term we apologize; and will be willing to accept whatever definition he may choose to

give his new position. Very few seedsmen have found time to engage in politics, and not all those who have, have been able to make a pronounced success of it; but as Mr. Burpee is taking no active part in the campaign beyond acting in the capacity above named, and is not a candidate for any office he would not come under the above category.

We have been informed that Frank T. Wood, formerly of Wood, Stubbs & Co., Louisville, Ky., has been engaged to manage the garden seed department of the J. Chas. McCullough Co. He should prove a decided acquisition. We extend our best wishes to Mr. Wood in his new position and believe he will be able to make good.

F. W. Bruggerhof, head of Thorburn's, New York, celebrated his 84th birthday on October 15th. The seed trade everywhere will, we are sure, join heartily in our congratulations and earnest good wishes for many more years of health and usefulness for the grand old man of the American seed trade.

Notes.

Azaleas arriving in St. Louis during the past week are reported as being in bad condition in some instances.

Milwaukee, Wis.—Currie Bros. Company will move from their old quarters on Broadway about January 1st, 1915. They have rented a seed store on East Water street.

A full page announcement, published in the Horticultural Advertiser, London, October 7, by the Agricultural Seed Trade Association of the United Kingdom is as follows:

WARNING.

It having come to the knowledge of this Association that certain Traders in Germany are offering their cleaned Natural Grasses through indirect channels to the British Seed Trade,—

It is necessary to warn Seedsmen against the purchase of such goods, as being contrary to the Law of the Land.

Moreover, most of these Grass Seeds are produced outside Germany, and are in fact imported in their uncleaned state from the countries of origin.

The patriotic course, therefore, is to purchase your Natural Grasses from British Wholesale Houses, who buy in the same Markets and clean up to the same standards as the Germans.

The following pertinent notice is being sent to bulb customers by A. T. Boddington of New York. The warning against inferior surplus stock is timely and cannot be too strongly emphasized by the American trade.

We are often asked what effect the war is having upon the bulb business. In the first place, it has very much delayed the deliveries of French and Holland goods, and it seemed at one time as if no shipments would be received. The usual full line of bulbs is offered, with few exceptions. We now expect to have deliveries upon all varieties. If, however, you are short shipped upon your order, excuse the delay which is entirely beyond our control; the balance of bulbs will be forwarded as soon as received, or if totally unable to supply or procure, we will notify you. Owing to the Holland houses receiving many cancellations from Russia, France and Germany, a great many inferior bulbs are being thrown upon the American market, and we ask our customers to beware of this stock, mostly sent over by irresponsible firms.

PUBLICATION RECEIVED.

Little Bulbs for Little People.—This is a four-page sheet written for A. T. Boddington by Ellen Eddy Shaw. It tells the reader how to plant and care for bulbs successfully. It is a straight and genuine story without frills or thrills and if everybody—man, woman or child—who has a garden, small or large, could have a copy of this timely pamphlet the country would be gorgeous with bloom as a result. It is a "business-getter" because it is sensible, truthful and convincing and no detail or contingency is overlooked.

When writing to advertisers kindly mention HORTICULTURE.

When writing to advertisers kindly mention HORTICULTURE.

Of Interest to Retail Florists

Reed & Keller, the New York florists' supply dealers are displaying in their show windows, drapery of silvered southern smilax which is an attractive and serviceable decorative novelty. This is not dried or brittle but fresh and pliant, the silver coating being applied to the green material by a secret process which closes the pores in the foliage.

About half the space in the market building which is to replace the old Stern store on West Twenty-third street, New York, is said to have already been taken. The remodeled building is expected to be ready next May. The structure will be known as the Cosmopolitan Garden. The building is to be made over from plans by Starrett & Van Vleck into a four-story building with a fifth story inclosed in glass which will be devoted to plants and flowers.

The improvements on the new Ross flower store at 52nd and Walnut streets, Philadelphia, are now completed and the finished result is certainly very pleasing. A daintier or better appointed flower emporium would be hard to find. The store is wide in frontage, but narrow as to depth, and here the lavish use of mirrors has been very effectively introduced, giving one the impression of unlimited depth. The show refrigerator is all glass and faces the street, the prices being easily readable from outside. A new concrete addition building has been erected in the rear, the entire width, and makes a splendid storage and work room.

THE RETAILERS' BUSINESS CALENDAR.

For October.

24, Saturday—You'll have more customers in your store today than any day this week. Display your best stock attractively so as to make people "want them."

25, Sunday—Why don't you try to get your orders out Saturday? Is it absolutely necessary for the retail florist to work today?

26, Monday—This is said to be "blue Monday," but there's no use in believing everything you hear. Smile, laugh, radiate happiness and you will get your customers to do likewise.

27, Tuesday—Get after your collections and inactive purchasers. Tell them how much you love them and their patronage and their money.

28, Wednesday—Dig up some novel scheme of decoration and get the whole town gaping into your windows.

29, Thursday—Make social calls on a few real live competitors and note the things they do a little better than you do them.

30, Friday—What's the matter with planning ahead for holiday business?

31, Saturday—Use every effort to make this the biggest Saturday in the month. Look through your HORTICULTURE and see what others are doing.

NEWS ITEMS FROM EVERYWHERE

BOSTON.

Two florists doing business in this city were summoned to court this week on a charge of selling flowers on Sunday.

Julius Rusitzky of 129 Pleasant street, florist, and Clara Dorothy Levy of 289 County street, Bedford, Mass., are to be married next week.

The lunch counter in the Boston Flower Exchange started business Thursday morning with a rush. It is operated for the benefit of the members of the market only.

James Deal is a new addition to Wax Brothers' forces. Mr. Deal has had experience in Thorley's, Small's and as manager at the Knickerbocker, is a good plantsman and well liked wherever known.

Hyman Kolow, florist, at 167 Summer street, has increased his store space to twice its former size. Mr. Kolow has been carrying on his business for the last fifteen years in what was perhaps the smallest florist shop in the city.

Despite the general business depression which just now prevails in the city flower market, news of a more cheering nature comes through Hyman Heckel, salesman for H. M. Robinson & Co., who has just returned from a four weeks' trip through New England.

Wm. A. McAlpine, of McAlpine & McDonald, contemplates taking a trip to Virginia about Nov. 1st for the purpose of buying greens for Christmas. The firm has installed a new department of supplies and have put up five million dagger ferns for winter storage.

E. Allan Pierce of Waverley, Wm. A. McAlpine of Boston and L. J. Reuter of Westerly, R. I., took an auto trip last week to Exeter, N. H., where the party inspected McAlpine Bros.' range. Mr. Reuter was very favorably impressed with the excellent condition of the establishment.

Penn the florist, made a very effective window display of flower baskets during the first part of the week. Pink and yellow roses carried out a novel scheme of window decoration. The refrigerator in the store featured roses exclusively, the quality being one of the finest we have seen in any retail store in the city.

It is difficult to understand why so few florists appreciate the value and unlimited benefits of advertising. This sloth on the part of the retailer amply demonstrated itself at the first meeting of the Pilgrim Publicity Association, held Wednesday evening. Several hundred business men were present, but only one florist—Henry Penn. I was not surprised to see him there; in fact, I anticipated his presence. Mr. Penn celebrated his 15th wedding anniversary at Lenox, Mass., last week.

SAN FRANCISCO.

State Gardener Wm. Vortriede, in charge of the State Capitol gardens at Sacramento, has a corps of collectors in various parts of the state collecting native flowers to be planted in the grounds. A large collection of mountain flowers will be planted in a spot formerly occupied by a building, and part of the collection will be distributed among other state institutions.

Angelo J. Rossi, of Pelicano, Rossi & Co., was very busy last week in connection with the Columbus Day celebration at the Exposition grounds, having been appointed by the Mayor to take charge of the affair. Pelicano, Rossi & Co. are making quite a feature at present of some very fine potted chrysanthemum plants from the Hillsborough Nursery in San Mateo county.

A complimentary dahlia exhibition was held Saturday evening, Oct. 10, at Redmen's Hall in this city, under the auspices of the Pacific Coast Horticultural Society. Local growers and florists took considerable interest in the affair, and the large and varied collection of flowers brought out quite a good attendance. Prizes were awarded covering eight classifications of dahlias.

Tourists and commuters have lately been attracted by the work of the Southern Pacific Railroad, which has been parking a strip almost the entire length of its Oakland mole, planting a pleasing variety of flowers and shrubbery. The flowers are now beginning to blossom, and will make a fine showing during the Exposition year on a strip of track which has heretofore been bare and bleak.

Under the leadership of Daniel MacRorie, vice-president of the S. A. F., preliminary arrangements are already under way for the reception of the Convention next year. Committees have already been appointed, and will be announced shortly, to take charge of the various features: an entertainment committee, a dance committee, a Ladies' Day reception committee, a press committee, and an outdoor garden committee. Arrangements have been made for a convention hall in the Auditorium, and for the use of the ballroom of the St. Francis Hotel. Mr. MacRorie is at present at San Diego, attending the convention of the California Association of Nurserymen. Mr. Eberle, of the California Nursery Company, is also at the convention.

Jackson, Mich.—More than 2,000 roses were given away by Henry M. Burt on Nov. 10 as mementos of the opening of the new Burt floral shop. The store is nicely appointed in the remodeled store building at 113 Francis street, opposite the Otsego hotel. Mr. Burt was at home to hundreds and hundreds of friends Saturday, and from almost every visitor words of complimentary praise for the new store were heard.

CHICAGO.

Phil. Schupp is recovering from an attack of pneumonia.

W. E. Tricker, formerly with C. H. Totty, arrived last week to take charge of the greenhouses of Vaughan's Seed Store at Western Springs, Ill.

Jack Byers, well known in the market, where he has been with both wholesale and retail florists, is now to have charge of the floral department of the O. T. Johnson Co., Galesburg, Ill.

The Abest Floral Co., which opened a retail flower store a year ago, at 3345 W. North Ave., has sold out to Morgan Jensen, who was connected with the Chicago parks for several years. Mr. Jensen offers also seeds and nursery stock.

Poehlmann Bros. received a shipment of azaleas this week. The plants arrived in excellent condition many of the buds showing color. The eight "Cap" varieties of pot chrysanthemums are just coming into bloom and so far promise well.

Paul Klingsporn of the Chicago Flower Growers' Association, finds *Milady* rose splendid for late summer and winter use. In size, color and shipping qualities it excels any other of its kind. His growers have no fear for a good supply of lily of the valley pips.

At A. Lange's dahlias have been good sellers this year. The colors are very beautiful and the size seems to play no part in the sales, for all have been popular this season, from the little ones to the giant blooms. A favorite for boutonniere use is of a deep golden color and two inches in diameter. The stock is shipped in from adjoining states.

At Winterson's Seed Store, bulb business is reported fair with the retail end decidedly in the lead. The wholesale orders lag in comparison. There has been a good demand for lawn grass seed during the month. The counter display here shows what bulbs will do for house culture, when placed in their mixture of ground coconut fibre, oyster shell and charcoal, moistened. The roots develop in a remarkably short time.

T. Waters who has never been known to be behind time, has Christmas festoons in place in the Poehlmann Bros.' supply department, of which he is manager. Mr. Waters says florists are ordering early and that the wreaths

of prepared materials which they are making up, sell almost as fast as made. They are very attractive and the color combinations unusually tasteful. A Roman striped corsage ribbon is among the new offerings.

The Chicago friends of Phil. Breitmeyer of Detroit are pleased to learn of the big wedding decorations he captured recently. The one in Detroit, was very elaborate and called for quantities of American Beauties. The room in which the ceremony took place had 1,000 American Beauty roses used, forming aisles and banks. The other decoration was in Lansing, Mich. and both were under the personal charge of Mr. Breitmeyer.

At the Schiller stores, George Asmus says a fair amount of trade is coming each day. It might be noted, however, that the strict attention paid to orders in these stores and the very attractive way in which the stores are always kept, have much to do with bringing the business. Mr. Asmus says that their experience with the Mrs. Russell rose has been very satisfactory this summer and he thinks a good summer rose has come to stay. He classes it with the American Beauty.

Among the death notices in the local papers, Tuesday, was that of Alexander Henderson. This is not the head of the well known seed house of A. Henderson Co., as his friends were glad to learn. A. Miller of this firm states that the late summer is holding back bulb sales as flower beds are still in use. With a severe frost, he predicts a rush will come when everyone will want orders filled at once. A second car load of gigantium lilies has just arrived. All kinds of bulbs are of good size and tulips particularly so.

Mr. and Mrs. E. B. Washburn of Pasadena, Calif., are visiting C. L. Washburn of Hinsdale, Ill. Mr. Washburn's health has improved steadily in the milder climate but his father states that he is not yet sufficiently strong to enter commercial life. The rumor to that effect, was caused by the growing of one small house of plants for O. P. Bassett's personal use. Mr. and Mrs. Washburn will make a short visit in Philadelphia and then leave for California where their children are being cared for by their great grandparents, Mr. and Mrs. O. P. Bassett.

WASHINGTON.

George H. Cooke expects to take possession of his new store early next week.

Robert Bowdler & Sons are erecting a modern display window at their store at Fourteenth and Eye streets, N. W.

President Patterson, of the Maryland Agricultural College, has tendered his resignation to take effect July 1, 1915, in order to enable the authorities to put into operation a commission form of government advocated by him for use in all of the United States land-grant colleges. President Patterson believes that this is the proper manner in which to conduct the affairs of such institutions.

For the Taft wedding at St. John's Church last week the church was very prettily decorated with auratum lilies, cibotium ferns, white cosmos and smilax. The bride's bouquet was of orchids and lily of the valley, that of

the senior Mrs. Taft of violets, and the maids carried huge bronze chrysanthemums. The home of the bride's mother where the wedding breakfast was set was decorated with chrysanthemums, Ward and American Beauty roses and cosmos.

Gude Bros. Company furnished a large floral display which was presented to the department store firm of Goldenberg's by their employees on the occasion of the formal opening of their new building. This consisted of a large quantity of white and yellow chrysanthemums with a central standard of American Beauty roses and yellow chrysanthemums. On the two sides of the table were baskets of white chrysanthemums, pink dahlias and Mock roses and at the front and back were large rustic baskets of white chrysanthemums and quantities of oak leaves and branches. Specimen ferns and small palms and quantities of asparagus completed this decoration. In front of the main entrance was a huge bank of ferns and 500 dahlias. During the first three days the dahlias were changed daily. This decoration was supplied by Robert Bowdler & Sons who also furnished palms, ferns and other potted plants which were arranged on stands and on top of the rows of merchandise racks. Here and there about the store were bouquets and baskets of flowers sent by friends of this and other cities through the local florists.

PHILADELPHIA.

George Burton, the newly appointed president of the Philadelphia Florists' Club, has started off with his year's work in good shape. Here is a list of the new committees appointed, according to his prerogative:

Club Room.—Arthur Niessen, John C. Gracey, John Kuhn, A. T. Moore, Chas. E. Meehan, George Craig.

Games.—H. S. Betz, Wm. Graham, F. Adelberger, F. J. Michell, Jr., E. H. Geschick.

Novelties.—Robert Kift, E. A. Harvey, Geo. Campbell, Victor Grosbans, Alfred Burton.

Essay.—Chas. H. Fox, A. Farenwald, A. E. Wohler.

Membership.—H. E. Michell, James W. Heacock, M. C. Wright.

Exhibits.—F. Hahman, John Dodds, J. W. Prince, Duncan Macaw.

It is now up to these gentlemen to show us what they can do in their respective fields to uphold the glorious records of the past and if possible to surpass them.

Pennock Bros.' great window on Chestnut street, made famous by the artistic displays of the floral art at all times and seasons, from far and near, was especially dis-

BE SURE that you get the MEYER GREEN SILKALINE, and do not take any other that is sold as an imitation of the MEYER GREEN SILKALINE, as they do not have the full weight, measure and strength of the genuine article. All our GREEN SILKALINE is guaranteed up to the high standard and mark. The sizes are F, fine; FF, medium; FFF, coarse. It is for sale by all the best jobbers. If you cannot get it of your jobbers, order direct of the manufacturer.

THE JOHN C. MEYER THREAD CO., LOWELL, MASS.
In writing advertisers kindly mention HORTICULTURE.

tinctive this week by having a beautiful exhibit of the new "Fordhook Hybrid" gladioli. These are remarkable not only for their great size and lovely colors but also the fact that they were raised from seeds sown last May. They are creating quite a sensation. More about them later.

E. J. Fancourt, of the S. S. Pennock-Meehan Co., has just returned from a trip north and west as far as Kansas City. He reports larger business than last year notwithstanding a generally pessimistic tone in the trade. This means one of two things: Either Mr. Fancourt is a wonder or trade is not so bad as so many say it is. Take your choice. Maybe the real truth lies in between the two propositions.

NEWS NOTES.

Topeka, Kan.—Kline & Lamont have leased J. M. Kessler's greenhouses.

Philadelphia, Pa.—August Albert has rented the greenhouses of Chas. Disel, 59th and Gibson avenue.

New York, N. Y.—George Cotsonas has leased the two-story building at 118 W. 28th street and will remodel it for his wholesale florist business.

Milwaukee, Wis.—James Curran, Mt. Clemens, Mich., has leased the greenhouse range of Currie Bros. Co. and will grow pot plants for the wholesale trade.

Milburn, N. J.—George W. Brand of East Orange has purchased the greenhouses of Jacob Fischel on Taylor street and will conduct a wholesale and retail florist business.

Rahway, N. J.—Wm. Saling was surprised last Friday by the appearance of a big buck deer in the vicinity of his greenhouses. The rare visitor disappeared in the neighboring woods.

Flower Market Reports

The story of flower market conditions in BOSTON this week may be told in a very few words. There is no flower obtainable at this season of the year in the wholesale marts, that is not stagnated in superfluous accumulation for which a market is simply out of the question. What sales are made are from the high-grade stock and at the prices of the refuse, the latter being absolutely unsalable. The quality generally, in all sorts of flowers is very fine. Even dahlias, which were supposed to be finished up for this year, are coming in under the rejuvenating rains and merry sunlight, in quality better than heretofore and they have the unusual experience of facing the chrysanthemum hosts, already in the trenches and with loaded guns. Carnations are side-tracked as effectively as anything else and, although of excellent quality, they are not wanted. So much for glorious weather and other glorious things too numerous to mention.

Trade conditions have BUFFALO changed but little. Too much of the outdoor material, dahlias, gladioli, asters, mignonne marigolds, cosmos and other truck filling a good portion of the wholesalers' counter space. With chrysanthemums coming on heavier each day and the increase in supply of carnations, roses, lilies, lily of the valley, violets and other stock the market is badly weighted, although the dealers are making excellent show and window decorations and encouraging the buyers to their utmost. Bargain sales on Saturday did not help much as the threatening weather had a tendency to hold off the buyer of cemetery flowers.

The market still remains inactive. Week after week has found practically the same condition and now on the 20th of October, flower beds are as bright as ever and not a vine has been touched by frost. Social events are becoming more important and the opening of clubs and a few weddings have called for more or less flowers but the volume of fall business has not begun. The principal change in the market is the finishing up of the big crop of roses that has been coming in for many weeks. About Thursday the 15th it began to be noticeable and by Saturday the change was apparent to all. It has made no material difference as yet, for the demand is so light. Chrysanthemums are coming in large numbers, a great many of them being below grade. The great number of chrysanthemums, according to one of the largest growers, is making no difference this year in the sale of American beauties. Lily of the valley is no longer scarce and special prices are often made to move it. Violets are very slow sale. Orchids sell spasmodically and either sell at a fair price or go unsold. All kinds of green can be had in quantity and no great amount can be sold. Shipping trade is fair.

In our many years' familiarity with the NEW YORK New York wholesale flower district we have never known such a redundancy of fine flowers as is in evidence on all sides this week. Ice boxes, tables and floors are heaped high with roses, lilies, carnations, dahlias, violets and chrysanthemums of high degree, the larger part of which it is impossible to dispose of at any quotable figure. \$5.00 a thousand is gladly accepted for roses in quantity and even at that, the buyers are very capricious about quality. One wholesaler estimated the stock of speciosum rubrum lilies on his hands one day this week, at 25,000. Other stock is in proportion, so some idea is readily conveyed of the enormous quantity of material on hand just as the chrysanthemums are beginning to assert themselves, and what it means for the next few weeks especially if the lovely weather should continue. The country is too beautiful and auto riding too much of a pleasure for people to have any interest in store flowers. People of means are buying nothing and if it were not for the speculative element, distributing flowers at cheap prices through popular channels, the situation would be hopeless.

Trade reports are PHILADELPHIA not so optimistic this time; rather "on the blink." The weather has been so fine—all kinds of outdoor stock in immense supply. This has had a marked effect on the demand for choicer and more expensive materials. What the growers are praying for now is a hard black frost, which would finish the dahlias and other disturbing factors. Then the roses and chrysanthemums and other fine things would have a show. The commission man has had to do an awful lot of work for nothing. As a rule he did a dollar's worth in labor and overhead expenses for every ten cents he got back. And yet the growers find fault; and the retailers grumble and the "seceders" fuss. The latter's latest idea is to standardize prices—never offer your customer a bargain; have a standard price; don't cheapen your goods. We have not heard any of these men remark that they would refuse to accept a bargain themselves if offered to them. Of course, that's very different.

Flower Market Reports

(Continued from page 527)

Stock is plentiful in all **ST. LOUIS** grades except the extra fancy. The rainy weather during the past week has caused the retailers to buy sparingly and stock is piled up in the wholesale markets. Chrysanthemums are coming in heavy and the demand is not any too good for high priced stock. Roses, carnations and other seasonable stock are suffering in consequence. There is still a plenty of outdoor material. The best violets and lily of the valley sell well. Lillies are plentiful and prices are low.

The retail flower **SAN FRANCISCO** business is showing a little improvement each week. There are indications that the close of the month will bring much greater all-round activity and a few good orders have already been placed for social affairs. The wholesale shipping business is picking up fairly well. Chrysanthemums still overshadow everything else, being very plentiful and in large variety, fully up to expectations as to quality, and finding a very large demand. Aside from the local trade, large shipments are being made to all parts of the state, and a good many east of the mountains. Bonnaillon remains among the leading varieties, Hunter, Maud Jeffries and Portola also being abundant. There has been just enough rain to put the violet gardens south of San Francisco in fine shape, and the flowers are plentiful and of very good quality. A good many are being shipped to points throughout the middle west, where the demand seems to be picking up. There are roses enough for local needs, but no oversupply, and few are being shipped. The quality, on the whole, is just fair, with nothing new for the week as to variety. Carnations are becoming more plentiful, and include some very nice offerings. Orchids are coming in freely and in good variety. As for lilies, some giganteum are appearing, but there is no great amount of new stock coming in. Offerings of lily of the valley are decreasing, and this flower has stiffened up considerably as to price, as the trade is holding them back for the holidays.

A marked change **WASHINGTON** in the temperature served to shorten up on an overstocked market and to bring sales more nearly to normal. It has not been expected that this year the dahlia crop would be so heavy, as earlier in the season there were more blind eyes than flowers and the stems were so brittle as to make the stock almost worthless. This changed in due time and the supply became heavier than ever. Roses could be had at almost the buyer's own price but in this respect conditions have

Smilax.....	8.00 to 10.00	8.00 to 10.00
Asparagus Plumosus, strings (per 100).....	25.00 to 35.00	25.00 to 35.00
& Spreng (100 bunches).....	15.00 to 25.00	15.00 to 25.00

changed and there is a little better demand. Carnations are daily improving in quality and a good crop is in promise. Orchids have stiffened slightly in price and there is a limited demand and similar supply of violets. Palms and ferns are meeting with ready sales in most of the stores and a good business in these has been reported.

TRADE MARK REG. U. S. PAT. OFF.

It pays to get in fall spraying whenever possible. There is danger in waiting for spring spraying. "Scalecide" is better than any other dormant spray, either for insects or fungi.

Costs no more than lime-sulphur or the less effective mixtures. Our booklet "Scalecide, The Tree Saver" mailed free. B. G. Pratt Co., Dept. "12", 50 Church St., N. Y. City.

THE USE OF COMMERCIAL FERTILIZERS IN GROWING CARNATIONS AND ROSES.

By the University of Illinois.

The University of Illinois has recently published the report of experimental investigations on the use of commercial fertilizers in growing carnations and roses. This material has brought together by the Floricultural Division of the Department of Horticulture, and embraces the research work in Floriculture which has been in progress at the experimental station during the past six years. Since the reports are voluminous, they will probably not be ready for distribution before the first of next October. In the meantime, the Department of Horticulture is giving to the press, for the immediate information of the growers, some of the conclusions which have been reached as a result of this experimental work.

It has been shown that without doubt that excellent carnations can be produced in as large quantity by the use of commercial fertilizers as with farmyard manure. The quality of the flowers, as measured by their size, length of stem, strength of stem, and keeping quality, is not changed by the use of commercial fertilizers. The splitting of carnations cannot be directly traced to the application of commercial fertilizers in moderate amounts. The results show that commercial fertilizers may be successfully used for the production of carnations; whether it is desirable to use them, depends in large part on the cost of manure and of labor. A careful florist will calculate the relative cost of manure and commercial fertilizer by figuring the plant food content of manure (averaging 10 pounds nitrogen, two to three pounds phosphorus, and eight pounds potassium per ton) at the market price of these elements in commercial fertilizers. These are (1) for nitrogen purchased in dried blood (13 per cent. nitrogen) or ammonium sulphate (20 per cent. nitrogen), about 18 cents per pound; (2) for phosphorus in acid phosphate (6¼ per cent. phosphorus), 12 cents per pound; and (3) for potassium in sulphate of potash (40 per cent. potassium), about 6 cents per pound. At this rate, a ton of manure supplies plant food costing as commercial fertilizer about \$2.50. In the case of prepared manures, which contain less water than barnyard manure, the value in terms of commercial fertilizers can be calculated from the guaranteed analysis which should be required of the dealer. The method outlined for the use of commercial fertilizers involves a preliminary preparation of the soil followed by three applications of fertilizer throughout the year. Comparison of the labor involved in these operations with that in the weekly application of liquid manure will show a saving of labor where commercial fertilizers are used.

No attempt has been made to grow carnations without the addition of manure to the soil, because it was believed that some additional humus would be necessary. Whether or not this is true has not been proved; but the amounts recommended below are based upon a small addition of well rotted manure.

From the past experiments it seems certain that dried blood or sulphate of ammonia (supplying nitrogen to the plant) is the commercial fertilizer most needed by the carnation. Some indications, which are being tested during this year, have been found that acid phosphate, applied with one of the above, results in still further increased production. No benefit has been obtained up to the present time from the use of sulphate of potash. Before these conclusions were reached, the mixture of manure, dried blood, acid phosphate, and sulphate of potash given below was tried and found to produce excellent flowers in as large quantity as by culture with natural manure. The amounts are as follows:

Fertilizer	Quantity per cu. yd. soil	Quantity per 100 sq. ft. bench (5 in. deep)
Manure	50 lbs.	125 lbs.
Dried blood (13 per cent. nitrogen)	5 "	8 "
Acid phosphate (7 per cent. phosphorus)	1½ "	2 "
Sulphate of potash (40 per cent. potassium)	1¼ "	2 "

All of the above were mixed with the soil before setting in the plants, with the exception of the dried blood, which was applied in four installments,—two pounds with the others, and two pounds at each of three different periods throughout the year.

No exceptional crops of carnations have been produced by the use of commercial fertilizers. Good crops have been produced, however, by the use of moderate amounts of them. The use of excessive amounts will result in marked lessening of production and injury to the flowers, so that warning must be given not to attempt to produce larger crops by the use of more fertilizer than the trials have shown to be safe. Those commercial fertilizers from which there is greatest danger, when used excessively, are in the order named: (1) sulphate of ammonia, (2) sulphate of potash, and (3) dried blood. Up to the present time no injury has resulted from heavy applications of acid phosphate.

During the experiments an attempt was made to regulate the time of heavy crop production by variation in the time of application of the fertilizers. No change in the time followed, showing that the time of application of the fertilizers does not influence the time of heavy crop production.

A complete report on the rose experiments, which have been in progress

each year was Killarney, the other half, Bride. Of these, one-half the since 1910, is now nearly complete, and may be summarized at this time.

During seven months (November to May inclusive) of 1910-11, and eight months (October to May inclusive) of 1911-12 and 1912-13, 3,840 first year rose plants were grown with varying quantities of commercial fertilizers and record kept on the number of flowers produced and the length of stem of each flower. The amount per 100 square feet of bench space of dried blood was varied in different sections from none to 32 pounds, of acid phosphate from none to eight pounds, and of potassium sulphate from none to eight pounds. In addition, well rotted manure was added to each section at the rate of 115 pounds per 100 square feet of bench space, regardless of the amount of commercial fertilizer applied. One-half the number of roses

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Two volumes have now been issued and the others will follow in succession. Order from

Directions on every package

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

CAMBRIDGE, MASS.
LONG ISLAND CITY, N. Y.

number was own-root stock and one-half grafted. During the three seasons mentioned above, 95,013 roses were produced, an average of about 25 flowers per plant per season, which is to be considered a satisfactory yield for first year plants, a large number of which were injured in the course of the experiment by overfeeding in the attempt to determine the maximum amount of fertilizer that might safely be used. Of these 95,013 flowers, 46,135 were Killarneys and 49,878 Brides, showing a larger production of Brides under the conditions of the experiment. Of the flowers produced by Killarney, 21,297 were produced from own-root stock and 23,838 from grafted, showing a larger production from grafted stock. Of the Brides, similarly, 23,019 were produced from own-root stock and 26,859 from grafted stock. Results indicate, then, that in the order of production the plants rank as follows: grafted Bride, grafted Killarney, own-root Bride, own-root Killarney.

The average length of stem of the own-root Killarneys was 10.6 inches; of grafted Killarneys, 10.5 inches; of own-root Brides, 14.6 inches; and of grafted Brides, 14.9 inches. The quality of the flowers, measured in this manner, is about the same in the Killarneys, whether own-root or grafted, and is somewhat superior in grafted Brides to own-root Brides. The question whether it pays to grow grafted stock may be answered by the figures given above, and the average price for flowers of such quality. With grafted Killarney, for instance, the excess production over own-root stock of 960 plants was 2,541 flowers. The average wholesale price of Killarneys of this quality would range around \$6 per 100; the excess production of these 960 plants would sell for \$152.46 at this price,—twice the difference in cost between own-root and grafted Killarney per thousand. This, of course, is for the first year after planting, alone.

Those sections to which manure alone was applied are compared in the figures given below for the average number of flowers produced per 16 plants with those sections to which eight pounds of dried blood, two pounds of acid phosphate and two pounds of potassium sulphate per 100 square feet, and with sections to which 32 pounds of dried blood with amounts

of acid phosphate and potassium sulphate as named in the sections previous had been applied.

Fertilizer	Killarney own-root	Killarney grafted	Bride own-root	Bride grafted
No commercial fertilizer.....	327.4	389	325	388.5
8 lbs. dried blood	349.7	410.4	391.0	428.8
2 lbs. acid phosphate.....				
2 lbs. potassium sulphate.....				
32 lbs. dried blood.....	391.0	383.6	339.3	405.6
2 lbs. acid phosphate.....				
2 lbs. potassium sulphate.....				

These figures show that 32 pounds of dried blood per 100 square feet is excessive for all the roses excepting Killarney own-root. These plants have a smaller root system than Killarney grafted, and probably this is the reason they produce more flowers with heavy applications of dried blood in contrast to the grafted stock. On the whole, it is inadvisable to apply more than eight pounds of dried blood per 100 square feet. On the other hand, applications of acid phosphate up to eight pounds per 100 square feet (the largest amount used in the experiment) gave increasingly larger numbers of flowers as the application was increased, showing that the roses responded to applications of this fertilizer. No benefit was observed from applications of potassium sulphate, as was the case with carnations also. These results lead to the recommendation of commercial fertilizers in the following amounts for first year roses:

Fertilizer	per 100 sq. ft.
Dried blood	8 lbs.
Acid phosphate	8 "

Experiments are being carried on with still heavier applications of acid phosphate; when they are completed, the advisability of heavy applications of this fertilizer will be determined.

Experiments have been made during the year 1913-14 in regard to the use of sulphate of ammonia in place of dried blood on roses. It is found to be a satisfactory source of plant food, but much more difficult to use successfully, since roses are particularly susceptible to overfeeding with it. No experiments have yet been made with nitrate of soda. Acid phosphate was used during the experiments as a source of phosphorus. It is quite probable that finely ground steamed bone meal could have been used in equal amounts with as good results, although its value was not tested. The dried blood should not be applied in full amount at the time of preparation of the soil, but one-fourth should be mixed with the soil and manure at this time, followed by three further applications as top dressings during the season, at times when the roses are

coming into heavy crop. On no account should application be made during the off season, or the period of little growth, during the dark days of winter. Care should be taken not to scratch the dried blood into the soil deeper than one-half inch, as deeper cultivation will cause the breaking of many small roots, and dropping of the older leaves, as a result of the disturbance of the root system.

The results given in this summary were obtained by applying fertilizer to the type of soil known as the brown silt loam, common throughout the "corn belt." On account of the moderate amount of dried blood recommended, and the small tendency of acid phosphate to produce injury from overfeeding, these amounts are undoubtedly safe for use on any Illinois soil. The fertilizers recommended will supply the elements lacking in most soils also, with the exception of those peaty and sandy soils of northern Illinois which have been shown to be deficient in potassium.

SIGGERS & SIGGERS

PATENT LAWYERS

Box 9, National Union Building
Washington, D. C.

These are the two last houses, each 55 feet 6 inches by 300 feet.

The Famed Briarcliff Range of Paul M. Pierson

IN addition to greenhouse business interests in connection with his brother, F. R. Pierson, at Scarborough; for a number of years Mr. Pierson was also interested in the Law houses at Briarcliff, N. Y. A few years ago, as you know, Mr. Pierson bought out the entire Law interests, and added new houses. It was along in March, 1901, that we built the first houses at Briarcliff—they were 28x300. In 1909 Mr. Pierson ordered two more, each 55 feet 6 inches wide and 300 feet long. The sides are of tile—

cement covered. The benches in both these houses run across the houses—an idea of Mr. Pierson's, which he feels has distinct advantages.

Five years ago, when making practically the first repairs on one of the L. & B. houses owned by the two brothers at Scarborough, it was found that the wrought iron posts which had been originally used when the house was erected a quarter of a century before, were practically as good as the day they were set.

Based on this conclusive bit of endurance, we promptly abandoned cast iron foot pieces for all our posts, and substituted **guaranteed wrought iron**, which runs in **one piece** from the eave to the bottom of the foot piece footing.

If houses we built 25 years ago (it's 30 now) are in such good condition that we are glad to take our customers around to see them, it's hard to tell how long these last big houses of Mr. Pierson's will last. As

good as we built them years ago, we certainly are building them much better now. Better in every way.

Bankers—even the conservative, hard-headed bankers—recognize that the kind of houses we build are as much an asset as any other factory building and are willingly advancing money on them as never before.

And now, how about you—are you about ready to talk business? Say when and where, and we will be there.

Interior view of one of the Pierson wide houses at Scarborough, N. Y. It shows how light in appearance the framing is—how entirely free from overhead complications of trussings and bracings.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil."—/ p.

Asparagus plumosus nanus

Good strings of this asparagus can only be raised by constant and careful attention to their culture. A steady temperature of about 60 degrees and ventilation without cold draughts are important in growing fine *Asparagus plumosus*. Extremes either way in watering should be guarded against. Before asparagus shows any signs of exhaustion through the want of nourishment, they should have a top dressing of loam and well-rotted cow manure in equal parts. Liquid feeding can also be given once a week as these plants are rank feeders.

Begonia incarnata

Begonia incarnata is a useful winter flowering variety. It cannot be grown into a really salable plant, however, in one season and for this reason is unlikely ever to be a serious rival of *Gloire de Lorraine* or *Glory of Cincinnati*. By propagating now you would be able to work up a good stock for a year from this winter. It is not in good flower for Christmas, but in January and February it far outclasses *Lorraine*. Well grown plants would easily command a fancy price, for, as a house plant, it is way ahead of *Lorraine*. Plants carried over from last year, if they were cut back and kept on the dry side for a few weeks, will now be producing plenty of nice, succulent cuttings. Place in bench such as you would root roses in. Rooted cuttings should be potted off before they become hard. It is a great mistake to leave cuttings of any kind too long in the sand, as they soon become hard and stunted. Use a light compost: one which contains plenty of flaky leaf-mold is what they revel on. Give them a bench well up to the light in a house where they can have a temperature of 60 degrees at night.

Carnations

We must harden up the growth a little for the time when there will not be so much root action, so apply water with judgment. If you are in doubt as to whether the plants need it, better put off the watering until the next day at this time of the year. If the stems of some of the varieties are a little weak, give them a light dressing of wood ashes. In fact it will be quite beneficial to all of them, about this time. It serves to tone up the plant system and sweetens the soil. If the soil is not too full of roots stir it about a half inch deep with your hands, then sprinkle over it about a 3-inch pot of ashes to each row half way across a 5-foot bed and water thoroughly. Syringe only on bright days and early in the day to the end that the foliage may dry out before night. Of course you are keeping the plants disbudded right along now, so that by this time you should be picking some very nice blooms. Give strict attention to ventilation as this will play a big part in putting the plants in a good condition before the winter sets in.

Gladioli for Forcing

Every florist who has a local trade should force a good batch of gladioli; they will come in many ways handy. There are many beautiful varieties in the smaller-flowered or *Colvillei* section and for later forcing we have in addition to these the large-flowered sorts such as *America*, *Augusta*, *May*, *Silver Trophy*, *Shakespeare* and others. The *Colvillei* corms can be planted in flats or beds, while the large flowered kinds will need a bench or bed in order to do well. They will flower in from fourteen to sixteen weeks after planting. When planting in benches allow about 5 inches between the rows and 3 or 4 inches in the rows. The corms should be placed about three inches deep. Give them a temperature of from 50 to 55 degrees at night. When they have made fairly good roots and top growth they will be greatly benefited by weekly doses of liquid manure. Keep them nice and moist at the roots, as they like it.

Marguerites

If you are going to prepare for Easter at all, a good stock of marguerites should be gotten into shape, for that is the great day for the sale of them. Whether you have the old-fashioned Paris daisy or the latest,—by many of us considered the best of all,—Mrs. F. Sander—when well in flower they all sell, and that grand yellow sort, *Etoile d'Or*, also makes a splendid pot plant. If you have a lot of 2½-inch stock on hand let them come along on a sunny bench. If at all shapely they should be allowed to grow along from now on, and if kept in a carnation house temperature they should progress in good shape. A batch can be started by propagation now if not already started. All marguerites, whether white or yellow, single or double, flower well in spring and early summer, and a good many of them can be sold for bedding out and the filling of window boxes and vases. All will make good sized plants by the end of May. Bring your plants along so they will not have to stand the high pressure of extreme forcing. Be very careful as to watering, giving all the plants a required amount so as to keep them in unimpaired health.

Sowing *Centaurea gymnocarpa*

For filling vases, baskets and veranda boxes next spring *Centaurea gymnocarpa* will be of great use. To insure having a plant in 3½ inch pot with ten or twelve perfect leaves the seed should be sown within the next three or four weeks. When they are up you can grow them along in a cool house. Give them a good rich compost at each shift.

Mr. Farrell's next notes will be on the following: Forcing of *Ixias*; *Fuchsias*; *Lilium multiflorum* and *giganteum*; *Orchids*; Young *Cyclamen*; Storing *Cannas* and *Dahlias*.

themum holds the chief position in these enterprises that cannot well be avoided.

Put in
your ear

As November draws near, although the dahlias and salvias still adorn many gardens, we must begin to realize that winter will soon be upon us and the hustle and tussle of the busy season must be prepared for. If it looks unpromising ahead there is all the more reason for hustling so that a successful business may be extorted from unwilling fate. Give no heed to the pessimist. None of us are prophets or sons of prophets and the buoyant optimist knows as much about what is in prospect as does the apostle of ill-omen and grouch. There are just as many valid reasons for expecting good business this season as there are for fearing the opposite. And the best way to assure a good business is to get at it early and earnestly with an irresistible determination, and by this good example inspire those about us to do the same.

Improve
the occasion

Attention has been called to the fact that, because of the interruption of the usual demand from the warring countries of Europe, certain high-grade Holland bulbs that have heretofore been reserved by the Dutch growers for exacting buyers in Russia and elsewhere have for the first time reached the American market in commercial quantity. Evidence of the truth of this is not hard to find if one will take the trouble to visit any one of the leading seed stores dealing in these stocks. Never before have hyacinths, tulips and narcissus bulbs of such fine quality been offered to the American planter and it may be a long time before an equal opportunity presents itself for securing sensational stock to force for the spring exhibitions. The season in Holland is said to have been unusually favorable to the growth and perfecting of the bulbs which adds still further to the rarity of the situation. We hope our readers will take advantage of this opportune opening to do something out of the ordinary for the spring flower shows. Depend upon it no common stuff will stand any chance of winning honors this time.

A deep-
rooted evil

The Boston flower market growers and dealers, at their annual banquet last Saturday night listened to some pretty practical talk on the time-worn but ever timely subject of credits. It is an incontrovertible fact that the long-credit custom which has become so prevalent in the flower trade is its one worst feature. Irresponsible concerns find no trouble in getting goods on credit in every city in the country and the flower producer or jobber is called upon over and over again to face loss after loss as a result of this wide-spread evil, for which he individually is jointly responsible. And the injury falls not alone upon the grower who cannot collect for his goods but upon the trustworthy dependable tradesman whose business is cut into and injured by the unfair and demoralizing competition which has been so stupidly and reprehensibly encouraged and built up by those who must in the end be the greatest sufferers from its effects, both directly and indirectly. As to how to apply the remedy, opinions differ. One thing is sure, which is that so long as concerted action is withheld, there can be little hope for any improvement. Any movement towards amelioration must be generally agreed to and stolidly adhered to in order to be successful.

The fall
shows

Now for the fall shows. They are already under way in several places; next week will see them multiply and the following week will be high tide. It is to be regretted that the dates for so many of the more important exhibitions should come simultaneously but so long as the chrysan-

Herbaceous Clematis

The cultivation and artistic employment of hardy perennials in gardening is not only a most enjoyable pastime but a wonderful educator. A growing intimacy with the different characteristics of the material brings the desire to study plant life scientifically; it develops the subtlety of our vision in regard to beauty in form and outline as well as to colors and there is no use denying that by sometimes taxing our patience it is apt to strengthen this virtue. In the frequent absence of the latter I see one of the principal reasons why the American garden lacks so many plant treasures of which the European is justly proud. It takes time, and in our modern age there seems to be no time to wait for gradual development. A thing we cannot have at once, in by far the most instances, does not appeal to us at all. I wish to call the special attention of those of my readers inclined to be impatient to the cover-page illustration of an, at least, five-year-old specimen of *Clematis recta*. For further explanation I wish to add that the photograph was taken in Compton Garden in Chestnut Hill near Philadelphia. Compton Garden represents one of the rare exceptions where work has been carried on systematically for many years and the results, to say the least, prove the value of patience beyond a shadow of doubt. It is today Philadelphia's foremost private plant treasury excelling in its large collections of trees and shrubs embracing the bulk of Mr. Wilson's new Chinese introductions, grouped sufficiently apart to perfect development of the natural habit of growth of each specimen and all its other characteristics are easily discern-

ible. Compton Garden should be a Mecca for all Philadelphia's horticulturists who are anxious to learn.

Returning to our subject—the herbaceous clematis—the limited number of garden species rank among our best plants for the large perennial flower garden. Employed as single specimens on the open lawn, or as fore-runners of flowering shrub plantations their ornamental value evokes admiration. *Clematis recta* decidedly merits more consideration and space than it has so far received. Its masses of large white panicles can easily be made a conspicuous ornamental feature in our floral midsummer displays. *Clematis Davidiana* distinguished by beautiful bright green foliage and very handsome long bell-shaped lavender blue flowers, deliciously fragrant, deserves the attention of all garden and flower-lovers. The same may be said of *Clematis heracleaefolia*, a species closely related to the former, but bearing flowers of a lighter hue. *Clematis recta* flore pleno is said to be an improvement on the original form. The Siberian type of *Clematis recta*, offered by European firms under the name of *Clematis Pallasii*, produces more branching, lighter built panicles of graceful appearance.

Herbaceous clematis can be easily raised from seed sown in early spring, or, after ripening in September; or propagated by divisions. All prefer the open sunny exposure and thrive best in light rather high ground.

Richard Rothe

Glenside, Pa.

BOSTON CONVENTION GARDEN NOTES.

The Nymphaeas.

In the several bays planted with aquatic and semi-aquatic plants these flowers have made quite a hit with the visiting public. They sauntered around those bays in animated groups, and sat on the seats so thoughtfully provided by the park management at advantageous places expressing the enjoyment they received from beholding those strange, to most of them, water nymphs. The varied hues of the tropical kinds, commingled with the hardy species added a dash of color and novelty to the scene that made the picture a particularly pleasing one to those who are not so familiar with the charming effect of the tropical varieties. Indeed the professional fraternity are not any too familiar with the striking beauty of the tropical nymphaeas, largely, doubtless, on account of the extra care and preparations with its accompanied fuss of starting them in hothouses, etc. Nevertheless, they are so impressive that any extra fuss bestowed on them is amply repaid by their large and stately flowers. One or more according to the size of the small artificial pond, should always be employed to lend an added character to the collection.

The Convention Garden in this exhibit, as in others, has had its usefulness manifested, inasmuch as it has revealed two at least splendid acquisitions to the galaxy of hardy nymphaeas. In Mr. Tricker's exhibit, two excellent comparatively new hardy varieties were shown, Paul Hariot and Escarboucle; the term superb can appropriately be applied to the latter

named kind. It is the freest flowering variety that ever came under my notice, as it behaved here, being in continuous flowering since it was planted in early summer up to its removal in late October, and such large strikingly beautiful cup-shaped carmine colored flowers as I am persuaded to think has not an equal in the hardy Nymphaea family. It has, further, the essential characteristics that must be inherent to any kind of plants claiming special merits, and that is a strong growth habit. Nymphaea Paul Hariot seems to possess a superabundance of the latter characteristics, the masses of large foliage in every case testifying to the same. It is a very fine variety, of great substance, large cup-shaped flowers, creamy-white in color with a slight shading of pink at times. Natural robustness inherent in any one kind of plants when superfluity of foliage or wood is produced at the expense of floriferousness, would suggest to the practical cultivator the adoption of a less liberal dietary treatment, which, if not in all cases, in most, will correct largely the uneven balance between the excess of leaf or wood and that of floriferousness.

The water garden has a fascinating charm comparable to any branch of horticulture on a large scale. With an appropriate location and surroundings, it might indeed become an incomparable branch of horticulture, as a particular choice spot to delight and please the owner or the beholder, according to the excellency of the subjects used and the deftness of their respective artistic placing. Much pleasure can be derived from a limited area of water, planted judiciously, and it should be made a feature whenever

possible on all well regulated estates. To succeed well in this branch of floriculture, it is needless to say that "happy-go-lucky," "on-the-spur-of-the-moment" methods will not work towards that end. Forethought and preparation in securing the proper soil and other necessary material beforehand is as essential as in other cultural branches. KENNETH FINLAYSON.

PERSONAL.

Harry A. Barnard, representative of Stuart Low & Co., London, will sail for home on the Lusitania on November 4.

Matthew Macnair, Providence, R. I., is back from Europe. Several hundred palms which he purchased in Belgium and England have arrived in fine condition.

Alex Geranios, head of the Metropolitan Flower Co., St. Louis, was married the past week to Miss Anna Wittmann who has been in his employ. The happy couple were presented with a silver percolator and a cut glass set by the members of the Retail Association of which Mr. Geranios is secretary.

Economy is one of the principles of modern distribution which must be recognized no matter whom it hits.

Do you share in preventing this old world from becoming a howling wilderness by not howling.

Cold cash isn't so cold as it sounds; it has been known to warm some pretty chilly men, and women, too.

Many a man puts his foot in it when he attempts to stand on his dignity.

National Hardware B. Co.

WHY NOT GROW SEEDLING STOCK ON THE PACIFIC COAST

A paper read by E. Benard before the California Association of Nurserymen at San Diego, October 16, 1914.

I had the privilege to be born at Orleans, France. Angers and Orleans are the centers of production of the largest quantities of seedling stock that is distributed throughout the whole world.

First of all, is the selection of the land well adapted and suited for the propagation of such stock. The following are the conditions where the many nurseries of Orleans are located: a fine deep, well drained sandy loam or light clay soil, friable, retaining the moisture and free from alkali. They are situated along the former stream bottoms of the Loire River, which has a moist atmosphere most of the year, and the thermometer does not raise above 90 degrees in the summer months, nor fall below 20 degrees Farh't during the winter. Such a spot could be easily selected in California or in some parts of Oregon.

Many of the tree seeds and ornamental shrubs, native of the United States, and principally from California, are gathered and forwarded every year to Europe to be propagated according to the species, and later distributed as staple nursery stock, from there to all the world.

Second, The Seeds: As to pears and apples—they are a by-product of the cider press. They are selected from districts where the pears are hardy and exclusively free from blight. Many of these trees have been producing seeds of high germinating quality for a half a century or more. The apple seeds being also a by-product of the cider press, are taken from very old trees, which have been free from woolly aphids and curculio. The plum, "*Prunus sativa*" and Mazzard cherry seeds are gathered from trees generally growing along the draining ditches. After becoming separated from the pulp, the seeds are dried and sold fresh, to the nurserymen. The Mahaleb and Myrobalan seeds are harvested from the woods and sold fresh to the grower. As soon as these seeds are received they are mixed with coarse moist sand, put into protected cellars, free from frost, to remain there to stratify; about in the same manner as we do with the peach, apricot, almond, walnut and others in this country.

I will try to explain to you how the pear stock of superior quality, called French pear, are treated. After the late frosts are over, the seeds are sown in specially prepared beds, made of very friable soil mixed with sand. When sprouted and as soon as the first

leaves appear, they are transplanted as cotyledons, about 2 inches apart, in rows 6 to 8 inches apart. This operation insures three or four small rootlets a few inches under the collar. This transplanting is performed by men who are paid by piece price, many handling six to eight thousand, good stand, per day. These seedlings are kept clean from weeds during the whole season and watered quite freely during their growing stage. Many other seedling stocks are treated in the same manner. By this method, stock of superior quality are produced.

After the seeds of the plum, cherry, Maraleb and Myrobalan have been sufficiently stratified or sprouted, they are planted in small trenches, 2 or 3 inches deep (mostly done by hand), about 10 inches to 1 foot apart, covered over and mulched. They are to be kept well cultivated by hoe or, better still, by some Planet Jr. hand cultivator. Other seeds are treated according to their habits.

As to Manetti stock, which are propagated in large quantities every year, are made into cuttings of uniform caliber, about 6 inches long. All the eyes are cut out except the two or three to be left above the ground; this is done to avoid suckering. They are put into small bundles, heeled in coarse sand, and left there until they are calloused. After being calloused they are planted in about the same manner as that of the pear stock. The Angers quince stock, Paradise and Doucin Apple are propagated from mother roots, which have been previously planted 4 feet apart each way, in nursery rows. When old enough, say 3 or 4 years, they can produce young shoots of new wood of caliber size. They are induced to make new rootlets at the base by the manipulation of the soil during the fall, as we do with potatoes in this country. What has been said about the fruit tree seedlings could be applied to all the coniferous and ornamental nursery stock needed by the trade in this country, which at present are imported exclusively from Europe.

The workmen of these nurseries are generally divided into crews, which work in their respective departments, such as seedling conifers, forest trees, cuttings, grafting, transplanting, ornamental, roses, etc. Each man generally remains in the same department several years until he is an efficient workman.

When the shipping season is close at hand and the first frost has removed the leaves, each special variety of stock is dug separately and graded according to caliber, tied in uniform packages of one hundred and put in protected sheds or cellars to pass a sort of sweating process before they are ready to be packed for shipment. The motto of Orleans is, "Full count and uniform caliber."

Now, that is the way in which the many millions of seedling nursery stock are produced in that district and sold by the exporting firms, who are producers, jobbers and distributing

agents of such stock, and why they are financially successful. The firm or "Etablissement" gives the opportunity to their employees to co-operate in the welfare of the firm on the following principles: Every year the master gives his employees the opportunity to raise some stock and many times furnishes the seed or stock at cost price, and then buys from them all they can produce of a standard quality and uniform size, at a stated price corresponding with the selling quotations. In this way they retain in their service many efficient workmen, who produce at home in their spare hours an amount of stock which equals their wages and often times over. As you can readily see, they encourage their employees to make good wages, by buying every season all they can produce of a standard variety of trees, of which they are experts. Many of these men remain ten, fifteen and often twenty years with the same firm. The distributing firms of Orleans have between themselves a sort of "clearing house" co-operating so as not to over-produce certain stock staples and to maintain a remunerative selling price for the same.

I have here given you some points as to how it is done in France, and I do not see why we could not duplicate this important industry on the Pacific coast and by our improved methods of cultivation and irrigation, produce an equally good quality of all the seedlings, cuttings, young grafts of seedling stock mostly demanded on this continent, which are imported every year from Europe, and that could be sold at a living selling price here. With this inducement all the nurserymen of the Atlantic coast, as well as those of the Pacific shores, could co-operate and buy their needs on this coast. By doing this, we could retain in the United States, millions of dollars which are sent abroad every year to purchase seedling nursery stock. Therefore, we could create an industry which would prove a bonanza for this coast.

The Panama canal being open to commerce, our facilities for transportation put us as close to our Eastern states as the producing centers of Europe where we are at present compelled to purchase. To make this business a financial success we must follow their principle and, as stated before, avoid over-production, as the stock unsold costs as much to produce as that which is disposed of. I hope that in the very near future the Pacific coast states will be made the "Mecca" of the seedling nursery stock producers and distributors of the United States.

INDUCEMENT TO START NOW.

Every new subscriber who sends \$1.00 for the fifty-two issues of HORTICULTURE for 1915 will receive free all the issues for the remaining weeks of 1914.

MASSACHUSETTS AGRICULTURAL COLLEGE NOTES.

The junior class in Floriculture visited A. N. Pierson's, Cromwell, Conn., on Saturday, Oct. 24th. Quite a few acres of ground are devoted to grass. Piersons do most all of their own construction of new houses.

The Landscape Art Club has elected Earle S. Draper president, Harold D. Grant vice-president, Malcolm Goodwin secretary and Andrew Dalrymple treasurer. Weekly field trips will be made to study the native materials about the surrounding country.

The program for the second annual flower show of the Holyoke and Northampton Florists' and Gardeners' Club is in distribution. There are 42 classes listed, but it is a pity the classes should be limited to members of the society only. This narrows the scope of competition, and the far-reaching effects of the exhibition.

An exhibition will be held on the 3rd and 4th of November in French Hall. Table decorations and other showy groups will largely feature this exhibition. A display of fancy pottery will attract much attention, as many ideas can here be worked out individually by the students. A few new varieties of flowers tried out in the department will be exhibited for the judgment of the public. The idea to be emphasized in these floricultural exhibitions is to arouse interest and to receive support from outside growers, especially the commercial men. There should be co-operation between the college on the one hand and the commercial grower on the other, so that when the outside grower exhibits a fine display its merits can be noted by the student. He then gets acquainted with the varieties of flowers which the market demands.

W. H. HATFIELD.

BASIC SLAG FOR GRASS-LAND.

For many years Professor Somerville has advocated and practiced the use of basic slag for the improvement of grass-land. His experience has shown that in the cases of land which responds to this treatment, the meat and milk-producing power of grass-land has doubled or even quadrupled—poor herbage having been converted by the dressing of phosphate into a tangle of white clover. Professor Somerville now shows by means of a series of careful experiments carried out at the School of Rural Economy, Oxford, and published in the Journal of the Board of Agriculture, that grass-land to which basic slag has been added, after having amply repaid the cost of the dressing, contains an accumulated fertility, which is demonstrated at once and in striking manner as soon as the land is ploughed and sown with oats or other cereals. The experiments indicate that on land thus treated the first tillage crop is likely to show 50 per cent. increase over that taken from similar but untreated land. In the case of land at Cockle Park, North-

SWEET PEA VEILED BRIDE.

We take much pleasure in presenting a portrait of C. C. Morse & Co.'s sensational new sweet pea, Veiled Bride. We understand that the story of this variety is still very limited. Mr. Morse says that Veiled Bride has been in his "work shop" for about five years, and it is only now that

they have been able to get it fixed.

The cross made between Countess Spencer and Helen Pierce, the Veiled Bride Spencer appearing in the second generation. While it is not a very large Spencer, its daintiness and sweetness are bound to make it a favorite.

umberland, which had been dressed three times during 17 years with 10 cwt. of basic slag, the productive power was shown to have been increased by so much as 153 per cent., and soil from a pasture that had received only 7 cwt. of basic slag three years previously was improved by 121 per cent. This accumulated fertility

is to be ascribed partly to the residues of the phosphatic manure, but chiefly to the indirect effects of that manure. Among these indirect effects are the increased accumulation of humus and the larger fixation of nitrogen due to the increase of leguminous plants in the grass-land treated with phosphates.

Gardeners' Chronicle.

CLUBS AND SOCIETIES

LENOX HORTICULTURAL SOCIETY.

Lenox horticulturists held their annual flower show Thursday and Friday, Oct. 22 and 23. The show surpassed their former efforts, the orchid displays and the chrysanthemum groups being the finest ever exhibited in Lenox. To the growers the society gave \$800 in money prizes. There were three silver cups, the chief being offered for the best vase of chrysanthemums of any variety, the donor being the Chrysanthemum Society of America.

It took two sets of judges over 10 hours to decide on the award in the class for collection of 18 kinds of vegetables. W. Duckham of Madison, N. J., and Walter Angus of Chapinville, Ct., who judged the exhibition, disagreed and called in the other two judges. Alexander L. Marshall of Port Chester, N. Y., and John F. Johnston of Glen Cove, L. I., and the result of their deliberations was a tie vote of two for the collection exhibited by George H. Thompson from the Carlos de Heredia estate, and two for the collection shown by Edwin Jenkins of the Bellefontaine estate of Giraud Foster. These four men discussed the collections from 5 o'clock Thursday afternoon until after midnight, and reached no award. Despite the minute examination, scoring every vegetable separately, the result was always the same in the opinion of the judges. They notified the Lenox Horticultural Society officials of their positions on the award and asked to be discharged and this was done.

The next morning the Society called in three other judges R. Schmidt of Mrs. George G. Haven's estate, John Donahue of the Jesup estate, and Robert Scott of Pittsfield, of Mrs. William Pollock's estate. They were given the proposition to decide and after two hours' deliberation, placed the first award, carrying with it the silver cup offered by Joseph Brock & Sons, on the Foster exhibit by a margin of only five points in nearly 1500.

The list of awards in the plant and flower classes was as follows:

Plants—Chrysanthemums, three specimen plants, Mrs. John E. Parsons, 1st; one plant, Mrs. John E. Parsons, 1st; 12 single stemmed plants, Giraud Foster, 1st; Mrs. W. E. S. Griswold, 2d; Mrs. John E. Parsons, 3d; group of miscellaneous plants arranged for effect, Elm Court farm, 1st; Giraud Foster, 2d; specimen Kentia, Charles Lanier, 1st; specimen Areca, Charles Lanier, 1st; specimen palm, any other variety, Elm Court farm, 1st; specimen Adiantum, Charles Lanier, 1st; Joseph H. Choate, 2d; Mrs. W. E. S. Griswold, 3d; three specimen ferns, Charles Lanier, 1st; Elm Court farm, 2d; six flowering plants, Mrs. Robert Winthrop, 1st; R. W. Paterson, 2d; 12 ornamental foliage plants, Charles Lanier, 1st; G. Foster, 2d; W. M. Salisbury, 3d; three begonia Gloire de Lorraine, Elm Court farm, 1st; R. W. Paterson, 2d; orchids, group, silver cup donated by Giraud Foster, Mrs. W. E. S. Griswold 1st; A. N. Cooley, 2d; Elm Court farm 3d; round table of orchids, G. Foster, 1st; Charles Lanier, 2d; six Cattleya

labiata, R. W. Paterson, 1st; six cypripediums, Mrs. W. E. S. Griswold, 1st; six oncidium varicosum, Mrs. R. Winthrop, 1st; Elm Court farm, 2d.

Chrysanthemums, cut flowers—24 blooms, distinct varieties, G. Foster, 1st; R. W. Paterson, 2d; vase of 24 blooms, G. Foster, 1st; Elm Court farm 2d; Mrs. J. E. Parsons, 3d; 12 blooms, distinct varieties, Mrs. Griswold, 1st; Mrs. Parsons, 2d; A. N. Cooley, 3d; six blooms, distinct varieties, Mrs. Winthrop, 1st; W. H. Walker, 2d; 12 blooms, not less than six varieties, disseminated in 1914, Mrs. Griswold, 1st; Mrs. Winthrop, 2d; six yellow, G. Foster, 1st; Mrs. Griswold, 2d; A. N. Cooley, 3d; six red, Mrs. Griswold, 1st; R. W. Paterson, 2d; G. Foster, 3d; six white, G. Foster, 1st; R. W. Paterson, 2d; six pink, G. Foster, 1st; R. W. Paterson, 2d; Mrs. Griswold, 3d; six bronze, R. W. Paterson, 1st; Mrs. Griswold, 2d; G. Foster, 3d; six any other color, R. W. Paterson, 1st; G. Foster, 2d; Mrs. Griswold, 3d; three yellow, Mrs. R. Winthrop, 1st; Mrs. Parsons, 2d; W. H. Walker, 3d; three red, Mrs. Winthrop, 1st; Mrs. Parsons, 2d; W. H. Walker, 3d; three white, Mrs. Parsons, 1st; Mrs. Winthrop, 2d; W. H. Walker, 3d; three pink, Mrs. Winthrop, 1st; W. H. Walker, 2d; Elm Court farm, 3d; three bronze, A. N. Cooley, 1st; Mrs. Winthrop, 2d; Mrs. Parsons, 3d; three any other color, Mrs. Parsons, 1st; W. H. Walker, 2d; six "James Fraser" for C. H. Totty prize, A. N. Cooley, 1st; G. Foster, 2d; Mrs. Griswold, 3d. Chrysanthemum Society of America cup, vase of 10 blooms, one variety, G. Foster, 1st; Mrs. Griswold, 2d; Elm Court farm, 3d. Single chrysanthemums—12 vases, six sprays, A. N. Cooley, 1st; Mrs. Winthrop, 2d; six vases, six sprays, Mrs. Parsons, 1st; R. C. Dixey, 2d; J. H. Choate, 3d; pompon chrysanthemums, 12 vases, six sprays, Mrs. Winthrop, 1st; six vases, six sprays, Miss A. Kneeland, 1st; R. C. Dixey, 2d; W. M. Salisbury, 3d.

Roses—Vase of 50 in variety, G. Foster, 1st; Elm Court, 2d; 18 American Beauty, G. Foster, 1st; Elm Court, 2d; 24 pink, G. Foster, 1st; Elm Court, 2d; 24 Kaiserin Augusta Victoria, Mrs. Parsons, 1st; R. W. Paterson, 2d; 24 scarlet, Giraud Foster, 1st; 24 yellow or bronze, W. M. Salisbury, 1st; Mrs. Griswold, 2d; G. Foster, 3d; 24 any other variety, G. Foster, 1st; Elm Court, 2d; 12 pink, C. Lanier, 1st; Mrs. Parsons, 2d; Elm Court, 3d; 12 white, C. Lanier, 1st; Elm Court, 2d; 12 scarlet, C. Lanier, 1st; 12 yellow or bronze, Mrs. Parsons, 1st; C. Lanier, 2d; R. W. Paterson, 3d; 12 any other variety, W. M. Salisbury, 1st.

Carnations—24 white, R. W. Paterson, 1st; Mrs. Griswold, 2d; 24 pink, R. W. Paterson, 1st; Mrs. Griswold, 2d; 24 light pink, R. W. Paterson, 1st; Mrs. Griswold, 2d; 24 scarlet, Mrs. Griswold, 1st; C. Lanier, 2d; W. M. Salisbury, 3d; 24 any other color, R. W. Paterson, 1st; C. Lanier, 2d; John A. Spoor, 3d; 12 white, Mrs. Winthrop, 1st; A. N. Cooley, 2d; W. H. Walker, 3d; 12 pink, R. C. Dixey, 1st; Joseph H. Choate, 2d; 12 dark pink, Mrs. Winthrop, 1st; Mrs. Griswold, 2d; 12 light pink, Mrs. Win-

throp, 1st; C. Lanier, 2d; A. N. Cooley, 3d; 12 scarlet, W. H. Walker, 1st; A. N. Cooley, 2d; J. H. Choate, 3d; 12 crimson, J. H. Choate, 1st; Elm Court, 2d; 12 any other color, Mrs. Griswold, 1st; 50 blooms, mixed, Mrs. Griswold, 1st; R. W. Paterson, 2d; W. H. Walker, 3d.

Violets—100 Princess of Wales, Mrs. Griswold, 1st; J. H. Choate, 2d; R. W. Paterson, 3d.

The fruit and vegetable displays were very numerous, entailing a lengthy list of awards. The competitors were the same as the foregoing, in the main.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Work of Committees.

Exhibited at Cincinnati, Oct. 17, by Elmer D. Smith & Co., Adrian, Mich., Marigold, deep yellow, Jap. Inc., Com. scale 93 points; Crystal Gem, white, Jap. Inc., Com. scale 88 points; Niza, delicate pink, Pompon, Ex. scale 86 points; 3-54-12, pink, Inc., Com. scale 81 points.

Exhibited at Philadelphia, Oct. 17, by Elmer D. Smith & Co., Adrian, Mich., Crystal Gem, white, Jap. Inc., Com. scale 86 points; Niza, white, shaded to delicate pink, Pompon, Ex. scale 90 points.

Exhibited at Chicago, Oct. 17, by Elmer D. Smith & Co., Adrian, Mich., Niza, light pink, Pompon, Ex. scale 88 points; Crystal Gem, white, Jap. Inc., Com. scale 86 points; Marigold, yellow, Jap. Inc., Com. scale 92 points.

Exhibited at Boston, Oct. 17, by Chas. H. Totty, Madison, N. J., Antigone, white, Jap., Com. scale 90 points, Ex. scale 87 points.

Exhibited at Philadelphia, Oct. 17, by Chas. H. Totty, Madison, N. J., Antigone, white, Jap. Inc., Com. scale 87 points, Ex. scale 89 points.

NASSAU COUNTY HORTICULTURAL SOCIETY.

Owing to the drought and unseasonable weather that has prevailed during the past few weeks, there was only a limited display of dahlias at the early fall show of the Nassau County Horticultural Society, held Tuesday afternoon and evening, Oct. 20 and 21, at Pembroke Hall. In other outdoor flowers, and in the vegetable and fruit classes, however, the display was particularly meritorious. Henry Gaut gardener for Mrs. Herbert L. Pratt, staged a display of vegetables that was one of the most extensive ever shown here, and included almost, if not quite, every kind of vegetable grown in this climate.

Frank Pettricia, gardener for Anton G. Hodenpyl was a very successful exhibitor in the vegetable classes, as were also William Noonan, gardener for Charles F. Cartledge. Henry Gaut also made a fine display of grapes, and other outdoor fruit, Herman Boettcher was also a successful exhibitor in this department, and in addition to receiving prizes in the regular classes, was awarded a cultural certificate for va-

rieties of apples. James Duthie of Oyster Bay, gardener for Mrs. E. M. Townsend, was awarded special prizes for three exhibits of dahlias, and John Lewis Childs of Floral Park received honorable mention for display of seedling dahlias, and a certificate of merit for celosia.

ST. LOUIS SOCIETY MEETINGS.

The St. Louis County Growers' Association will hold a meeting on Wednesday night, November 4, at the Eleven Mile House.

The Retail Florists' Association held a meeting Monday night, October 19 at the Washington Hotel and had a splendid attendance and took a new lease of life.

The Florists' Union met on Monday night, October 26, in the Public Library. A. Artmann is president, Max Rotter, vice president and Mrs. Seeleg secretary. They now have a membership of thirty-two.

CLUB AND SOCIETY NOTES.

The Horticultural Society of Chicago will give what they call "A Seasonal Display of Chrysanthemums" at the Art Institute, Nov. 9-10. The only awards will be medals and no flowers except chrysanthemums will be exhibited. Novelties in blooming plants will be accepted.

At a meeting of the Newport, R. I., Horticultural Society, Oct. 27, W. A. Manda of South Orange, N. J. had on exhibition some very promising seedling decorative dahlias and certificates of merit were awarded to the following varieties in the collection; Minnie Burgess, Albert Manda and South Orange Surprise.

The eighty-third annual exhibition of The American Institute of the City of New York, will be held in the Engineering Building, 25 to 33 West Thirty-ninth street, on Wednesday, Thursday and Friday, November 4, 5 and 6. It will be a Grand Chrysanthemum Show, together with orchids, roses, carnations, ferns, palms, fruits and vegetables.

The prize schedule for the Sixteenth Annual Exhibition of the Tarrytown (N. Y.) Horticultural Society has been received. The show takes place in Music Hall, Tarrytown on Wednesday Thursday and Friday, November 4, 5 and 6. There is a splendid list of special prizes in addition to the regular class premiums, each day having its distinctive classes.

The next meeting night of the New York Florists' Club will be Ladies' Night and Alexander J. Guttman of the entertainment committee is making an unusual effort to have an attractive program for that evening for the entertainment of the ladies. The nominating committee held a meeting on Friday, the 23d, and will make their report at the November meeting of the Club.

INDUCEMENT TO START NOW.

Every new subscriber who sends \$1.00 for the fifty-two issues of HORTICULTURE for 1915 will receive free all the issues for the remaining weeks of 1914.

THE ROSE GROWING INDUSTRY

Prepared by Robert Pyle, West Grove, Pa., for the American Association of Nurserymen, Cleveland, June 24th.

It would be a pleasure if I might devote my time this afternoon to a discussion of the new roses which from information gathered in various parts of this country appear best adapted to American gardens. New hybrid perpetuals like Gloire de Chedane Guinoisseau, George Arends and Coronation, new hybrid teas like George Dickson, Edward Mawley, John Cook's new Panama, also the new pernetianas, Mme. Edouard Herriot and Willowmere, with many others, some just christened and not yet launched, this subject alone deserves our attention, for it seems almost neglect to pass by such modern celebrities as American Pillar, Christine Wright, Climbing American Beauty, Excelsa, Shower of Gold, with which rose gardens have recently been enriched.

I pass by the opportunity offered for a discussion of the newer roses to a phase of the subject which appeals to me as deserving the thoughtful consideration of no less important a group of men than are gathered here. Three years ago I traveled through western Europe with the express purpose of coming in touch with the leading rose growers and rose gardens, with camera cocked and eyes open for ideas as well as roses.

I do not pose as an expert, but wish to submit for consideration some facts that bear a close relation to your future balance sheets. Suppose for convenience, we divide the rose growing industry in America under three heads, first the cut-flower business from producer to ornamental decorator; second, and in this the nurserymen are more interested, the production of the small roses because really in itself a branch of the trade; and third, field-grown roses for outdoor planting. Regarding the first I will not even cite statistics. You know as a rule that the cut-flower men are a thrifty lot with acres of glass and still extending. Single firms there are that handle easily a million roses annually, and yet concentrate on a little more than a dozen varieties all told; that is one thing the nurserymen cannot do.

Second, the increasing demand for small roses is indicated by the growth of one center in this state alone which claims an output of seven million roses a year, and that is by no means the only place where such roses are produced in large quantities. While the first named class influence the taste of the American public and the second class mentioned influence the nurserymen by what they have to supply them. I believe the subject that most closely concerns you and that deserves the attention of us all is that of field-grown

roses for garden planting, and whether they be own root or budded, whether they be produced on the Pacific coast, the great gulf states of Mississippi and Alabama, the Atlantic coast states of Virginia, North Carolina and Georgia, whether from New York and Ohio or from the very heart of the country itself, while of real importance to us producers does not matter so much as does whether those in charge of these vast producing areas are awake to what appeals to me as an opportunity for bigger business at better prices.

You will remember that in the sacred history account of the people of Egypt it was "Joseph the dreamer," whose foresight and gumption had provided in advance for the lean years during which his people had enough and to spare. Call it a dream if you will, and there are those here that know more about this industry than I, but it is my firm belief that the rose growing industry in America is on the threshold of a new era, and if I mistake not, how rapidly we advance and take possession of the field before us will depend more upon the gentlemen who are here (or who read these words) than upon any other one group of men I can think of in America, unless it be a very little group with whose work I wish to make you later acquainted. We are living in an age of co-operation. Noteworthy enterprises demand unity of purpose and continuity of effort and that only I feel is necessary to put the rose growing industry in America where it rightfully belongs, foremost among the nurserymen's specialties.

Between the producer and consumer in this industry, as in others, stands the sales manager; he is obliged to know both ends of the game, as a part of his proposition. He will tell you that among the most important distributing agencies of field-grown roses are the nurserymen's agents or the small dealers; second, the department stores, and third the catalogs of the catalog houses. Perhaps the department stores are least particular about the quality and origin of their stock and are prone to neglect the essentials of care and treatment and in consequence probably hand out more stock that fails to make good than any other of the three distributing agencies mentioned. The nurserymen's agents do sell "stuff" as any one who grows for this class of trade realizes, but I am informed by one of the largest of them, that it is not the grower or indeed the agents who control the sales, but rather that as regards new roses especially he is limited and influenced according to the stock color plates which are distributed* by the Rochester and other lithographers. So I turn to the last of the three distributing agencies the catalog man who hires expensive salesmen, and hires them by the thousands and consequently the selection of the varieties that he shall recommend and push are more entirely within his own control.

With a sales situation as above de-

scribed what is the result: The department stores take what the Holland salesmen choose to deliver. Second, the firm which depends upon agency distribution continues to grow largely the same old varieties in order to cover the sales produced mainly by lithographed plates, and while the catalog man may be a little better able to dispose of new varieties as they come along, he, too, is slow to weave into his list the worthy new sorts as they are introduced—why? First, because the general public do not now readily take hold of new sorts and second because the grower himself lacks first-hand information regarding the new roses. Except for one or two firms who are doing splendid test work for their own information, our present means and methods for testing new roses and disseminating information are woefully inefficient and inadequate. How many of us realize that new roses are being introduced at the rate of seven hundred every five years—yet how many of us know what we are getting when we buy new roses from abroad and therefore go slow and in consequence are so far behind our European brother as to give him the cream of the American trade.

Can this be true? It is distinctly so in some sections. Just for example at the Syracuse Rose Show where I acted as judge, there was one amateur alone who showed one hundred and fifty varieties out of a collection of something over 250 in this garden, and he was only one of many I met there who were obtaining their stock directly from across the water. Several other amateurs with whom I have come in contact, typical of those who show a discriminating interest in having the best obtainable, seem to feel that it is only natural that they should go to the source of supply in Europe for what they want in the way of roses. I have it on good authority that one enthusiast not from New York State or Ohio, during the past year has bought upwards of seven dozens of rose bushes none costing less than \$3.50 a bush and a greater number \$5.00 each, having imported all of them from abroad, and from among the number only one, the Rose Richmond was hybridized in this country. I believe that this tendency to go abroad for roses is growing, not so much because of the superior quality of the stock as the new varieties there introduced and there early available.

Let us compare. The average number of roses offered by the six leading rose firms in America, the past spring was about 400. The average number of roses offered by the six leading rose firms in England was over 1,000. The total number of varieties offered by eleven leading American firms was a little over 1,000, and only 18 kinds were offered by them all. In these eleven catalogs of 1914, I find ninety-one new roses not formerly listed by any of them. I calculate that American firms have begun adding on the average more than twice as many new roses annually as they did five years ago. But in selecting them it is largely guess work and consequently we still crawl along in the dark.

Therefore, in order that we may walk in the light, in order that we may not become burdened with the 1,000 long list of the Europeans—in order

that we may eliminate before they reach the nurserymen's hands the varieties unsuited to our needs—in order that we may build our sales upon "make good" sorts only—I advocate that American growers provide adequate means for obtaining country-wide tests of roses for Americans.

Having once established a means of obtaining regularly a dependable list of roses that will make "come back" customers, may we not turn to the other phase of our subject, that of creating throughout the country a greater interest in and a bigger demand for roses. Painted upon the wall of a certain high building in Cleveland, you will notice a spectacular advertisement showing an Indian standing on a rock overlooking a great city completely illuminated. The Indian is made to explain "All Light—No Night"—a condition that is typical of every first-class American city. What has made possible our magnificent illuminating systems? Because one Benjamin Franklin of Philadelphia, detected evidences of a wonderful power lying latent about him. He blazed the way for modern electrical engineers; and electricity, which was a scattered force, and to the Indian unnoticed, has been brought under control and direction and is now used.

In the same sense and in no less a degree there is lying loose around us a love for the beautiful, which needs to be centralized, organized, controlled and used. The love for flowers is instinctive. The power of a beautiful rose to beget enthusiasm for more roses you all know. It is tremendously contagious, and do you know that if by means of roses the love for beauty, lying latent all over this big country, were once enkindled and exploited, you would be obliged to double your output or else double your selling price.

If the rose men of America were to combine in a national advertising campaign (just as the lumber men and the brick firms have done), their advertising manager in making his preliminary study of the situation would want at least to review the industry abroad, where last year the demand for roses exceeded the supply. As between the American situation and the European, he would discover one big and notable difference. I, therefore, propose to present to you photographs of some of the leading horticultural exhibitions held in England and of some of the most distinguished private and public rose gardens in France, and I want you to see if you can detect wherein our European craftsmen have succeeded in arousing public interest in a field in which we are merely pioneers. (Mr. Pyle here threw on the screen with colored lantern slides, views of the great shows of the National Rose Society of England, of the Royal Horticultural Society, of the leading growers of England, Ireland, France, Germany and Luxemburg.) He described in succession with autochrome reproductions, the famous Rosarie de la Hay with its seven thousand five hundred different varieties; with its tree roses 12 feet high with 5 and 6 feet spread; with its avenues of rose-covered archways; its laboratory for extracting the essence of the rose; its museum containing records of the rose in the literature of all languages as used in the produc-

Thorburn's Seeds and Bulbs

To the Trade:

TO the Florist who depends for his profits upon reliability of his seeds and bulbs a bargain is not of the first importance.

Yet we often have an over stock of popular seeds and bulbs which we are able to supply below the market.

This Month We Particularly Recommend the Following:

Freesia Purity Bulbs

$\frac{1}{2}$ -in. diam., $1\frac{1}{2}$ -in. long.
Per 100, \$2.00 Per 1000, \$10.00
Extra Mammoth Bulbs,
\$3.00 per 100

Refracta Alba

$\frac{3}{8}$ to $\frac{1}{2}$ inch.....\$3.00 per 1000
 $\frac{1}{2}$ to $\frac{3}{4}$ inch.....5.00 "
 $\frac{3}{4}$ inch and upward... 8.50 "

Pansy Seed

Finest Strains

	Per oz.
Thorburn's Superb.....	\$1.00
Fine Large English Mixed.....	.90
Masterpiece.....	.80
Masterpiece from Originator.....	3.00
Trimardeau Giant Mixed.....	.90

Lilium Harrisii

(Bermuda Easter Lily)
5 to 7 inches in circumference
\$5.50 a hundred \$45.00 a thousand
7 to 9 inches in circumference
\$10.00 a hundred \$85.00 a thousand

And all other varieties at reasonable prices.

Also a few cases Cold Storage
Lily of the Valley Pips

Cases of 250 each for..... \$1.50
Cases of 500 each for..... 8.00
Cases of 1000 each for..... 15.00

Ask for a copy of our Bulb Catalog and Special Prices to Florists

J. M. THORBURN & CO.

Established 1802

53 Barclay Street - New York

tion of textiles, coins, paintings—in-
deed wherever the rose has figured in
art—with also records tracing the his-
tory of rare roses found in this gar-
den, kinds that dated back beyond the
beginning of the Christian era, and
then he showed how cleverly screened
from the rose of the garden is a little
open-air theatre with turf seats, bloom-
ing roses for footlights and for stage
setting, where M. Gravereaux provides
entertainment especially of produc-
tions treating of the rose for the pleas-
ure of his friends from Paris. Espe-
cially favored are the members of the
French Rose Society and the Ladies'
French Rose Society, as well as dis-
tinguished visitors from abroad. Then
showing a photograph of M. Grave-
reaux, Mr. Pyle called attention to the
magnificent work abroad that has been
done by the amateurs, when they be-
come sufficiently interested in popu-
larizing the rose for all the people.
As for example, M. Gravereaux himself
an interested amateur, was largely in-
strumental in persuading the authori-
ties of the city of Paris to establish in
one of the public parks, the Bagatelle
Gardens in the Bois de Boulogne, a
magnificent garden of three or five
acres in extent, with a completely rep-
resentative collection to which are an-
nually added the seedling roses invited
from the hybridizers of all nations.
Another feature which lends unusual
distinction to this garden is the an-
nual meeting of men prominent in the
rose growing industry who are invited
as representatives from all nations, in-
cluding England, Ireland, Holland, Ger-
many, Luxemburg, France and Amer-
ica, who bring their own intimate
knowledge of values regarding new
roses to bear in the decision, upon
kinds most worthy of the gold medal
and grand prize awards so highly cher-
ished by the originators. Mr. Pyle il-
lustrated the above with a series of
photographs lastly showing a group of
some twenty such judges standing
around the rose Jonkheer J. L. Mock,
which that season was awarded the
gold medal, and in a comprehensive
summary of European practices, the
speaker pointed out the fact that the
difference between the American and
the European industry may be seen in
the fact that abroad the amateurs
with all their resources of time and
money and enthusiasm have been har-
nessed to the happy task of popular-
izing roses. They "have it going" and
the motive power appears to be auto-
matic within the amateur. With re-
spect to rose shows, organized ama-
teur rose gardens, we as yet are in the
pioneer stage, but happily in America
have examples of how these things can
be and are being carried out most suc-
cessfully.

With an illustration of ex-President
Roosevelt sitting at his desk in ad-
miration for a large bouquet of mag-
nificent Richmond roses, the speaker
related the incident when last the
American Rose Society met in Wash-
ington and upon adjournment went in
a body to meet the President in the
White House, presenting him with a
bouquet of roses of American origin.
After interrupting his remarks to con-
gratulate Mr. Hill, the originator, Mr.
Roosevelt expressed the great feeling
of satisfaction which always came to
him "when we Americans are able to
produce what we need for our own
use."

AZALEAS

We have just received a large importation of Azaleas in splendid
condition, which we offer for immediate delivery and as long as un-
sold at no advance over prices of previous years.

We offer the leading varieties,—Mme. Van der Cruyssen, Vervae-
neana, Simon Mardner, Empress of India, Mme. Jos. Vervaene, Ernst
Eckharte, Niobe, Vervaeneana Alba, etc., strong plants:—

10 to 12 inches in diameter	\$6.00 per dozen,	\$45.00 per 100
12 to 14 "	9.00 "	60.00 "
14 to 16 "	12.00 "	75.00 "
16 to 18 "	18.00 "	135.00 "
18 to 20 "	24.00 "	
20 to 22 "	36.00 "	
Dwarf or Miniature: Firefly or Hexe, and Chas. Encke.....	4.80 "	35.00 "

**F. R. PIERSON, TARRYTOWN,
NEW YORK**

Too little incentive and precious lit-
tle reward indeed, in the past, have
been offered to the American hybri-
dizer, and this is one of the various
points among others that I shall men-
tion, which calls for our corrective at-
tention, if we would develop our rose
growing industry. Let me recapitu-
late. We have already shown the need
for a series of test gardens. There is
no question but that there is an enor-
mous field for the development of
roses, particularly for American condi-
tions, and therefore that we should en-
courage hybridizers. Furthermore, we
need to organize rose societies, garden
clubs, among amateur rose growers, to
encourage and assist in every way pos-
sible with organized local effort along
these lines, and last but by no means
least we must get going the movement
to plant public rose gardens for all the
people.

You will be interested in the prog-
ress already made with the test garden
movement, which was launched a year
ago last April at the annual meeting
of the American Rose Society, and also
of the Society of American Florists
and Ornamental Horticulturists held in
New York, and as evidence of what
has been done you will see in these
pictures the splendid location pro-
vided for us at Washington, just
across the Potomac River, by the De-
partment of Agriculture, who have
charge of the garden under our aus-
pices. The next pictures also show
an equal number of some two or three
thousand roses that were planted out
this spring on the grounds of Cornell
University at Ithaca, New York.

It is difficult to estimate the value

to American rose men likely to grow out of these gardens. We can certainly depend upon information quite as useful as that worked out at Cornell by the American Peony Society or the American Sweet Pea Society, and it is encouraging to know that the New Jersey State Experiment Station at New Brunswick have requested the A. R. S. to establish a rose test garden on their grounds; a similar request has come from Vassar College, with its annually changing body of five thousand women, most of whom some day will have rose gardens of their own; a similar request comes from Minneapolis, and what is the stand taken by the American Rose Society with reference to extending this work? Because rose gardens are not of mushroom growth they require care and the judgment that comes with experience, as well as stock. There is little question about the success of the gardens already established. The response of the trade donating roses has been most gratifying, but the present membership of the American Rose Society does not afford men enough to properly handle the work ahead. Do you know the NATIONAL ROSE SOCIETY OF ENGLAND HAS OVER FIVE THOUSAND MEMBERS, and are you aware that in our own enormous country our membership numbers less than a paltry three hundred? We will accept the invitation to establish rose gardens in other centers when the increase of membership brings us from the trade and from the ranks of able amateurs, men who will share with us in assuming responsibility for the oversight of these gardens. Their value has been exemplified by the results in the Hartford test gardens this past spring with seedlings of two years' stand, that enabled the judges to make careful and valuable awards within the present month to seedlings and other roses some as yet undisseminated.

But most impressive evidence, I think, of the possibilities for cities in different parts of the United States to make use of the rose for the benefit of their people at most reasonable expense and with surprising results, is the example of Elizabeth Park rose garden, Hartford, Conn., of which I am able to show you some photographs. Do you realize that during the first rose week in this month there were counted in this park in one day not less than one thousand five hundred automobiles and careful count showed the attendance for the day over 32,000 people? The rose garden is only an acre in extent. The authorities were obliged to plant perennial and other gardens nearby to scatter the attention and prevent the grass turf from being entirely worn out. Attempts were noticed in the gardens of many wishing to note varieties for home planting, but certainly under great difficulties, because of the crowds pushing from behind. When one little park in New England can call forth a hundred thousand people within three weeks, doesn't it indicate the latent love for roses that other cities ought to recognize? Some will object that conditions in other cities do not permit. Look at this illustration of what has been done towards a rose garden in the parks of Minneapolis, our cold northwest country. If they can have roses, such as these, surely no man-sized city need hesitate.

FOR YOUR CATALOG IT'S TO YOUR ADVANTAGE TO LIST SWASTIKA BRAND CANNAS

TO thousands of people, all over this country, the **Swastika Brand** stands for the very best Cannas it's possible to grow.

It stands for the choicest varieties produced. It reflects the wonderful work of Antoine Wintzer, who has been so frequently called, "the Canna Wizard."

The **Swastika Brand** name in your catalog, is a canna guarantee to your customers. Not a root of our stock is grown South. Every one of them is grown by us right here in West Grove, Pennsylvania. They are solid and heavy, making them the best of keepers and slow to dry out. They are dependable in every way.

Let us make up for you, from our collection—a list covering the best in each color, in the dwarf, tall and bronzed-leaved varieties.

Surely you will want some of **Mrs. Woodrow Wilson**, with its large, overlapping petals of rich crimson pink set in veined, light green foliage.

Then there is **Wintzer's Colossal**, which is by far the one best large flowering red variety; no list can be complete without it.

Let us help you solve your Canna problems. We will furnish free to you rows of **Swastika** signs for use in the Canna heading for your catalog.

GIMBEL'S, New York City

BUDS, "CROWN" AND "TERMINAL."

Dear Sir:—

Would you kindly publish in your columns what buds make the best flower on chrysanthemums, the first or second? Yours truly,

READER.

The taking of the bud on chrysanthemums depends usually upon the varieties grown. As a general rule the first bud, or crown bud, is not as good as a bud taken the second time. This is a terminal bud. The later the variety the more opportunity to take a second or even a third bud. If the first bud is taken too early it will develop weak and off color. The crown bud is taken in ordinary varieties only when it is solid, flat, and of healthy appearance.

NEW YORK EXHIBITION PROSPECTS.

We are pleased to learn that there is as yet no foundation for any solicitude as regards the holding of the proposed spring flower show in New York next spring. From what we can hear show preparations are moving along as well as could be expected. It is possible that the closing of some of the large private estates may cut out some prominent exhibitors at past shows but "there are others" and until something more alarming transpires, the contracting of "cold feet" seems ill-advised. The fall show at the Museum of National History at the end of the present week should give some little insight into the attitude of the exhibitors as regards supporting the spring enterprise.

Obituary

Mrs. C. W. Hoitt.

Mrs. Hoitt, wife of Judge Chas. W. Hoitt, Nashua, N. H., died on Monday morning, October 26, after a long and painful illness.

Mrs. Percy Huxley.

Mrs. Huxley, wife of Percy Huxley, of Pine Grove Gardens, Sayville, N. Y., died on October 12, leaving an infant son. It is a hard blow for Mr. Huxley, they having been married only a year and all their relatives are across the water.

Mrs. Robert Hunnicks.

After a long illness Mrs. Robert Hunnicks died at her home in Newport, R. I., on Oct. 24. She was the wife of Robert Hunnicks, who was for many years gardener for Mr. F. W. Vanderbilt at Newport and who is at present in charge of Mrs. Delancey A. Kane's estate.

TREATMENT OF STORE HELP.

One of the first things I want to go on record as saying in offering my theory of the relationship between employer and employee, is that you are going to see a constantly changing sea of faces among the employees of a store where the owners still believe that they can "King and Queen" it over their employees.

If you have any doubt regarding the proof of this statement, just observe the way competent sales people are changing from one store to another. So frequent are these changes that the loss of capable help is one of the big nightmares of the merchant today; not from the standpoint of more salary, but largely from the human side of it.

To solve this problem, it is necessary for the employer to get right down among his employees—mix with them—be one of them—make a fuss over them, then let them know that you expect service from them in keeping with their compensation. There is a happy medium you can strike, if you hunt for it.

To my mind, there are more stores suffering today from too much system than from being under fed with it. No system is bad, but too much system is worse. Knowing where to put on the brakes, that is the point.

One of the best systems in the world is that whereby one can hold his entire force of help with the magnetism of his own presence. He can be intimate with his employees without becoming too intimate. He can compel their respect, and should. It is not an easy matter to tell how he can do these things, but he can. Every employer should take heed of the degree in which his control of his own paid employees is largely slipping from him.

The law now says how many hours a week certain employees should labor. What a laugh such a suggestion would have produced 25 years ago. The law

ARTHUR T. BODDINGTON

Seedsman

342 West 14th Street, NEW YORK

says that if your girls are standing up too much during their working hours they must be provided with seats, and the law says certain other things that makes service conditions vastly different than they have ever been before. The great thing that I would emphasize to every dealer who is an employer is that he devote as much time and attention to a study of the human side of life from the standpoint of his employees, as he does the commercial side from his own standpoint.

Time was when the drunk could go on being the drunk and still get away with his job, when the star salesman could stay up all night playing cards and not be reprimanded the next day for dozing as he worked, but these weeds have all been cut; there are not nearly enough men and women to

cover the demand for competent help. It is a tragedy when even one good employee gets away from you.

I say, "Study the human side of life and reap the benefit from your employees.—Shoe Retailer.

FIRES.

Dobbs Ferry, N. Y.—The greenhouse on the Morton Paton estate was completely destroyed by fire Oct. 18th. The cause of the fire is unknown.

N. Tonawanda, N. Y.—The greenhouse owned by John Schweichler at Division and Christiana streets was practically destroyed by fire Oct. 20th. The loss is estimated at \$4,000, partially covered by insurance. Mr. Schweichler will rebuild at once.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

Onion Sets.

We learn from Schilder Bros. of Chillicothe, Ohio, the following facts concerning the onion set crop:

About 98 per cent. of all the large onions sold after the 1st of September are grown from seed, and practically all onions grown from seed are not ripe until late August and up to Sept. 15th. Onion sets are ripe and harvested in Chillicothe the first week in July, and are usually harvested in Louisville July 15th and in Chicago Aug. 1st. All vegetable crops this past summer maturing up to Aug. 1st were a short crop in nearly every section. It was late July and all through August that the weather was favorable for the growing crop of large onions produced from seed. Right in Louisville, where 300 to 500 cars of large onions are grown each season from sets and are ready for market the 1st of July, they sold as high as \$7 per bbl. this past summer, because the crop was short. Therefore, it does not obtain that because there is a large onion crop there will also be a correspondingly large crop of sets, simply for the reason that sets are ready for harvest a long time before large onions; and as before stated, August was a very favorable month for the growing crop of large onions and other vegetables as well.

June is the month for the set crop to make in Chillicothe and Louisville, and all through June and a good part of July is the time for sets to make in Chicago. Late in June Chicago was suffering for rain, and none fell there until late in July. However, that section has very close to an average crop, and a little increase in acreage over last season. Louisville had no rain whatever in the set-growing section from the 5th of May till the 10th of July, a period of practically ten weeks. Last year that section had between 100,000 and 125,000 bushels of sets. This year they will have about 30,000 to 35,000 bushels of very inferior quality, for the reason that so many of the bulbs are no larger than beans; such stock would blow out through the mill in January and February. In the Chillicothe section there are a few less sets than last season. Whatever excess bushels Chicago

may have this year over last will not any more than offset the shortage in Louisville and Chillicothe sections. Therefore, it is not believed that there are any more sets in the country this season than there were last, and last spring there weren't enough sets to go around. Several thousand more bushels could have been sold in April at \$3 per bushel, but they couldn't get them.

Notes.

For the week ending October 17, 1914, the value of imports of grass seeds into the port of New York was \$12,448; of clover, \$7,335; of trees and plants \$47,152.

Louis H. Schaefer & Sons have opened a seed and bulb store at 102 Hudson avenue. Mr. Schaefer has for the last ten years represented the seed house of Sherman & Eberle.

CATALOGUES RECEIVED.

Wilbur A. Christy, Warren, O.—Price List of Mapleshade Gladioli.

J. Bolgiano & Son, Baltimore, Md.—Advance 1915 Wholesale Prices for Market Gardeners.

Sluis & Groot, Enkhuizen, Holland—Advance Price List of Vegetable, Flower and Agricultural Seeds for season of 1914-15. Issued under date of October 12, 1914, this wholesale price list of a well known and highly respected house comes with a welcome assurance that in so far as first-class flower and vegetable seeds are concerned, the trade in this country need not be disturbed by the unfavorable conditions existing in other European countries.

The B. G. Pratt Co., of 50 Church St., New York City have just sent out a very instructive publication in the interest of "Scalecide." It is a 32-page pamphlet, finely illustrated and it gives an abundance of conclusive evidence in testimony to the virtues of this preparation as an effective remedy against scale insects, with full directions for its use. The time for scale destruction is now here and Messrs. Pratt & Co., are ready to do their share. The pamphlet alluded to bears the title "Proof of the Pudding."

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Two volumes have now been issued and the others will follow in succession. Order from

Of Interest to Retail Florists**THE RETAILER'S BUSINESS CALENDAR.**

Oct. 31. Sat. Forget everything to-day but selling flowers and pleasing customers. Have something fresh and novel to show patrons and sustain their interest in the store.

Nov. 1. Sun. Get through with your orders as soon as possible. Prevent moisture from settling on the glass by allowing a little ventilation at the top of the windows.

Nov. 2. Mon. Forget about last week and start this week "on the scratch" with a smile on your face. Don't antagonize any customers. Remember, "Honey catches more flies than vinegar." Keep plenty of stock on hand; too many flowers is better than not enough, as their display is an advertisement.

Nov. 3. Tues. Figure out ways to place more responsibility on each clerk. Nothing develops one's muscles like hard work and nothing so rapidly broadens a man as responsibility. Unpack flowers from the market as soon as possible. Clean up before customers begin to come in the morning.

Nov. 4. Wed. You ought to feel fine today. Nothing to do but sell flowers. Create an artistic and brilliantly effective window decoration—one of those arrangements that calls for a police squad to keep the crowds from obstructing the sidewalk in front of your store. Use mirrors as much as possible in window decorations. Don't crowd the display space.

Nov. 5. Thurs. Don't talk war—you'll get it if you don't talk business. Don't display too much autumn foliage; it looks as if that is all you have to sell. Think hard about the big holiday sales in prospect. That's the idea—smile!

Nov. 6. Fri. You have already mailed your statements, but what have you done to pay your bills? Sit down and figure how many mistakes you made this week.

Nov. 7. Sat. Look through your HORTICULTURE and realize how progressive other florists are. It won't do any good to regret the business lost before you started to advertise in HORTICULTURE, the national florist weekly.

NEWS NOTES.

Milburn, N. J.—George W. Brand, of East Orange, has purchased the old George Clark place, comprising three greenhouses, office and dwelling.

New York—The Duke of Manchester has been declared a judgment debtor for \$492 to Thomas F. Galvin in the Sixth Municipal Court, and an execution has been served on the Duke. Witnesses testified that the Duke bought \$725 worth of flowers and tendered a \$250 check in part payment. The balance remained due. The Duke made no defense.

Don't gain the impression that there is anything commendable about business suicide. —Southern Merchant

NEWS NOTES.

Waltham, Mass.—Two new stores are being opened here this week, one by Henry Talbot and the other under the name of The Rosary.

Plainfield, N. J.—Smith & Hoff, Somerset street, have dissolved partnership. James Smith will continue the business, both wholesale and retail.

Malden, Mass.—Fred R. Kaulback and two Italian laborers were painfully injured last Monday when Kaulback's automobile backed into a street excavation in front of his store in Malden. Kaulback started to back his machine away from the hole where the two laborers were at work. The wheels skidded on the pavement and backed down into the hole. Epi Top and Vito Muzzo, the two laborers, were pinned at the bottom of the excavation. Kaulback remained at the wheel. All received cuts and bruises.

NEWS ITEMS FROM EVERYWHERE

BOSTON.

At the Rosary, business is reported very good, especially that of window plants and boxes. The sale of pot chrysanthemums for house decorations shows marked increase this season.

At the opening of the Roxbury branch of the Houghton & Dutton department store several hundred dollars' worth of floral designs were presented by the newspapers and friends of the firm.

T. F. Perkins of Reading is a recent addition to the list of growers shipping flowers to the Boston Co-operative Market. Mr. Perkins was formerly connected with the West Street Greenhouses of Reading.

Pampas grass, anthuriums and yellow chrysanthemums combined to make a very pleasing window display at the store of Thomas J. Clark. Mr. Clark states that the freakish-looking anthurium is a prime favorite with his customers.

Wax Bros. make a rule of completely changing their window display three times each week. This they find to be so effective an advertisement that with each change they receive a fresh influx of transient trade. An especially rich and appropriate piece of work seen at their store this week was a casket cover of carnations with a large cross of cattleyas at one end.

A tastefully decorated window was noted at the store of J. W. Rogers on Summer Street. The display consisted of red-tinted oak leaves and yellow chrysanthemums essentially different from the usual autumn display. The majority of windows so far seen show an excessive use of foliage, whole sheaves of it, in fact. Too much fall foliage would seem to suggest a scarcity of other stock.

Chrysanthemums are rapidly appropriating the center of the stage in the wholesale markets. Already Major Bonaffon—usually much later in appearing—is in the van and the Budlong Rose Company are duly elated at being the first to show it. This firm counts Chas. Razar as one of the best market whites. Chieftain as grown by C. S. Andem of Putnam, Conn., has rapidly attained popularity with the buyers this season and among the pompons that sell well is Charles Kingsley which is a specialty with J. K. Chandler & Son of Tewksbury. Newport, R. I., is also taking a try at the Boston outlet, William Jurgens being in with a vigorous line of yellow pompons.

KNOXVILLE, TENN.

Karl P. Baum, manager for Chas. L. Baum has been on the sick list, but is better now and able to get back to business again.

Bruce Howell was doing something about the engine of his new auto truck when his hand was caught in the fan and badly disfigured. He is again able to make use of it.

Chas. L. Baum reports making several wholesale shipments, but nothing like enough to take up the surplus; however, regular shipments to points in the south, will soon consume his entire output.

On Friday the Girls' Cottillion Club gave a Cotton Ball using cotton balls for boutonnieres for their gentlemen escorts, which was quite a novel feature; Crouch furnished numerous corsage bouquets for this occasion.

The Knoxville Florists' Society through a committee has set aside Saturday and Sunday, November 7th and 8th as Chrysanthemum Day, and it will be observed by all the cemeteries in and about Knoxville. This day will be advertised through the local papers in a co-operative way, as it is found that better results are obtained by this mode of advertising.

SAN FRANCISCO.

Peter Perkins has just opened a new flower shop at Visalia, Cal.

The Sies Floral Company of San Diego has been holding a reception and flower show at its gardens in East San Diego for the last week.

Construction work in Joseph's new flower shop on Grant avenue is rapidly nearing completion, and will be ready for business soon after the end of the month.

Neal Childs, who was formerly in the U. S. Forestry service in this state and more recently engaged in educational work in a similar line in the east, is starting business as a landscape engineer in Oakland, making his headquarters at a new flower shop at Fifteenth and Clay streets.

M. H. Ebel of Sacramento was a visitor in San Francisco this week, and made a motor trip to the Palo Alto show, in company with Daniel MacRorie. On his visit to San Diego last week, Mr. MacRorie enlisted hearty support among the southern florists and attending nurserymen for the S. A. F. convention to be held next year in this city.

G. Rossi, has returned from his vacation and is getting ready for the busy season. His company has just finished the construction of three new greenhouses at Ocean View, this city, and will shortly start work on another and larger one. This firm is now handling quite a lot of madrone berries, and looks for a liberal supply of red berries by Thanksgiving.

Practically every florist and grower of the San Francisco Bay district who can get away is making the trip to Palo Alto for the flower show conducted under the auspices of the Menlo Park Horticultural Society. Some of the finest flowers in the state are grown in that district, and an unusually large and fine exhibit is expected. Several of the San Francisco people went down for the opening.

The annual convention of the California Association of Nurserymen at San Diego last week was quite a successful and well-attended affair. Many interesting talks were given by leading nurserymen from all parts of the state. One of the best entertainment features was the visit to the Panama-California Exposition, the landscape work of which is practically complete. This trip was made by over 100 of the visitors. The affair closed with a banquet at the U. S. Grant Hotel. Fred H. Howard was elected president for the ensuing year.

WASHINGTON.

Charles Scarborough is expected back from his father's farm in New Jersey to accept a position at the store of Gude Bros. Co. Edward Wilson has also returned to business.

The next regular meeting of the Florists' Club of Washington will be held on Tuesday evening, November 3. This promises to be a very interesting affair and it is the desire of President Cooke that the attendance be large.

The 14th annual chrysanthemum show of the Department of Agriculture opened on Thursday, October 29, with about 1800 plants on exhibition, at the Government Gardens. The display will continue for eight days, open from 9 A. M. to 9 P. M. daily, including Sunday.

Fred H. Kramer, florist, 916 F street, Northwest, and T. A. Lucas, landscape gardener, are prominently mentioned in the report of Maurice Otterback, of the Anacostia Citizens' Association, in connection with the making a success of the town garden at Anacostia.

O. A. C. Oehmler last Wednesday donated a quantity of roses which were sold at his store by the members of the company of players now appearing at Poli's Theatre. The ladies acted as salesgirls, while the men wrapped up the bundles, etc. The proceeds were turned in to the Red Cross war relief fund.

A "bargain counter" is an innovation at the Washington Florists' Company's store, considerable space at the front of that establishment being devoted to the sale of flowers in season at tempting prices. The counter is built somewhat in arbor shape, having a roof made of oak leaves and branches, and ferns and palms are used to mask the sides. A rustic lamp is hung in the center and around the edge of the roof, on the inside, are hidden electric lights.

Just before Congress adjourned, the Committee on the District of Columbia made a favorable report to the House of Representatives on the Dent bill designed to prevent fraudulent advertising in the District of Columbia. The bill provides that advertisements containing any assertion, representation or statement of fact which is willfully untrue, shall be a misdemeanor, punishable by a fine of not more than

\$500 or imprisonment for not more than six months, one or both.

"There is no reason why the florists of Washington should not have a very good season, regardless of the present condition of business and the fact that there will probably be no formal social functions at the White House this winter," said a well known retailer to the HORTICULTURE correspondent. "Those of the caterers who handle the larger social affairs state that they are daily receiving requests for bids on large jobs, and these may be taken as forerunners of additional business for the florists. Then again, with Europe in such an unsettled state, the many Washingtonians who usually go abroad during the cold months will probably retain their residence here during the entire season. With all of these things in mind, I cannot possibly see that business will remain so quiet and there is no doubt but that other cities will benefit in a like manner."

CHICAGO.

Mr. and Mrs. H. C. Wullbrandt are in Georgia, looking after the harvesting of their crop of pecans.

Indianapolis bids fair to be a rallying place for florists of the middle west, Nov. 6-8. With the big flower show, which will in itself be a great attraction, comes the joint meeting of the State Florists' Associations of Illinois and Indiana. Chicago and vicinity will be well represented both in attendance and exhibits.

The disappearance of the window boxes in the business district show not only that the summer is over, but also that the softening and beautifying effect on the streets bordered by high buildings was no small matter. The window-box movement in the loop was started two years ago and this summer it reached large proportions, running into miles.

The wish of the florists is at last fulfilled. Jack Frost came on the night of Oct. 26 and he did not go tiptoeing around but jumped into the game with both feet. The thermometer dropped to 20 degrees and every flower and vine is gone. From summer to winter in a single day with a snow storm thrown in is the 1914 record. The florist who is not happy now has made a mistake in locating the cause of his troubles.

John Poehlmann finds the Mrs. Russell rose to be all that they had expected and more. To see the daily cut at that store would convince anyone that Mr. Poehlmann was fully justified in his high opinion of the Mrs. Russell, which brings 20c. each for the 36-inch stock this month and has fallen below that only a few times this summer. Mr. Poehlmann says also, that the Hadley and Mrs. Sawyer are doing well, and may prove to be equally valuable later on. They have not bloomed, however, as has the Mrs. Russell.

F. Oechslin's greenhouses present a very busy scene at present. The recent arrival of three car loads of azaleas and several smaller shipments means work in potting up. The large quantity of tulips, narcissi and hyacinths are going into the pots and pans and the large bulb house, 22x115

THE JOHN C. MEYER THREAD CO., LOWELL, MASS.

In writing advertisers kindly mention HORTICULTURE.

BE SURE that you get the MEYER GREEN SILKALINE, and do not take any other that is sold as an imitation of the MEYER GREEN SILKALINE, as they do not have the full weight, measure and strength of the genuine article. All our GREEN SILKALINE is guaranteed up to the high standard and mark. The sizes are F, fine; FF, medium; FFF, coarse. It is for sale by all the best jobbers. If you cannot get it of your jobbers, order direct of the manufacturer.

feet, is rapidly filling up. A large number of cyclamen are coming into bloom and all are of named varieties. In pot chrysanthemums only standard varieties are grown and of these one-half are pompons. The new begonia, Florence Davenport, is showing up well, being nicely covered with buds, well above the foliage.

Ernest Oechslin was severely injured Oct. 23, when his auto truck collided with a street car, and he is in a critical condition at the Washington Park Hospital. The driver was running the machine south, just behind a street car, which made a quick stop at a crossing. The machine, for some reason, could not be stopped and the driver turned to the left to avoid running down passengers from the car, and met a north bound car. Mr. Oechslin was thrown through the wind shield to the curb and has since regained consciousness only at brief intervals. The driver was also injured, but not so seriously. Mr. Oechslin was the victim of an accidental shooting about four years ago, from which he has only lately recovered. His greenhouses are at Madison street and Gale avenue, in River Forest, and had extensive additions last year. Mr. Oechslin has a wife and three small children and their many friends hope for his speedy recovery.

DIAGRAMS SHOWING FLOWER MARKET FLUCTUATIONS FOR TWO YEARS.

1912—Violets per 100—Singles.

1913—Violets per 100—Singles.

Growers of roses, carnations and violets will be interested in the diagrams herewith presented, showing in tabulated form the mean wholesale market prices for these specialties as quoted from week to week in the four trade journals for the years 1912 and

1913, in Boston, New York and Chicago. The fluctuations as shown in these three markets, while exceedingly erratic at times, seem to maintain a fairly regular relationship to each other as a whole. We think there are in this concise, comparative summary of two years' trade many points which

will be quickly discerned by the studious grower, from which valuable deductions may be drawn. Should it thus impress our readers and prove as useful as *HORTICULTURE* hopes, we shall make of it an annual feature, perhaps including other markets and other important crops.

BOSTON FLOWER EXCHANGE.

The Boston Flower Exchange Corporation had its annual meeting and dinner at Young's Hotel on Saturday evening, October 24. About 125 stockholders, salesmen and invited guests were present and enjoyed to the fullest extent an elegantly served banquet, over which President Stickel presided with an easy grace, part inborn and part acquired by oft repeated experience. Business followed the banquet. The treasurer's report duly audited showed a very auspicious financial condition, total receipts \$20,827.17, running expenses \$19,313.88 for the year. The statement of condition shows a net gain of \$9,729.19 for the period 1910-14. The regular slate for board of directors, nine names, was added to by a number of direct nominations, but when the ballots had been counted the regulars were all found to be elected by overwhelming majorities. During the long counting of the ballots there was some speaking, singing and plenty of music by the orchestra. Wm. J. Stewart was first called upon as the "dean of the horticultural press." He urged loyalty to the horticultural prestige of Boston and New England and complimented the members on the hopeful spirit which seemed to permeate this occasion, although coming at a time when more or less talk of bad times is rife. W. N. Craig being next called upon, said that the outlook was not exactly encouraging; that increased production and diminished purchasing present a disquieting problem and bring to the front the necessity of finding a way to increase public distribution. Wallace R. Pierson made optimistic remarks and told some stories from the New Brunswick hunting country from whence he had just returned. W. H. Elliott predicted more and more flowers in the Boston market and at lower prices. He deprecated the reluctance of the retailers generally to encourage a more elastic

outlet. Charles Robinson declared business to be as good as it was at the same period last year. The credit system as prevailing in the wholesale flower markets was vigorously scored by Mr. Cummings. He contended that it should be abolished entirely and the cash system followed as in the wholesale vegetable market. Then followed an animated discussion participated in by Messrs. Elliott, Pierson, Cummings, Donohoe and others in which the unwise conditions were acknowledged but the adoption of cash settlements was pronounced impracticable by all except Mr. Cummings. Natham Lenard sang two songs very acceptably. A rising vote of thanks was extended to Messrs. Alex. Montgomery and Wm. Nicholson, for their long service as directors, from which they had now voluntarily retired. Auld Lang Syne in chorus closed this very enjoyable reunion.

WINDOW ADVERTISING.

The majority of retail florists do not begin to make enough use of their windows. Some of them might just as well be doing business in one of the upper stories of their buildings.

Suppose you pay \$4,000 rent for the store on the street floor. You could probably hire the whole second story for \$1,000. That means that you are paying \$3,000 for your show windows. Do you make them earn that much?

The man who never changes the text of his advertisements merely pays for a sign, just such a sign as he uses above his windows to let people know that he is in the business of selling flowers. Advertisements in order to pull trade and results, must tell a story and tell it convincingly and differently with every insertion. Otherwise the ad. is just a sign of existence.

So it is with a window display. Get people into the habit of looking for

your decorations. The florist who changes his windows twice or three times a week stimulates and renews public interest in his establishment that many times each week.

We have in mind one florist who has had the same character of window display for the last two years. It was effective once, but now people who pass by the store no longer look into the window for some thing new or interesting. They now know that the same stock in the same old way will be shown and consequently—no stimulation of interest and desire to buy. The public does not like to be told the same monotonous tale in the same old way. Give them something new or at the very least tell about or show the same thing in a new way.

The opportunities in window advertising are manifold. Think of your window as a personal affair. Make it alive. Make it tell things to the passerby. Make it a subject of comment. Good advertising is a good investment, and the best advertisement in all the world is the wagging tongue of the satisfied customer or interested observer.

A new defender of the pheasant, which is being slaughtered throughout the state of Massachusetts, has come to the front in the person of Joseph H. Mosher, superintendent of the state hatcheries at Wilbraham. Mr. Mosher says:

"Beetles, grub worms, all crop-destroying insects fall victim to the pheasant. It is, indeed, too bad that someone cannot stop their slaughter, as the majority of people do not know even one-half of their benefit to humanity. When I lived in Winchester, at a time when the gypsy moth was destroying trees and working havoc in the town, I let loose a flock of pheasants in the pest-ridden area. Within a few months every gypsy moth had disappeared. The pheasants had eaten them all."

—Boston Traveler.

Flower Market Reports

BOSTON The market is still in a slump. All kinds of stock are hanging fire with no buyers offering to move them. The retailers are making continual complaints of poor business and thus are very reluctant about helping to move the over-abundant crops in the hands of the wholesalers. The weather is getting a little colder, but the demand is not increasing. The quality generally, in all sorts, is very good. The early varieties of chrysanthemums are "petering out" and are being rapidly replaced by the mid-season kinds, which, although of fine quality, cannot procure the prices they deserve. We can hope for a stirring up of the market with colder weather and an increase in social activities.

The receipts are still heavy in all lines. Chrysanthemums of the late varieties are coming in and some choice Halliday, Chrysolora and Caprice, have sold quite satisfactorily. The early varieties are about over. There are also some good pompons and these have sold satisfactorily. Roses continue plentiful and there is an exceptional lot of carnations in the market which do not sell as fast as they should. Violets are improving daily and lily of the valley and orchids are here in quantity.

CHICAGO October is keeping up its record of light business and trade in general continues slow. Now that a frost has put an end to outdoor flowers, an impetus will undoubtedly be given to the sale of indoor stock, and will find the florists ready to take advantage of it. The rather sudden shortening up of the rose crop, which had been on for many weeks, made quite a change in the attitude of the buyer who must pay the price if he would have the stock. Chrysanthemums are more and more in evidence each week and the supply is very large. Every size and color are here to appeal to customers and it is not to be expected that all will be disposed of to advantage. Carnations are having a larger part in the sales as roses become scarce. The warm weather has not made them of as good substance as might be desired and the chrysanthemums have been formidable rivals. The violet sales will be more steady with the cooler weather and lily of the valley is expected to be more in demand. The sales of the latter however have been fair during the month.

Almost everything in the market continues in a large supply. **CINCINNATI** The outdoor flowers are about over for

KILLARNEY BRILLIANT

This new Rose is very fine indeed at present—magnificent in coloring and perfect in form and finish. Deep brilliant pink, heavy buds, splendid foliage and long stems.

the season, but chrysanthemums are coming in good and strong and are making up for any deficiency caused by the end of the dahlia and cosmos season and are keeping up the crowded condition of the market. Business last week was somewhat quiet but shipping business is good. The rose supply is as large as during the past several weeks and is meeting with the same indifferent demand. Carnations are more plentiful each week, but as yet do not enjoy a real active, steady demand. Lilies have no especial call. Lily of the valley sells pretty well, but orchids have a rather indifferent market. Greens of all kinds are plentiful. New boxwood and new "Mexican ivy" were added to the list last week.

KNOXVILLE, TENN.

The weather here is still very warm, which is rather against the flowers as out-of-door flowers are still plentiful, and the demand for greenhouse flowers is not as great as it might be under more favorable conditions. Flowers of all kinds are plentiful; especially chrysanthemums, which are very

fine. Dahlias are still blooming, but it seems that chrysanthemums have taken their place, as there is not much demand for them.

NEW YORK

The wholesale market this week, if anything, is not quite so good. Chrysanthemums are very much more in evidence, especially yellow varieties, and the finest blooms are being sold for as low as \$8 per 100 in large lots. If there are any in better demand it is for the white and pink varieties. The American Beauty market is in bad shape and cattleyas are hanging fire at very low figures. Lilies are suffering severely and prices have declined to a point as low as has been reached heretofore. The prices shown in our quotation tables do not show the situation as it really is. The amount of material accumulating from day to day and finally lost completely is and has been very large. Sweet peas are beginning to show up in the stock of most wholesalers. The frosty snap in the middle of the present week has cut off most of the outdoor stuff for this season.

Flower Market Reports

(Continued from page 3)

There has been very little change in business conditions. Outdoor stock has been coming in, in large volume and the same low prices prevailed. Dahlias, outdoor chrysanthemums, and cosmos are the principal black beasts of the situation. Indoor chrysanthemums big and little in immense quantity and variety are of course the dominating feature just now and lead the procession. There are some splendid specimens among them—really exhibition blooms. Mrs. Chas. Turner, white, and Chieftain, pink, are two of the extra fine ones seen at Niessen's. Chrysolora is also fine. Cattleyas are in good supply and of fine quality. Dendrobium, oncidium, and cypripedium follow up by way of variety. Bouvardia in its three colors has greatly improved in quality and quantity and at present is cutting some little figure in the market. While the carnations are better, and more of them, the market somehow was not particularly brisk. Not so many roses. The growers seem to be pinching for a better market later on. A few stragglers in the aster army yet to be seen, but we are all ready to kiss them goodbye now.

The market was quite strong last week—not in demand but in quality and quantity. From the demand standpoint the retail business is dull and it seems that it's only funeral work that keeps the store men alive nowadays. Whatever demand there is daily at the wholesale houses is for chrysanthemums which of course is the seasonal flower, but this makes it bad for other stock and especially so for roses and carnations which seem to have but little or no demand and all are on crop. Prices on every thing are low, the only flowers that keep any even prices are lilies and lily of the valley. A good frost is badly needed to kill off the outdoor stock which is still very heavy in this market.

Except for chrysanthemums which are going out on a larger scale than ever, the wholesale shipping business is gathering headway rather slowly. There is plenty of stock, but the demand from outside markets has not yet developed to any great extent; and while some violets are going as far east as Chicago, a great deal more business could be handled without difficulty. Shippers, however, look for a good normal business between now and the holidays. Business in this immediate vicinity, though it might be better, gives no ground for complaint; the leading retailers being pretty steadily occupied with large orders. Chrysanthemums have of course lost their novelty by this time, but it can hardly be said that the demand is any less active. In fact, this has so far been a very successful season for chrysanthemums in every way. Carnations are now coming in quite freely, and the quality in general is very satisfactory. The supply of roses is gradually increasing but a good many growers, who are

& Spren (100 bunches)	15.00	to 25.00	15.00	to 30.00

making special preparations for the late fall and winter trade, will have little to offer for another fortnight or more. The average quality of current offerings also shows some improvement. A large crop of orchids is coming into the market, and many very beautiful varieties are now appearing. Among the most desirable are Cattleya Bowringiana, and Oncidium varicosum Rogersii.

The demand for roses has not been as strong as could be desired, but this same condition holds true of all indoor grown stock due to the great influx of outdoor chrysanthemums, cosmos and dahlias. Sunburst and Mrs. Shawyer roses have been bringing from \$2 to \$8 per hundred. The top price for Radiance has hovered around \$6, with few going at that figure. Hadley roses are being held at prices from \$6 to \$12. Carnations have improved greatly, but are still going at little money. Lily of the valley holds good at \$3 to \$5. Orchids have been quite plentiful and good Cattleyas now bring \$5 per dozen, but neither these nor the gorgeous spray orchids now to be had are in much of a demand. Violets are coming in a little stronger and Fire Flame roses are in fine shape. Potted pompon chrysanthemums are moving well. Cut pompons are being sold at \$1.50 per dozen bunches.

**IMP.
SOAP SPRAY**

Is a scientifically prepared compound that is highly efficient for ALL insect pests. Why bother with several sprays when this will answer every purpose throughout the year?

LOOK FOR THE IVY LEAF TRADE MARK.

Ask your dealer or write

EASTERN CHEMICAL CO., BOSTON**Scotch Soot**

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. sacks, at:

\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

LONG ISLAND CITY, N. Y.

IF YOU ONLY KNEW what a good have the METROPOLITAN PATENTED is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the give is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

Telephone Connection.

The Greenhouse and Garage

YOU will agree with us that this arrangement is unusually attractive. We are often confronted with the statement that "we like the greenhouse, but do not care to erect another building for the work-room." Now that is just where we can help you.

It is impossible to imagine a more practical, or economical layout than this splendid range of glass erected at Germantown, Pa. Was the owner satisfied? We will be only too glad to tell you how we built last year the first house, and have just added the other two. A positive assurance that the owner was pleased with our methods and our type of construc-

tion. Nearly all our work this year has been "repeat orders." This work is particularly gratifying, and proves conclusively how well the owner was pleased.

There are many special features on the Lutton House well worth your careful consideration. We cannot tell you all about them here, but will be glad to explain them to you in detail if you will afford us the opportunity, or better still, inspect our full-size greenhouse erected complete in the largest Railroad Terminal in the country: Grand Central Station, 42d Street, New York City. You will then be convinced of the superiority of our houses.

Purlin and Header Used In Our Reconstructed Construction

SPACING the rafters four feet wider apart than in our old standard construction, necessitated making the purlins a bit larger. This larger purlin, however, when secured to the rafter by the usual short steel knee, might have a tendency to sag a bit. To prevent even the possibility of such a thing, we designed a special fitting which extends several inches along both underfaces of the purlin.

It serves the purpose of both a lug and a brace.

You might think that the larger purlin, with this Lug Brace might make the frame look rather heavy. But it doesn't. You see you have a third less rafters, posts

Rafter, rafter cap, purlin and special Lug Brace securing the purlin to the rafter.

The vent header rests on the purlin and is screwed firmly to it.

and columns which gives so much lighter an effect that the purlins and Lug Brace are in perfect proportion to the rest.

The ventilation sash header is placed on top of the upper purlin, and screwed securely to it. The header is grooved out to receive the end of the glass, making a tight joint. Drip from the sash is carried off by the header gutter.

The next Ad. will take up the ridge and truss in our Reconstructed Construction, as still further evidence of your being able to depend on depending on Hitchings. And we go anywhere for business or to talk business.

Shows house of Louis Dupuy at Whitestone, L. I. It is 35 feet wide, built on a side hill. Our Reconstructed Construction, using only one column, is a decided departure in a house of this width, so located.

Miscellaneous Stock

A few items every florist needs. For complete list send for catalog No. 5. Send us your list of wants.

CALADIUM ESCULENTUM—Good bulbs with sound centers: 5 to 7 in. circumference, \$2.00 per 100; 7 to 9 in. circumference, \$3.00 per 100; 9 to 11 in. circumference, \$6.00 per 100.

BEGONIA, TUBEROUS ROOTED—Bulbs large from one of Belgium's best growers: Single Separate colors, \$2.50 per 100, \$22.50 per 1000; Single Mixed colors, \$2.25 per 100; \$20.00 per 1000; Double Separate colors, \$4.50 per 100, \$40.00 per 1000; Double Mixed colors, \$4.00 per 100, \$35.00 per 1000.

GLOXINIAS—Fine sound bulbs in separate colors, \$4.00 per 100, \$35.00 per 1000.

RHODODENDRONS—A fine lot of hardy sorts, in plants full of buds and with good foliage, 18 in. high, 8 to 12 buds, \$9.00 per doz.; 24 in. high, 12 to 14 buds, \$12.00 per doz.

AZALEA MOLLIS—Bushy, well budded plants, 15 to 18 in. high, \$35.00 per dozen.

DUTCHMAN'S PIPE—Aristolochia Sipho, tops 4 ft. long, a grand vine for shade and cold exposure, \$3.50 per dozen, \$25.00 per 100.

MAGNOLIA—Fine well budded plants, with ball of earth, burlapped; all varieties, White, Pink and Red, 4 to 5 ft. high, \$1.50 each. Stellata or Halleana, early star shaped white, 2½ to 3 ft high, at \$1.50 each.

ENGLISH IVY—Two or more shoots, 3 ft. long, \$12.00 per 100.

The Storrs & Harrison Co.
Painesville, O.

FERNS IN FLATS

All the popular and useful small ferns, including a specially fine lot of Pteris Victorine, \$2.00 per flat. Guaranteed 200 plants to a flat.

CIBOTIUM SCHIEDEI

Fine plants in 8 in. flats, \$3.00 and \$1.00 in 7 in. pots, \$2.50 each.

CYPERUS ALTERNIFOLIUS

3½ in. pots, \$1.00; 4 in. pots, \$1.80 per 100.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil."—*Proverb*.

Care of Young Cinerarias

Cineraria seed that was sown early in August and up to September should now be nice strong plants in flats. Just as soon as they have made enough for a three-inch pot they can be potted off. They like a light and sandy mixture, say three parts fibrous loam, two of not too old leaf mold, and a little sand. They can be kept rather close and shaded for a few days until they have made new roots, after which they can be placed well up to the glass in a cool house. They gain vigor and tone in a temperature of about 45 degrees at night; during bright weather, a day temperature of from 55 to 60 will suit. When they have filled these pots with roots they should be shifted into 5-inch pots. Never let them approach a pot-bound condition until they are in their flowering size.

Freesias for Christmas

The earliest planted batch of freesias should by this time have made good headway. Where they are in boxes, flats or pots raise them well up to the glass, which will help in keeping them from "drawing up." Be sure that the soil is always kept nice and moist, but not saturated. The house should have ample ventilation whenever possible. To be in flower for the holidays they will want a temperature of at least 60 degrees at night with 15 to 20 degrees more during bright days. To enlarge the flower and lengthen the stem they should have liquid manure once a week and up until they show color.

Dracaena indivisa

We are now running into shorter days which limits the allowance of fresh air, so take advantage of every good day to give ventilation; this will help to harden the plants before winter sets in. In dark or rainy weather firing should be run more brisk which will permit of more ventilation to hold the atmospheric condition of the houses right. Watering can be overdone as well as too little. They like to be kept moist at the roots, but not to such an extent as to cause any sourness. Keep the atmosphere moist by damping down two or three times a day. Keep a night temperature of from 55 to 60 degrees.

Syringe overhead in the morning of bright days and keep the floors and benches well dampened. Sponge frequently for thrips and scale, as they soon accumulate on these plants.

Potting Geraniums

Now when early chrysanthemums are all out of the way is a good time to pot up the earliest propagated geraniums, which will enable you to get another cutting from each plant by the first week in January. It is always better to use new soil for geraniums. A good compost is fibrous soil three parts and very old manure one part; do not use any green manure. Pot firmly. Water as they may need it, but never keep them soaked as they are better for being dried out once in a while. It always pays to give these plants a good light house as it results in nice sturdy plants. Give them room as they grow.

Schizanthus for Easter

Now is a good time to sow schizanthus. When sown at this date they will make fine plants for Easter in 6 or 7 inch pots. Make a compost of loam, leaf mold and sand, mix well and fill the pans to within an inch of the top. Keep them shaded until the plants begin to show enough through the surface, but after that they will stand all the light and sun that they can get. When they can be handled they should be potted in 2-inch pots and shift afterwards as they may need it until they are in their flowering size. When they are well started in the small pots a night temperature of 45 to 48 will be high enough. Pinch frequently so as to form bushy plants and for the last two or three shifts give them a compost of fibrous loam three parts, well rotted manure two parts, with a little sand. When they have filled their pots with roots they will take plenty of water.

Procure Your Supply of Palms

Now is a good time to lay in a good supply of salable plants of all sizes and the sooner this is done the better. You can get fine stock through the advertisers in HORTICULTURE. When received give these new arrivals a good place in your palm house by themselves so they will have a chance to go ahead.

Mr. Farrell's next notes will be on the following: Cinerarias for Christmas; Irises for forcing; Lillium speciosum; Resting Bougainvilleas; Paper White Narcissus; Planting Hardy Roses.

Chrysanthemums from seed

Anyone who has paid particular attention to the varieties of so-called single early chrysanthemums so profusely exhibited at the shows this year, must have noticed that in every respect—size, form and diversity and purity of color—the groups of mixed seedlings are oftentimes fully the equals of the collections of named varieties. At a banquet which took place recently a large vase of mixed seedling single earlies had been sent in to adorn the table and one gentleman, superintendent of a large estate where the best of everything is always purchased, was heard to remark that he had bought the novelty set for this year of named varieties sent out by one of the leading chrysanthemum introducers in this country and that the best of these was hardly the equal of the poorest in the vase

of seedlings before him. Foreign raisers of these as well as of roses are too prone to give names to things which are no improvement over varieties already disseminated. Catalogues are encumbered with long lists of sorts of commonplace quality and buyers are perplexed and disheartened by the indifferent results from over-praised introductions. It would appear that anyone who will take the trouble to raise his own seed from carefully selected stock can be independent in the case of single chrysanthemums at least.

Our editorial note of last week in regard to the decorative value of the smaller blooming varieties of chrysanthemums and the moss-grown methods still pursued in staging these as well as many other flowers at the exhibitions, has elicited quite a few comments from readers. One writer, in expressing his disappointment at the incorrigible pertinacity with which exhibitors stick to old ways and ignore all progressive suggestions, says that it makes him think of a Dickens story. The driver of the stage coach has always kept a seat on the box for Charles D., and they had become quite familiar. Noting that he never had known the driver to take a holiday, Dickens arranged with the owners of the line for a day's vacation, and a sovereign was given for spending money. What did the driver do? Why he hired a coach and four, and drove over the road he had driven on for twenty years! However, it is very evident that HORTICULTURE's frequent comments on the deplorable stand-still policies which so often hedge around schedule makers and exhibitors alike, are beginning to bear some fruit and there are cheering signs of a breakaway. We shall continue to hammer at it for we know we are in the right. No progressive florist would think of displaying his goods and no person of taste would adorn his home in the crude, monotonous manner in which flowers are so frequently put up for public inspection in our exhibitions.

Welcome work by the Dept. of Agriculture

The Department of Agriculture has begun the issuance of a series of bulletins of popular information on the care of the flower garden and allied topics. These bulletins are sent to the newspapers throughout the country and to other mediums through which the educational information they contain may have the widest possible dissemination. We notice what appears certainly to be a mistake in a recently issued bulletin, otherwise correct and instructive, on the uses and the treatment of tulips and other bulbs. It is stated that "Holland bulbs, such as the narcissus, tulip and hyacinth, are practically the only plants that will flower satisfactorily in the house with ordinary care. About the only plant giving similar satisfaction is the begonia." Thousands of home windows gay with geraniums, abutilons, gloxinias, callas, primroses and a score of equally adaptable subjects all winter through, make this statement so absurd that the credibility of the rest of the bulletin must suffer seriously in the estimation of the innumerable housewives who know better. But, as aforesaid, these publications are in the main correct and instructive; they are well written in easily understood terms and will undoubtedly do much to disseminate needed knowledge as to horticultural operations in and around the home. We are glad to see the Department thus broadening its field of activities and giving this long-deferred but well-merited recognition to the purely ornamental end of horticulture. The bulletins issued thus far include: "To protect your flowers from Jack Frost;" "Tulip bulbs should be planted in the late fall;" "Bulbs may be raised indoors;" "Fall fertilizers for lawns;" "The indoor window box;" "Potted plants for the living room."

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Last Chance For Repairs

Snow has appeared here and there all over the northern section of the country. The squalls that it came in were miniature storms, sent out as it would seem, to warn us of what is coming later on in the winter. With this in mind it will be a wise grower who will take the last chance and go over his houses if he has not already done so, and see that all is in good shape, all loose glass taken out, and securely fastened, after being imbedded in fresh putty. The work is much more pleasant now when done on a nice day, than it will be later in a storm with the wind blowing about fifty miles an hour from the north pole. All crevices, and all broken glass that is likely to make trouble should be seen to, and will insure the growers a much more peaceful mind when the storms do come. The coal bill can be decreased a little by having the houses tight. Among the old houses of the three-quarter-span type, there will no doubt be some that will need bracing to keep them up should a strong wind come with damp snow. It is not very nice to plough through the sleet at night to do this work when the storm is raging. Better do all repairing now, and have it done.

Ventilation

The season having advanced, every possible care should be given to ventilation, as this has a good deal to do with the successful growing of roses. See that the houses are not closed down tight unless the temperature outside falls to 28 or 26. Otherwise it is best to keep a crack of air on all night long. This will apply especially to new houses, or to houses that are kept up in extra good shape, for these are bound to be tight, and will hold air much more than the old leaky houses found on a good many places. It will also be advisable to run the houses a little cooler now. Do not let them run much more than 66 deg. F. on cloudy days, and not more than 78 on clear days. Putting on air should begin in the morning as soon as the thermometers show an increase of four degrees over the night temperature. Then apply a little more air as the temperature rises, say a little for every three or four degrees until the highest temperature for the day is reached, and keep it there until it naturally begins to decline in the afternoon. Always aim to have the houses open at least a little bit when the sun is shining, a practise that applies at all times except in the extreme winter when the sun's rays are not so strong, and when the weather is extremely cold. Be very careful to see that there are no sudden changes in temperature, as that makes ideal conditions for mildew to start.

Night Temperature

Try to maintain the same heat all night, unless you want to vary it during certain hours for the benefit of the plants. Make sure that your thermometers are right, and that they register the right temperature. We had trouble once with a house running very uneven, and had it not been that the night man was very trustworthy, he would have the blame for this. However, other houses were all right, and the trouble was finally located in the recording thermometers that were used there. Just before the winter season sets in it is well to collect all thermometers, and after carefully marking them as to where they belong, test the whole bunch, and discard all that have a tendency to show that they are not registering true. It will pay to do this, when we consider the important part that the thermometer plays in rose growing, and yet these silent helpers are seldom questioned as to their reliability.

Syringing

We can easily say that the weather has been ideal for growing not only roses, but other greenhouse stock as well. To hope that this will continue would be asking too much, and there is nothing like being ready for a dark spell of weather should one arrive. Therefore, it will be of advantage not to lose a chance to syringe when the weather is fit, and try to clean out all possible traces of spider. Then if some dark days do come there will be little to worry about, for if the plants are free from this pest they can go quite a while without syringing. There are growers who syringe regardless of weather, but we prefer to stick to some of the old ideas even though they are a little old-fashioned at times. Therefore we would advise all not to syringe unless the day promises to remain clear, and when the plants are not too dry. Syringe in the morning, always, and never fail to shake the plants well after they are syringed. This will take away all the water that hangs on in drops, and it is surprising how much quicker the plants will dry off. Use plenty of pressure, as much as can be used without tearing the plants all to pieces. Syringe as quickly as possible, and always take three rows from the back of the bench, and only one from the front. This will throw the largest part of the water to the front of the bench where the plants will be in better position to stand it. Be careful to clean the corners well, and also wherever the hose meets between the faucets. Use good hose, for there is nothing to be gained by mending hose that is so old that it falls apart. Sell that to the junk dealer, and save your men a lot of trouble and nerve racking by giving them good hose. Men who use it carelessly will need a little looking after, but these are few we hope.

Mr. Ruzicka's notes for next week will be: Lime; Damping Down; Fumigation; Cuttings; Disbudding; Old Beauty Plants; Sand.

THE EXHIBITIONS

THE BOSTON SHOW.

The time-honored annual Chrysanthemum Show of the Massachusetts Horticultural Society was held at Horticultural Hall, Boston, on November 5 to 8, inclusive. It was a good exhibition and well merited a much larger attendance of visitors than was accorded it. The spectacular trained bush plants which formerly give unique dignity to this event are no longer seen but these, if present, would have no particular effect upon the public patronage of the show and there were other prime attractions of recent introduction which should have more than offset the absence of these marvelous products of the gardeners' art. The extensive groups of foliage and flowering plants which flanked the big hall on either side were an indispensable factor in the general effect and were very creditable to the exhibitors. The 1st prize in both classes—300 sq. ft. and 150 sq. ft.—was won by W. W. Edgar Co. Both groups were grand but we liked particularly the light graceful arrangement of the latter, due largely to the free use of pink and white speciosum lilies. The imposing group of R. & J. Farquhar & Co., which did not compete, was recognized by the award of a special silver medal and it was an excellent example of good taste in color placing, especially in the massing of geraniums in pink, white and scarlet.

The orchid groups were also among the prime attractions, the principal exhibitors being F. Dolansky and J. T. Butterworth, both commercial men. We have seldom seen a healthier, richer collection of cattleyas than were staged by Mr. Dolansky in his first prize group. These were interspersed with phalaenopses and Dendrobium Phalaenopsis. J. T. Butterworth had a very graceful group in which oncidiums and odontoglossums figured strongly. J. S. Bailey had the specimen plant groups all to himself except for A. N. Davenport who captured one first and got the silver medal for the best chrysanthemum plant on exhibition. In the commercial chrysanthemum plant groups, Wm. H. Elliott was invincible, as usual. Palms of high degree from Wm. Whitman, Mrs. Frederick Ayer and Mrs. J. L. Gardner, Lorraine and Cincinnati begonias from Mrs. Lester Leland, E. A. Clark and W. W. Edgar Co. completed the winning exhibits in the competitive plant classes. E. S. Webster, gard. Wm. Downs, received a silver medal for three plants of the new Begonia Mrs. Heal and Mrs. Lester Leland, gard. E. H. Wetterlow, a cultural certificate for Begonia Turnford Hall. Edw. MacMullin was recognized with a gratuity for plant groups, T. T. Watt for Platycerium alcicorne and other curious subjects seldom exhibited, and Breck-Robinson Co. for evergreens, Lorraine begonias, etc. Axel Magnusen showed a seedling dark red salvia, too somber and dull in shade to be desirable.

The cut flowers shown in the various classes were the equal of any we have ever seen. H. E. Converse, gard. D. F. Roy, and E. A. Clark, gard. Alex. McKay, were the leaders in most of the Jap. classes with superb

blooms. Not far behind them were Mrs. Lester Leland, W. S. Russell, Galen L. Stone, H. W. Vose, Chas. D. Sias and Mrs. Lothrop Brown. Pompons and singles were shown in great profusion by F. P. Putnam, Mrs. Fred Ayer, Miss Cornelia Warren, E. J. Norman and others. While all these were really very fine yet we must say that the varieties shown by F. P. Putnam and the way they were staged and labeled were the best we have ever seen anywhere. Fully one-half of the many varieties shown by him were seedlings and they were the peers of the named sorts.

One of the best features of the show and a very potent attraction for the visitors was the competitive display of long stemmed chrysanthemums arranged for artistic effect with autumn foliage, in big vases. There was a good number of entries, 1st and 2nd awards going to W. W. Edgar Co., and 3rd to Mrs. J. C. Phillips. These large vases together with the dinner table decorations which we fully described in our issue of last week, filled the greater part of the lecture hall.

There were some fine carnations from A. A. Pembroke, who took 1st in the six vases of fifty each, vase of one hundred mixed, and fifty mixed. S. J. Goddard and Strouts got the 2nd awards. Peter Fisher showed Alice in nice shape and received a first class certificate for it. Littlefield & Wyman and Edw. Winkler each got honorable mention for a seedling carnation. There was no competition for the rose prizes, but Waban Conservatories showed the new light pink Mrs. Moorfield Storey and won a silver medal with it. Mrs. E. M. Gill showed some dipladenias and allamandas.

The fruit and vegetable section was well filled with fine displays of exceptional quality. The innovation of introducing autumn foliage, berries, etc., among fruit collections worked very satisfactorily, modifying the monotony of the rows of plates of apples, etc. E. M. Bruce of Leominster and Parker Bros., of Brookfield were 1st and 2nd respectively for collections of apples so decorated. Edw. MacMullin won the 1st prize and silver medal for an elaborately adorned and rich collection of native and foreign fruit arranged for effect. The most sensational display in the vegetable section was made by the Boston Market Gardeners' Association. It contained forty-two bushel boxes of forty-two sorts of high quality vegetables. The silver medal offered for collection of vegetables exhibited by seedsmen was won by Thos. J. Grey Co.

CHICAGO SHOW.

The Horticultural Society of Chicago held a show at the Art Institute Nov. 9 and 10. The display was not large, but there were some fine blooms and plants shown, the latter mostly in the bush form and in commercial sizes.

There were no cash prizes offered, and only silver and bronze medals with certificate of merit for novelties, and a notice that no cut flowers aside from chrysanthemums and novelties of other flowers, and plants could be received. Notwithstanding these limitations, the display was suf-

ficient to fill three rooms and the foyer of the Art Institute.

The principal exhibitors were Vaughan's Seed Store, Poehlmann Bros. Co., Mt. Greenwood Cemetery Association and E. G. Hill Co., the latter showing Dorner's new rose Hoosier Beauty and a yellow rose seedling of their own, No. 1000.

Chas. H. Totty sent a fine display of pompon and single chrysanthemums, also blooms of the novelties, Mrs. J. Purry Mitchel, white; Mrs. A. S. Watt, white; Earl Kitchner, pink; Mrs. S. Baldwin, yellow; Woodside, yellow.

William Tricker showed his new nymphaea, Mrs. Woodrow Wilson. R. Karlstrom was present with a fine display of novelties in foliage plants from W. A. Manda. Groups of decorative plants were shown by Winterson's Seed Store and Poehlmann Bros. Co. The retail trade was represented by A. Lange and Bohannon Floral Co. with baskets and vases of chrysanthemums arranged very effectively. A specimen plant of William Turner, fully eight feet in diameter, was shown by Mrs. A. C. Allerton and Robert Blackwood. C. S. A. certificate of merit was awarded to Herman Bros. Co., Council Bluffs, Ia., for their new pink pompon chrysanthemum, Queen Marie.

Special silver medals were awarded to Poehlmann Bros. Co., W. A. Manda, Mrs. A. C. Allerton and William Tricker.

Carnations were awarded certificates of merit as follows: J. D. Thompson Co. for Superb, Vera and Hero. Chicago Carnation Co. for Aviator, their new scarlet. The judges were Guy French and Nic. Wietor.

NEW BEDFORD.

The annual Chrysanthemum Exhibition of the New Bedford, Mass., Horticultural Society was held in Library Hall on November 3rd and 4th and certainly reflected great credit on the few who exhibited. Although the exhibitors were few in number the show was not lacking in material and the flowers were as fine as the writer ever saw. The ends of the hall were decorated with groups of foliage plants; the alcoves furnished excellent locations for group displays of chrysanthemums while the center was given up to tables for cut blooms of wondrous size and perfection.

Peter Murray of Fairhaven had a tasty display of palms, ferns and chrysanthemums not for competition, Joseph V. Pierce of New Bedford exhibited a vase of Lady Hillingdon roses of exceptional quality and a vase of carnations in variety which showed excellent culture. A first class certificate was awarded for the roses. James Garthly, formerly gardener for H. H. Rogers, now just entering the florists' field, displayed a fine collection of greenhouse plants, conspicuous among them being several specimens of Nephrolepis muscosa and Nep. magnifica. For these two latter he was given a first class certificate. A vase of 18 blooms of Chrysanthemum William Turner was the centre of attraction, while a vase of 12 Mary Farnsworth was a close second. Among the specimen blooms the following from the

Converse Estate were especially fine—Leila Filkins, Cheltoni, Marquis V. Venosta, Mrs. W. Duckham, Alice Lemon and Adonis.

The awards were as follows:

Group of chrysanthemums arranged for effect, Dr. E. R. Humphries' cup, won by D. F. Roy; 2nd, A. E. Griffin.

Collection of hardy chrysanthemums, H. F. Michell silver medal, won by Peckham Floral Co.; bronze medal by D. F. Roy.

6 blooms, Harry E. Converse, Converse cup won by A. E. Griffin.

18 blooms distinct variety, Galen Stone cup won by D. F. Roy.

6 plants, 6 flowers to a plant, cup won by D. F. Roy.

18 flowers, one variety: Cup offered by T. J. Grey Co., won by A. E. Griffin with a beautiful vase of William Turner.

12 blooms, one variety: Silver medal won by A. E. Griffin with Mary Farnsworth.

Special mention should be made of the groups covering 40 sq. feet, both of which were very fine, competition being close, and the man who could have beaten the cup winner would have had to step some.

W. F. TURNER.

WESTCHESTER AND FAIRFIELD.

Superior quality and tasteful arrangement was a marked feature of the annual fall exhibition of the W. and F. Society held in Germania Hall, New Rochelle, N. Y., Nov. 4-5-6. The largest chrysanthemum bloom was exhibited by Ewen MacKenzie with a splendid specimen of William Turner. A noteworthy feature was the large number of examples of floral decorative work. Twelve baskets, ten centerpieces and fifteen dinner table decorations were in evidence. Pompons and singles were shown in many different ways—pot plants, vases, baskets and also in some of the table decorations, showing the adaptability of these varieties for decorative work. Four splendid trade exhibits were staged and were an attractive feature. Geo. E. Baldwin Co. of Mamaroneck displayed orchid plants in bloom, comprising many rare and choice varieties. A certificate of merit was awarded this exhibit, also to a splendid specimen *Cattleya labiata*. Scott Bros. of Elmsford, N. Y., staged a large collection of singles and pompons, several novelties being awarded a certificate of merit, also their exhibit of *Nephrolepis Elmsfordi*. Scott Bros. were also the winners in the class for 50 carnations with a grand vase of Matchless. The A. N. Pierson Co. exhibited a large and choice lot of chrysanthemums, including singles and pompons, pot plants and cut flowers, for which a certificate of merit was awarded. A certificate was awarded the MacMillan Co. of Greenwich, Conn., for flowers, plants, baskets and made-up work. First prize for table decoration went to Thos. Aitcheson. In the class for ladies only, first went to Mrs. Ewen MacKenzie. Miss B. Scott arranged what was the best basket ever exhibited before this society.

In the bush plant classes W. J. Sealey, E. MacKenzie, A. L. Marshall and Jas. Linane were the principal winners. In the cut flower classes Adam Patterson, Thos. Aitcheson, Ewen MacKenzie, A. Bieschke, A. Wynne, Thos. Ryan, Wm. Whitton, C. Hankenson, P. W. Popp, H. Lehman, Benj. Disley, Joseph Tiernan. In the pompon classes W. J. Sealey, P. W. Popp, Thos. Ryan, Thos. Bell, J. P. Sorenson. Single chrysanthemums: John T. Burns, J. Stuart, E. MacKenzie, C. Hankenson. Vase arranged for effect: 1st, Jas. Stuart; 2nd, Thos. Aitcheson. Vase of 25 sprays, singles: Thos. Ryan. Basket of pompons, 1st, J. P. Sorenson; 2nd, P. W. Popp.

F. R. PIERSON EXHIBIT AT NEW YORK.

The accompanying illustration shows in the foreground a portion of the elaborate collection of *Nephrolepis* exhibited by F. R. Pierson Co., at the Museum of Natural History, New York, also some of the superb vases

Group of flowering and foliage plants arranged for effect: 1st, Jas. Stuart; 2nd, Ewen MacKenzie. Specimen palm classes: Jas. Stuart, E. MacKenzie and A. L. Marshall were the winners. Table plants: 1st, Wm. Graham Greenwich, Conn.; 2nd, E. MacKenzie. Specimen fern classes: Jas. Stuart, A. L. Marshall, Wm. Whitton, Begonia Lorraine; 1st, E. MacKenzie; 2nd, W. J. Sealey. Specimen orchid: Hobart J. Park, gard. A. L. Marshall. Orchid flowers: A. L. Marshall. Roses: J. T. Burns, Louis Wittman, Jas. Stuart, Benj. Disley, W. H. Maginnis, A. L. Marshall, Robt. Grunnert. Carnations: A. L. Marshall, Robt. Grunnert, J. T. Burns, Thos. Aitcheson and Thos. Bell were the most prominent. Violets: 1st, Thos. Bell; 2nd, C. Hankenson. Outdoor roses: 1st, Martin Glendon; 2nd, P. W. Popp. Display of outdoor flowers: P. W. Popp, who also was first for lily of the valley. Bulbous flowers: Jas. Stuart. Annuals: J. P. Sorenson, Essex Fells, N. J. Basket of flowers: Thos. Aitcheson. Stump & Walter cup for vegetables: Joseph Tiernan. Thorburn cup, Adam Patterson. Collection of vegetables: H. Gaut, who also was first for centerpiece for table.

In the other vegetable classes: Robt. Williamson, Owen Hunwick, E. Lewis, A. Patterson, Jas. Linane, Martin Glendon, A. Bieschke, H. Gaut, Robt. Grunnert, Thos. Bell and J. Stuart were successful. Greenhouse grapes: the honors were divided by Robt. Williamson, Adam Patterson. Apples: Wm. Graham. Pears: Thos. Ryan. Outdoor grapes: Henry Gaut, 1st. Muskmelons: 1st, Wm. Graham; 2nd, Owen Hunwick. Basket of fruit and vegetables: Mrs. W. R. Pitt.

The judges were Wm. Turner, Oceanic, N. J.; Jas. Bell, N. Y. City; Samuel Batchelor, Mamaroneck, N. Y.; N. Butterbach, Larchmont, N. Y.; Donald Sheppard, New Rochelle, N. Y.; W. H. Waite, Yonkers, N. Y.

The decisions of the judges were recorded with universal satisfaction.

P. W. POPP.

TARRYTOWN HORTICULTURAL SOCIETY.

The sixteenth annual exhibition of the Tarrytown Horticultural Society was held in Music Hall, Tarrytown, N. Y., on November 4th, 5th and 6th. The exhibits were far superior to those of previous years, both in quality of flowers and plants and their arrangement, the exhibition on the whole being the finest in the vicinity of New York City, reflecting great credit on all who helped to make it such a successful show. There was keen competition in the class for the group of decorative plants, and Wm. B. Thompson and Finley J. Shepard deserve

much praise for the groups shown by them. The tables of decorative plants, were the finest ever shown by the society. The table of orchids by Finley J. Shepard was very beautiful. The exhibits of roses, carnations and chrysanthemums were also especially fine.

F. R. Pierson exhibited a grand vase each of Ophelia and Francis Scott Key roses, each being awarded the Society's silver medal. F. R. Pierson exhibited, also, a fine lot of roses, chrysanthemums, and ferns, which were awarded a certificate of merit. Certificates of merit were awarded also to the following:

Scott Brothers for a fine exhibit of large-flowering, single, and pompon chrysanthemums; Wm. B. Thompson, for seedling verbenas; Finley J. Shepard for seedling *Begonia semperflorens variegata*, Dorothy Gould; Joseph Eastman for Golden Perfection chrysanthemums. A cultural certificate was awarded the Sleepy Hollow Country Club for an exhibit of pumpkins and squash. The table decorations on the second day of the show were particularly interesting, and there was keen competition in this class. A table for exhibition only was put up by Mrs. James Speyer. It was a very artistic creation.

The attendance throughout was very good. On the first day the judges were S. Carlquist, Lenox, Mass., Alexander Mackenzie, Highland Falls, N. Y., and George H. Penson, New Brunswick, N. J.; the second day, James Blair Staatsburgh, N. Y., Robert Williamson, Greenwich, Conn., and Alexander Thompson, Mt. Kisco, N. Y.; the third day, L. A. Martin, Irvington, N. Y., Joseph Mooney, Hastings-on-Hudson, N. Y., and John Featherstone, Tarrytown, N. Y. The public schools were invited to attend the show on Friday.

The list of awards was very lengthy and we shall attempt to give only the most important ones. W. B. Thompson, supt. R. M. Johnson, won the F. R. Pierson cup for the exhibitor receiving largest number of prizes; also the prizes offered by Charles McElroy for table decorations: plants; by W. E. Marshall for cut flowers, cuttings and cuttings; by Peter H. Johnson & Co. for collection of vegetables; and the 1sts in the regular classes. Finley J. Shepard, supt. Chas. R. Russell, won the Mrs. Stuyvesant Fish cup for cut orchids, Henry

Graves, Jr. prize for orchid display, and one 1st in regular classes. Mrs. F. E. Lewis, supt. James Buchanan, won the J. D. Archbold prize for 12 blooms, 12 varieties of chrysanthemums. A. Lewis, supt. John Canning, the Mrs. F. Hermann prize for 20 flowers, 20 varieties; the Mrs. W. C. Osborn prize for 36 blooms, 6 varieties; W. K. Thompson prize for 24 blooms, 12 varieties; Hugh Hill's prize for 12 vases of single and Vaughan's Seed Store prize for 6 plants single stem. Mrs. Carl Vietor, gard. Thos. A. Lee, A. T. Boddington prize for 6 blooms, 6 varieties, and one 1st. Mrs. W. D. Guthrie, gard. Wm. F. Ross, the W. F. McCord cup for vase of 18 blooms. Wm. Rockefeller cup for 18 blooms in 6 varieties, and the prizes by Hugh Hill for best 3 blooms and by Charles Vanderbilt for specimen bloom. Hugh Hill, gard. Robt. Grieve won the H. H. Cannon prize for 12 blooms, 4 varieties; Mrs. C. Neustadt, gard. David Gordon, the Pierson U-Bar prize for 18 blooms, 3 varieties; Miss Blanche Potter, gard. Geo. Wittlinger, Hugh Hill's prize for 12 blooms, 6 varieties, and 4 regular 1st prizes; Charles Mallory, gard. W. J. Sealey, H. Darlington's prize for 6 vases pompons; Winthrop Sargent, gard. F. E. Witney, C. P. Johnson's prize for Lorraine begonias; Dr. L. H. Backland, gard. Jas. Caselli, Burnett Bros.' prize for collection of vegetables.

D. G. Reid, supt. A. W. Golding, won the Stump & Walter cup for collection of vegetables arranged for effect, the special prizes offered by Mrs. J. B. Trevor for 36 carnations, 3 varieties, by H. Darlington for 12 carnations one variety, and by John Wilk for 36 carnations 6 varieties, and five regular 1st prizes. R. Delafeld, gard. William Brock, won the Mrs. Stuyvesant cup for 12 Killarney Queen roses, Mrs. Jas. Speyer's cup for 12 Pink Killarney, A. Lewisohn's cup for 50 roses, R. Langley's prize for 12 White Killarney, an anonymous special for Killarney Brilliant, and two other 1st prizes; Eugene Meyer, Jr., gard. Chas. Ruthven, Mrs. H. F. Osborn's prize for 12 roses, and the Lord & Burnham gold medal for 18 roses, 3 varieties; F. C. Luckenbaker, Mrs. I. N. Seligman's prize for basket of flowers; W. H. Waite, F. M. Warburg's prize for table centerpiece; A. W. Golding, R. B. Dula's prize for bridal bouquet; M. Fitzgerald, special for dinner table decoration.

In the regular schedule classes 1st prizes were also awarded as follows: F. W. Vanderbilt, gard. Henry J. Allen, four; E. Berolzheimer, gard. Wm. Jamieson, four; Dr. C. C. Brace, gard. Geo. McIntosh, three; Richard Langley, two; Samuel Ullmann, gard. Robt. Sharp, two; H. C. Neubrand, Walter D. Blair, Miss Belle Scott, Wm. See, Clarence Whitman, gard. Wm. Will, Mrs. W. H. Pullan, Mrs. J. B. Trevor, gard. Howard Nichols, D. G. Oppenheimer, gard. A. MacDonald, F. R. Pierson, Mrs. F. E. Lewis and Elmsford Nurseries, one each.

Among those not mentioned heretofore who participated in the 2nd awards were Paul M. Warburg, gard. F. C. Luckenbaker, H. F. Osborn, gard. Wm. Ritchie, Joseph Eastman, gard. Robt. Angus, Sleepy Hollow Country Club, supt. A. W. Myers, Mrs. Isaac N. Seligman, gard. M. McPherson, R. M. Johnston, Joseph Erdman, Mrs. Stuyvesant Fish, supt. Wm. MacBean, Howard Soar, R. D. Neubrand, Irving T. Rush, gard. Edw. Tretheway and J. W. Smith, gard. Frank Shaw.

NASSAU HORTICULTURAL SOCIETY.

The 10th annual Chrysanthemum Show of the Nassau County Horticultural Society was held at Glen Cove, N. Y., Oct. 29th and 30th, and there was a fine display of well finished chrysanthemums, carnations, roses, vegetables, etc. The judges were Messrs. R. Angus, A. Griffin, W. Turner and J. Bell. Among the prominent exhibits, the class for 50 vases in 50 varieties of hardy pompons attracted the most attention, as both exhibitors had already won the cup for this class twice each and this year was the deciding one for final ownership. It was won by Henry Gaut, gard. to Mrs. H. L. Pratt, and John W. Everitt, gard. to Mrs. J. T. Pratt was 2nd. J. W. Everitt won the cup for table decoration with a pretty table done with a new pink single seedling chrysanthemum named Ernest Westlake, Jr. Henry Gaut was 2nd with Dorothy Dan;

Jos. Adler 3rd with Peter Pan; F. Honeyman 4th with a bicolor of a very pretty bronze shade, and J. Hayes 5th. There were eight entries for this class. The society's cup for 12 kinds of vegetables was won by A. G. Hodenpyle, gard. F. Petroccia with a clean grown lot of vegetables. Mrs. H. L. Pratt 2nd. A splendid programme of music was given each day.

C. A. Coffin special—Group chrysanthemums arranged for effect: 1st, Percy Chubb, gard. F. Honeyman; 2nd, Mrs. H. L. Pratt, gard. Henry Gaut.

H. S. Ladew special—Double standard: 1st, Mrs. J. H. Ottley, gard. James MacDonald; 2nd, Mrs. H. L. Pratt.

Standard Single: 1st, Percy Chubb; 2nd, W. H. Harkness, Esq., gard. A. Fournier.

Lord & Burnham special—Bush double: 1st, Percy Chubb; 2nd, Mrs. Ottley.

Bush single: 1st, Percy Chubb; 2nd, Mrs. Harkness.

Peter Henderson special—6 plants in 6-inch pots: 1st, Mrs. W. D. Guthrie, gard. A. Ross; 2nd, Percy Chubb.

Andrew Wilson special—6 vases, 6 varieties: 1st, Mrs. Guthrie; 2nd, Percy Chubb.

Chas. H. Totty special—Vase 8 blooms, 1 variety: 1st, Mrs. Guthrie; 2nd, Mrs. Ottley.

Mrs. W. H. Bucknall special—6 blooms, 6 varieties: 1st, Mrs. Guthrie; 2nd, Percy Chubb.

Arthur T. Boddington special—6 blooms, 6 varieties: 1st, Mrs. J. T. Pratt; 2nd, Payne Whitney, gard. L. G. Forbes.

Rev. J. W. Gammack special—12 blooms, 12 varieties: 1st, Percy Chubb; 2nd, Mrs. Guthrie.

Burnett Bros.' special—3 vases, 2 blooms each: 1st, Payne Whitney; 2nd, Mrs. J. T. Pratt.

Mrs. D. Burns special—12 blooms arranged for effect: 1st, Mrs. Guthrie; 2nd, Mrs. H. L. Pratt.

Chas. H. Totty medals for 2 blooms Mendon: Gold medal, Mrs. Guthrie; silver, Mrs. H. L. Pratt; bronze, Mrs. Ottley.

Pierson U-Bar Co. special—12 blooms, 3 varieties: 1st, Percy Chubb; 2nd, Mrs. Guthrie.

Six pink: 1st, Mrs. W. L. Harkness; 2nd, Mrs. C. D. Brewster, gard. J. Fogarty.

Six, any other color: 1st, Mrs. Guthrie; 2nd, Payne Whitney.

F. B. Edmonds special—Largest bloom in the Show: Mrs. Guthrie.

Vaughan Seed Store special—18 vases hardy chrysanthemums, 18 varieties grown and flowered outdoors: 1st, Mrs. H. L. Pratt; 2nd, Mrs. J. C. Ayer, gard. Harry Jones.

M. Stapleton special—12 vases singles: 1st, Mrs. J. L. Pratt; 2nd, Percy Chubb.

Glen Cove Echo special—6 vases singles: 1st, Mrs. H. L. Pratt; 2nd, Paul Dana, gard. James Gladstone.

One vase singles: 1st, Percy Chubb; 2nd, Mrs. J. T. Pratt.

Titus & Bowne special—12 American Beauty roses: Mrs. Guthrie.

Miss Marion Peck special—12 yellow roses: 1st, Mrs. J. C. Ayer; 2nd, Mrs. Guthrie.

12 pink roses: 1st, Mrs. Guthrie; 2nd, Percy Chubb.

12 red roses: 1st, Percy Chubb.

12 Tea or H. T.: 1st, Payne Whitney; 2nd, Percy Chubb.

Cottage Gardens Co. special—Carnations in five classes: Mrs. Guthrie 1st in 4 classes, Percy Chubb in 1.

Bon Arbor Chemical Co. special, 2 classes: 1st, Mrs. Guthrie; 2nd, Payne Whitney and Percy Chubb.

Pino Lyptol Co. special—100 single violets: 1st, Mrs. J. T. Pratt; 2nd, Mrs. J. C. Ayer.

50 single violets: 1st, Thos. Leeming; 2nd, Mrs. C. F. Cartledge.

Mrs. F. S. Smithers special—Outdoor flowers: 1st, Mrs. G. D. Pratt, gard. J. F. Johnston; 2nd, Mrs. Ottley.

Nassau County Horticultural Society's cup for vegetables: 1st, A. G. Hodenpyle; 2nd, Mrs. H. L. Pratt.

R. Meserole special—6 kinds vegetables: 1st, Mrs. Ottley; 2nd, Mrs. W. V. Hester, gard. Herman Boettcher.

Hitchings & Co. special—Flowering and foliage plants: Percy Chubb.

Julius Roehrs special—Orchids: Percy Chubb.

J. M. Thorburn special—Begonia Gloire de Lorraine: Mrs. Guthrie.

C. M. Underhill special—Ferns: Thos. Leeming; 2nd, Mrs. H. L. Pratt.

Certificate of merit to H. Gaut for new bronze seedling single chrysanthemum. Honorable mention to A. Fournier for two grafted standard chrysan-

themums. James Gladstone was manager of the show.

HARRY JONES, Cor. Sec'y.

TUXEDO HORTICULTURAL SOCIETY.

The annual flower show of the Tuxedo Horticultural Society was held in Tuxedo Club on 30th, 31st October and 1st November, it being the finest show the Society has ever held, in most of the classes competition being very keen. There is nothing we could specially mention as being a feature of the show as all the exhibits were of very high quality. The chrysanthemums were the best that had been shown here. D. S. Millar won in the 18 distinct varieties with W. E. Tricker, Daily Mail, Woodmason, G. Drabble, Wells' Late Pink, Mrs. R. H. Boggs, Lady Hopetown, Wm. Kleinheinz, F. S. Vallis, Gertrude Peers, James Fraser, Mrs. H. Stevens, Mrs. R. C. Pulling, Pockett's Crimson, Mrs. Ernest Wild, Mrs. G. W. C. Drexel, Rose Pockett, Wm. Turner, Thos. Wilson won in the twelves with Wm. Turner, Mrs. D. Syme, Hetty Wells, H. E. Converse, W. E. Tricker, Georgeous, Wm. Kleinheinz, Rose Pockett, Daily Mail, Mrs. G. W. C. Drexel, Nakota, M. Louiseau Rousseau. The groups of miscellaneous plants, chrysanthemums and ferns were all very fine and tastefully arranged. Roses were, we may say, shown to perfection; in the class for 18 pink, Mrs. C. Russell was shown by Wm. Brock, D. S. Millar and Mr. Tansey with six-foot stems. There was good competition in all the classes of carnations, Joseph Tansey, gard. to H. M. Tilford, winning the Hitchings cup for the most meritorious exhibit, also the Alphano Humus Co. cup for group of chrysanthemums, the president's prize for the best vase of roses in the show with a vase of 12 Sunburst and the Julius Roehrs prize for plant groups. D. S. Millar won the New York Stable Manure Co. cup for six chrysanthemums, 12 roses, 12 carnations. The judges were R. Williamson, A. Bieschke and W. H. Waite.

Other special prize awards were as follows:

Dreer prize for group of ferns, Mrs. M. C. Bell, gard. David McIntosh; Weeber & Don prize for lily of the valley, H. M. Tilford; Bon Arbor Chemical Co., prize for standard chrysanthemums, R. Mortimer, gard. C. D. Schaeffer; Scott Bros. prize for 18 chrysanthemums, 18 varieties, G. G. Mason; Totty prize for single chrysanthemums, introductions of 1914, Mrs. J. Murray Mitchell, gard. Thomas Wilson; A. N. Pierson prize for 12 Hadley roses, R. Delafeld; Thorburn prize for collection of vegetables, Mrs. S. Spencer, gard. E. Barth; Wilk prize for 18 vegetables, G. G. Mason; Stump & Walter prize for 9 vegetables, C. B. Alexander, gard. W. Hastings; Burnett Bros. prize for exhibit of farm produce, Arden Farm Co., Mr. W. Viner; Burpee prize for Tuxedo village vegetables, Wm. Devenzo; W. F. McCord prize for dinner table decoration, G. E. Baker, gard. Jas. MacMachan; Boddington prize for centre piece by greenhouse assistants, 1st Alex. Roy, 2nd Wm. Grantham; Bieschke prize for floral piece, H. M. Tilford; Lager & Hurrell prize for orchid plant, G. E. Baker; Dreer prize for collection of hardy flowers, Mrs. A. Spencer.

In addition to the foregoing we find in the long list of winners kindly sent by Secretary Thomas Wilson the following names, our space not permitting a detailed list of the various classes:

D. Wagstaff, gard. Thos. Lyons; A. Seton, gard. Patrick Cassidy; Mrs. A. Carhart, gard. Chas. Cockick; Mrs. J. Wolfe and Mrs. L. Chandler.

INDIANAPOLIS.

The combined efforts of the State organization and the Chrysanthemum Society of America last week, at Indianapolis, brought out a very fine exhibition.

Special Prizes.

The cup for the best 10 blooms was won by Thomas Page, Great Barrington, Mass., with variety, Mrs. J. C. Neil.

Elmer D. Smith & Co.'s prizes for 15 blooms considered from a commercial standpoint: 1st, E. G. Hill Co.; 2nd, Elmer D. Smith & Co.

A. N. Pierson, Inc., prize for Pompon Golden Climax; Mt. Greenwood Cemetery Association.

Philip J. Foley prize for best 10 blooms not disseminated: Elmer D. Smith & Co.

Totty prizes for six blooms of Mendon: Howard Gould.

Vaughan's Seed Store, cup for singles and pompoms: A. N. Pierson, Inc.

Wm. Wells' prizes for two blooms, James Fraser: Howard Gould, gold medal; E. G. Hill Co., silver medal.

Dreer prize for best 10 blooms, one variety, introductions of 1913 and 1914: E. G. Hill Co.

Lord & Burnham Co. prize for six vases, six varieties; gold medal, Howard Gould.

President Kleinheinz cup for 10 blooms, one variety, white: E. G. Hill Co., with variety Wm. Turner.

H. E. Converse's cup for 10 blooms H. E. Converse: Howard Gould.

H. F. Michell Co. prizes for best 12 blooms, 12 varieties: 1st, Howard Gould; 2nd, Elmer D. Smith & Co.

Hitchings & Co. sweepstake cup for most meritorious exhibit: Baur & Steinkamp.

Elmer D. Smith & Co. prizes, vase of Chrysolora: 1st, Elmer D. Smith & Co.; 2nd, Hartje & Elder.

F. Dörner & Co. prizes for 12 blooms Major Bonnaffon: 1st, Hartje & Elder; 2nd, Baur & Steinkamp.

E. G. Hill Co. prize for 12 blooms Chieftain: Fred H. Lemon & Co.

Ionia Pottery Co. cup for 25 blooms, assorted colors, in one vase: E. G. Hill Co.

The certificate of merit for undisseminated seedling or sport, scoring not less than 85 points: H. W. Rieman, Indianapolis, Ind., 92 points; E. G. Hill Co., 89 points; A. N. Pierson, Inc., 88 points; Mt. Greenwood Cemetery Ass'n, 86 points.

The State Florists' Association of Indiana awarded a silver cup as sweepstakes in this class.

Regular Awards.

Specimen, bush form: 1st, Pahud Floral Co., Indianapolis; 2nd, Bertermann Bros. Co., Indianapolis; 3rd, Claypool Hotel Florist, Indianapolis.

Six plants, bush form: Claypool Hotel Florist; Pahud Floral Co.; Bertermann Bros. Co.

Twenty-five single stem, 3 classes: Baur & Steinkamp.

Group of chrysanthemum plants arranged for effect: Bertermann Bros. Co.; Pahud Floral Co.; Hartje & Elder.

Fifty blooms, arranged for effect in one vase: 1st, E. G. Hill Co., Richmond, Ind.; 2nd, Mt. Greenwood Cemetery Ass'n, Chicago (Chas. W. Johnson, Supt.); 3rd, Fred H. Lemon & Co., Richmond, Ind.

Twenty-five blooms, white, one variety: E. G. Hill Co.; Baur & Steinkamp; Bertermann Bros. Co.

Twenty-five pink: E. G. Hill Co.; A. N. Pierson, Inc.; Mt. Greenwood Cemetery Association.

Twenty-five yellow: Howard Gould, Castlegould, Pt. Washington, N. Y., gard.; Wm. W. Vert; Bertermann Bros. Co.; B. F. Hensley, Knightstown, Ind.

Twenty-five bronze: Howard Gould; Elmer D. Smith & Co., Adrian, Mich.; E. G. Hill Co.

Twenty-five red: Mt. Greenwood Cemetery Ass'n; Elmer D. Smith & Co.; E. G. Hill Co.

Six blooms white, one variety: E. G. Hill Co.; Mt. Greenwood Cemetery Ass'n.

Six pink: E. G. Hill Co.; A. N. Pierson, Inc.

Six yellow: A. N. Pierson, Inc.; Elmer D. Smith & Co.

Six bronze: Mt. Greenwood Cemetery Ass'n.

Six red: Mt. Greenwood Cemetery Ass'n; Elmer D. Smith & Co.

Largest individual blooms: 1st, E. G. Hill Co.; 2nd, B. F. Hensley; 3rd, A. N. Pierson, Inc.

Six varieties, three blooms of each: E. G. Hill Co.; B. F. Hensley.

Twenty-four blooms, in 24 varieties: E. G. Hill Co.; Elmer D. Smith & Co.; Howard Gould.

CHRYSANTHEMUMS AT CORNELL UNIVERSITY.

CHRYSANTHEMUMS

In the Greenhouses of the Dept. of Floriculture at Cornell University.

Every fall the Department of Floriculture gives a special exhibition of chrysanthemums for the benefit of the students, faculty and townspeople. This exhibition is planned to be educational and to illustrate different methods of culture and training, as well as different types of blooms. The blooms in the University greenhouses were better than ever this year in spite of the exceedingly warm weather of the last month.

The public exhibition was held on Saturday afternoon and evening, Oct. 31, and was very largely attended. Aside from the chrysanthemums grown at the University, a splendid collection of varieties was sent by the following: Elmer D. Smith, Adrian, Mich.; Pittsburgh Cut-Flower Co., Pittsburgh, Pa.; E. C. Ludwig Floral Co., Pittsburgh, Pa.; Pennock-Meehan Co., Phila., Pa.; W. W. Edgar Co., Waverley, Mass.; W. J. Palmer & Son,

Buffalo, N. Y.; W. F. Kasting & Co., Buffalo, N. Y.; Anton Schultheis, College Point, N. Y.; and the U. S. Cut-Flower Company of Elmira, N. Y. Many exhibitors sent roses, carnations and other flowers in addition to chrysanthemums. The two retail stores in Ithaca each exhibited a table decoration. The Bool Co. had a Hallowe'en table in delicate yellow, and the Hill-side Floral Co. had a decoration of pink chrysanthemums. The class in amateur floriculture showed a number of table decorations for luncheons. These were planned to show simple designs such as could be used in the home.

The Department of Floriculture appreciates the cordial cooperation shown by the many florists in various parts of the United States. Their assistance helps wonderfully in demonstrating to the students what is being done along practical lines.

Vase of 100 sprays of pompoms, assorted colors, arranged for effect: Baur & Steinkamp; Mt. Greenwood Cemetery Ass'n; Fred H. Lemon & Co.

Vase of 100 sprays, singles: E. G. Hill Co.; Hartje & Elder; Fred H. Lemon & Co.

Ten vases of pompoms, in 10 varieties: A. N. Pierson, Inc.; Mt. Greenwood Cemetery Ass'n; Chas. H. Totty, Madison, N. J.

Ten vases singles, in 10 varieties: A. N. Pierson, Inc.; Hartje & Elder; Chas. H. Totty.

ASBURY PARK, N. J.

With a display of choicest chrysanthemums, rare tropical plants and a varied assortment of orchids, the annual fall flower show of the Elberon Horticultural Society opened Tuesday evening, Nov. 3, in the boardwalk Casino. The Casino presented a most attractive appearance with the blending of natural blossoms and electrical floral decorations. Every detail, as to setting and background for the choice blossoms to appear at their best, had been carefully planned.

The exhibition of chrysanthemums this year far surpassed any previously seen here and the public interest was very great. To the right and left of

the Casino was banked a gorgeous display of tropical plants, while the center is given over to the orchids. The east end was banked high with single and double chrysanthemums interspersed with ferns. Scattered through the exhibition was a splendid assortment of palms and ferns. The balcony was given over to cut flowers including single chrysanthemums, carnations, violets and roses in baskets and vases, choice fruits and vegetables. Here also was displayed the amateur results in the growing of hardy chrysanthemums.

Among the chief exhibitors were:

R. Guggenheim, gard. Robt. Allen; Fredk. Frohnhagen, gard. Geo. Masson; Max Kuschka; B. Myers; Mrs. Washington Wilson, gard. C. O. Duncan, D. Guggenheim, gard. Chas. Burn; Henry Goldmann, gard. A. Bauer; B. J. Greenhut, gard. D. C. Kelley; C. A. Wimpfheimer, gard. Thos. Hambleton; George Gould, gard. Joseph Mills; H. S. Borden, gard. Percy Hicks; S. M. Goldsmith; W. R. Seymour; Newman & Legg; Sam'l Riker, gard. Chas. Dewilde and Mrs. Hamilton Kenn.

The gold, silver and bronze medals offered by Wm. Wells & Co., for two blooms of Mendon were won by D. C. Kelley, Percy Hicks and A. Bauer, res-

chell medal for five blooms, C. O. Duncan the Hitchings cup for artistic arrangement of chrysanthemum flowers. Robt. Allen the Vaughan jardiniere for freshest blooms and C. O. Duncan the Hambleton prize for most winnings in vegetable classes.

A fine feature of the show was the display of dinner decorations on Friday. Eight competitors entered the lists. George Masson was 1st with a fine combination of Irish Fire Flame roses and Bouvardia Humboldtii; A. Bauer 2nd with Cattleya labiata and schinzanthus. Other tables were by Chas. Hurn with cypripediums and Adiantum Farleyense; D. C. Kelley, cattleyas, bouvardia and asparagus; Robt. Allen, Sunburst roses, lily of the valley, croton leaves, etc.; C. O. Duncan, hardy chrysanthemums in pumpkin-shell baskets; Thos. Hambleton with Castle Gould celosia and ferns and Joseph Mills with Gloriosa superba.

PROVIDENCE, R. I.

The annual November exhibition of the Rhode Island Horticultural Society held on November 3 and 4 in the parlors of the Mathewson street M. E. church was freely commented upon by visitors as a pronounced success. All departments of horticulture and floral art were well represented. Roses were shown in profusion by Burke & Burne and M. Macnair; carnations by J. A. Macrae, Maplehurst Greenhouses, E. E. Howard and R. J. Taylor; chrysanthemums by J. A. Macrae, F. C. Hoffman, M. Macnair, R. I. Hospital, Mrs. E. Osborne and Mrs. Samuel Brown; palms and foliage plants by Wm. Appleton; baskets of chrysanthemums, bouquets, etc., by T. J. Johnston & Co. and Johnston Bros. The fruit and vegetable classes were well filled.

DOBBS FERRY.

The thirteenth annual flower show of the Dobbs Ferry, N. Y., Horticultural Society held in the village hall Friday and Saturday, Nov. 6 and 7, was a great success and much credit is due its officers: Claude Wilson, president; H. Keiling, vice-president; H. Harms, secretary; H. Wells, treasurer; P. Clinton, corresponding secretary. The exhibition committee were: H. Keiling, manager; H. Harms, secretary; H. Wells, treasurer.

The Association in opening its exhibition thanked its numerous patrons and friends, who by their liberal support have enabled it to make its past exhibitions a success; also for the liberal support received toward the exhibition this year.

There were 48 classes in the schedule, of which 12 were for fruit and vegetables. Prominent among the prize winners in the plant and flower sections were J. Andward, Mrs. D. E. Oppenheim, gard. A. McDonald, Mrs. F. Dunn, gard. T. Richardson, J. A. Townsend, gard. E. Howe, I. T. Bush, W. H. Brown, gard. Mr. Holgerson, C. Wilson, Mrs. J. Fraser, gard. H. Harms, Mrs. Henry Draper, gard. H. Wells, D. F. H. Backland, gard. J. Caselli, St. Christopher's Home, gard. P. Clinton, J. Anderson, H. Keiling. A number of special honorary awards were made to Scott Bros. of Elmsford, N. Y.

Many of the prizes were specially contributed by trade houses and amateur patrons of horticulture.

BUFFALO BOTANICAL GARDEN.

The Buffalo City Botanical Garden has a chrysanthemum show and Director Cowell presents many rare and strange specimens. The first day's opening being on Sunday which set in with an all day rain did not keep the crowd away and it was highly gratifying. This is the best show ever had at the Garden and many blooms seen there could not be seen in any other place in the world. One of the most interesting is Dawn, a dull copper colored bloom and in artificial light a coppery bronze. A new French variety is Arvede Barine, yellow, hairy. One of the most interesting exhibits is a large group of the original yellow chrysanthemum species from China. Banked up against these venerable but not imposing ancestors were white blooms having the circumference of 26 inches, some of the stems being 7 feet high. There is a handsome deep red new one which is named after Postmaster Wm. F. Kasting. The show will last until Nov. 22. E. C. B.

The annual display of chrysanthemums by the park board of Minneapolis, Minn., opened Nov. 8 at the Lyndale Farmstead and will continue two weeks. At the close of the show the choicest blooms will be distributed among the hospitals.

PARK INSTITUTE OF NEW ENGLAND.

Pursuant to a call issued to citizens and officials in New England states interested in Municipal Parks and Playgrounds, a meeting was held in Hartford, Conn., and organization was effected under the above title. Six meetings each year are contemplated.

George H. Hollister, superintendent of Keney Park, was elected manager of the Institute. His address is No. 272 Westland street, Hartford, Conn. Mr. Hollister is from old New England stock, a graduate of the Connecticut Agricultural College in 1902, where he remained for two years as an assistant professor of horticulture. Then for three years he was assistant entomologist for the Connecticut Experimental Station, among other duties having direct charge of the gypsy moth work. Four years ago he was appointed foreman of Keney Park, and has been its superintendent for the last two years, in which position he has been eminently successful. Mr. Hollister is a young man with a bright future before him, a most faithful worker and a diligent student, just an ideal man to direct the fortunes of the Park Institute of New England.

At the Hartford meeting eleven cities were represented by park officials from Boston, Providence, Worcester, Springfield, Hartford, New Haven, Waterbury, New Britain, Northampton, Holyoke and Naugatuck. About three-fourths of the population that live in cities in New England were represented at this time. The next meeting will probably be held about the middle of December, and it is hoped that all the cities of New England will have a representative present.

The Institute is open to all who are interested in municipal park work, whether park officials or not, and it is hoped all interested will write to Mr. Hollister for the program of the next meeting.

VISITORS' REGISTER.

Boston—W. C. Langbridge, Cambridge; N. Y.; W. C. Clark, Scranton, Pa.

Indianapolis, Ind.—Chas. L. Baum, president of Knoxville Florists' Society.

New York—D. A. Spear, Hartford, Conn.; Louis J. Reuter, Westerly, R. I.; E. Allan Peirce, Waltham, Mass.

St. Louis—Guy Reyburn, representing A. Henderson Co., Chicago; Robt. Newcomb, representing Vaughan's Seed Store, Chicago.

Knoxville, Tenn.—A. Zirkman, representing M. Rice Co., Phila.; Walter Mott, representing Hammond's Slug Shot Works, Beacon, N. Y., and several Holland bulb salesmen.

Washington, D. C.—C. B. Knickman, New York; Richard Vincent, Jr., White Marsh, Md.; Bert W. Anson, Maryland Agricultural College, College Park, Md.

Cincinnati—J. H. Broxey, Dayton, Ohio; Ellis Woodworth, representing the Sefton Mfg. Co., Chicago; Chas. L. Baum, Knoxville, Tenn., and O. D. Bramman, representing the Johnston Tin Foil & Metal Co., St. Louis, Mo.

Tuxedo Park, N. Y.—J. Muller of Julius Roehrs Co., Rutherford, N. J.; Mr. Edmonston of Wilson & Edmonston; H. Winter of Winter & Sons, New York; John Scheepers; John Low of Peter Henderson & Co.; A. L. Don of Weeber & Don; W. C. Rickards of Thorburn & Co., all of New York City; John Brock, Greens Farms, Conn; G. B. Wilson, Jericho, L. I.

Philadelphia, Pa.—C. L. Washburn and his son, E. B. Washburn, Chicago, Ill.; Myer Heller, New Castle, Indiana; E. G. Hill, Richmond, Indiana; Mr. and Mrs. A. L. Yeager, Allentown, Pa.; H. Lehr, Isaac H. Moss and Chas. Siegener, Baltimore, Md.; Ernest Ashley, Allentown, Pa.; John Young, New York; P. Welch, Boston; Thos. Roland, Nahant, Mass.; George Asmus, Chicago.

Chicago—R. Karlstrom, representing W. A. Manda, South Orange, N. J.; B. Katzwinkel, proprietor Restland Floral Co., Mendota, Ill.; Mrs. M. E. Irby of the Flower Shop, Memphis, Tenn.; W. A. Kennedy of the C. C. Pollworth Co., Milwaukee, Wis.; R. F. Smith of the Joy Floral Co., Nashville, Tenn.; T. B. Commandros of the Golden Rule Flower Dept., St. Paul, Minn.; Wm. Desmond of Donaldson Co., Minneapolis, Minn.; W. E. Trimble and Mr. Jennings of the Trimble Greenhouse Co., Princeton, Ill.; E. G. Hill, Richmond, Ind.

NEWS NOTES.

Worcester, Mass. — Frank L., son of Mr. and Mrs. Leonard C. Midgley, and Miss Marion L. Hero, daughter of Mr. and Mrs. Butler W. Hero, were married on November 7.

St. Louis—Robert Aull, former Park Commissioner, is at the Jewish Hospital suffering from a stroke of paralysis which came on him last Friday. Mr. Aull has many friends in the trade who will be sorry to read this bit of news.

The Chrysanthemum show at Shaw's Garden is drawing large crowds daily, and is said to be the finest display the garden has yet held.

CLUBS AND SOCIETIES

FLORISTS' CLUB OF WASHINGTON.

The Florists' Club of Washington, at their November meeting, were addressed by Richard Vincent, Jr., of White Marsh, Md., and by Prof. Bert W. Anspen, of the Maryland Agricultural College. Mr. Vincent's talk was on chrysanthemums. In his boyhood days, he said, pompons were the leaders, but that later considerable interest was taken in the larger varieties, with the result that the former soon lost all favor. About twenty years ago he decided to resurrect the pompons and so successful was he that he soon earned the title of the "father of the pompon." When it was noted that he was going after this business on a large scale, others followed. In conclusion he declared that he would continue the production of pompons as long as he lived, and told a very amusing story of how he had demanded recognition of these flowers at a meeting of the chrysanthemum society in New York some ten years ago.

Prof. Anspen, in telling of the work being accomplished by the Maryland Agricultural College, declared that, for some reason or other, florists as a rule do not co-operate with the colleges as much as they should. The colleges, he said, are trying to aid the florists in the solving of various troubles. He told of the facilities of the college for the classification of plants, of the productive value thereof; qualities of various fertilizers, and other things of true value to the growers. He roundly scored the latter on this point and urged that advantage be taken of the experiments conducted by the college.

William F. Gude had a few words to say upon the trip to the Panama Pacific Exposition in 1915, and in concluding his remarks extended the members an invitation to visit the chrysanthemum show then in progress at the store. This was immediately accepted, but before adjournment a vote of thanks was extended to Mr. Vincent and to Theodore Diedrich, both of whom had on display several vases of small double and single chrysanthemums and pompons, and to David G. Grillbortzer, who had sent in a vase of what was conceded to be the finest Killarney Brilliant roses ever seen in this locality at this time of the year.

LENOX HORTICULTURAL SOCIETY.

The annual meeting of the Lenox Horticultural Society was held on Saturday, Nov. 7th. Officers were elected for the following year as follows: George Breed, gardener to Mr. Joseph Choate, Stockbridge, president; Walter Jack, gardener to Mrs. Alexander, Lenox, vice-president; Alfred J. Lovell was again elected treasurer; George Instone, secretary; John Mair, assistant secretary. A motion that the society change its meeting night to second Wednesday in month will be voted on at next meeting. The judges of the fall show were extended a hearty vote of thanks for services rendered, also committee of arrangements.

There was considerable debating on the right and wrong way of exhibiting

sprays of chrysanthemums. At our fall show several persons made glaring mistakes, giving the judges and committees unnecessary work.

A proposition that we hold a floral and agricultural show combined next summer instead of two summer shows was looked upon with great favor, and a committee will be appointed by our next president to draw up some sort of an outline for same.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The club had a good meeting on Nov. 3 in the Fort Pitt Hotel. It was Chrysanthemum Night, which is always a good drawing card. The Pittsburgh Cut Flower Co. showed the standard commercial sorts. Jno. Costoff, gardener for Wm. Flinn at Beechwood Farms showed a good vase of flowers grown two blooms to a plant. Carl Becherer, gardener at Dixmont Hospital, showed a collection of seedlings—both singles and doubles. Yellow Star was a good single, and there were other good ones under numbers. Mr. Becherer is quite active in hybridizing and raising seedlings, and we look for something of much value from him one of these days.

The Bureau of Parks from both the N. S. and Schenley showed good displays. Jno. W. Jones of Schenley Park showed the type—Chrysanthemum indicum—and it was interesting to compare it, for example, with Wm. Turner, and note the changes that had been made by man. Mr. Jones thinks Wm. Turner still the best white. T. Tyler with C. D. Armstrong, staged Brasso-Cattleya Heatonensis, Laelio-Cattleya Sunday, Catt. Luegae, and a yellow sport from Anna chrysanthemum. To Mr. Becherer was awarded a certificate of merit for his seedling chrysanthemums and to Mr. Tyler a cultural certificate for his orchid novelties. To the other exhibitors a vote of thanks.

At the October meeting P. S. Randolph & Sons invited the club members to visit their new plant on the afternoon of October 29. The invitation was accepted by between thirty and forty members. The affair was very enjoyable and the secretary was instructed to write a letter to the firm expressing the club's appreciation of their kindness and hospitality.

M. H. Hart read a paper on the Effect of Electricity on the Soil for which he received a vote of thanks.

H. P. JOSLIN, Sec'y.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next regular monthly meeting of this club will be held at Horticultural Hall, Boston, on Tuesday evening, November 17, at 8 o'clock. W. N. Craig of Brookline will read a paper on The Gardener and His Profession. The annual nomination of officers will be made at this meeting. There will be a good display of late chrysanthemums and other flowers. A small number of additional students can be cared for in the landscape classes. A prompt application, however, is necessary.

W. N. CRAIG, Sec'y.

ALBANY FLORISTS' CLUB.

The regular monthly meeting of the Albany Florist Club was held at the Albany Cut Flower Exchange on Thursday, Nov. 5. President Henkes being on a hunting trip, vice-president Frank R. Bilson took the chair. The candidates for membership, J. Berg and M. Selinker were elected members. F. A. Danker reported progress as committee for the trip to California next August. Mr. Danker's motion that the club hold a flower show in 1915 was carried, and he was appointed to call on the trustees of the Institute & Historical Society in regard to the use of their hall.

Nominations on the regular ticket for 1915 are Frank R. Bilson for president; Thos. F. Tracey for vice-president; Robert Davidson for secretary; F. Williams for treasurer; Geo. Christie, John J. Haggerty and Wm. Quinn for two-year trustees. The opposition ticket is Edw. P. Tracey for president; James H. Snyder for vice-president; Robert Davidson for secretary; Fred Henkes for treasurer; Chas. Sanders and Wm. Hannell for two-year trustees. An essay was read by F. A. Danker on the culture and use of chrysanthemums both for show and commercial use.

A very fine exhibit of new chrysanthemums was sent by A. N. Pierson and the secretary was instructed to send a vote of thanks for same. President Henkes extended an invitation to a venison supper on his return from the Adirondacks. The next meeting will be held at the Exchange on Thursday Dec. 3, when election of officers will take place.

The club will have a banquet on Jan. 7, 1915, when installation of the new officers will take place, under charge of L. H. Schaefer, chairman of the entertainment committee. James H. Snyder will give a reading on violet growing, their use, diseases and experience he has had with them.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public notice is hereby given that J. A. Peterson, Cincinnati, Ohio, offers for registration the Begonia described below. Any person objecting to the registration, or to the use of the proposed name is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Description—New winter-flowering begonia, "Mrs. J. A. Peterson;" seedling from Begonia Socotrana x Gloire de Sceaux; flowers deep cerise-pink changing to dark red with age, borne in great profusion from October till March; at its best during December and January; foliage similar to that of Lorraine, but of an iridescent bronzed; decidedly distinct from all other varieties. Has been in our possession for the past three years, and its keeping qualities are all that could be desired.

Name, "Mrs. J. A. Peterson."

JOHN YOUNG, Sec'y.

Nov. 7, 1914.

NEW YORK FLORISTS' CLUB.

The news of C. H. Totty's serious illness, of course, threw a blanket on the pleasures of Ladies' Night at the New York Florists' Club meeting, Monday. There was a very fair attendance and the business session was made very short. Resolutions were read on the death of Miss Lilian Shaw. The nominating committee reported as follows:

For president, William H. Duckham, Harry A. Bunyard and I. S. Hendrickson. Mr. Duckham declined the nomination with a very few well chosen words. Vice-president, John Miesem, Robert Koehne, A. M. Henshaw; secretary, John Young, L. W. C. Tuthill, M. C. Ebel; treasurer, W. C. Rickards, Charles Schenck, Julius Roehrs. Trustees, Alexander Hogg, W. R. Cobb, John H. Fiesser, Oscar Boehler, Emil Schloss, W. E. Maynard, P. W. Popp, Sam Batchellor and James Fraser were elected members.

There was an exhibit by Charles L. Stanley, Plainfield, N. J., of chrysanthemums Source D'Or, Souvenir D'Or, Yellow Caprice and Lilac Caprice, and one by Charles Webber, Lynbrook, L. I., of carnation Laura Webber, both of which were awarded a vote of thanks.

A resolution was passed instructing the secretary to convey the sympathy of the club to Mr. Totty in his illness, sending the best wishes and the hope for a speedy recovery. Many of the younger people remained until almost 1 o'clock enjoying the musical program which had been prepared. The house committee deserve great credit for the successful manner in which they pulled off the affair. The meeting room was nicely decorated with flowers and oak branches and was made very attractive.

ST. LOUIS SOCIETY NOTES.

The Retail Florists' Association entertained their members with a banquet at the Washington Hotel on Wednesday night, Nov. 11.

The Lady Florists' Home Circle were entertained by Mrs. F. W. Bruning at her home on Wednesday afternoon, November 11.

The St. Louis County Growers' Association held its regular monthly meeting on Wednesday night, Nov. 4th. The feature of the meeting was that every member will buy an oil stove and have it in readiness should anything happen to any member's heating system so that in a short time all stoves can be put to work and save the stock.

CLUB AND SOCIETY NOTES.

The Chrysanthemum Society of America voted at Indianapolis to hold its 1915 meeting in Cleveland, O.

At the Chicago Florists' Club meeting on Nov. 5, R. J. Parker and Victor Young were elected to membership, after which, owing to fact that meeting was held on the evening of the departure of a good many of the members to the chrysanthemum meeting at Indianapolis, the meeting was adjourned until Thursday evening, Nov. 19th, when nominations of officers for ensuing year will be the special order of business.

J. B. FOLEY, Sec.

The Worcester County (Mass.) Horticultural Society held its annual

One of the fat, heavy roots of Wintzer's Colossal. By all means, order some Colossal.

This Idea Will Increase Your Canna Sales

All our Canna roots are northern grown right here at West Grove.

LOTS of your customers want an assortment of Cannas—say, twelve. Now, supposing you had assortments all packed in special parcel post mailing boxes, ready to send right out; wouldn't it greatly simplify things for you? Of course, it would. Then another thing, Antoine Wintzer would make up the assortment a point well worth mentioning in your Catalog. But that isn't all; you would be sell-

ing, not just Cannas—"any old Cannas"—but an extensively advertised brand, the Swastika Brand.

In addition to your regular Cannas, let us send you a case of twenty of these assorted boxes, all carefully packed, ready to mail out.

Fall Trade List now ready. Send for it, and let us explain more fully this box assortment plan.

THE CONARD AND JONES CO.
SWASTIKA BRAND CANNAS
WEST GROVE, PA.

chrysanthemum show on Thursday and Friday, Nov. 5 and 6. The most elaborate and effective displays were made by President E. W. Breed and Harry I. Randall, the Pleasant street florist. The Denholm & McKay Company, John Gunn of Whitinsville, O. S. Walker, A. H. Lange, George W. Knowlton of West Upton, and the estates of Mrs. W. N. Estabrook, Mrs. J. C. Whitin and Mrs. Percy G. Forbes were all represented in more or less extensive displays of seasonable material.

The Cincinnati Florists' Society's regular meeting on Monday evening was well attended. Pres. Allen appointed a committee consisting of Gus Adrian, chairman, Max Rudolph, Henry Schwaz, R. Witterstaetter and Chas. H. Hoffmeister to devise a system of valuation of plants and flowers for taxation purposes and to report thereon to the society at its next meeting. R. Witterstaetter brought up the discussion that led to the appointment of the above committee. J. A. Peterson and Roger Peterson showed a plant of the new begonia, Mrs. Peterson.

The Knoxville Florists' Society held its regular meeting at Chas. L. Baum's store, Tuesday night, November 3rd. Saturday, November 7th, having been set aside as Chrysanthemum Day, final arrangements were made, and a committee was appointed to get up sufficient advertising matter in the local papers, (and otherwise as it may see fit), with instructions to do all advertising in a cooperative way through

the Society. This mode of advertising has proven very effective heretofore, as it reaches the public more in the form of an announcement than an ad., and does not solicit trade for any one florist.

The American Sweet Pea Society having decided some time ago to hold its next annual exhibition in Newport, R. I., requested the Newport Horticultural Society to fix dates and place for the event, so at a meeting of the latter society on November 10, it was voted to hold the exhibition at the Newport Casino on July 8 and 9, 1915. The local society is also planning to hold a general horticultural exhibition in conjunction with the sweet pea exhibition and at present the outlook seems very good for a large and interesting show. At the above stated meeting Alexander MacLellan of Newport was elected general manager of the joint exhibition.

BEGONIA MRS. HEAL.

See Cover Illustration.

Three specimens of this resplendent flowering plant were exhibited at the Boston show last week and they caused a decided sensation, winning a silver medal for the grower, William Downs, superintendent of the E. S. Webster estate, Chestnut Hill, Mass. We are indebted to Joseph Breck & Sons for the use of the photograph of one of the plants exhibited. Unfortunately as with all scarlet flowered plants the photograph does not show the flowers distinctly. A group of these plants which we saw at Mr. Webster's conservatories impressed us as one of the most beautiful things in the floral line we had ever seen. Mr. Downs has favored us with some notes on this charming begonia and its culture, which follow:

This is of the new winter flowering type of begonias originated in England and marking a new departure in this ever popular race of plants, being the result of a cross between the tuberous and fibrous rooted sections, the latter if a am rightly informed being Socotrana. Mrs. Heal, with Winter Cheer and Elatior, was the advance guard of many varieties which will follow. We have (though untried at present) Fascination (yellow), Optima (salmon) and Her Majesty (pink), which will make a very interesting group. Optima, it is claimed, will succeed in a cool greenhouse and one grower told me that Mrs. Heal would, but my experience is that it needs same temperature as Lorraine.

This type has not proved quite so easy of culture as the Lorraine and I think the dual nature of the plant accounts for that, taking the resting nature of the bulbous and the continuous of the fibrous. I think if this is kept in mind and with a little extra care in watching and watering they will amply repay in the end.

All, or most all, of the plants that have been grown in this country have been imported in the spring or early summer and when received are in their dormant state, potted in a mixture of peaty nature with a lot of silver sand through it. Right here is where you have to be very careful with the water until they begin to grow which may be soon or may be after quite a long time. They are much the same as Lorraines, not making much growth until August and September, but when they do they make rapid growth, but at no time must they be carelessly watered or it will cause rotting of the bulb and that, of course, is the end of the plant. We use much the same compost in growing then as for Lorraines—tough fibrous loam, leaf mold, sand and dried cow manure broken up in small lumps which makes a rough porous mixture.

When they get started into growth and rooting freely they can be potted along with an ordinary shift, 4 to 6 in. and so on and carefully watered until they root through again. In the final shift a little Clay's manure may be used in the mixture.

We feed them with this and liquid manure just the same as other plants and grow them in the house with our Lorraines until they go out of flower and then comes the critical time, to my thinking—the keeping of them through the winter. They must not be thrown

AZALEAS

We have just received a large importation of Azaleas in splendid condition, which we offer for immediate delivery and as long as unsold at no advance over prices of previous years.

We offer the leading varieties,—Mme. Van der Cruyssen, Vervae-
neana, Simon Mardner, Empress of India, Mme. Jos. Vervae-
ne, Ernst Eckharte, Niobe, Vervae-
neana Alba, etc., strong plants:—

under the bench nor put on the shelf, but kept on the bench where they can be seen, in a temperature of about 50°, until the spring. When they show signs of activity they can be put in a warmer house and started along.

Cuttings from them root nearly as freely as geraniums, but I have not had good success from leaf cuttings so far; these will make nice plants in 6-in. pots by the fall.

The plants we exhibited at the chrysanthemum show were two-year-old plants, the largest about 2 feet through and the same in height above the pots (8 in.). Over 200 flowers and opening buds were counted on this plant—to be accurate, 233—by one of my men. They have been fully in bloom for nearly three weeks and we have plants in the conservatory now about two weeks looking as fresh as ever.

Many have told me they cannot grow them. I really don't see why, if they can grow Lorraines; and some say they can't get a decent plant of the latter. It surely is not the fault of the plant; it is something left out in its culture that it needs. I have heard of one lot up on a shelf, another soaked with the hose, but that will not grow them. The extra care and attention they need is well repaid with such plants as we have now. I was told I could not grow them after the first year, but this is the third and they are better than ever. These are plants

that the old adage is well applied to, "If at first you don't succeed, try, try, try again."

Make Some Money Right Now On Hicks' Evergreens

JUST because your customers have taken their awnings down, raked up the leaves, and are hugging the fire; is no reason why you can't interest them in some evergreen planting.

Right now, when all other planting work is off their mind, is just the time to talk evergreens.

Just a little explaining on your part, about the distinct advantages of fall evergreen planting, and in nine cases out of ten, you can get their interest.

Setting aside altogether the indisputable fact that fall planted evergreens will be better established and make a sturdier, denser growth next Summer, than if planted in the Spring; there is the question of the plain, common sense of it.

The sense that tells you that when the leaves are off the other trees; is the time when more than ever the beauty and comforts of evergreens are needed and appreciated.

We have 14,000 of these Colorado Blue Spruce. Finer trees no Nursery can offer.

Why should any of your customers be annoyed all Winter long, by the view of some neighboring unsightliness, when you can sell them a few Hicks' evergreens that will at once screen it from view?

Why let such opportunities get away from you, when a little hustling right now, will add to your profits?

There's not a finer assortment of *all* sizes and kinds of evergreens to be found anywhere, than right here at Hicks'. Transplanted, root-pruned, hardy trees of the very best sort.

When it comes to the larger trees; seldom can you find a nursery that has any to sell, over 8 feet high. We have thousands of them, up to even 25 or

30 feet.

Send us the dimensions of the screen your customer wants. We can save five years on a screen 12 feet high. Can save you a lot of money too. Let us make you a proposition.

DURING RECESS.

Boston Co-operative Flower Market Banquet.

The eleventh annual banquet of the Boston Co-operative Flower Market was held at the Quincy House on Saturday evening, Nov. 7. While in some respects a business affair as regards the topics discussed, yet it was an evening of relaxation and social enjoyment for those who attended. There were about 75 present, of whom quite a number were ladies.

The corporation had had its annual business meeting earlier in the day, and the list of members of the board of directors showed quite a change of complexion, four out of nine being new men—the most radical change since the establishment of the market. The new members are Thomas Capers, John Barr, Charles H. Leach and J. W. Simpson.

When the talking hour had arrived President Robert Montgomery called upon William H. Elliott to act as toastmaster, which that gentleman did in a very efficient manner. He extended a pleasant welcome to the diners and emphasized the delights of getting together thus socially. He brought up the problem which confronts the flower growers—the bad condition of the market and the burden of accumulated stock for which no outlet seems possible under present

methods of distribution. Referring to the suggested plan of opening the market to public retail trade he advised that so radical a step should be decided upon only after cautious investigation and deliberation. The problem was to serve the people more freely with flowers without, however, causing any injury to the existing retail florist industry.

It had been expected that the Mayor would be present and perhaps throw some light upon the city's probable attitude towards a public flower market. In his place came City Treasurer Charles Slattery, who expressed the Mayor's regret at inability to be present. He did not venture to touch the market problem, but made a vigorous and eloquent speech on the virtues of good citizenship and the duties of those holding official position, dwelling especially upon the courage, honesty and devotion to duty of Mayor Curley, whom he extolled as a shining example of what a Mayor should be.

The other speakers of the evening were W. N. Craig, J. J. Cassidy, B. A. Snyder, J. M. Cohen, Thos. Westwood, and C. H. Leach. The general topic was the public market possibilities. Mr. Snyder called attention to the disadvantages of the present location for such an enterprise. Mr. Cohen suggested that the Mayor be induced to open the public streets to flower boys under certain restrictions, as less

likely to stir up resentment. Mr. Cassidy, as representing the retail store people, advised extreme caution on the part of the growers on this delicate subject.

A handsome vase of Mrs. Moorfield Storey rose graced the head table.

The banquet committee consisted of N. F. Comley, John McFarland and Carl Streiferd.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers.—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

Bulb Trade in California.

Further shipments of imported bulbs have arrived this week, and while few, if any more are expected, there is quite an abundant supply. The jobbing business, however, has been very good, and is still holding up in good shape, large individual orders being more numerous than usual. The retail bulb business, which started out well, is hardly holding up to expectations, as a good many department stores have gone into the business and are offering keen competition to the regular retailers.

Notes.

Los Angeles, Cal. The Aggeler & Musser Seed Company have moved into larger quarters at 1200-12 Produce street.

Imports of grass seed to the port of New York during the week ending Oct. 31, 1914, amounted to \$1,058. The value of trees and plants received during same period was \$6,117.

MANHATTAN REVISITED.

Of course we pass through the big town quite often and stay for an hour or two, year in and year out. But it must be twenty years since we put in a Sunday in Manhattan. The most astonishing thing we saw on last Sunday morning was the prevalence of the tall hat with the cutaway coat which is as extinct as the dodo in other parts of the world. It was a fine mild joyous sunny "Indian summer" Sunday morning and the ride up Fifth avenue on top of a bus was delightful and brought back old recollections of thirty years ago. How splendid compared with the subway!

Those "bite you" cars on Broadway are certainly funny, and make one think of Jim Shea's hippo "with the lovelight in her eye."

The most solemn places we went through were the new post office at 8th avenue; and the new Pennsylvania station at Seventh avenue. But both these are meant for the future—and fifty years from now will be probably considered very cramped and inadequate. As the United States grow in population so must New York grow—not because of its people but because of its harbor and geographical position. The Knickerbocker thinks he did it all. But geography did more. Geography brings the big brains there from all over the world to make New York what she is.

They've taken the horse cars off Chambers street at last and cute little baby electrics take their place. "The world and New York do move." When we smile at her provincialism let us not forget the wonders performed for her by McAdoo and Cassatt.

BRITISH HORTICULTURE.

Chrysanthemum Novelties.

Owing to the war the National Chrysanthemum Society has been compelled to abandon its Crystal Palace shows. In order that interest in the Society's operations shall be maintained a series of smaller exhibitions is to be held at the Floral Committee meetings in London. A special conference will take place on Dec. 9th, when papers will be read by experts. At a recent meeting of the Floral Committee awards were made to a number of novelties hereunder enumerated: Lowe & Shawyer received first-class certificates for General French, chestnut crimson; Delight, silvery pink; Miss Edith Webb, white florets, flushed with reddish purple; Cragg, Harrison & Cragg obtained a first-class certificate for Hestonia, buff, suffused with chestnut.

Items of Interest.

The suggestion by the Horticultural Trades Association that the motto of "Business as usual" during the war should be acted upon is evidently bearing fruit. The "Nurseryman and Seedsman," a London trade paper, has lately issued an International Novelty Number—the largest in point of advertising pages which has so far been published by that paper. This is very gratifying, at a time when most of the British papers have to deplore depleted revenue from advertising. The Belgian grower, despite his perilous experience, comes up smiling with enterprising notices, whilst the Dutch bulb growers are not relaxing their enterprise. It is apparent that every effort is being made to turn to good account the crippled condition of the German seed trade, and to smash the competition in the horticultural world from that quarter.

Sir Harry Veitch, the veteran horticulturist, has recently sustained a loss by the death of his nephew, J. G. Veitch.

No less than 671 growers entered a competition organized by Dobbie & Co., of Edinburgh, for the best six samples of the potato, Burnhouse Beauty.

About 70 employees of Sutton & Sons have joined the army. Two sons of Leonard Sutton are serving as second lieutenants in infantry regiments.

W. H. ADSETT.

National Dahlia Society of England.

On the 15th of October last the annual conference of the society was held at Carr's restaurant, Strand, London. The chair was taken by Reginald Cory of Cardiff, a well-known dahlia enthusiast whose trials are well-known and were referred to in Jos. Cheal's paper on The Dahlia as a Decorative Plant for Parks and Gardens, delivered before the Society at this conference. J. Stredwick opened the meeting by reading a paper on the history of the dahlia. There was practically nothing new or original in his remarks and for a full authentic and instructive paper on the subject nothing has yet surpassed the history of the dahlia read by the

Of Interest to Retail Florists**THE RETAILER'S BUSINESS CALENDAR.**

Nov. 14, Sat.—Make one day of every month "Advertising Day," on which to give consideration to all advertising matters. It's a bitter pill to swallow to find one's best customer has been lured away by a competitor's advertisements. But there's a remedy—better advertising. We should realize that it is the life blood of business.

No. 15, Sun.—Today is a good time for every employer to reflect upon his creed. We have all seen and heard about the employee's creed, but should not the employer also have one? The employer's creed might consist of something like the following:

1. I believe my salesmen are the greatest asset in my business.
2. I believe in their honesty.
3. I believe in their loyalty.
4. I believe in their ability.
5. I believe I am entitled to their confidence.

Nov. 16, Mon.—"Blue Monday" again! But don't let it catch you napping. Start the week with a smile. The optimist quite often gets some satisfaction from the fact that the people he doesn't like aren't twins.

Nov. 17, Tues.—It's a good thing to be active and hustle after business, but you must produce the goods if you would keep your customers. It's the return orders that count. Consider the phonograph, how it is always on the move and makes a pile of noise—but it never gets anywhere.

Nov. 18, Wed.—Don't neglect the mailing list. Make letters personal; avoid stereotyped forms. People like to feel that they are on a selected list. Emphasize the fact as to how particular you are about the kind of customers you want and explain your facilities for serving them. Service is the essence of all business.

Nov. 19, Thurs.—Originality is the faculty of thinking for one's self. Therefore—don't be a parasite! Imagine yourself a customer. Now what do you think of your store? There are plenty of people who are worrying about smokeless chimneys and noiseless pavements; put in a few licks for yourself for a lossless business and a shabbiness store.

Nov. 20, Fri.—Get everything ready for that big football game tomorrow. The opportunities we are all most eager to embrace are naturally the good-looking ones. Here is your chance. Advertise flowers and bouquet ribbons to match the competing school colors.

Nov. 21, Sat.—Look through HORTICULTURE for the new offers. Everything floral that is new and good is advertised in this excellent medium. Buyer and seller meet effectively to their mutual advantage when they both read HORTICULTURE. Keep in touch with what is going on in the trade. About the only excuse some florists can give for their presence is, "We're here because we're here."

NEWS ITEMS FROM EVERYWHERE

BOSTON.

E. H. Wilson, now in Japan on research work for the Arnold Arboretum, is expected to arrive home in Boston early in January.

Among the new stallholders at the Boston Flower Exchange are A. H. Westhaver of Malden and E. B. Hanson of South Royalton, Mass. The latter, who is one of our best local violet specialists, is represented by Wm. H. Carr.

Anderson Bros. of Woburn have a small quantity of aster seed of a new variety, shell pink, which they state will prove to be a revelation. This new aster has been tried out by them and by Gustav Olson of Woburn, who is the originator of the variety, for the last two years. They expect to disseminate the seed next season.

The old Harry Fenn carnation is still a favorite with many local growers. This is especially so with J. W. Simpson of Woburn, who states that he is having much success with this variety. The latter's business has been markedly prosperous during the last few years, in view of which fact Mr. Simpson expects to increase the size of his range shortly.

The scarcity of violets in the market was very apparent in a recent visit to some of the violet growers of Woburn, where the writer visited several ranges. The leading violet growers of the district, among them Wm. Spillsbury and Chas. A. Sanborn, agreed in placing the cause of the meager crop to the extreme mildness of the season. Both growers state that their output has been decreased over a third below normal. The plants are healthy and in good condition, but are shy on flowers.

Evidently some smooth gent is picking out the suburban florists as "easy marks," for two jobs have been nearly pulled off the last few days. Joseph Hamilton, a Salem florist, reports to the police that a man came into his store and ordered a piece of flowers for the Sons of Veterans. He neglected to complete the bargain by coming to the store after the piece, however, and so did not pass the worthless check he was probably going to present. Henry T. Conant, also of Salem, reports a similar experience. The man wanted a \$14 check cashed, but Mr. Conant could not see it and was not stung.

"Winter Perfection," one of Veitch's hybrid begonias, was noted at the E. A. Clark estate, Jamaica Plain, gard. Alexander McKay. This begonia has just recently come in from England and has not yet been exhibited in the United States. The flowers are a very attractive rose-pink. "Ensign," another one of Veitch's hybrids, an unusual variety, was also seen there. The writer's attention was caught by a number of magnificent specimens of the William Turner chrysanthemum, of the kind that captured first prize at the Boston Chrysanthemum Show. Several of these plants were over seven feet tall and the blooms surely spread eight inches.

Flower shops are springing up like mushrooms in the shopping district of the city. During the last month, at

least half a dozen have begun business within a minute's walk of Winter street. Winter street itself, although but a very short side street, now has four stores and two stands. This growth may or may not be ephemeral. Most of the new stores are operating under the cut price system and are advertising that fact. A large volume of stock is being sold to transients, and in this respect the development of these stores should help to relieve the over-glutted condition of the markets. The effect on the old established shops remains to be seen.

Henry Studer, under whom many of the local florists served apprenticeship. During the evening refreshments were served and an elaborate vaudeville entertainment provided.

George H. Cooke has at last taken possession of his new quarters at 1102 Connecticut Ave., and now has one of the finest establishments in the city. At the front is the sales department with the usual equipment and at the back of this is an archway, supported by carved pillars, forming a balcony across the store. This balcony is continued along the two side walls and

DECORATED AUTOMOBILE

In New York Tercentennial Parade. By Max Schling.

WASHINGTON.

C. E. Brooks, 1527 14th St., N. W., will open a branch flower store in the Arcade on upper 14th St. the latter part of this month.

Charles E. Scarborough has returned to Washington after an absence of nearly two years spent in Philadelphia and on his father's farm in New Jersey, and is again in the employ of Gude Bros. Company.

Anthony Hankey, formerly in the employ of Ira G. Marvin, of Wilkes-barre, Pa., and for the past three years connected with the Birchwood Gardens, in Hackensack, N. J., has entered the employ of George H. Cooke.

Otto Bauer, manager of the local branch of the S. S. Pennock-Meehan Company, Charles E. Meehan, a member of the firm, and J. J. Perry, manager of the Baltimore branch, are on an automobile trip through the Blue Ridge Mountain section visiting growers there located.

The large conservatory at the rear of the store of F. H. Kramer presented a most attractive appearance last week when the members of the several Swiss societies availed themselves of his invitation to there hold a joint meeting to plan for the Swiss ball for the purpose of raising funds for their needy patriots of the mother country, and to pay tribute to the late

forms a second floor at the rear and at the head of a broad flight of stairs. This balcony and floor space is used for the display of palms and ferns, and from the latter is the entrance to the small conservatory, with its cement flooring and single line of white enameled benches. At the foot of this stairway is a large space in which is located the icebox and several display cases for the showing of ribbons and other materials. To the left is a small entryway which leads to the large basement, and at the right to a large workroom. The walls and ceiling are buff colored and from the latter electric light chandeliers are suspended

by heavy brass chains. The floor is covered with green linoleum. There are two large display windows made shallow by two huge square uprights which are later to be covered on all sides by mirrors, making the display space shallow and allowing of a more advantageous display of the stock placed therein. The flooring of the window is but about one foot above that of the store, thus giving an unobstructed view of the interior. The entrance is roofed with dull copper and the trimmings of the windows are of the same metal. The low bases are of cement, ornamented in lattice work effect.

Gude Bros. Company are extremely gratified at the results obtained from their annual chrysanthemum show held last week at their store. The attendance was considerably larger and more appreciative than ever before. The entire first floor of the building, extending back from the street for a distance of nearly 130 feet, was a mass of color. During the show week all makeup work was accomplished in the large basement and, although this resulted in some little inconvenience, all orders were promptly handled. The salesroom was lined on either side by masses of autumn leaves, palms, ferns, roses and carnations, and vases of chrysanthemums, which included fine specimens of the leading varieties. In the center, in what is ordinarily a fountain, a rockery had been built, with palms and fine ferns surrounding. The rockery was built up to a height of ten feet and was topped with a large bunch of American beauty roses. The large plate glass mirrors on either side of the room were partially covered with strips of bark placed diagonally across them. This was covered with vines and cattleyas, *Dendrobium formosum* and other orchids. In front was a decoration of palms and ferns and here, as well as on the sides of the mirror, artistically placed, were bouquets of American Beauty roses and baskets of other roses in profusion. To these were added vases of superb chrysanthemums. In the workroom the long tables were filled with vases of flowers. The greenhouse at the rear was made up in tropical effect with palms and ferns setting off the vari-colored chrysanthemums to fine advantage. The fencing of the mezzanine floor was covered with autumn foliage and smilax. On this floor had been placed a large Victrola, which played throughout the day and evening.

CHICAGO.

The Marshall Field flower department is beginning to look more like a flower store now that the clerks are beginning to understand better how to handle the stock. The space assigned is still very small for an extensive business, scarcely more than is allowed for artificial and prepared flowers and foliage, which occupies the adjoining section.

Garfield Park conservatories are open to the public from 8 A. M. until 10 P. M. from Nov. 8 to Nov. 22nd. That this is appreciated is evidenced by the fact that over 22,700 visited the chrysanthemum display there on Sunday, Nov. 8th. A trip through the conservatories where over 3000 single

BE SURE that you get the MEYER GREEN SILKALINE, and do not take any other that is sold as an imitation of the MEYER GREEN SILKALINE, as they do not have the full weight, measure and strength of the genuine article. All our GREEN SILKALINE is guaranteed up to the high standard and mark. The sizes are F, fine; FF, medium; FFF, coarse. It is for sale by all the best jobbers. If you cannot get it of your jobbers, order direct of the manufacturer.

JAPANESE WINDOW DISPLAY BY PENN THE FLORIST.

The above illustration represents a characteristic window display of this Boston house—a recent Japanese decoration in which exquisite miniature gardens were featured. The sets were

laid on a background of dark green velvet. Effective advertising is the slogan of the firm and their window advertising receives fully as much attention as that through any other medium.

stem plants and 2000 bush plants of chrysanthemums are on exhibition together with the 320 varieties of orchids as well as fine specimen palms, and the various other attractions that can be found here, well repays one.

Among the newer chrysanthemums being tried here the following have been found very satisfactory: Elderson, pink incurved; Jas. Fraser, lemon yellow; Chieftain, pink; Mrs. R. H. Bogg, white; Mrs. W. A. Read, red; Mrs. Gilbert Drabble, white; Gertrude Peers, red; Mendon, pink; Mrs. Paul Moore, yellow; Romance, white. These are all large flowering and most of them are fine for single stems or bush plants. The following pompon varieties have also proved very good: Ruth, lilac; Blushing Bride, pink; Mary, tinged with pink.

The largest wedding decoration of the season was executed by Mrs. H. Simpson for the Davis—Bankstrom nuptials. The outer aisles of the church were bordered with palms and chrysanthemums and the altar banked with palms, wild smilax, prepared oak leaves, large chrysanthemums and pompons with white roses in the front. For the six bridesmaids, Mrs. Simpson arranged gilt baskets, each filled with Sunburst, Ophelia, Bulgarie and light pink Killarney roses. The maid of

honor carried American Beauty roses. At the house, festoons of smilax, *Asparagus plumosus*, roses and chrysanthemums were generously used.

Springfield, Ill.—Springfield, the capital city of Illinois, entertained nearly a thousand women who attended the State Federation of Women's Clubs there Nov. 10-13. The chief social event of the occasion was the reception at the executive mansion, by Governor and Mrs. Dunne on Nov. 10th. The rooms were very tastefully decorated with palms and a generous use of chrysanthemums, chiefly in yellow and white. Boxes filled with white pompon plants stood upon the mantles and the lower banisters of the stairways were topped with the same. The refreshment tables had centers of moss, covered with ferns from which rose tall yellow chrysanthemums. Baskets were also used largely in the various rooms. A. C. Brown, 217 S. Fifth street, the leading downtown florist, had charge of the work which did him credit. Springfield is a popular convention city and the florists appreciate these orders more perhaps than ever before. Some fine bunches of roses were presented to the officers which were also grown in the Brown conservatories.

Flower Market Reports

BOSTON Chrysanthemums continue to control the market. They take the place of all other long-stemmed crops and yet command but a poor figure. The best products of the chrysanthemum specialists secure very mediocre prices. The market is looking forward to the close of the chrysanthemum season with great expectations. This is especially true of the rose growers, whose products so far this season have had to take second place to the "Autumn Queen." Violets are a rarity, although whatever there are are of good quality. Paper white narcissi are beginning to appear in small quantities. Sweet peas are still scarce. The last few nights have been a bit chilly and with this as a sign of real winter, we can hope for a shortening up of most crops and an increase in the violet output very shortly. The retailers in general are not enthusiastic over the prospects of the season, especially since the epidemic of new shops has started.

BUFFALO Conditions in this market are unchanged, but as the early chrysanthemums have been cleaned up and all the outdoor truck gone, prospects look somewhat better from now on. There are the usual amount of roses in all grades and varieties and these have gone to the buyers at practically their own prices. At this time prices on roses are 40 per cent less than a year previous though some varieties which are sold only in small quantities are about the same. Chrysanthemums have taken well considering the heavy receipts and Mrs. Turner which is grown especially fine in this locality has reached the \$4 a dozen mark but only a few. The majority of sales are the medium stuff at prices from \$6 to \$10, such as Adelia, Maud Dean, Golden Wedding and Josephine touched the 20c. mark and so far have sold exceedingly well. Carnations have been very plentiful this fall and in prices have not been up to previous years. Quality of blooms is good but the stems are weak in most cases. There are more white carnations than colored. Lilies are plentiful with no special demand. Sales on violets picked up a little but fell off on lily of the valley. Some fine pompons are coming in and these have taken well.

CHICAGO Last week the market opened up with a fair prospect for at least an average business and it was hoped that at last trade would take up a trend of natural activity for the season. As the week advanced, however, it soon became evident that the little activity of the first few days was only a "flash in the pan." The week closed extremely disappointing. Saturday which is generally a clean-up day for all odds and ends proved little better than a midweek day, and consequently large quantities of stock were carried over; as a matter of fact the ice boxes of all the dealers at the close of Saturday's business were crowded to the doors. Roses, which up to last week have cleaned up fairly well, joined in the general slump. Carnations fared no better, thousands of them being left over. Chrysanthemums are less of a glut than other items, still these

move slowly at very low prices. The midseason sorts are about over and all the late varieties have made their appearance in large quantities. Bonaffon, generally classed as a midseason sort appears to be at least a week later than usual. Eaton, both white and yellow, is superb. Chas. Razer is to be had in any size and quality. Chadwick white, pink and yellow has made its appearance and denotes the near close of the season. To judge by present conditions chrysanthemums will be pretty well gone by Thanksgiving day. The opening of the market this week is no more encouraging. The rose crop is none too heavy, but stock moves slowly, pink and white Killarney particularly. The new varieties meet the best demand, Russell still leading the list; Sawyer sells well and so does Ophelia. Beauties are fairly good, but move slowly. Carnations continue in over-supply; it is only on the very best that even a fair price can be realized; the poorer grade and short-stemmed have to be sacrificed in job lot sales. Lilies are about equal to demand. Lily of the valley is moving slowly and there appears to be

a falling off of the usual crop of fall weddings. Sweet peas are more and more in evidence, some very fine winter flowering butterflies may be had and these bring \$1.00 to \$1.50 per 100. Violets are improving but meet with slow demand; besides eastern double some very fair local grown singles are offered.

The local market is
CINCINNATI still overcrowded.

The general demand is pretty fair but the supply is so very large that only low prices are realized by the wholesalers. Chrysanthemums are very plentiful. The greater part are short and medium grades that at the best have only an ordinary sale. Pompons have only a fair market. Roses are coming in in large quantities and are of a high quality. Carnation receipts continue to increase. Lilies, though in not quite as large a supply as before are still more than sufficient for needs. Both callas and rubrum lilies are offered. Double violets are now in.

Flower Market Reports

(Continued from page 701)

KNOXVILLE, TENN. The weather remains warm and, although we have had a frost, much out-door stock is still on the market, especially chrysanthemums, and trade is not as good as it might be under more favorable conditions. Stock of all kinds is plentiful. Chrysanthemums are fine; Roman Gold, Nellie Pickett, Dr. Enguehard, Chas. Razer, Col. Appleton and many other varieties are now in full crop and never were finer than this season. Carnations are gradually growing better and are enough to more than supply the local demand. Roses are not very good.

NEW YORK There is nothing that we can say regarding market conditions except that they are much worse than last week. Chrysanthemums of all kinds are exceedingly plentiful with a tendency to lower prices. Lily of the valley is also abundant and 2c. seems to be the top price. Lilies are clearing out nicely. Roses are not going near as well; the high grades especially seem to be suffering the most. American Beauties, if anything, have improved in price as quotations will show. Narcissus Paper White are getting to be a glut at six bunches for \$1.00.

PHILADELPHIA The flower trade is holding on a fairly even keel here. The trading has been of good volume but prices on the whole have remained very moderate. Chrysanthemums dominate the market. There is a good demand for them but the supply is so large that prices for even choice stock are very low. Bonnaffon and Razer are the leaders. Roses are very plentiful and good and in great variety. Buyers may choose among thirty or forty new and standard sorts instead of the old three or four of a few years ago. Carnations are now of fine quality and sales fair; but the prices are lower perhaps than ever before known for them at this time of year. Gardenias are fine and the demand has improved slightly. The orchid situation is pretty fair, prices reasonable and they are moving well. Lily of the valley rather on the scarce side although prices have not as yet advanced any.

SAN FRANCISCO Retail activity in this city is steadily increasing, and the larger down-town shops are particularly busy just now. The wholesale market, however, is not in altogether satisfactory shape. Florists in the interior are still relying largely on home-grown stock, and with fine weather still prevailing, there is considerable competition from outdoor flowers. Shipping business with eastern points is also rather slow to develop. Chrysanthemums are as fine and as plentiful as ever, the supply, indeed, being excessive, as they are hardly as much sought after as before. Prices have been sagging in consequence. Carnations are very plentiful, and while the average quality is improving, decidedly easy prices prevail on ordinary offerings. Violets even yet are hardly at their best, needing colder weather to harden them up a

little. They are moving well locally, but the shipping movement is limited. More growers are beginning to cut roses, but there is nothing new as to varieties, and there is a tendency to conserve the stock for the Thanksgiving trade. Current offerings, however, are fully as much as the market will absorb. Orchids remain plentiful, but find a very fair market. Gardenias are rather scarce at the moment, as the leading growers have not commenced cutting from their new plants, preferring to hold them until there is more demand. Greens are quite plentiful, and some California holly berries are appearing, though not yet in large quantity. It is reported that some eastern firms have arranged to ship these berries east in large quantities from the Sierra mountains.

ST. LOUIS The supply of cut flowers still crowds up the market so that prices

in some cases have dropped lower than ever before. Chrysanthemums have the call over all other stock and will have as long as they last; all the late varieties are now coming in and some of the early ones are still with us. Roses are slow in demand. Sweet peas sell well, also violets. Carnations are, like roses, slow in demand and large in supply and of fine quality. The retail business has been dull, but with cooler weather this week the demand should be better and the prices higher.

WASHINGTON A return of the warm weather has served to fill the local market with flowers of all varieties. There is a large oversupply of chrysanthemums, and great difficulty has been experienced in finding a market for these, although the shipments to other flower centers have been very heavy. No better flowers than these have ever been seen in Washington, and the consignment of large quantities to the ashheap is all the more regrettable. There are large amounts of roses and carnations, but the predomi-

nance of chrysanthemums has caused them to be very sluggish. These have been taken up in part by the many small weddings which have also offered a favorable market for lily of the valley. Christmas Pink and white sweetpeas are now to be had, but the quality of these flowers is poor and stems short. Violets are still scarce, although in good demand. Carnations are daily improving; the quantity last week was excessive. Gardenias are stronger and in a little better demand. Dendrobium formosum is in heavy supply and other spray orchids are quite plentiful. In roses, Afterglow is a recent arrival, but with Fire Flame they constitute an exclusive grade sought after by only the better classes. The leading chrysanthemums of the week are Colonel Appleton, Amorita, Mrs. Shaw in both pink and white, Major Bonnaffon, Charles Razer and Dr. Enguehard.

ILLNESS OF CHARLES H. TOTTY.

The sole important topic in New York this week is the serious illness of Charles H. Totty. He was a visitor at the Flower Show in the American Institute in the Engineers Building on Wednesday, apparently as well as ever. Upon his return home he was taken suddenly ill and was removed to the Overlook Hospital, Summit, N. J., on Friday, where an operation had to be performed immediately for appendicitis. It turned out to be a very serious operation as peritonitis had set in and the operation took almost two hours. For a long while Mr. Totty's condition was critical, but we are pleased to say at the time of writing he is slowly on the mend and the doctors hold out hope now that he will pull through.

J. H. Troy has severed his connection with the Rosary Flower Co., 24 E. 34th street, New York City. For the present, however, he retains 25 per cent. of the stock of the corporation.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

FOR SALE—Two Lord & Burnham 9-sectional boilers, 1 No. 15 L. & B. Greenhouse material new, at a reduced price. V. E. REICH & SONS, 1429-31 Metropolitan Ave., Brooklyn, N. Y.

SAN FRANCISCO NOTES.

The Horticultural Society is making great preparations for its annual ball, to take place on the evening of Nov. 14 at Native Sons' Hall in this city. Invitations are in great request, and a record attendance is expected. Arrangements for the affair are being made by Frank Thatcher, of Pelicano, Rossi & Co.

The MacRorie-McLaren Company now has a nice lot of Phalenopsis amabilis, and is letting its cyclamen, of which it has some unusually large plants, go to flower. This company also has some Lorraine and Cincinnati begonias of its own propagation, said to be the first of the kind ever propagated on the Coast, which are the largest that have been seen here.

The decorations for the annual dinner of the Faculty Club of the University of California at Berkeley, carried out by Prof. Gregg and Prof. Stephens of the landscape engineering department, received considerable favorable comment. The leading feature of the color scheme was gold, and some 800 large yellow chrysanthemums were used. This department of the University has made great progress of late, and is getting some fine results in its nurseries. The nurseries are now showing a wonderful variety of new introductions, including mainly Australian and South American plants.

In writing to Advertisers kindly mention Horticulture

Obituary

John L. Parker.

John L. Parker, for many years the leading florist of Birmingham, Ala., and highly respected in business and social life, committed suicide by shooting on Tuesday, Nov. 3. He was 49 years of age. He leaves a widow.

Christian Ackerman.

Christian Ackerman, Sr., of Riverside Floral Co., died at his home in Columbus, Ohio, on Monday, October 26, at the age of 58, after a long illness. He leaves a widow and four sons. Three of the latter were in the business with him.

F. C. Kirchhoff.

Old in experience but still young in years, Frederick C. Kirchhoff passed away at his residence 4705 Milwaukee avenue, Chicago, November 2nd. Mr. Kirchhoff was born in Germany 51 years ago and left the fatherland for Chicago when ten years of age, and began his experience as a florist almost at once. He has been identified with the northwest side of the city and helped greatly to develop it. Three times he built greenhouses and store, only to move farther out and his last place is just nearing completion. Mr. Kirchhoff leaves a widow, two daughters and five sons, two of whom, Edward and Herbert, will continue the business.

John Gilmartin.

The fatal mistake of taking a drink in the dark caused the death in five minutes of John Gilmartin, 42 years old, in his home on the estate of Perce Bros., Waverley Oaks road, Waltham, where he was employed as a gardener.

Before leaving the greenhouses there, Gilmartin filled a pint bottle with a powerful disinfectant and carried it home for use in killing flies. He took a hot mustard bath to help relieve a cold and was about to retire shortly before 11 o'clock when he decided to take a drink of whiskey out of a pint bottle he kept in the house.

Reaching for the whiskey bottle in the dark, he got the disinfectant instead, and took a long drink. Agonized screams brought his wife and two children to his side quickly, but before a physician could be summoned he was dead.

Henry Cannell.

We clip from a lengthy account of the life and achievements of the late Henry Cannell in *The Gardeners' Chronicle*, the following notes:

The news of the death of Henry Cannell, the noted florist and founder of the firm of H. Cannell & Sons, will be learned with regret by gardeners everywhere. He died on the 25th inst. at Swanley, the small Kentish village with which his name is associated, in his 82nd year. Deceased was born at Norwich in March, 1833, the eldest son of a large family. His gardening career commenced at the early age of 11½ years in the nursery business of Messrs. Mackey and Stewart, Norwich. Later he became gardener at Portnall Park, Virginia Water, where he remained for a few years, and on leaving that establishment he opened a nur-

sery business at Woolwich on land belonging to his uncle. His new enterprise prospered, but the district was unsuited to plants, and he removed to Swanley, away from the smoke and fog of the Metropolis. How the "Home of Flowers" at Swanley grew into one of the largest nursery businesses in the country is well known, as is also the great part its owner played in the popularizing and developing of such florist flowers as the chrysanthemum, pelargonium, fuchsia, dahlia, Chinese primula, violet, heliotrope, canna and begonia. During more recent years Mr. Cannell directed his labors more especially to the improvement of zonal-leaved pelargoniums and cannas, and his exhibits of these flowers were always features of the R. H. S. fortnightly meetings. He was greatly interested in cactaceous plants, and it was his pride to refer to his collection as one of the most complete in the country. Mr. Cannell was a cultivator of unusual ability, and, in addition, he possessed a keen business aptitude.

The Victoria Medal of Horticulture was conferred on him in 1902. The troubles of his closing years were somewhat alleviated by horticultural friends, who contributed a fund for a pension. Amongst his most treasured possessions was a gold medal from the inhabitants of Eynsford, who also planted an elm tree in the principal part of the village in his memory. Misfortunes followed his declining years, at a time when, owing to failing sight and health, he was unable to cope with them. Had he been able to fight his trouble with youth and vigor on his side, we are convinced that his grit and determination would have surmounted every obstacle, for Henry Cannell was a remarkable man.

MASSACHUSETTS AGRICULTURAL COLLEGE.

On Tuesday and Wednesday, November 3rd and 4th, a chrysanthemum show and exhibition of floral arrangements was given by the Department of Floriculture at the Massachusetts Agricultural College. A large number of exhibition chrysanthemums, all of which were grown in the college greenhouses, were shown. A contest among the Junior students in table decorations added materially to the interest of the show. Wedding bouquets of roses, corsages, and baskets and box arrangements of various kinds of flowers were done by the Seniors in the course. Exhibits of new varieties of flowers, potted plants, and pottery were sent by growers and people in the trade. The entire exhibition was much larger than any held by the Department in former years and was visited by over a thousand people from all parts of the state as well as from the near vicinity.

The exhibits were prepared and arranged under the supervision of the department staff assisted by the students of floriculture. The chrysanthemums in more than seventy exhibition and commercial varieties surpassed all expectations and elicited much favorable comment. A feature was an arrangement of palms and decorative plants interspersed with pot plants of large, single-stem yellow and white chrysanthemums. Other banks and masses of decorative plants with

286 Fifth Avenue, New York.

single chrysanthemums in pots formed a background for the exhibits.

The Junior students showed both taste and skill in decorating their tables. In this class were sixteen entries for which three prizes were awarded. Miss Esther Chase of Holden, Mass., received the first prize of \$5.00 for a very light and dainty design of Fairy Queen (light pink pompon) chrysanthemums and adiantum. Miss Gertrude White won second prize, \$3.00, with a low decoration of Dorothy Dann (bronze single) chrysanthemums and Asparagus Sprengeri. A table decoration of foliage of Japanese maple and Dorothy Dann chrysanthemums gained third prize for Mr. McKechnie. Ornamental vases and pottery, baskets and other accessories of the florist were displayed. Large vases of chrysanthemums and box trees were used in the general scheme of decoration.

Interesting exhibits by growers were sent in. Henry A. Dreer, Inc., of Phila., exhibited plant novelties, crotons, adiantums, asparagus, etc.; F. R. Pierson, of Tarrytown, N. Y., showed different types of Nephrolepis; Butler & Ullman of Northampton, Mass., had an exhibit of accessories of the retail florist. Peter Fisher, of Ellis, Mass., and the Montrose Greenhouses of Montrose, Mass., exhibited specialties in carnations and roses.

Tuesday evening the Holyoke and Northampton Florists' and Gardeners' Club met at the college in conjunction with the M. A. C. Florists' and Gardeners' Club. Mr. Butler of Northampton gave an interesting talk on floral decoration.

Waterbury, Conn. — Unconscious from illuminating gas poisoning since last Saturday morning, Mrs. Ellen N. Ryan, mother of George T. Ryan, the florist, of 22 East Main street, is lying at death's door in St. Mary's Hospital as a result of failing to turn the gas off completely when she retired early Friday evening. Since the discovery of the woman lying unconscious in her bed in her apartments at 16 East Main street occurred she has failed to respond to the most vigorous treatment and absolutely no hope is held out for her recovery. There is every indication that the case was purely accidental.

LEMON OIL CO'S STANDARD SOLUBLE IN WATER INSECTICIDE NO ODOR NO POISON

Guaranteed under the Insecticide Act, 1910. Series No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Directions on every package

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little often than too much all at once.

We offer the genuine in original cwt. Sacks, at:

\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

IF YOU ONLY

KNEW what a

good have the

METROPOLITAN

PATENT-

ED is, you would

use no other. It

is made of cast

iron and will not

rust. That part

of your green-

house which in

other construc-

tions is the weak-

est becomes the

strongest. Not

this alone, it is

ice-clearing and

carries all the

water of con-

densation from the inside, and it is so

constructed that almost the entire end

of the bar is exposed to the air, there-

by preventing decay. Only one screw,

about two inches from the end, is all

that is necessary to secure the bars.

For side stationary glass, wood headers

are absolutely unnecessary, thereby

causing no shade. Zinc glass stops are

not necessary—the glass is made with

a lug to prevent the glass from slip-

ping. Let your next house be built

with a Metropolitan Patented Iron Wall

Construction. You will never regret it.

Our price and service are right.

MASTICA
Greenhouse Putty
USE IT NOW
F. O. PIERCE CO.
12 W. BROADWAY
NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

THE FLORISTS' HAIL ASSOCIATION OF AMERICA, insurer of 39,000,000 sq. ft. of glass

For particulars address

John G. Esler, Sec'y Saddle River, N.J.

ON GUARD!!

No Greenhouse Man can afford to take the risk of leaving his place unprotected against the possibilities of overheating or frost, when absolute safety against either of these contingencies can be assured by installing the **faithful, sleepless, watchman**, whose portrait appears herewith. All you have to do is to set the hands—one at minimum and the other at maximum temperature limit and the Thermostat will give instant warning if temperature goes above or below.

All This for \$5.00

Ridge Framing In Our Reconstructed Construction

THE more work we can do in our factory on a greenhouse, the better. It brings the cost down for you and means quicker erection on the job. One radical departure in our *Reconstructed Construction* is the complete assembling and hot-riveting together of the rafter, from the ridge to the column, in connection with the main members and strut of the double angle iron truss. See bottom cut.

To splice this assembled rafter and truss together at the ridge we use an Angle Splice Plate and bolts. See top cut, part No. 2.

The 12 feet 13 inches span of the ridge between the rafter is so long that if not stiffened it would have a

tendency to sag. To prevent this we run a light steel rod truss from rafter to rafter with a strut in the centre. See top cut, part No. 1. Now take particular notice of the extra wide ridge cap overhang and how it is milled out to take the sash, making a weather tight cap that is weather tight. See top cut, part No. 7.

Detail at ridge, particularly showing method of splicing together rafters and truss

Notice also, the notch that is milled on the sash to prevent the wind forcing the water between the sash and cap. In the next Ad. we will tell you still more about the ridge and further about the rafter truss.

The rafter and truss from the ridge to the column are all assembled and hot riveted at our factory. This saves time on the job and greatly increases erection speed.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil."—*L. J. P.*

Cinerarias for Christmas

Plants intended for Christmas should by this time be well advanced in 5 or 6-inch pots. Where the roots have filled their pots they should have some manure water at least once a week. See that they are given plenty of room between the plants so they will not draw. Do not try to force cinerarias in a high temperature, as it will spell ruin. They should be kept as near to 45 degrees as possible during the night with 10 to 15 degrees higher with sunshine. Keep the atmosphere cool by free ventilation. Keep a sharp outlook for greenfly. Give them a fumigation every week and you will be sure to have nice clean plants. Give them full sun.

Irises for Forcing

These flowers are coming into favor every year. Flats about 4 or 5 inches deep and of ordinary size, should hold about 45 to 50 roots with ease. They like a good compost, say three parts fibrous soil to one of well-rotted manure. Give them a temperature of about 45 degrees at night. When they have made good roots they will stand from 5 to 10 degrees higher. These plants will not stand anything like hard forcing. Keep the compost moist as they do not like to become dry at the roots. Give them a good light bench and well up to the glass.

Lilium speciosum

Lilium speciosum should be planted just as soon as received. For a compost use fibrous loam three parts, well-rotted manure one part. Be sure to give plenty of drainage as next spring they will need lots of water which should pass off freely. A single bulb can be put in a six-inch pot, but a better plan is to allow three bulbs to an 8-inch pot and six bulbs to a 10-inch pot. These make good sizes when the flowers are wanted for cutting. See that they have a good soaking of water and are kept in a moist state. A good place for them is in a cold frame where they can be covered with about six inches of soil. When the weather becomes cold they will want the protection of sashes and later on some long manure or hay to prevent too hard freezing.

Resting Bougainvilleas

Bougainvilleas should by this time have made all the growth necessary, which should now be followed by a ripening process, but, of course, this should be done gradually or harm will result. From now on up to January they should have a period of rest. Start by withholding water gradually giving less each week until they are at a point of flagging when they should have enough water to freshen them up. Keep only enough moisture in the soil to overcome absolute dryness. Give free ventilation to keep the atmosphere dry and cool. This treatment will assist the wood in maturing. Do not keep them in a high temperature. Anywhere around 50 degrees at night will do.

Paper White Narcissi

Paper whites must have time to develop plenty of roots before they can receive any forcing. After they

have made plenty of roots they will take from 7 to 8 weeks to bloom in a temperature of anywhere from 50 to 58 degrees at night. Give them all the sunlight possible. Batches brought in from a cool house every ten days will give a succession of bloom. When they are fairly well out they can be placed back in a cool house, thereby holding them in good condition for some little time. They will want abundance of water at the roots just as soon as they have made plenty of roots. In order to have flowers with good substance and strong stems they will need plenty of ventilation whenever possible. They can be well syringed until they start to open, but after that syringing should stop.

Spiraeas

Clumps of spiraeas when they arrive should not stay in the boxes as they usually get dried up in transit. Give each clump a thorough soaking in a tub of water, and if there is not time to pot them up now, lay them in a trench outdoors. These can be brought in later. Be sure to give them a rich compost when potting as they are rank feeders.

Mr. Farrell's next notes will be on the following: Allamandas; Carnations; Gardenias; Propagating Crotons; Rhododendrons; Asters.

Chinese "Wool Flower"

This odd-looking celosia, which attracted much curiosity at the New York Shows is an annual, the seed of which was sent to me from China, four years ago. I have grown it now for three seasons and shall introduce it in 1915. It is as easy to cultivate in the garden as any of the celosias. The blooms begin to develop in July, and continue to increase in size and numbers until killed by the frost; none of the blossoms fade until injured by cold weather. It grows about two feet high, branches freely; each plant shows twenty or more main heads of bloom, but every stem is full of laterals showing

small bloom. So the plant is as near a solid mass of color as anything I have ever seen in cultivation. It is a very shy seeder, some plants producing no seed at all, and others only a dozen or two. It is in my judgment, the best and most showy all-around annual in cultivation. The color of the flower head is rich crimson, and on measurement the circumference was $13\frac{1}{2}$ in. The stems are half an inch thick.

Flowerfield, N. Y.

Ilex opaca

The American Holly is very well known as a Christmas decoration but in plantings and as a garden ornament it is altogether too little used. The northern limit of this plant is in the country just south of Boston, Mass., but with a slight protection or in the right situation, a northern exposure on sloping ground, it will prove fairly reliable—in fact there are several large specimens in and about Boston. It is the only holly that can withstand the rigor of our New England winters without injury and without protection other than as above mentioned. Sometimes its leaves may be injured if it is too openly planted and does not receive partial shade from neighboring trees.

(*Ilex Perneyi*, one of Wilson's Chinese discoveries, gives good promise of being hardy in Boston. It is very beautiful.—Ed.)

Ilex opaca will form a small tree up to fifty feet in height, with short, stout branches, and a narrow pyramidal head. The leaves are too well known to need description. The berries on the American variety are not as handsome as those of *Ilex aquifolium*, the European variety, nor are the leaves as highly polished, but in that the shrub is considerably more hardy this extra beauty can easily be dispensed with.

The American Holly cannot be said to transplant entirely successfully when collected from the woods for it then takes on a blacker look and appears sickly. However, plants are raised easily enough in other ways. In procuring stock one should be careful to get only that from the coldest and highest attitudes where the plant is found wild, as this tends to make hardier trees. Care should also be used in selecting stock from a fruiting tree, for being a dioecious plant, the beauty of the berries will be lost unless good selection is made. Propagation may be effected by division, by which method a fruiting plant may be procured, but a very prolific individual should be selected from which to make the divisions. This process, however, is necessary when only one or two plants can be afforded, but where possible, propagation from seeds is the best. Where there are a large number, seedlings can no doubt be easily selected, as there will be among them a sufficient number of fruiting plants to make the collection interesting. The seeds germinate slowly, sometimes not producing plantlets till the second season. Dry gravelly soil is generally conceded as the best for the development and growth of the species.

Ilex opaca would doubtless prove a valuable hedge plant in the latitude of southern New York and Pennsyl-

vania, if it could be purchased at reasonable prices. Especially would this be true in the region near the sea-coast for it seems to thrive especially well in the salt air.

It is interesting to note that often some of the leaves are wholly without spines and the margin becomes entire. Often it is found that the lower branches are clothed in spiny leaves and the upper in the entire and spineless ones. This is also true of the English holly.

Cattleya Dowiana Memoria Julius Roehrs

TOP—DOWIANA TYPE. BOTTOM—MEMORIA JULIUS ROEHRS

The beautiful cattleya which is the subject of our cover illustration this week has recently appeared, flowering for the first time, in a lot of imported *Cattleya Dowiana* and has been named *Memoria Julius Roehrs* in respect to the late Julius Roehrs of Rutherford, N. J.,—a well merited compliment to a man who during his life did much for the cause of orchid culture in the United States. The flower differs from the type in that the lip is gold and orange-veined, without a trace of any other color. In fact it is an all-yellow *Dowiana* and for hybridization purposes to get an absolutely pure yellow cattleya its value cannot be estimated. On this page we again show the flower, with a bloom of true *Dowiana* above it for the purpose of comparison.

THANKSGIVING DAY NOTICE

THANKSGIVING DAY COMES ON OUR USUAL PRESS DAY NEXT WEEK THURSDAY. CORRESPONDENTS AND ADVERTISERS SHOULD PLAN, THEREFORE, TO HAVE ALL COPY FOR THAT ISSUE REACH OUR OFFICE NOT LATER THAN WEDNESDAY MORNING, NOVEMBER 25.

ROSE GROWING UNDER GLASS

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Damping Down

Even in houses that have a good deal of concrete work on the floors, damping down from now on should be omitted, by all means. The moisture coming out of the soil in the benches as these dry out will be all that is necessary to keep the air in the houses right. Under ordinary conditions, we never employ damping-down at all, as we find no benefit by so doing, and as a rule find that blackspot will start much sooner in houses where damping-down was practised than where it was not. This method may be all to the good in other branches of the business but we would keep it out of the rose houses altogether.

Fumigation

Do not wait until greenfly and other pests appear before starting to give them a dose of smoke or gas. The same applies to spraying, and it is much better to use a weak spray oftener than a strong spray only once in a while. Even though the plants do not show any ill effects from smoke or spray we believe that it affects them just the same, and as soon as the dose is made too strong, then the injury is at once visible. Try to fumigate just before syringing—that is, the night before. If there are any flies left alive, they will not be feeling very well, and a good stream of water will finish them up, or else throw them under the benches, and they will be too sick and too weak to crawl back to the plants again. As it is necessary to have the plants wet enough to syringe the next day, the smoking will be much more effective. In fact if the plants are dry at all do not smoke or spray, for even a weak smoke or spray may burn them at this time. During the summer it was best to fumigate while it was raining, for all the little openings here and there in the glass were full of water, thus making the houses much tighter. Now there is always more or less condensation on the glass, and this will keep the houses tight at any time. Avoid burning tobacco stems from now on, for they will prove harmful to the flowers. If the houses dry out well, it would be well to apply some of the tobacco stems to the benches, scattering them well so that they will not lie too thick. They should be applied as evenly as possible, and will then become a plantfood, and an insecticide as well.

Cutting

When cutting the Beauties be very careful not to cut off all the shoots, for a plant like that will seldom amount to anything any more, and more than likely it

will die. Look at the plants well when cutting and if the flower to be cut is the last and only break that the plant has, disbud or rather pinch out the bud, and let the stem remain. This will give the roots something to do, and they will not die; instead the plant will put out new breaks in the near future. Although it is well not to let the buds get too far open before they are cut, it is profitable to let them remain on the plants until they have a chance to become large, and well pointed. This will make them almost twice as large when they become fully open.

Disbudding

Never neglect this very important item, especially now when even the best of stock brings small prices. Stock that is not disbudded when it should be, will have much smaller buds, and will appear somewhat disfigured, to say the very least. Keep right after your growers—or after yourself for that matter—and see that this is attended to as it should be.

Sand

Before the bad weather sets in, it is well to see that there is a good supply of nice sand for propagating for the coming season, for where large quantities of plants are required, propagation begins right after Thanksgiving. Unless the sand is to be used immediately, we would never recommend putting it into the propagating house at once. Should this be done, and no cuttings put in at once the sand will get full of disease germs of all kinds, and will not be very healthy for the cuttings when these are finally put in. Keep the sand in a clean shed somewhere until it is wanted and then put it in the benches, and as soon as it is warm enough, put the cuttings into it.

Old Beauty Plants

Plants that have been cut down, and run another year, should be doing very nicely, and great care should be exercised in cutting from these so as not to cut some of the plants all off. The notes on cutting written above will apply well to these plants. Then be careful with the water. Mark all that are suffering from too much water with a little lime, and then keep the water away from these when the other plants are watered. Carefully cutting will keep these plants all even and there will be none that will suffer. It seems like waste to disbud a perfectly good bud, and leave the stem, but it will pay in the long run, and is what counts in the end. It is not one day's cut that makes the money. It is the average all the year through.

Next Week: Sheep Manure; Soot; Storing Manure; Soil for Potting; The Coal Supply; Electric Lights.

On the right track Felicitations to Lancaster, Pa., on their success in carrying through a flower show in modern, progressive lines, as told in our news columns. Every city in the country can do equally as well, if the local trade and profession will only follow Lancaster's good exam-

ple and, forgetting immediate self-interest, for the time being, all get together enthusiastically for the general good. The lively impulse given by these local affairs when properly conducted and the resultant increased interest in and demand for the products of the florist cannot be overstated. In the lesser communities they are undoubtedly far more potent in this respect than are the more pretentious displays presented to the amusement-seeking public of the metropolitan centres. We congratulate our friends in Lancaster for their good sense and public spirit and we hope to see their progressive example emulated in a score of places next season.

Philadelphia for 1916

We believe that the horticultural interests generally will be much gratified in reading the minutes of the meeting of the National Flower Show Committee held in Philadelphia last week. We present the report in full detail, for, showing as it does, the representative character and standing of the Philadelphia firms who have pledged enthusiastic co-operation in this big undertaking, it eliminates all anxiety as to what support may be expected from the local trade and profession, whose loyalty and zeal are so indispensable to the full success of such an enterprise. That Philadelphia means business and will rise to the occasion with her old-time spirit and unanimity there can be no question. The prime movers have done well to start in thus early. A year and four months is not too far ahead, and we hope the work of schedule making and other preparatory measures will be promptly proceeded with. The situation seems to hold every element for success and a glowing promise that the National Flower Show of 1916 will eclipse in many respects all those that have gone before.

Unfair competition

The seed houses and other horticultural dealers generally in the United States have good and sufficient cause for protest over the increasing number of foreigners who, maintaining no established office here, and paying no taxes of any kind, local, state or income, travel all over this country soliciting business in competition with established American concerns. We have in mind parties whose advertisements and correspondence give as their address, offices where their name even does not appear on the door; no information as to their whereabouts can be elicited, and their only apparent connection therewith is that their mail is there received and held for them. From the prominent location of the addresses thus advertised, trade buyers are led to place a confidence in these migratory prowlers which they would not do if they knew the facts. American dealers and those foreign houses that maintain legitimate offices in this country are called upon to pay income and other business taxes, and some way should be found to hold these shirkers up to a proper responsibility, and compel them to do likewise. A vigorous rounding-up by the business men of New York and other seaboard centres and a presentation of the facts to the proper authorities, State and Federal, is manifestly the remedy for this notorious imposition on the trade.

—Lychnis—

The name *Lychnis*, derived from the Greek *Lychnos*, the lamp, refers to one of the chief characteristics of this hardy plant genus; that is, the strong fiery red of the flowers of its foremost species. Indeed the intensity of the red of *Lychnis chalcedonica*, *L. fulgens* and *L. Haageana* is rarely eclipsed by any other garden flower. The prevailing tendency among many garden owners to keep red out of their color schemes is no doubt in part the reason for their frequent omission in modern gardens. Few perennials can be as easily raised and propagated as *lychnis*. Early spring seedlings flower profusely the first season. All species are extraordinarily hardy, requiring only a minimum of care and particularly the *lychnis* of our ancestors, the well-known London Pride shows a remarkable longevity.

Lychnis at present remains the perennial of the beginner with a small purse undisturbed yet by color riots. It is the perennial of rural housewives and it claims its undisputable space in every old-fashioned garden worthy of the name. But as soon as we take up the cultivation of the white-flowering varieties such as *L. chalcedonica alba plena*, *L. vespertina*, *L. flos-cuculi alba plena* and above all *L. Viscaria alba grandiflora plena* then we begin to realize the existence of beautiful forms well worth their space in modern gardens. The flowers of the last variety mentioned represent a fine material for filling vases. Color harmony supreme or of little concern, I believe we cannot afford to omit the *lychnis*. The rich and glowing magenta red of *L. viscaria splendens* fl. pl. may be an impossibility in many modern color schemes, nevertheless its dazzling strength will always appeal to us so forcefully that we can never lose sight of it. At present

DOUBLE FLOWERING LYCHNIS VISCARIA SPLENDENS

the rock-garden offers the best opportunity to use it to full advantage. Within its precincts we may also enjoy the low dense cushion-like growth of *Lychnis alpina*, covered with legions of little rosy-red blossoms and the two less known species *L. pyrenaica* and *L. yunanensis*.

My impression is that the genus *Lychnis* of late has been somewhat neglected. In taking up the cultivation of the best species and varieties we are apt to increase our cash returns and, in availing ourselves of the opportunities for effective garden use, we doubtless will add to the beauty of our home grounds. I particularly wish to call attention to the quick and easy way of raising the single-flowering species from seed.

Richard Rothe

(Glenside, Pa.)

Fall Treatment of Vines

Established vines that have carried a full crop of fruit should now be given every encouragement to go to rest. If there are any bunches still hanging on the vines they should be removed without further delay and stored in a cool room with the stem of the lateral inserted in a bottle of water to which a few pieces of charcoal have been added to keep the water sweet, placing the bottles at an angle on a shelf or rack to allow the fruit to hang clear of the shelf or bottle. As soon as the foliage is off the vines they should be properly pruned, a sharp knife being the best for this purpose, secateurs being liable to bruise and crush the tissue where the cut is made. When pruned the vines should be thoroughly washed with a good insecticide applied with a brush in order to reach all cracks or crevices where red spider may make their headquarters for the winter. A little extra care in having this cleaning thoroughly done will save lots of time and trouble in the growing season. After pruning and the cuts are dry they should be all well caulked with styptic, rubbing the preparation all over the cut to fill every pore. If only partly done the overlooked part will commence to bleed when started into growth.

Opinions vary as to the harmfulness of this so-called

bleeding but it is not a natural process and would not take place unless the vines were cut and for that reason I should say it were better avoided if possible. When the vines are pruned the house itself should be well washed in all parts with a good strong solution of soft soap to make everything bright and clean for a new start. After washing the house, the top dressing of the borders should next be attended to, first going to work and clearing out all the loose rubbish and soil from the border; then the surface of the border should be carefully removed until the roots are met with, taking as much as possible of the soil from around them without damaging them. When all soil that can safely be taken has been cleared away a good mixture of sound loam and manure should be applied and the roots covered 2 or 3 inches. Manures used for this top-dressing should be of the slow dissolving or lasting kind. Bone, woodash, and a quantity of a good fertilizer containing phosphates and potash are the best for these applications, leaving the nitrogen to be applied in the growing season when it can be better determined what quantity is needed by the appearance of the vines.

J. W. SMITH.

Ridgefield, Conn.

THE EXHIBITIONS

LANCASTER COUNTY FLOWER SHOW.

Some thirty odd years ago Lancaster, Pa., had a successful flower show, held under the auspices and management of William Pyfer, a young florist. The exhibit he made at that time with the assistance of but a few other florists was remarkable for its day. Since then a few greenhouse shows were held consisting of the grower's own stock only.

The Lancaster County Florists' Club started the flower show pot boiling soon after its organization and it finally bubbled over into the show held on the 6th and 7th of November this year. The committee, consisting of Albert M. Herr, chairman, Harry K. Rohrer, treasurer and Chas. Edgar and Rudolph Nagle as an advisory board presented to the people of Lancaster a show that compared very favorably with those of the large cities, and that in artistic effect was the superior of many of them.

On the first floor was a formal garden with geranium beds edged with echeveria and sod, hardy chrysanthemum beds edged with sod, tan bark paths, evergreen trees, rustic seats, a gazing globe and all the accessories belonging to it. This garden was twenty feet wide and some sixty-five long and in walking through it the greenhouse exhibited by T. J. Nolan for the King Construction Co., was in constant evidence, giving the effect of a private estate. On this same floor were plant exhibits by the various local growers, a fine exhibit of commercial ferns by H. S. Brandt of York, Pa., and trade exhibits by the Pfaltzgraff Pottery Co. of York; H. F. Michell Seed Co., Philadelphia, greenhouse sash and material from The Lord & Burnham Co., of New York and a fine display of ribbons from S. S. Pennock-Meehan Co., of Philadelphia, Pa.

On the second floor as well as the first, everything was arranged for effect, the local florists being perfectly willing to partly sink their own identity to attain an artistic show. The show was set up in such a manner so that when the visitor opened the door the psychological effect on their mind was to at once conclude that the show was magnificent and the conclusion thus formed was kept up by little surprises all through the building, with the result that during the day and one half that the show was open a number of people visited it three, four and five times, paying admission each time; others bought tickets as they went out for their friends, and we feel proud to think that out of a city with a population of about fifty thousand we had one tenth of them at the show, with no complimentary tickets issued to any one.

One thing that helped wonderfully was the fact that there were no awards offered in the florists' classes excepting a \$25 one by Lord & Burnham Co. for the best display made by a florist in the building. This was captured by H. D. Rohrer of this city. The retail men, three of whom made exhibits, all worked in harmony. Mr. Schroyer setting up a magnificent dinner table, Mr. Goldbach a display of filled baskets and Mr. Bass a wedding display,

all well surrounded with necessary accessories, following out the general effect rather than to push their own display in antagonism to the other fellow.

To mention the exhibitors in full, is beyond an article of this length. Almost every member of the club did his honest share. The few who did not are wearing sackcloth and ashes today and will no doubt be the first to get busy when we hold another show.

A number of trade visitors were present and fine displays were made by some of our friends from various parts of this country, among who were the Leo Nissen Co., S. S. Pennock-Meehan Co., McCallum Co., Pittsburgh Cut Flower Co., A. N. Pierson (Inc.), Elmer D. Smith & Co., R. Vincent, Jr. & Sons Co., C. H. Totty, Peter Fisher, Wm. Swayne, Joseph Heacock and several others.

We feel especially proud of the fact that we have made a success of a strictly non-competitive show conducted and set up with one object only and that was to have the attendants feel that they received their full value for the quarter expended. Another point that was strictly adhered to was that the attendance represented cash, no complimentary tickets being given out beyond a half dozen to each of the local papers and about another half-dozen to men who helped with the show without pay, and we not only had the crowd but we had the people we wanted—the flower-buying public.

ALBERT M. HERR.

CHRYSANTHEMUM SHOW AT UNIVERSITY OF ILLINOIS.

In spite of a cold rain and a driving wind, 2500 people ventured out to the South Campus Sunday afternoon to see the Chrysanthemum Show, which was held in the floricultural greenhouses. At times the crowd was so great that it was a difficult task to relieve the congestion at the entrance to the different houses. A gorgeous display of single, pompons, and numerous other chrysanthemums, occupied one house 30 by 100 feet. The commercial exhibition and specimen plants were staged in an adjoining house and these with the different varieties of orchid-flowering sweet peas also received their share of admiration and attention.

The palm, fern, rose and carnation houses were also open to the public and never before have the greenhouses been in as good condition as this year. The rose section is making a wonderful showing. The Hoosier Beauty roses, which were presented to the University by the F. Dörner & Sons Co., have made an excellent growth and have out-topped any other rose on exhibition, and it received more comment and praise than any other. The palm house with its large variety of tropical plants seemed as a place of recreation to the most of the visitors. In this house such plants as Pawpaws, Bananas, Ficus, Dracenas, Anthuriums, and Saintpaulias, stood out most conspicuously.

The chrysanthemum show is an annual affair at the University, but this year the show has proven a greater success than ever before.

MINNESOTA STATE FLORISTS' ASSOCIATION.

The fall meeting of the Minnesota State Florists' Association was held at the West Hotel, Minneapolis, November 12th. A business meeting was held in the afternoon followed by a banquet, with speeches in the evening. The main feature of this meeting was the large exhibit of chrysanthemums and other cut flowers and plants, which compared very favorably with many of the flower shows held throughout the country.

At the meeting presided over by President Olson a committee was appointed to confer with the State Fair officials relative to making up a premium list for another year. This meeting was well attended and was full of interest from start to finish.

The Minnesota State Horticulture Society will meet December 1st, 2nd, 3rd and 4th at the State Farm School, St. Anthony Park. The program for Tuesday evening has been turned over to the State Florists' Association, and papers will be read by A. S. Swanson, E. Meyer and Prof. Moore of the State School. All florists are urged to attend this meeting. During the week premiums will be awarded for the best exhibits of palms, ferns, blooming plants, roses, chrysanthemums and carnations.

List of awards:

Carnations—Jewell Nursery Co., Lake City, Minnesota, certificate of merit on White Enchantress; honorable mention for Comfort, Enchantress, Rose Pink Enchantress, Rosette, C. W. Ward and Victory. Will Brothers Co., Minneapolis, certificate of merit on Benora, Rosette and White Wonder; honorable mention for Eureka, C. W. Ward and Delbi. Minneapolis Floral Co., certificate of merit on Philadelphia, Cincinnati and Champion; honorable mention for Herald and White Enchantress. L. S. Donaldson Co., certificate of merit for Windsor and White Wonder; honorable mention for Rosette and Philadelphia.

Roses—Miss H. B. Whitted, certificate of merit on American Beauty and Bulgarian; honorable mention for Mrs. Russell. L. S. Donaldson Co., diploma for Mrs. Russell; certificate of merit on Mrs. Ward and Ophelia.

Chrysanthemums—La Crosse Floral Company, honorable mention on collection of 15 varieties. Miss H. B. Whitted, honorable mention for general collection. Poehlmann Bros. Co., diploma on Chadwick and Golden Chadwick; honorable mention for Pauline. John E. Sten, certificate of merit for Golden West; honorable mention for December Gem, Adonis and Helen Frick. Merriam Park Floral Co., certificate of merit for collection of Pompon and Jessie Miller; honorable mention for a sport of Shrimpton. Will Brothers Co., certificate of merit for White Eaton, Yellow Eaton, Maude Dean and Wallace G. Nye; honorable mention for Roman Gold and Shrimpton. Minneapolis Floral Co., diploma on Yellow Mercer, White Mercer and Buckingham, each scoring 95 points; certificate of merit for Yellow Eaton and Golden Wedding; honorable mention for F. Miller, Linwood Hall and William Turner. Hans Rosacker, certificate of merit for Black Hawk. J. A. Weber, diploma for Dolly Dimple and Harry Converse, both scoring 95 per cent.; certificate of merit on Wells Late Pink and Quittenton. L. S. Donaldson Co., certificate of merit on Dolly Dimple and William Turner. Jewell Nursery Co., diploma on William Turner, scoring 98 points.

Plants—L. S. Donaldson Co., certificate of merit on Begonia Glory of Cincinnati. Minneapolis Floral Co., honorable mention on Begonia Glory of Cincinnati. Minneapolis Floral Co., diploma on collection of stove and greenhouse plants.

Easter Lilies—L. S. Donaldson Co., diplo-

ma on vase scoring 95 points. I. S. Donaldson Co. certificate of merit on basket.

A fine group of Christmas cherries and pepper plants exhibited by Holm & Olson was overlooked by the judges, as well as potted ever blooming strawberries in full fruit exhibited by J. A. Weber.

The Banquet.

About one hundred guests sat at the banquet table, including members of the trade and their ladies. At the conclusion Mr. Olson presiding as toastmaster called on Aug. S. Swanson and L. L. May to respond for the Old Timers, as this meeting was a silver anniversary. Both related instances connected with the flower business 25 years ago. Mr. Swanson alluding to the fact that the same secretary was now serving who was secretary 25 years ago. Mr. May in his remarks spoke of the great change of feeling that had come about between the florists; where formerly they did not speak or deal with each other, now they were fast friends and accommodated each other whenever it was possible to do so. H. A. Quallich of A. L. Randall Co., Chicago, Ill., was then introduced as the speaker of the evening and gave a very able talk on retail store management, supplementing it by telling what he knew of the new roses now on the market. This paper was followed by a discussion which brought out a number of very important points in connection with store management, emphasizing the following essentials: how, what and where to buy; following collections closely; keeping up the general appearance of the store; having it light and neat at all times and the windows well dressed. The speaker thought these points were just as essential as the location. He also mentioned that good clerks were one of the greatest assets a store could have. In touching on methods of increasing the business he spoke of newspaper publicity as being of little or no use, unless followed up continuously.

During the meal and throughout the program which followed a colored quintette furnished music, both instrumental and vocal. Theo. Nagel also rendered vocal solos accompanied by his wife on the piano. The entertainment throughout was very pleasing and enjoyable to the fullest extent.

AMERICAN INSTITUTE OF NEW YORK.

The American Institute Show, (83rd Fair) at the Engineering Building, West 39th street New York City, Nov. 4, 5 and 6, was the largest Chrysanthemum Exhibition the Institute has had since the show in the Herald Building some years ago. The blooms were grand and the competition keen, especially in the chrysanthemum classes for private gardeners. C. H. Totty exhibited a new chrysanthemum Mrs. Charles S. Whitman also his new rose Mrs. Thompson. Lager & Hurrell had a fine display of orchids. Mrs. John Crosby Brown had an exhibit of ten bush and standard plants, very fine.

There were one hundred and eleven classes in the schedule. We regret that our space compels so much abbreviation and condensation, but we can only give briefly the results in the more important of the plant and flower classes.

In the section for cut flowers for commercial growers, Chas. H. Totty and

BURPEE'S FORDHOOK HYBRID GLADIOLI.

This new race of hybrid gladioli is the result of crossing the Praecox type with the finest named varieties of Nancieanus, Gandavensis, Childsi, Groff's, Lemoine, etc. In addition to the exquisite colors found in this new type is their wonderful precocity, flowering freely from seed the first year if planted in light rich soil. The flowers that Burpee has been exhibiting this fall in Philadelphia and elsewhere were all cut from plants, seed of which was

sown in the open during last May. Their full beauty and immense size (many rivalling the giant Princeps) are, however, more fully realized the second year.

The colors of the new Fordhook Hybrid Gladioli include many delightful "pastel" and art shades in combinations of salmon, salmon-pink, lavender, light-blue, yellow, white to richest crimson, etc., the pencillings and throat markings being exquisitely lovely.

Thomas W. Head were the winners. In the section for private growers, James MacDonald, gard. to J. H. Ottley, W. H. Waite, supt. of Greystone, W. H. Duckham, Frank Honeyman, gard. to Percy Chubb, and L. G. Forbes got the money. In the "open to all classes" for chrysanthemum blooms we find in the list of 1st prize winners the following names:

James Bell, gard. to C. K. G. Billings; Ernest Robinson, gard. to Mrs. M. F. Plant; Frank Honeyman; J. W. Everitt; A. Williams; Ernest Robinson; Joseph Tansey, supt. for H. M. Tiltford; Wm. Verr, gard. to Howard Gould; Frank Black, gard. to C. E. Chapman; Jos. G. P. Kennedy; James MacDonald; Chas. H. Totty; Thomas Wilson, gard. to Mrs. J. Murray Mitchell; and Henry Gaut, gard. to H. L. Pratt, most of them in several classes. Among those not above mentioned who came in on the 2nd prizes were: Walter Angus, gard. to R. H. Scoville; Percy E. Hicks, gard. to B. H. & H. S. Borden; W. R. Fowkes, gard. to Howard Cole; J. G. P. Kennedy, gard. to Mrs. J. S. Lyle; A. Wynne, gard. to W. W. Heroy; and A. Bauer, gard. to Henry Goldman. In the hardy classes the winners were: R. Vincent, Jr. & Sons Co., and Chas. L. Stanley. In the chrysanthemum plant classes, Peter Duff, gard. to Mrs. J. Crosby Brown, won

five 1sts; W. H. Waite, J. W. Everitt and James Bell, one each. Rudolph Heidkamp, supt. H. W. Boettger estate, won one 2nd in this class and 1st on specimen fern. For orchids, Lager & Hurrell were 1st and Julius Roehrs Co., 2nd. In the rose classes L. A. Noe and C. H. Totty cleaned up the commercial section. In the private rose classes A. A. MacDonald, gard. to J. B. Duke, and Jos. Tansey, won all the 1sts. In carnations the winners were Chas. H. Totty, Chas. L. Stanley, Jos. Tansey, A. Wynne and W. R. Fowkes. Wm. B. Thompson on Lorraines and Rex begonias, and Max Schneider and Wm. Vest on violets, completes the regular prize list. There were, in addition, 67 specials or gratuities awarded in plant and flower classes.

The judges were Eugene Dailledouze, Peter Duff, George Middleton, J. G. McNichol, Edward Reagan and A. Herrington.

The Elliott Auction Company, 42 Vesey street, New York City, are planning for a big sale next week of roses, and a large variety of other imported hardy material. The roses have opened up fine and ought to "sell like hot cakes." Note the advertisement in this issue.

CLUBS AND SOCIETIES

NATIONAL ASSOCIATION OF GARDENERS'

The annual convention of the National Association of Gardeners will take place in Philadelphia on December 9th and 10th.

Thomas Logan, William Kleinheinz and John H. Dodds are the committee on arrangements and report the preliminary program as follows:—

Wednesday, 9th inst.:—The general meeting of the association will be opened promptly at two o'clock at Horticultural Hall. Following the business session several speakers prominent in horticulture will address the members on subjects interesting to the gardeners.

Wednesday evening:—The banquet will be held at one of the local hotels to which ladies are to be invited.

Thursday morning, the 10th inst.:—The bowling tournament will take place, open to all members of the association who register at the business session. There will be no team bowling, but prizes will be offered for individual scores. During the bowling tournament a shuffle board contest for the ladies will be provided, for which prizes will also be offered.

Thursday afternoon will be devoted to visiting some of the prominent growing establishments in the vicinity of Philadelphia.

The Hotel Walton, directly opposite Horticultural Hall, has been selected as the headquarters of the association during the convention. Accommodations can be secured there at moderate rates. M. C. EBEL, Sec'y.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The monthly meeting of this society was held in Greenwich, Conn., Nov. 15th. The report on the fall show was read indicating that the recent exhibition at New Rochelle, N. Y., was a financial success as well as an exhibition of superior quality. Mayor-elect John M. Brown of Stamford, Conn., on behalf of the society presented the prizes to the successful competitors and assured the Society of his continued personal support as well as in his official capacity. It was unanimously voted to co-operate with the national organization in all matters affecting the gardener and the advancement of horticulture in America. During recess J. E. Melcher of Riverside, Conn., entertained the members with some very clever sleight-of-hand tricks. Oscar E. Addor of Larchmont, N. Y., read a clever and original piece of writing entitled the Battle of Rye, that was replete with satirical allusions to the struggle for supremacy at the annual outing and games between the members from Fairfield Co., Conn., and Westchester Co., N. Y. Nominations for officers were made. The list of names submitted assures the Society of a continuation of the phenomenal successes of the past.

The awards of the judges are as follows:—

Cultural certificate to Jas. Foster for W. Mease chrysanthemums, and Jas. Stuart for hybrid nerines and *Pancratium speciosum* gr. fl.; A. Wynne highly commended

for red seedling carnation, and P. W. Popp for seedling chrysanthemum; vote of thanks to Robt. Grunert for carnations and Thos. Ryan for single chrysanthemums; Geo. E. Baldwin Co. certificate of merit for *Cattleya maxima*.

A vase of single chrysanthemums was staged purposely to start a discussion as to what constitutes a "terminal spray." There is so much diversity of opinion in this matter that it would be well to have an eminent authority pass on it, the result to be published in the horticultural press. The next meeting will be Dec. 11th.

P. W. POPP, Cor. Sec'y.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

An unusually large number were present at the meeting of this Club Tuesday evening, November 17. The main business of the evening was the nomination of officers for the coming year. The following candidates were nominated:—For President, Herman Bartsch; Vice-President, Jas. Methven; Treasurer, Peter Fisher; Secretary, Wm. N. Craig; Executive Committee, W. J. Kennedy, Geo. Anderson, F. J. Rea, A. K. Rogers, P. M. Miller, Wm. J. Patterson, W. J. Collins, Peter Barker, Geo. Wyness.

Prof. Arno H. Nehrling of the Mass. Agricultural College was the scheduled speaker of the evening, but was unavoidably detained. In his place W. N. Craig delivered an interesting address on "The Gardener and His Profession," which was very favorably received.

The show table displayed a fine collection of plants and cut flowers. Among them were two begonia plants, Florence Davenport and Melior, exhibited by Wm. W. Edgar Co. Six splendid chrysanthemums from the E. A. Clark estate were shown by Alex. McKay. A. A. Pembroke of N. Beverly, Littlefield & Wyman of N. Abington, and A. Roper of Tewksbury exhibited several new varieties of carnations, some still unnamed. A vase of *Bouvardia Humboldtii* corymbiflora came from Faulkner Farm, Brookline.

A lively discussion on the defects of this year's chrysanthemum show was held towards the latter part of the evening, in which the management was severely criticised. The meeting closed at an unusually late hour, testifying to the enjoyment and interest of the evening.

UNIVERSITY OF ILLINOIS FLORICULTURAL CLUB.

On Friday evening, November 13, the Floricultural Club gave a reception to the members of the Faculty of the University of Illinois at the floricultural greenhouses, and about 400 members turned out. Besides this number, there were some noted out-of-town florists including Mr. and Mrs. Smith, of Danville, Ill.; Miss Emily Dorner, of Lafayette, Ind.; Mr. and Mrs. and Miss Rudd, of Morgan Park. The greenhouses were open in connection with the reception and it gave those present an opportunity to see the display of chrysanthemums and other flowers under artificial light.

A. G. H.

CONNECTICUT HORTICULTURAL SOCIETY.

The first November meeting was held in the County Building, Hartford, on Friday evening the 13th. There was an unusually fine display of chrysanthemums. In the collection exhibited by President Huss was a vase of sensational blooms of William Turner, also fine specimen plants. The Park Department had an exhibit of large chrysanthemums. Warren S. Mason, of Farmington, exhibited some fine seedling geraniums (Lemoine's Hybrids) and a splendid collection of pompon and single chrysanthemums. Alex. Cumming, Jr., showed the new rose Ophelia. George W. Fraser, of the Conn. Agricultural College, Storrs, had on exhibition a handsome pink rose, Mrs. A. G. Gulley. C. H. Sierman, H. A. Pinney and George W. Fraser served as judges. They made the following awards:

A. N. Pierson, Inc., certificate of merit for pompon chrysanthemums, a first-class certificate for singles, and a first-class certificate for rose Ophelia; Warren S. Mason, of Farmington, cultural certificate for collection of pompons and a certificate of merit for singles; Alfred Cebelius, cultural certificate for singles and a first-class certificate for large chrysanthemums; President Huss, a certificate of merit for his large blooms and for each plant; George W. Fraser, a certificate of merit for rose Mrs. A. G. Gulley, and a cultural certificate for his seedlings.

A collection of \$16.09 was taken up for the Belgian Relief Fund. G. H. Hollister read an article on "Propagation of Ornamental Trees and Shrubs." A local co-operative committee of the National Association of Gardeners was appointed at this meeting, viz: H. A. Pinney, W. W. Hunt and C. H. Sierman. P. A. Sears, one of the charter members of the Society, was present, and made a few reminiscent remarks. There was a fine turn out and the Society is in a splendid condition in every particular.

ALFRED DIXON, Sec'y.
Wethersfield, Conn.

AN APPRECIATIVE REPLY.

The following communication has just been received by the committee appointed at the meeting of the National Association of Gardeners held in Boston in August last, to draft suitable resolutions conveying the sympathies of the organization to the European horticulturists.

ROYAL HORTICULTURAL SOCIETY,
Westminster, London, England.

November 3, 1914.

Dear Sirs: The council of our society are very grateful to you and to the National Association of Gardeners for the kind and brotherly sympathies which you extend to us and the other gardeners of Great Britain and elsewhere in the present time of intense strain and distress.

May we hope that when the time comes for the reinstatement of the Belgium horticulturists we may receive your active co-operation and financial support. Our society will start a fund of help when the right time comes; but that time, we grieve to say, is not yet.

With brotherly greetings to our fellow gardeners in the States, I am,
Yours very truly,

W. WILKS, Sec'y, R. H. S.
By order of the President and Council of the R. H. S.

MEETING OF THE NATIONAL FLOWER SHOW COMMITTEE.

The National Flower Show Committee held a meeting in Philadelphia, occupying two days, Nov. 11 and 12. There were present: Chairman Geo. Asmus, Adolph Farenwald, W. P. Craig, Thomas Roland, Secretary John Young, Treasurer W. F. Kasting and President-elect Patrick Welch.

The first session was called to order at the Hotel Walton at 10 A. M. on Wednesday. The minutes of the previous meeting held in Cleveland, O., were read and approved. Mr. Farenwald made a report in detail covering the efforts which had been made to secure a suitable building in which to hold the show and the terms under which Convention Hall, operated by the municipality, could be engaged. Action on the report was deferred until a later session.

Considerable discussion took place regarding the premium list, the total value of which it was arranged should be \$15,000. Liberal apportionments to the different societies were made, the same to be contingent upon the usual conditions as to active co-operation. The premium committee was given authority to prepare a preliminary schedule on the basis thus determined, all special prizes being considered as part of the total valuation.

In the afternoon the committee made an inspection of the principal public buildings available for show purposes, including Convention Hall at Broad street and Allegheny avenue. Later, the committee had a second session at the Hotel Walton. Adolph Farenwald was appointed vice-chairman of the committee. A special committee on finance and appropriations was appointed, composed of the chairman, vice-chairman and the treasurer, its duties to include the passing upon all appropriations. A resolution was passed authorizing the secretary to raise a guarantee list to amount to \$10,000. The secretary was authorized to sell space for trade exhibits at the show, upon the usual basis of compensation for his services. The matter of the official program was left in the hands of the local executive committee. Adjournment was taken until Thursday afternoon at 2.30, when an open meeting was arranged for in the rooms of the Florists' Club of Philadelphia.

The meeting on Thursday was attended by the committee, and there were also present many members in the trade from Philadelphia and vicinity. The meeting was called to order by the vice-president of the Club, who stated the nature of the business before the meeting, and introduced Chairman George Asmus of the National Flower Show Committee, who presided over the meeting. Mr. Asmus made a stirring address, in the course of which he appealed to those present and others in the trade to give their loyal support to the National Flower Show to be held in the Spring of 1916. He reviewed the work of the promoters of the shows held in Chicago, Boston and New York, and the results accruing from the same, and emphasized the importance and value of such shows.

Patrick Welch spoke at some length regarding the Boston show and the benefits of a Sunday opening, in order that the working classes might have

an opportunity to take advantage of the educational features of the show. Leo Niessen spoke in favor of the leasing of Convention Hall, his view being that if the show were properly advertised the location of the hall would be no detriment. For this reason he gave it as his opinion that the appointment of a committee on publicity and advertising would be an important matter. Mr. Farenwald detailed the work already done in regard to the selection of a suitable building. If Convention Hall were selected, he said, some provision would have to be made for heating the building.

S. S. Pennock expressed himself as confident of the success of the enterprise. Charles H. Fox spoke of the value of publicity for the show not only during the few weeks preceding the show, but for many months in advance. He also suggested the advisability of the selection of jurors well in advance. Wm. Kleinheinz said he had given much thought to the matter and had every confidence in its success. He did not consider Convention Hall too far from the center of the city. He promised to support the show in every way he could, and said he would exhibit on a large scale, and that every private gardener around Philadelphia would do likewise.

Robert Craig spoke in favor of leasing Convention Hall, and was of the opinion that no better building for the purpose could be found in the country. The forthcoming show, he said, would electrify the horticultural world by its magnificence, and would be a pronounced success. John A. Dobbs expressed his confidence in the success of the affair and said that he would make a large exhibit and lend his assistance in any direction required.

John C. Gracey, also predicted a success, and that the members would work harmoniously together to that end. J. Otto Thilow expressed himself as being optimistic in regard to the outcome. He spoke of the value of publicity and intimated that his company was already preparing for it, and that he would seek to induce many others to become interested. Treasurer W. F. Kasting made a few remarks, in which he expressed his pleasure at the enthusiasm noticeable among those present at the meeting, which augured well for success.

Thomas Roland spoke of his satisfaction as regards the Convention Hall and suggested the possibility of some firm of horticultural builders undertaking to furnish a temporary heating plant. Thomas Logan spoke for the private growers and promised their support, also his own time and assistance. W. K. Harris, Jr., acknowledged the benefit he had received from previous shows, in the knowledge he had acquired, and said that if the members of the different branches of the trade in Philadelphia would eliminate all personal feelings, and work in unison the exhibition could not fail to be successful. David Rust, secretary of the Horticultural Society of Pennsylvania, expressed his satisfaction with the proposed location and predicted a successful outcome. His society, he said, was ready to assist, and was awaiting definite information as to arrangements before launching into the work of preparation. W. P. Craig also endorsed the choice of the committee and expressed his belief that the show

would be a huge success. Fred Michell, Harry Betz, George Burton, Charles E. Meehan and Robert Kift, also spoke, each expressing a belief in the ultimate success of the affair.

Chairman Asmus thanked all present for the interest they had shown in the undertaking. The National Flower Show Committee, he said, would at once appoint the chairmen of the various committees to handle the work of preparation and the chairmen of these committees would compose the local executive committee, with the vice-chairman of the National Flower Show Committee as its chairman. He announced that \$15,000 had been set apart for the premium list, a greater sum than ever before offered at such an exhibition.

In the evening the National Flower Show Committee had another session at the Hotel Walton, at which the names of a number of gentlemen were considered as appointees to the chairs of the proposed committees. A resolution was passed directing the secretary to notify these gentlemen as to the appointments and the powers conferred upon them. Acceptances of these offices are to be obtained before the list is available for publication. It was also resolved that Robert Craig, Louis Burk and John Wescott be added to the local executive committee as members-at-large with the privilege of voting. The Committee on Lease and Contracts was authorized to obtain a lease of Convention Hall on the best terms possible. It was decided that the chairman of the local reception committee should also be a member of the local executive committee. It was also decided that the exact dates of the show would be announced later.

Adjournment was then taken to the call of the chair.

JOHN YOUNG, Secretary.

ST. LOUIS FLORIST CLUB.

The Florist Club on Thursday, November 12, held a very interesting meeting in Odd Fellows' Hall with a good attendance. The holding of a spring flower show was brought up, and it was voted to appoint a committee of five to lay plans for such a show and report at the next meeting for final action. The committee consists of W. C. Smith, chairman, W. G. Wells, A. H. Hummert, Geo. W. Pring and Albert Gumz.

The trustees were instructed to prepare plans for some sort of entertainment for members and their families in the near future. Secretary Beneke says the membership is climbing and with little efforts on the members the 150 mark will be reached before the end of the term, August, 1915.

CLUB AND SOCIETY NOTES.

"Maryland Week," combining the meetings of the Maryland State Horticultural Society and allied organizations is held at the Fifth Regiment Armory, Baltimore, this week, closing on Saturday night, November 21.

Mrs. W. Scott Fitz, of 75 Beacon street, Boston, was elected president of the North Shore Horticultural Society at its recent annual meeting which was held in Manchester. Mrs. Fitz has long taken an active interest in the society and has served on the

advisory committee since it came into existence.

Syracuse, N. Y., had a good show of chrysanthemums, decorative plants, etc., on Nov. 5 to 8, which had the support and cooperation of the trade in general. Among the exhibitors were the Baker Floral Co., Elmer D. Smith & Co., C. H. Totty, A. N. Pierson, George B. Hart of Rochester, Pennock-Meehan Co., Philadelphia; W. H. Workman, H. Youell, Mrs. L. C. Smith, Peter Fisher, Ellis, Mass.; W. Bultmann, Peter Kay, G. Bartholme, J. Mullhauser & Son, Bannister & Co., Chester Harris, C. Bourne, G. M. Phillips, Pierce-Christian Co., P. R. Quinlan and H. D. Mann & Co.

The chrysanthemum and fruit show of the New London, Conn., Horticultural Society was held in the Court House on the 4th and 5th inst. There was a fine show of fruit, plants and cut flowers, including the new carnation Alice from Peter Fisher, Ellis, Mass., and a good display of single and pompon chrysanthemums from A. N. Pierson, Inc. The leading large blooms included: William Turner, Wells' late pink, William Vert, Mendon, James Fraser, Mrs. Gilbert Drabble, Onunda, Mrs. Clara Banghart, Mrs. Stevens, Mrs. A. M. Henshaw and others too numerous to mention. Everything went to making the show a great success in all ways.

The second annual flower show given by the Holyoke and Northampton Florists' and Gardeners' Club at Northampton, Mass., was larger and better in every way than the one held a year ago. The Massachusetts Agricultural College exhibited fine chrysanthemums and roses, taking many first and second prizes.

Butler & Ulman, exhibited prize winning roses and chrysanthemums. They got first in table decorations. E. J. Canning showed an excellent display of low-growing, pyramidal conifers in pots, especially adapted for landscape effects. Other exhibitors were Parks; G. H. Sinclair, Holyoke; F. D. Keyes & Son, Florence; and Smith College. W. H. HATFIELD.

DURING RECESS.

Andover Florists' and Gardeners' Club.

This organization held its first annual supper in Workman Hall, Andover, Mass., on Thursday evening, November 12. It was a very enjoyable occasion for the members and guests.

Lynn, Mass.—Lynn flower vendors must secure \$2 permits and those who come to that town from other places must have \$25 permits according to a decision of the Board of Control, Thomas F. Burckes, George A. Flanagan and Charles P. Murray. A petition calling on the board to act was signed by all the Lynn florists and was supported by the Chamber of Commerce.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Address by President Wm. Kleinheinz.

Fellow Members:

Another year has passed and again we meet as a society to pay due respect to the glorious "Chrysanthemum." This convention here, in Indianapolis, is especially remarkable as a banner meeting, as it is held in conjunction with the silver anniversary of the State Florists' Association of Indiana. And as we have chrysanthemum specialists with us like Messrs. Elmer D. Smith, E. G. Hill, Chas. H. Totty and others, the gathering must be a success, and I am proud to have the honor to bid you all welcome in the name of the society.

In the past fifteen years the improvements in chrysanthemums have been wonderful, surpassing all expectations. Great credit is due to the raisers and introducers of new varieties, of which a good many are certainly revelations to the growers. It is not necessary to mention any special varieties, as our shows prove this to the greatest extent, and I am sure that the future will bring out still better varieties, because we have a lot of never-resting hybridizers amongst us, and they will not rest until the highest point of honor is reached. The pompon and single varieties have also moved up to the front and beautiful colors and combinations have been brought out in these effective and decorative kinds.

The specimen plants raised for exhibition purposes in the last few years are also eye-openers for the public. I have seen plants exhibited in New York City, over fourteen feet in diameter and carrying over fourteen hundred flowers per plant, and were the chief attraction of the show. But don't forget what skill, time, and labor it requires to grow a plant to such perfection and we must feel proud that those plants are grown by gardeners who are members of the Chrysanthemum Society of America.

Considering the large number of chrysanthemum growers in this country it is to be deplored that so few are members of our society. The Chrysanthemum Society of America is beneficial to all chrysanthemum growers as we rout out the poorer varieties by having committees appointed all through the United States, by which the new varieties are examined and, when found to be up to the standard, a certificate is awarded. This prevents minor sorts from being represented as up-to-date, and thereby the buyers of new sorts do not run the risk of getting inferior sorts. The Chrysanthemum Society also holds a yearly exhibition, giving an elegant opportunity for competition. At these exhibitions, nothing but the best quality of flowers are shown and, by doing this, it shows the grower what can be done and what a flower of the highest standard looks like. The Society also sends to its members a copy of the proceedings of the yearly meetings, and this alone should be inducement enough to every chrysanthemum grower to join us. This has been the cry for years. "How can we increase our membership?" I appeal to every one who is interested in these beautiful flowers to send his application to our secretary and become a member of this Society. I am sure after one year's membership they will say "I am glad

that I joined this able body and must get my friends to do the same."

In regard to the scale of points I would say that I do not think it possible to improve on it. One suggestion I would like to make. A few varieties of our most wonderful exhibition flowers are lacking in stiffness of stem and need artificial supports, when staged on long stems. This I think is a weak point of these varieties and should be considered. I feel that any exhibit artificially supported should lose at least two points. This will not harm these sorts and still will give justice to varieties with self-supporting stems, but lacking in size.

In regard to culture and other points, I do not intend to pass any remarks, as every climate and soil require different treatments, but must say that not everything is gold that glitters. After all the skill, all the labor and all the expenses, the grower in general is proud every season to see his flowers develop, but the growers (especially in the East) have nearly every year more or less to suffer under a great loss. Warm weather sets in just at the time the flowers should have a cool atmosphere. This warm weather is generally accompanied by rolling fogs with a very high humidity, and the best flowers rot away within a few days, and so far nothing is known that can prevent this. Any suggestion or remedy would be thankfully accepted by this body.

I hope that you will all enjoy this convention and derive great benefits from it, also that the Chrysanthemum Society of America will have a larger membership next year.

THE GARDENER AND HIS PROFESSION.

We should like to give in full the excellent paper read by W. N. Craig before the Gardeners' and Florists' Club of Boston, on the above mentioned subject, but in our present overcrowded condition we have room only for the following brief abstract.

As tillers of the brown soil, we have at once the most lovable, fascinating and enthusing of professions. We work in the most wonderful laboratory in the world.

The gardener should be, not only one who is a florist, but very much more; he should have a good general knowledge of horticulture in its broadest sense and should be capable of handling all details of estate management. To be a good practical gardener in itself requires a great deal of care and forethought. One of the best friends a gardener can have is a carefully kept diary of operations; weather, time crops mature, etc.

The majority of us have not had the advantage of college, or even high-school training; and it says much for the grit, perseverance, and skill of many who, despite these educational drawbacks, have risen to good positions and are in many cases leaders in their profession.

The young man who can have both a horticultural and agricultural training in such colleges as Mass. Agri. College or Cornell, will gather a good theoretical knowledge of the fundamentals of our profession. The drawbacks in our agricultural colleges today are, that really practical men are lacking. Men who are first-class growers should have charge of their greenhouses and grounds, men who will turn out young men who can with greater

confidence apply for positions where practical worth is needed. The gardener of to-day must be gentlemanly in demeanor, both to his employers and those who are his assistants. Our profession is retarded by incompetent and undesirable material; men who have no right to the name of gardener. More men should equip themselves to handle the great outdoors; trees and shrubs, hardy herbaceous plants, bulbs, tennis courts, tree surgery, spraying, garden crops, live stock, birds.

Our noble profession should be better recognized than it is today; its craftsmen more looked up to and esteemed; a better feeling existing between employer and employee. Let us labor unitedly to seek each other's welfare. Let our lives be as harmoniously beautiful and bountiful as are the works of Nature's God.

PERSONAL.

Donald McRae, formerly with Mr. H. R. Johnstone, at Brackenside, Hamilton is now superintendent at the Geo. V. L. Meyer estate, Hamilton, Mass.

We are pleased to report that Chas. H. Totty's condition is favorable for recovery and his family and friends are relieved of the anxiety which prevailed last week.

Attleboro, Mass.—Three persons were injured, one seriously, when a horse attached to a light delivery wagon owned by A. A. King, an Attleboro florist, dashed up a narrow alley crowded with shop folks last Monday. The horse was frightened by the noon shrieking of factory whistles in the neighborhood.

BRITISH HORTICULTURE.

New Chrysanthemums.

The Floral Committee of the National Chrysanthemum Society have recently granted first-class certificates to the following new varieties: James Stredwick, Jap., deep rose, with amber reverse; Elfrida, large bronze; Dorothy, golden yellow market variety. Lord Roberts was accorded an award for color, but the committee desired to see the blooms again. It is bright chestnut with golden reverse.

Dahlia Conference.

The annual conference arranged by the National Dahlia Society was held in London on Oct. 15th. Mr. Reg. Cory presided. Mr. Stredwick, of Stredwick & Son, raisers of dahlia novelties, read an interesting paper, giving the history of this flower from the earliest date, chiefly compiled from the writings of the late Richard Dean. C. Harman Payne, who spoke in the subsequent discussion, took exception to some of the statements, and supplemented the paper with many instructive facts. There was an excellent paper from J. Cheal, dealing chiefly with the dahlia as a decorative plant. Chas. Curtis, acting for the secretary, read a paper on "The Dahlia in America," contributed by J. Harrison Dick.

High Prices for Fruit.

Amongst the methods now being adopted for raising funds for benevolent purposes in connection with the war the fruit trade has devised a successful means of raising revenue. At Liverpool a quantity of Californian apples realized the respectable total of £120 (pounds) and a case of Jersey

pears £82. At Newcastle-on-Tyne a single pair sold for £17 10s. Six cases of Doyenne du Comice pears made £182 7s., and some other lots of fruit £203. At Belfast high prices were realized for Jersey pears and tomatoes. A mammoth cabbage sold for £3 5s., and a barrel of Nova Scotian apples fetched £2.

W. H. ADSETT.

A VERSATILE GARDENER.

Commenting on our notes of last week in reference to Begonia Mrs. Heal, a number of plant growers have told us that the reason they had not taken up this glorious blooming plant commercially was the difficulty in growing it satisfactorily. We took occasion to visit Mr. Downs, who grew the plant we illustrated, a few days ago, and found a display of Mrs. Heal well worth going to see. Wm. Downs is a clever and successful grower, but he makes no extraordinary claim in this regard and, with all due respect to Mr. Downs' abilities, we must say that we believe the plant can be grown commercially by scores of our well-known plant growers. While on the subject we must, however, say a word in recognition of the versatile accomplishments so well exemplified in William Downs. Plant houses, rose, carnation, chrysanthemum, orchid and palm houses, bulb cellars, poultry, sheep, grade cattle, out-door gardens, fruit orchards, etc., all come under Mr. Downs' care and the extensive ranges of conservatories and frames are convincing evidence of the master hand. It is a pleasure and a treat to have the privilege to inspect such an establishment.

THE BEST EVER

That's what everybody exclaims on seeing the splendid stock now ready for shipment in our plant houses

Cyclamen Are Superb. Lorraine and Cincinnati Begonias Can't Be Beaten Anywhere. Ardisias Have Never Been So Fine; Loaded With Berries Already Well Colored Up.

Order Your Holiday Stock Now and Have It Shipped Before Freezing Weather Sets In.
Prices per doz., per 100, per 1000, on application.

JULIUS ROEHRS CO., Rutherford, N. J.

Obituary

E. E. Peiser.

Emanuel E. Peiser, Chicago, pioneer in the wholesale commission business and familiarly known as the "peony king," passed away suddenly at his home, 1004 E. 42nd Place, Saturday evening, Nov. 14th. His physical condition has been known for some time

E. E. PEISER

and Mr. Peiser would speak of his coming death as calmly as of some business transaction and attributed the cause to the use of cigarettes. Though he has suffered intensely at times the end came as he was chatting at the close of a day spent at the store and he had just remarked that he was feeling fine. Born in Chicago, on Jan. 1st Mr. Peiser would have been 52 years of age, 37 of which have been spent in the florists' business. For many years he was associated with Kennicott Bros. and his brother Gabriel who passed away three years ago to a day, was president of the company, while Emanuel was manager, later taking his brother's place as president. Mr. Peiser was noted for his daring in business transactions and has won or lost many times in peony and other speculations. The

business will be continued by Mrs. Peiser. Besides his widow Mr. Peiser leaves a mother, a brother Isaac, and two sisters, Mrs. J. Mitchell and Mrs. Ray Metz. The funeral was from Furth's Chapel and interment at Rose Hill.

J. Lowe Parker.

J. Lowe Parker, aged 88, a retired farmer, died on Nov. 17, at his home in Dorchester, Mass. He is survived by one son, George L. Parker, the proprietor of several rose houses in Dorchester. Mr. Parker was born in Boston and moved to Dorchester when it was nothing but meadowland. He was successful in farming and retired from active business when Dorchester began to develop into a residential community.

Cyrus A. Balkan.

While hurrying to work because he was a few minutes late, Cyrus A. Balkan, 68, of 26 Minot street, Neponset, Mass., fell dead from heart trouble on Wednesday, Nov. 11, in the yard of the Stearns Lumber Company, Neponset. A physician who was summoned pronounced him dead. He had been employed by the Stearns Company 30 years.

CHICAGO NOTES.

The funeral of E. E. Peiser was attended by many in the trade and many floral offerings were sent by both wholesalers and retailers.

The Marshall Field flower department was discontinued just as we went to press last week. It was not large enough to handle the trade and people did not take kindly to the cramped quarters and the inexperienced clerks.

The Jegen Floral Co. opened a retail store at 1155 N. State street on the 21st. The proprietors are sons of Mrs. Ratkowski who operated a store on Dearborn street for many years, and which went into the hands of a receiver this summer. The new store is on the popular north side.

INCORPORATED.

Filer, Idaho.—Filer Seed & Produce Co., incorporator, H. G. Weaver. Capital stock, \$10,000.

RUTHERFORD, NEW JERSEY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

Holland Seed Supply.

In the condition of extreme doubt now existing as to the ability of the French and German seed producers to supply the American trade as heretofore it is reassuring to know that a Holland house of the established good reputation of Sluis & Groot is enabled to stand in the breach as a reliable source of supply. On certain vegetable seeds, this firm has long been recognized as a leader. Of spinach, for instance they probably sell more than all their competitors combined. Dealers will do well to notice their advertisement and get into communication with them. You will find in their wholesale trade price-list of vegetable and flower seeds some very interesting and timely information as to Holland's ability to fill the requirements of the American trade.

Notes.

J. O. Barnes of Malone, N. Y., has opened a branch agency at Fulton, N. Y.

The value of trees and plants imported into the port of New York during the week ending November 7, was \$26,441; grass seed, \$2,383; palm seeds, \$1,431.

An American consular officer in France is informed by a seed dealer in that district that he is in the market for crimson clover seed, and wishes to make connections with American dealers who now hold large stocks of this seed.

GLADIOLUS REGISTRATION.

Public notice is hereby given that the application of Munsell & Harvey, Ashtabuta, Ohio, for the registration of Hazel Harvey, and of B. Hammond Tracy for the variety Maize is approved by the Committee on Nomenclature of the American Gladiolus Society.

Hazel Harvey. Bloom medium large, tube curved, stout, long. Segments unequal, connivent; the upper horizontal and broad, the lower reflexed and narrower. Stamen filaments reddish. Anthers violet. Color carmine-red, throat amber-white, penciled carmine-purple. A good, compact bloom of good, clear color and good substance. Mid to medium late season. Spike tall, erect and a free bloomer on both main stem and branches. A vigorous grower and well furnished with broad leaves. Corms medium large, "increases by division." Cormels prolific.

Maize. Bloom medium size, tube curved, stout, short. Segments nearly equal, connivent; upper horizontal, the lower nearly straight. Stamen filaments white. Anthers lavender. Color amber-yellow with a well-defined, dull crimson blotch on the lower lip. Season early to mid-season. Spike medium tall, very erect and branched.

Growth vigorous with broad foliage. Corms medium size. Cormels large and prolific. This variety was discovered by Umpleby and introduced by Tracy.

A. C. BEAL, Chairman.

**Of Interest to Retail
Florists****THE RETAILER'S BUSINESS CAL-
ENDAR.**

Nov. 21, Sat. Don't be so dead set on getting a traditional high price for your flowers. Give the public the benefit of seasonable price fluctuations once in a while. A nimble nickel is worth many times a dead dime. Many a florist has dead dimes lying thoroughly dead in long credit accounts with his customers.

Nov. 22, Sun. Hustle out with those orders so you can go home and get acquainted with the family today. Few florists can say that they see their children every day and go with them to church every Sunday.

Nov. 23, Mon. Start the week full of "pep" and a determination to have some substantial cause for feeling thankful for the business you are going to do for Thanksgiving Day. Keep track of all holiday sales, in order that you may be prepared when occasion arises. The business world is going at "break-neck" speed and to be merely "up-to-date" is no longer a safe position.

Nov. 24, Tues. Make that window display a dandy. You have all the theme you want at this time of the year with which to catch the popular fancy. Do it right and differently. The superconservative man is like a hitching post, steady enough, but he never gets anywhere.

Nov. 25, Wed. Collect overdue accounts and put the money to work earning or establishing a better credit for you. It would be a delightful old world if we could only buy experience on credit. But most of a man's illusions come out with his hair, and then again, sense always spells cents. Another thing—a man be said to have horse sense if he declines to mortgage his home to buy an automobile.

Nov. 26, Thur. All of us have something for which to be thankful. Only cowards cry, "No opportunity for a fellow nowadays." Can you look a United States map in the face and not see that the country is full of opportunities? Get busy; get excited over your chances for big success! Point out a man without enthusiasm and we will show you a plodder.

Nov. 27, Fri. Post the books today and note any defects in the system. The best thing we know for a business leak is — plug. The mistakes of the month need not be thought of as fatal and inevitable. Think of them as costly lessons—but be sure you realize their cost. It isn't the spurt or the false start that counts; it's the continual, unresisting advance that wins the race.

Nov. 28, Sat. If you do not take advantage of the opportunity to get something out of your trade papers, which should always include HORTICULTURE you are losing a lot of good chances. The trade papers are your partners in helping to increase the efficiency of the trade and place it on a pillar of superlative standards. And when it comes to advertising in the trade papers, it's ridiculous for the retailer to say that he has nothing to advertise. If he has anything at all

to tell about his goods or his service,
he has something to advertise. The
salesman argues these points to a
hundred customers—why not go fur-
ther and tell them to men the sales-
man knows nothing about? The sub-
scriber and advertiser of the trade
papers recognize the benefit of busi-
ness reciprocity; they know each other's
needs. They acknowledge the dis-
tinct service to each other. The trade
paper creates an unique bond of sym-
pathy between its subscribers and ad-
vertisers.

NEWS NOTES.

Southington, Ct. — Goodison Bros.
have purchased the florist business of
Olson & Mitchell.

Muskogee, Okla.—Charles W. Whal-
ey has purchased C. L. Crawford's in-
terest in Crawford's flower store, and
will continue the business under the
old name.

Philadelphia—Rupert E. Hall, late
with Wertheimer Bros. N. Y. City, is
now associated with the Pennock-Mee-
han Company in their ribbon depart-
ment. Robert Greenlaw, Boston, was
a recent visitor.

NEWS ITEMS FROM EVERYWHERE

BOSTON

The first indoor America gladioli were noted this week at Penn the Florist's.

The new Lord & Burnham greenhouse erected by Thomas Roland at Revere is now completed. It is over 800 feet long.

H. F. Hartford, formerly with H. M. Robinson & Co., and A. L. Bork, formerly with T. F. Galvin, have joined the force of Wax Bros.

A glass-encased honey-comb swarming with bees was part of a very attractive window display at Harry Quint's store last week.

A new flower store has been opened by Roger T. Sullivan at 181A Hampshire street, Cambridge, Mass. Walt Farrell, who has been in the florist business for 30 years, is associated with Mr. Sullivan in his new enterprise.

Red carnations have come and gone, but Harry Fenn continues to be a favorite with local carnation specialists. This time we hear from J. A. Nelson of Framingham, through Wm. Hastings, his salesman, that this old red is doing remarkably well and has not lost any of its virility.

Ferns of good quality are in steady demand in the market. A. M. Davenport of Watertown and The Needham Conservatories are two local growers who have established a reputation for superb clean stock. The latter firm is now being represented by H. G. Cathie in the Boston Flower Exchange.

Display advertisements consistently inserted in the trade papers certainly do bring results. From a 2-inch advertisement displayed in the trade papers, orders for over 225,000 rooted cuttings of his new carnation, Alice, have been received by Peter Fisher, of Ellis, Mass. It has been exhibited at most of the shows this fall and has been attracting very favorable attention.

The season for azaleas and bulbs brings with it a demand for bulb pans and azalea pots. Despite the undue warmth of the past month, which would naturally discourage the demand for house plants, A. Leuthy and several other large growers of pot plants report business as quite good. As a complement to this plant activity comes a report from the A. H. Hews Co. of North Cambridge that the pot business is improving.

SAN FRANCISCO.

Ferrari Bros. are adding a 100 h. p. boiler to their heating plant in the Ocean View district.

Architect L. P. Robart, this city, has completed plans for extensive garden work for the Newhall residence at Burlingame, Cal.

The Cottage Gardens Nurseries, Inc., in which Charles Willis Ward, of New York, is largely interested, has taken over 45 lots in the Eden tract, Eureka, Cal., as a site for its greenhouses.

The company is also doing experimental work on a 220-acre tract on Yager Creek near that place.

Domoto Bros. have about 200 boxes of Japanese lily of the valley with which they are experimenting, in hope of producing something that will be acceptable to this market. They say the stock so far has not been up to standard, and they can make no promises, but hope to get better results.

The Pacific Coast Horticultural Society has not yet fixed upon a date for the exhibition next spring, which is to take the place of the usual fall exhibition, omitted this year; but plans are gradually being worked out, and it is hoped that the main hall of the new Auditorium will be available for the purpose, as an unusually large showing is expected.

R. D. Paul, representing Mrs. M. Shimmins, who operates flower shops in several California towns, has leased quarters for a new store at Hanford, Cal. The store will be operated as the Hanford Floral Company, and will open about Nov. 25. This will be the first exclusive flower shop in Hanford, the business having formerly been handled by the fruit nurserymen.

In connection with landscape work, the MacRorie-McLaren Company recently made what is said to be the largest shipment of heathers ever made on the Coast, including vagans, codonodes, Veitchii, melanthera, per soluta, insitanica, cinera carnea and Mediterranean. This company is now carrying out a large landscape contract for Balboa Terraces, a real estate tract in this city.

G. A. Dennison, chief of the Department of Horticulture of the Panama-Pacific Exposition, has received an announcement from a firm at St. Albans, England, that its shipment of shrubs and trees for the Exposition will proceed without delay. It will include begonias from Bruges, Belgium, and a collection of bay trees. There are now 98 gardeners employed on the Exposition grounds. H. Plath has just delivered to the Exposition a large lot of ferns and cyclamen plants.

The finishing touches are now being put on B. M. Joseph's new floral shop on Grant avenue, in preparation for the opening Monday, Nov. 16. This shop will be entirely different from anything previously seen in this city. It will occupy two floors of a five-story building, the entire front of which has been decorated in Italian Renaissance style, with window boxes on all the floors, and a trellis, to be covered with vines, from the second floor to the roof. The ground floor will be devoted to cut flowers, and the second to growing plants and ferns, which will be strongly featured. Mr. Joseph, who has dealt in art goods for many years, will make a specialty of art boxes, etc.

SPRINGFIELD, ILL.

A. C. Brown, 217 South 5th avenue, has a large share of the decorations in Springfield. All kinds of flowers and

bedding plants are grown in the 80,000 square feet of glass for their wholesale and retail store, over which Geo. W. Jacks has presided for many years.

Most of the State House pilgrims pass the Capitol Greenhouses, which were bought by Geo. J. Dinkel after the death of A. C. Canfield, many years their owner. There is a store and 20,000 feet of glass. Mr. Dinkel has been a florist for 22 years and his successful competition in the recent flower show at Indianapolis speaks well for his product.

Edw. Middendorf and his able assistant, Mrs. Middendorf, went into the retail flower business two years ago, with a store and greenhouses at 207 South Fourth street. Already a good trade has been established and plans are on foot for further developing the business. Among their recent orders was a large book with the word "Mother." Mr. Middendorf placed the word upon a ribbon and hung it over the page in book-mark form, changing a hard and often unsatisfactory design into a pleasing one.

Springfield, Ill., has an example of the successful woman florist in Miss Bell Miller, who began when a mere child. Her 60,000 square feet of glass are under her personal supervision and the visitor finds everything in perfect order.

Miss Miller has also ten acres of land, two of which are in peonies. Her business is both wholesale and retail and her office and store are built in bungalow style at 829 South Second street.

"Down state," the chrysanthemums are blooming as profusely as in Chicago and are not tempting the dollars from the pockets any more readily. Pompons are crowding their big sisters hard, as most buyers prefer numbers to size. The many shades make up into tempting baskets and bouquets for home and public buildings. It was noted that not a large chrysanthemum was used in the decoration of the State House for the meetings of the State Federation of Women's Clubs last week. None of the florists made any special appeal to the 600 delegates in the way of window display and no flowers were distributed in the corridors or streets for advertising purposes. A good many flowers were used, however, and the florists would have appreciated more orders.

KNOXVILLE NOTES.

Mr. Speer, formerly of Columbus, Ohio, who has been some time with Crouch of this city, is now with A. H. Dailey.

Mrs. R. H. Ryno, A. J. McNutt, A. H. Dailey and Howell Nursery Company, all report similar satisfaction with the season thus far.

C. W. Crouch reports business very good for the entire month of November. They are very well pleased with the way the season has opened up.

Chas. L. Baum states that although he is not doing the volume of wholesale business this year as he did last, comparative statements show that November is holding its own with some increase.

CINCINNATI.

Wm. Murphy has been on the sick list for the last few weeks.

Mr. and Mrs. L. H. Kyck are spending the current week in Kalamazoo, Mich., and Portland, Ind.

J. T. Conger will open a store at 112 E. 3rd street on November 24th. His purpose is to use this store to handle his wholesale plants and poinsettias for the Christmas trade.

Flower Market Reports

BOSTON Market conditions are improving, but very slowly and to no marked degree. The conditions of last week continue to prevail with all kinds of flowers. Chrysanthemums still retard the movement of other crops. Bonnaillon and Eaton are the best sellers and command fairly good prices. Good red roses are being demanded in increasing quantities, especially Hadleys and Beauties. Killarneys are in light call just now. Trade was fairly brisk at the beginning of the week, but has dropped off considerably, although large sales are expected Saturday. The retailers are holding off till next week, on account of Thanksgiving, when business will naturally stir up. Gardenias and cattleyas are holding their own at normal figures. Violets are still scarce, but of good quality. Flowering plants and foliage plants are making steady sales.

BUFFALO Receipts are still heavy and speculative buying is weak. Stock is sold in small quantities only and there is naturally a surplus which has to be carried along from day to day. Beauties have shortened in supply, also violets, but there is any quantity of roses of all kinds, also lily of the valley, lilies and other stock. Of course the chrysanthemum season is now at its height. Excellent Turner, Maud Dean, Golden Wedding and Mrs. Jerome Jones, are coming in and a good quantity of medium Bonnaillon both yellow and white. The medium stock has sold though prices have not been up to other seasons. Pompons are fine and these too have taken well.

CHICAGO A little spurt in the wholesale trade began when the second week in November was midway, and quite an amount of the accumulation of stock, principally chrysanthemums, were moved. Friday showed a marked increase in sales all along the line. Saturday was a very good day and Sunday the demand was naturally very light for Indian summer suddenly took leave. Monday was very cold and florists were early at the market. All the first-class chrysanthemums of large size were cleaned out before noon and pompons made a record in the sales accounts. Stock has quickly responded to the drop in temperature by shortening up in supply, a condition not to be regretted. The price of roses has stiffened slightly though there is no material increase. There is a feeling that carnations are out of the race, with the ever-increasing popularity of the pompons and their splendid keeping qualities. So long as these are to be had at low prices, carnations will be sold at a loss, quantities moving at 50c. per 100. Ilex or winter berries are now in. Gardenias are here in limited quantity. Violets are selling fairly well. Lily of the valley and lilies are not selling particularly well. There is plenty of green and ferns are quoted at \$1.50 per 1000.

CINCINNATI Cold weather has set in and it is expected that this will result in a general shortening of the supply and stiffening of prices. The rose supply has been fully up to that of the

BEAUTIES

For Thanksgiving our Beauties will be in splendid shape. Good, well colored buds, unusually choice quality.

Special, \$4.00 per doz.; \$25.00 per 100.
Fancy, \$3.00 per doz.; \$20.00 per 100.
Extra, \$2.50 per doz.; \$17.50 per 100.
First, \$2.00 per doz.; \$12.50 per 100.
Second, \$1.50 per doz.; \$10.00 per 100.

VALLEY—Special \$4.00, Extra \$3.00 per 100.

GARDENIAS—Special \$3.00 a doz.; Fancy \$2.00 a doz.

CATTLEYS—Special \$6.00 a doz., \$40.00 a 100; Extra \$5.00 a doz., \$30.00 a 100.

past fortnight. The stock is good but has been having only an ordinary market with buyers' prices governing. American Beauties are meeting with a ready sale. Chrysanthemum receipts are heavy. Relatively speaking they are selling better than the roses but the demand is not strong enough to bring about good substantial prices. The carnation supply is heavy but is enjoying at the best an indifferent market. Quite a few to go to waste. Lilies are plentiful. Lily of the valley, violets and orchids have a pretty fair call. The first sweet peas and paper white narcissus made their appearance last week.

KNOXVILLE Cold stormy weather is having the desired effect on the florist business and trade has picked up very rapidly in the last few days. Carnations and chrysanthemums are plentiful and of extra good quality; roses,

although enough to supply the demand, are not so good. Chrysanthemum Day which was observed on Saturday, November 7th, at all cemeteries in and about Knoxville, gave very pleasing results inasmuch as this was the first time the day had been observed in several years.

NEW YORK The winter weather man has been doing his best this week to help the flower man but other conditions are too much to overcome at once. Crates, crates, crates, truck loads of them, from morning till night, they are being unloaded all along 28th street, crates big enough to hold a full-grown man. Where all the six-foot chrysanthemums come from is incomprehensible—where they all go to is a profound conundrum. The receipts of chrysanthemums are not at all confined to the giant blooms, however, for

Flower Market Reports

(Continued from page 737)

the pompons are also everywhere. Never before have they been so much in evidence and it is very plain that they are at last coming into general favor and are being used extensively in floral work. Notwithstanding the innumerable varieties and tints naturally produced in the chrysanthemums of today, the dye pot seems to be just as much in demand as ever and blooms with amazing colors are displayed in many a window where better judgment would be looked for. While all this lasts it is not much use to look for improved trade conditions but by the time Thanksgiving Day has passed, one week hence, the avalanche of chrysanthemums will be running low and then things will, we hope, take on a better aspect for the flower growers. Saturday of this week is expected to give a little impetus to the violet business and an advance price of \$1.00 per hundred is generally quoted for Yale's favorite flower. Snapdragons are again seen in the market in quantity and excellent quality for so early. Roses, carnations, lilies, cattleyas and all other standard stocks are in heavy supply and of excellent quality throughout.

There is little

PHILADELPHIA change to report in market conditions here.

Business continues fair with large supplies of all kinds of stocks and prices ruling low. Chrysanthemums are in immense supply and of fine quality. Bonnaffons predominate, and there are fine lots of Chadwick, Turner, Enguehard and Maud Dean. The rose situation is a little better; supplies are not so heavy and prices have stiffened slightly. American Beauty is an exception as they are in larger supply—the pinching for the Christmas crop being over. Jonkheer Mock is very good at present. More Russells could be used. It is in excellent demand and its growers are reaping a harvest. Sweet peas are beginning to appear again—some very fair Spencers being now offered. Cattleya Trianae is the latest among the orchids. Carnations are in fine form now, but the prices are far from being satisfactory. Violets are one of the few scarce items. They are probably holding these back for Thanksgiving. Paper Whites, pansies, bouvardia and mignonette are among the minor staples that are cutting some figure at present. Greens are going exceptionally well. Retinospora sprays seem to be one of the new items very popular.

Chrysanthemums, which have held a dominant position in the market for the last month,

SAN FRANCISCO are beginning to come forward less freely. This is not regretted, as people are beginning to tire of them a little, and prices for the last few weeks have not been entirely satisfactory. Attention is now beginning to turn more to roses, which are appearing in somewhat larger quantity, and also show a gradual improvement as to average quality. A good lively demand is expected by Thanksgiving. So far there has been no call for roses to be shipped north. In fact, violets are about the only line that is being shipped to distant points, though a few

chrysanthemums are going as far east as Salt Lake. The violet growers have been disappointed in their hopes of a good rain, which is badly needed by the flowers. The market is rather glutted with carnations, and prices are very low. The great bulk of the stock is rather trashy in quality, and its cheapness tends to depress really first-class stock, of which there is a little coming in. Cyclamen flowers are selling very well, and are rather more plentiful than usual, with indications of a gradual increase in supplies until Christmas. The supply of orchids is well maintained and offerings, as a rule, are well taken up. California holly and madrone berries find a little more demand, though by no means large as yet. Greens of all kinds are abundant. General retail business is about all that can be expected. The intercollegiate football game Saturday will doubtless give the usual stimulus to chrysanthemums and violets in the local market. Judging by conditions at the gardens and hothouses around the Bay, all seasonable goods will be unusually plentiful during the holiday season; and while prices will doubtless be low, the season is expected to be a very satisfactory one for the trade.

The local market has

ST. LOUIS been in splendid condition as to supply and the demand too has been quite satisfactory on some days. Chrysanthemums are still the main attraction. Some of the late varieties are now coming in heavy. Prices have been most reasonable. Other flowers coming into this market are far too many for the local trade to dispose of. Roses are many and fine. Only the extra fine stock goes at the quoted prices. Violets are in excellent demand, also sweet peas are improving daily in quality. Carnations are in fine supply. The cold winter weather that started in today, Nov. 16, should boom business and make things more steady.

WASHINGTON

Contrary to expectations, the good business that the majority of florists had hoped for has not materialized up to the present time. There is a large oversupply of stock and in many instances the customer dictates his own prices for the flowers that he desires. There are flowers of all kinds coming in from the nearby country that are flooding the local market to an extent never before known in Washington. The warm weather was continued for a week or more causing flowers of all kinds to be overplentiful and the demand exceptionally poor for this time of the year. This sentiment seems to prevail throughout this territory and there are but one or two retailers who are optimistic enough as to declare that business is good with them. It seems futile at this writing to quote prices for quotations would not hold good over night. Dendrobium formosum still continues to pile in. Gardenias are very plentiful and go begging at even \$1 a dozen. The call for lily of the valley has been very good and the stock is as fine as has ever been seen here. Paper White narcissi are not yet in sufficient quantity to cause worry. Some good mignonette is to be had but because of the lack of large dinner decorations this flower is passed by for something showier and perhaps cheaper. There is a great oversupply of Lilium rubrum and most of these flowers find their way to the refuse pile. Carnations are exceptionally good and are perhaps in somewhat better demand than they have been. Orchid flowering sweet peas that are now to be had in American Beauty shade and lavender, meet with a ready sale at up to \$1.50 per hundred. Violets are still very scarce and not very good.

BUSINESS TROUBLES.

Middleboro, Mass. — Frederick P. Chase, florist, assets, \$315.00; liabilities, \$1,616.00.

**BAILEY'S NEW STANDARD
Cyclopedia of Horticulture**

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Two volumes have now been issued and the others will follow in succession. Order from

PINES ATTACKED BY NEW INSECT.

The U. S. Department of Agriculture is calling attention to the introduction and establishment in America of the European pine shoot moth, which threatens to cause serious loss. This insect has been already mentioned in *HORTICULTURE* during the past season. It is a small orange-red moth, the larva of which hollows out new buds and kills or injures the ends of twigs of pine trees. This injury causes a deformity which is serious in ornamental trees, and in trees grown for lumber makes a crooked growth and a consequent waste when the tree is cut.

In Europe the insect not only attacks all native pines but is equally injurious to American species cultivated there. The department states that the young larvae came into this country within the buds on imported pine seedlings which have come from France, England, Holland, Belgium or Germany. The department's investigators have discovered it in only ten localities, in six states from Massachusetts to Pennsylvania, but it is likely that it may be found in other localities. It has not been found in any native trees in the forest, and with only one exception has always been on European pines in nurseries and private parks. There is no evidence to indicate that it has been in this country more than a year except on Long Island, where it has existed for more than two years.

There are several native pine shoot moths, but none of them inflict the serious injury of the European species.

The department hopes that the new pest may be stamped out before it becomes too widespread to be controlled. At present the problem of its elimination is confined mainly to nurseries, but if it once gets into the native pine forests the experts think that it would be beyond control. In its larval stage the moth is so effectively protected in the buds and shoots that it can not be reached by any insecticide, and the only method of getting rid of it is to prune out and destroy the shoots which contain the insect. This should preferably be done during the fall and winter. Though it is easier to locate the injured tips and shoots after growth has started in the spring, it is safer and better for the tree to have it done in the fall. Measures for control, to be effective, can not be accomplished without the cooperative action of all who grow or plant European pines or deal in them.

Further information in regard to the insect may be obtained by application to the bureau of entomology, Washington, D. C.

GERANIUM LEAF SPOT.

Apropos of the fact that we had received so many inquiries from different sections of the country and that, every fall and spring we see in the trade papers considerable discussion of a geranium leaf-spot supposed to be caused by a fungus, we have had our State Horticultural Department take the matter up and they have in turn referred it to the U. S. Dept. of Agriculture at Washington. In response, Prof. F. H. Chittenden, of the Bureau of Entomology, writes as follows:

"I am in receipt of your additional

Pulverized Sheep Manure From Big Feeding Barns No Adulteration—No Weed Seeds

THIS IS THE BRAND
GUARANTEED PURE

Sheep's Head Manure is the cleanest in America. Here are the big covered corrals of the railroads, where the sheep are unloaded and kept from 60 to 90 days to fatten for the Chicago market.

We Guarantee

our product to be absolutely clean — no pig manure or other adulteration — nothing but sheep manure — dried and pulverized for easy handling, and all the weed seeds killed.

Some of the largest growers in the East have used our product for years.

Shipped in 100 lb. sacks

Aurora, Ill.

specimens of geranium leaves and beg to state, as before mentioned, that the injury is apparently entirely that known as stigmanose. This was for some time believed to be a specific fungus trouble but by experiments has been determined to be the result of injury either by thrips or aphides. Under certain conditions plants attacked by these insects seem to develop this peculiar adventitious cell growth which much resembles the attack of certain species of fungus. Fumigation or the application of proper insecticides for thrips and aphides would undoubtedly lessen the injury. The attack of these insects may be responsible for the yellowing of the leaves but I am unable to state this definitely."

Prof. C. E. Temple, of Md. Hort. Dept., writing further on the subject, says:

"I may add that Mr. Anspen and I are planning some experiments to determine the cause of this trouble. It will take some time, but I am sure that we will be able to get some results. I am unable to see how the trouble can be considered especially serious, and personally I do not believe the spot which we have had most to say about is caused by a fungus."

Prof. Temple would be pleased to receive any information or data relating to the disease from any florist who has the trouble, so that he may come to some definite conclusion as to what the real cause is and thereby the remedy.

R. A. VINCENT.

Whitemarsh, Md.

NEWS NOTES.

Southington, Ct. — The Oleson & Mitchell Florists' Company will hereafter be known as the Mitchell Company, Mr. Oleson having withdrawn.

Marlboro, Mass. — Joseph Jones of Keene, N. H., has purchased the Warren House Greenhouses on East Main street.

Chatham, N. Y. — The greenhouse which has stood for some time on Richard Mason's premises in Kline Kill has been purchased by Mrs. R. H. Finch and is now being re-erected on her premises on "Brooklyn Heights."

Galesbury, Ill. — I. L. Pillsbury has just finished rebuilding one greenhouse, which will be used for palms and decorative stock. The house was built over twenty years ago and was getting out of shape, so he tore it down and rebuilt higher and broader.

St. Louis — The students at the Missouri Botanical Garden have organized a club of which Fred Grossart is president; Carl Giebel, vice-president; Paul Kohl, secretary and treasurer. They will hold monthly meetings. The first meeting was held Nov. 5 in the Lecture Room of the Garden and Dr. Geo. T. Moore addressing the young men. Interesting features will be at each meeting during the winter months.

The chrysanthemum show at the Missouri Botanical Garden is now at its height. The public is taking greater interest this year than heretofore. Max Schiller has charge of the show.

31 Union Stock Yards, Chicago

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

SILKWORMS AND TOOLS.

Silkworms and tools have this in common: their usefulness produces results out of all proportion to their size and cost. Who would attribute the origin of handsome silk gowns to tiny animals? And who, admiring a handsome building, gives a thought to the humble tools without which the structure could not have been built? The joy a silk dress brings to a woman is no greater than the delight a good implement means to a good mechanic. Red Devil glass cutters which have been advertised for some time in the columns of HORTICULTURE are among the most useful of the many useful tools bearing the trade mark "Red Devil" all of which have a first-class reputation the world over. If you are not already using these glass cutters, just note the advertisement of the Smith & Hemenway Co., in this issue and get busy. You'll never regret it.

NEWS NOTES.

Clinton, Mo.—The Barnhart Greenhouses have been sold to J. M. Holmes & Son.

Pittsburgh, Pa.—F. M. Fritchman has purchased the business of the Finleyville Floral Company.

Rehoboth, Mass.—Mrs. A. E. Brownell, who has been doing business under the name of the Seekonk Gardens has sold out to George C. Tennant.

ADVANCE CO.
Richmond, - Ind.

Photograph taken in one of Mr. Fred Burki's connected houses at Bakerstown, Pa. The Broad Strip of shade on the right hand bench is cast by the Gutter. The Narrow One on the left hand one, is cast by the Ridge. Time of taking photograph was at one o'clock, the fifteenth of August.

The Question of Shade In Ridge and Furrow Houses

ALONG the middle of last August when in Pittsburgh, I took the trolley one fine morning out to Bakerstown, to visit again the range of the Pittsburgh Cut Flower Co.

Was fortunate in finding Mr. Burki at his office. In his characteristic direct way; all formalities were soon out of the way and he was talking greenhouse facts and figures.

Most of his eight acres of glass are separate houses, but he has two blocks of connected ridge and furrow ones. In 1911 we sold him 10 each 12' 0" wide and 100' long.

Last year, however, he bought another of our separate houses 41' 4"x583' 4" and this brings us to the main point of this Ad.—the shade in connected houses.

In passing through some of these houses, the benches of which had just been white-washed ready for new soil, Mr. Burki called my attention to the difference in the shadow cast by the sun on the benches by the gutter, and by the ridge.

The ridge shadow measured three inches in width,

and the gutters, 7½ inches, or more than twice as much.

When you consider that this was at one o'clock on a day in the middle of August when the sun was high and casting the shortest shadow, the thought of what that shadow is during the short days of December when the sun hangs low, is certainly such as to make a man sit up and take notice.

Not only will the shade be much broader but in combination with the ridge, the shadow is practically continuous.

Mr. Burki declares that he wants no more connected houses. Such a statement coming from a man standing so high in the business and based on actual comparative results; carries with it conviction.

In addition to the shade side of this discussion there are also the questions of heating economy and improved ventilating conditions that unquestionably exist in the large single houses, both of which we would like to discuss with you.

When you are ready—say when and where and we'll be there.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toll, we ought to blame the culture, not the soil."—*Pope*.

Allamandas

These plants should now have made plenty of fine wood and will now need a good rest. All syringing must be discontinued and just enough of water should be given to keep the shoots from shrivelling. The ripening process will have to be done very gradually. Allow the soil to get a little drier after each watering. The foliage will turn yellow and finally drop. During this resting period which should go on for ten or fifteen weeks the temperature should not go below 55 degrees at night. They should have plenty of ventilation whenever the outside condition will permit.

Care of Carnations

Where carnations are showing plenty of buds they should get some light top dressing. After February 1st if the plants are still doing well they will need more food, and liquid manure can be used to advantage about once a week, or top dressing can again be resorted to, using dried blood or nitrate of soda in light doses, or sheep manure or shredded cattle manure in heavier doses, and if available, a good lot of rotted stable manure, which also will help to keep the beds from drying out too quickly. Carnations will do well with a night temperature of 48 degrees to 52. The day temperature should be governed by the weather, not allowing it to rise above 60 degrees on cloudy days and 72 degrees on bright days. Nothing will be gained in getting a few extra flowers in winter by running the houses a few degrees higher, as the plants will be sure to suffer. Examine the benches every day for the dry places which can be watered.

Care of Gardenias

Gardenias will now want very strict attention. The way watering is done from this out will play an important part in having good gardenia flowers. Either an undersupply or excess will always prove disastrous. Damp down the walks two or three times a day for they do abhor anything like a drying atmosphere. Give a night temperature of at least 65 degrees with 10 to 15 degrees higher with sun. Give enough ventilation on all good days so as to avoid a hot stuffy atmosphere. Take advantage of every bright day and do some syringing as it is a great aid in keeping the plants healthy and clean. Give them light mulches about every month. Either sheep or cow manure in equal parts with soil makes the best mulch.

Next Week:—Azaleas for Christmas; Christmas Talk; Lilies for Christmas; Christmas Greens; Hybrid Perpetuals for Easter; Care of Violets.

Propagating Crotons

From December to February, when firing is the heaviest and the propagating sand is most likely to be steadily warm, is perhaps the best time for rooting crotons. The best condition for successful rooting is when we can maintain a bottom heat of 80 to 85 degrees, with top heat 10 degrees lower, but they will root in a top heat even 20 degrees lower. Half ripened wood is the best to use. Water freely. Usually a good damping will be needed daily, in addition to occasional light sprayings. Protect from all sunshine. Where you have a lot of leggy crotons nice young plants may be had by making incisions in good, shapely shoots. Keep open with toothpicks, bind with sphagnum and keep constantly moist and roots will be emitted in a month or less, when the tops can be cut off and carefully potted. With a little shade and careful handling large and well finished plants in small pots may be had in this way. Crotons are fond of a high temperature so should never have less than 65 degrees at night, and 15 to 20 degrees higher with sun.

Rhododendrons

Rhododendrons for the past two seasons have sold well, especially at Easter. Considering size of plant and number of buds the first cost of the plants is a trifle and their worth must be estimated on the bench room they occupy rather than on first cost. The rhododendrons, remember, are hardy even in our semi-arctic winters, and it is not the cold but the soil that often makes them a failure outside in this locality. Wet the roots of the rhododendrons as you did the azaleas and place them in a cold house or shed or in a deep cold frame covered with sashes where they could remain until February. See that they have plenty of drainage and are potted firmly. Keep the soil moist. By February bring them into a cool house where they can be started up slowly.

Preparing Ground for Asters

Where the ground does not freeze up to this time it can be prepared for asters for next year. They always do better when the ground is plowed or dug late in the fall. Spread a heavy coat of manure and plow or dig this under, leaving it rough over the winter. In the spring this will save a good deal of time. All you will have to do is to give it sufficient harrowing to pulverize.

FOR A BIG BUSINESS

The Tenth Annual Holiday and Souvenir Number of HORTICULTURE

Will be issued under date of **December 12**. Make good use of it if you have anything to sell. For Getting Business That Is Worth Getting It Has No Superior

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Trouble With Mrs. Aaron Ward

Dear Sir:

I am sending you a piece of Mrs. Aaron Ward plant asking you if you will kindly inform me what is wrong with them. The stems do not get over four or five inches long. We also grow Killarney Brilliant, Double White Killarney, American Beauty, Richmond and Hadley, in the same house. The leaves seem to turn yellow and drop quite freely on all the varieties except the Hadley. These are doing fairly good, only the buds do not get as large as they should. These roses are in about three and one-half inches of soil; they were set out July 1st. I have given them a top dressing of cow manure, bonemeal, a little wood ashes and liquid manure. Is fresh cow manure the best for liquid, and how to make it to be most useful? How often is it advisable to use lime?

Yours respectfully, N. H. C.

New York.

The tips that you sent us for examination arrived pretty well dried up. Such samples should be sent in wet moss so that they arrive still fresh and green. However we were able to locate at least a part of your trouble. The plants are infested with an especially healthy tribe of red spiders, and these were all alive, crawling over your letter in search of something to eat. It will take quite a little work and patience to rid your plants of these pests at this time of the year. They must be numerous for they will not start on the new growth unless their numbers are so great that they grow faster than the plant itself. If you do not know what they are, take a magnifier and turn it on some of the leaves and you will see little red spiders, very similar to small chicken lice and about as destructive. These suck the very life out of the plants. This will account for your leaves dropping and you must begin at once and syringe the plants well on every clear morning. When we say syringe we do not mean just merely throwing water all over the plants, but throwing the water in a fine mist at great pressure against the plants from underneath, and shaking the hose or nozzle to go up and down the plant. This will take most of the spiders off, and blow them to kingdom come. We would recommend some insecticide, but we are afraid you may use it too strong and burn your plants. If you wish to try it, do so on a few plants and if no harm results then dose the whole house. Syringing, however, is the cheapest and safest. As soon as the plants are free from spider they will look a little better, and may grow real good again. Let us hear from you as you go along. Fresh cow manure is not as good for making liquid as decayed manure, same as is used for mulching. The liquid made of the latter is more available to the plants, and they can use it at once. The best way to mix it is to have two tanks, one higher and one lower. Have a narrow trough between the two about a foot square, with several screens in it, using two of each kind. The last should be the finest, and this will take all the coarse stuff out of the water. Put the manure into the upper tank, and fill with water, mixing the manure well, and then open the gate into the trough and let the water go through the screens. Having two of each kind, one can always be taken out to be cleaned, and the other will do

the work meantime. If you read our weekly notes, you will find an article on this subject every now and then. There is no set rule for the use of lime. This must be used as the plants need it, and the grower must judge for himself, always experimenting on a small scale before applying it to the whole house, unless he is sure of what he is doing. Lime, however, is quite harmless, and if not applied directly after mulching or after using any kind of a fertilizer, will never harm the plants, if applied in a moderate dose. Air-slacked lime should be used for this purpose. The knots that appear on the plants should be cut off and burned at once. If they are badly affected pull them up and burn them, destroying even the soil. This disease is a bad one, similar to the black-knot on plums, and we call it tree cancer. Some experiment station, or the U. S. Department of Agriculture could tell you more about this, give its correct name, etc., as we have no laboratory with powerful microscopes to ascertain just what the disease is.

Sheep Manure

To growers who have not had very much experience and to experienced growers who have never used sheep manure for roses we would advise that they experiment with it before giving the whole place a coat of it. Sheep manure is very concentrated, and is especially rich in nitrogen; that is why we would not advise using it, before the turn of the year, except in rare cases. After that the plants will naturally grow more vigorously, and even if the plants do receive a little too much of it they will take no harm, for they will grow out of it, or at least will stand a little more show of doing so. In our various experiments we have found nothing better for Beauties than the old-fashioned cow manure, for this is well balanced for the purpose, and makes an excellent plant food. Teas and other roses we found less particular, and many substitutes were used. Sheep manure did well with Killarneys and other roses of that type, being given in moderate doses and applied very carefully. The lump manure, or the manure in its natural state we found was best turned into liquid, and thus applied. A little bonemeal added to this with a least touch of soot, and the same heated and applied warm to benches in winter, proved an excellent tonic for the plants, and benches thus treated bore flowers of a better color. The foliage was better colored as well. Later we hope to go into this question a little deeper, and will perhaps devote a whole page to the one subject. Cow manure is hard to get in many places, and if we can substitute the sheep manure, it would be a relief to a good many growers.

Soot

A little soot applied to the benches when the buds are just about to show color will be a wonderful help to put a little extra pink to the roses of that color. This applies to the red roses as well, and the only thing to do is to remember that too much of the soot might prove harmful to the plants—the soot itself to the roots, and the smell of it to the leaves. Apply just enough of it to

blacken the benches a little, and if the same benches have had a dose of lime recently, then do not apply any at all until after the danger of the lime freeing the ammonia in the soot is past; in other words, postpone the application until the lime loses so much of its strength that it will be practically lifeless. The same may be said of bonemeal, for the latter contains quite a little lime in one form or another, although this of course is nowhere near so strong as the lime itself. Four or five days after bonemeal is used it is safe to use soot, and ten or twelve days after lime is used, if the latter has been watered in well.

Storing Manure

The cold weather will soon be here, and if the manure is left outside exposed to the wind, frost and rain, it will not only lose a good deal of its fertility, but will freeze solid, and it will be a very hard job for some one to dig it when it is wanted. If there are no buildings where manure can be stored, then heap it up nicely and cover it over with a good thick coat of leaves or straw. It will keep the frost out, and a good deal of the water, although not all of it. Avoid mixing soil with the manure, as this is not wanted in the mulch until after spring starts. It is well, however, to put a nice lot of sod under the manure heap, as this will absorb all the leachings, and then when spring comes and the plants are real hungry, a mulch of this will do wonders if applied at the right time. Avoid using coarse manure. It is a nuisance, to say the least, and greatly increases the cost of applying it to the benches. If it can be done, see the farmers who sell it to you, and have them feed the cattle with cut roughage and have them cut the bedding up as well. It will be just as useful, and the cost of cutting will be more than offset by the saving in handling later.

Potting Soil

This should be stored very similar to the manure, but try to get this under cover so that it will not be so wet when it is wanted. Some soils take an awful long time to dry out in the winter, and it will save much labor to have the soil dry in the first place. The old heaps that were not used for filling in will be the best kind of material to be used, and, if the soil is cut down well, it will run pretty evenly. This is important, for it is very annoying to have one mess of soil full of manure and another lot without any. The only way to get it even is to take the heaps up carefully, so that there is not too much manure here and none at all there. If the soil is deficient in manure, it is a good time to add a little more, taking care to put it in nice strata, so that when it is taken to the potting bench it will be even.

The Coal Supply

Now before the nasty weather sets in, the wise florists will fill their coal bins up to the limit. If you have not enough room in the cellar, store the coal outside, and see if you cannot build an additional shed for coal storage. It should be near at hand for it is not very pleasant or healthy for the night fireman to wheel his coal from a distant place, when he is all wet with perspiration after cleaning his fires. Bad roads will come with bad weather, and it is good to have an ample supply of the black diamonds on hand. Then too the cars are sometimes scarce, and a coal famine will result. The

people will worry and kick themselves for not having their bins full of coal. Better fill them up.

Electric Lights

These cost so little that it is really surprising to see how many places are not lighted with electricity, in the important buildings at least. Cellars should have lights; same with packing rooms. There are a great many things that can be done well at night, if there is light, and we are sure it will pay any place to have lights installed.

For December 5th.—Lining Boxes; Heavy Wrapping Paper; Twine for Tying; Wood for Propagation; Tying Teas; Dead Leaves on Benches.

Saccolabium giganteum

A lovely East Indian orchid which always adds grace to any exhibition group and its handsome deliciously fragrant racemes of amethyst-tipped and spotted blooms never fail to arouse interest and admiration. It is an easy bloomer thriving in abundant light, and deserves a place in every collection.

South African Harrisii Lilies

Lily growers will be greatly interested in the picture which serves as our cover illustration this week, for the use of which we are indebted to R. M. Ward of "Horse-Shoe Brand" fame. The flowers illustrated were grown by F. A. Danker, Albany, N. Y., from bulbs produced in South Africa. As is well-known the seasons in South Africa are reversed, so that these bulbs are ripened and dug in February and arrive here in April. The flowers shown were cut in September from fresh bulbs so received and they thus take the place of cold storage lilies for fall and Christmas blooming.

travel during the past summer was a disastrous blow to the florist business, felt most severely, of course, by the seaport florists but affecting the trade generally to a considerable extent. Nobody whined about it and it was accepted philosophically because it was realized that it was our share of the indirect burden resulting from the war. The ban on theatre flowers comes, then, at a very bad time and is all the more grievous because it seems oppressive and uncalled for. The flower business is pre-eminently one of the arts of peace. Its influence is humanizing to a degree attained by but few commercial avocations. As now established and conducted it represents large investments of capital and provides refined employment for tens of thousands of people. The influence of their work and their products is "all to the good" and they should not be molested. It is unfortunate for the nurseryman and the florist and, in some respects, the seedsman, that so much persistent antagonism against their calling is continually cropping up. We are inclined to think that much of the arrogant interference and tyranny which the florist has been called upon to combat up to the present time is largely due to his own supineness. His national society might be made his best defensive weapon against the meddling of politicians, priests and others having a little authority but the more he needs its help the less he seems disposed to use it.

An important lawsuit

A case now before the court in New Jersey, the outcome of which will be of interest to florists and nurserymen whose greenhouses or plantations are located along a railroad right-of-way, is that of W. A. Manda, Inc., against the D. L. & W. R. R. The railroad company is elevating its tracks through South Orange, which were formerly on the natural level, and in carrying out their plans have taken a wide strip of Mr. Manda's hardy plant gardens adjoining the railroad for a distance of over one thousand feet. This tract, originally valueless for planting had been overlaid by Mr. Manda to an average depth of nearly three feet with highly enriched loam and was devoted to the intensive culture of herbaceous perennials, fine garden shrubbery and rare evergreens. Mr. Manda's claim against the D. L. & W. R. R. runs into a large figure, covering not only the value of the plants taken with the land but of the compost in which they were growing; also the damages to his establishment as a whole, as well as to the plantations contiguous to the new embankment and the resultant injury to material in the greenhouses and in the outside beds from the interference with light and air and the descent of noxious fumes and gasses from the locomotives. Such prospective damages are difficult to show in advance and, being largely conjecture, are inadmissible as evidence in any court. Yet to anyone with an intimate knowledge of plant life and the essential requirements of a commercial enterprise such as Mr. Manda has established it is manifest beyond any possibility of doubt that a serious and permanent injury will be inflicted. On this broader phase of the question, as we have said, no practical basis of compensation is possible, so we are all the more anxious to see Mr. Manda win out in full on such specific claims for redress as, under the circumstances, it has been possible for him to formulate and present in acceptable legal form. When this litigation has been finally settled the decisions arrived at will no doubt furnish some data of pertinent interest and value.

Now that the real flower-buying season has started in we are wondering who will throw the next brick. The last one we heard came from the Metropolitan Opera House in New York when the opera season opened last week, in an edict prohibiting the passing of flowers over the footlights to the performers. The cessation of steamer

ARNOLD ARBORETUM BULLETIN
OF POPULAR INFORMATION. NO. 63.

In spite of the severity of the past winter and the injury which it caused, and of the drought of September and October which has been of exceptional length, the Arboretum on the whole does not look bad, and for lovers of plants there is much of interest to be seen here this year in the early weeks of November. The conifers, with few exceptions are in good condition, although the leading shoots of a few species have been destroyed by a borer, the White Pine Weevil (*Pissodes strobi*). The species which are injured by this pest nearly every year in the Arboretum are the Himalayan White Pine (*Pinus excelsa*), the White Pine of western China (*Pinus Armandi*), the Oriental Spruce (*Picea orientalis*), and the Balkan Spruce (*Picea omorika*). The Balkan Spruce is the last European tree brought into cultivation; it is a beautiful, fast-growing and perfectly hardy tree which on the mountains of southwestern Europe sometimes grows to a large size and is highly valued as a timber tree. In this country, or at least in the Arboretum, it does not promise to become valuable as an ornamental tree unless the ravages of the White Pine Weevil can be stopped. There is no indication yet that many of the new Chinese conifers, especially the Pines and Spruces, will not flourish in this climate. The Larches are perhaps less promising, and the Firs, although some of them may prove hardy, grow badly in the nursery and do not give promise of much value here.

A few of the conifers in the Pinetum which are particularly interesting just now are the Colorado White Fir (*Abies concolor*), the Japanese *Abies brachyphylla* and *A. homolepis*, the Carolina Hemlock (*Tsuga caroliniana*), and three Japanese Pines, *Pinus parviflora*, *P. Thunbergii*, and *P. densiflora*. There are good plants of a dwarf form of the last in the collection of dwarf conifers to which attention is called. This dwarf is a common plant in Japanese gardens and should be better known in this country, for it is one of the handsomest of all dwarf conifers among which are many decorative garden plants. Among other conifers which should be studied at this time are Engelmann's Spruce (*Picea Engelmannii*), the Colorado form of the Douglas Fir (*Pseudotsuga mucronata*), the Siberian Spruce (*Picea obovata*), the western White Pine (*Pinus monticola*), the different forms of the Black Pine of Europe (*Pinus nigra*, *laricio*, etc.), and some of the eastern North American Pines, notably *Pinus resinosa*, *P. Virginiana*, and *P. Banksiana*.

The few broad-leaved evergreens which can be grown successfully in this climate are in good condition, and Laurels (*Kalmia*) and all Rhododendrons now promise abundant flowers for next year. The evergreen Hollies are beautiful now. *Ilex opaca* is covered with its large red berries and is interesting because it is the only broad-leaved evergreen tree which is hardy in the Arboretum. Although less beautiful than the European Holly with its lustrous leaves, it should be more often seen in eastern American collections in which north of Washington the European tree is not hardy.

The native Inkberry (*Ilex glabra*) is one of the most valuable of the evergreen shrubs which can be grown in this climate. It is a round-topped plant, occasionally five or six feet tall, and is very common in the neighborhood of the coast from New England to Texas. As an ornamental plant it is chiefly valuable for its small shining leaves which nearly completely hide the small black fruits which remain on the branches during the winter. Only one other Holly with evergreen leaves has proved hardy in the Arboretum. This is the Japanese *Ilex crenata* which is a taller growing and narrower plant than *Ilex glabra*, with darker green leaves and larger black fruits.

Several shrubs are more beautiful now than at any other season of the year, especially those with showy fruits which retain their leaves late into the autumn with little or no change of color. Among such plants not one perhaps is more beautiful than the common European Privet (*Ligustrum vulgare*) which has been cultivated for centuries and has become naturalized in the eastern United States. This plant bears at the ends of the branches large clusters of shining black berries which now make a fine contrast with the dark green leaves. The European Privets are planted with a number of Asiatic deciduous-leaved species, to all of which they are superior as decorative plants at this season of the year.

There are few more beautiful shrubs in the Arboretum at this time than the variety (var. *podocarpa*) of the eastern Asiatic *Lonicera Maackii* which was discovered by Wilson in western China, for its leaves are still green and perfectly fresh, and its branches are covered with bright red fruits. This is a large, vigorous, fast-growing, and perfectly hardy shrub with wide-spreading branches and requires a good deal of space in which to show its real beauty. From the northern *Lonicera Maackii*, a native of the Amoor region, the leaves have mostly fallen, but the erect growing branches are covered with scarlet fruits. The flowers of the northern plant are pure white and larger than those of any other Bush Honeysuckle.

Photinia is a genus of the Rose Family related to the Apples, with a few species of small Asiatic trees. Two of these plants, *Photinia villosa* and its variety *laevis*, thrive in the Arboretum and are covered with their small red fruits. These little trees succeed perfectly in this climate; their small white flowers are freely produced in spring in many-flowered clusters, and their fruit remains a long time on the branches, especially that of the variety, from which it sometimes does not entirely disappear until the end of winter. This plant has been largely planted in the Boston parks.

The trees and shrubs of Japan usually retain their leaves later than the related American species, and as the leaves of many Japanese plants take on brilliant colors in the autumn they are valuable for prolonging the beauty of the autumn garden. It is interesting to find that this late changing of color is common also among many of the plants of western China. This is particularly noticeable in the new species of *Cotoneaster* discovered by Wilson. The leaves of nearly all these plants are still perfectly green, and probably by the middle of November

they will be bright scarlet, or in some species scarlet and orange. These plants have late ripening, red or black fruits which greatly add to their beauty, and among them are certainly some of the most valuable shrubs of recent introduction, and they deserve the attention of all lovers of hardy plants, especially *Cotoneaster divaricata*, *C. foveolata* and *C. Dielsiana*, the leaves of which turn brilliant colors, and the different forms of *C. horizontalis*, low shrubs with wide-spreading nearly prostrate branches. These have small lustrous leaves which in this climate do not fall before Christmas, and small red berries. No shrubs are better suited for the decoration of the rock garden.

Among the American Hawthorns which show their greatest beauty in November may be mentioned *Crataegus cordata*, *C. nitida* and *C. persiciens*. The first of these plants, the so-called Washington Thorn, is a narrow, slender tree, which sometimes attains the height of twenty or thirty feet. The flowers are small, creamy white, and do not open here until nearly the middle of June, and the small, scarlet, shining fruits, which ripen late in October, remain on the trees without much change of color until the spring. As the fruit begins to show its bright color the small triangular leaves turn to shades of orange and scarlet. *Crataegus nitida* is a native of the bottom-lands of the Mississippi opposite the city of St. Louis; it is a large tree with slightly spreading pendulous branches forming a large, open, round-topped head. The leaves are narrow, long-pointed and very lustrous; the flowers are pure white, of medium size, and produced in numerous clusters which cover the upper side of the branches. The scarlet drooping fruit, which is also of medium size, ripens late just as the leaves turn orange and scarlet. This is one of the handsomest of the American Hawthorns and has grown to a large size in the Arboretum. *Crataegus persiciens* retains its leaves, which are now as green as they were in midsummer, after those of all other Hawthorns have fallen, and the crimson fruit remains on the branches until spring, making this tree in winter the most conspicuous of the deciduous-leaved plants hardy in New England. It resembles in the shape and in general appearance of the leaves some of the Cockspur Thorns of eastern North America. Raised many years ago at the Arboretum from seeds received from the Paris Museum, its native country is still unknown. The largest plant of this tree in the country and the type of the species can be seen among several large Hawthorns at the foot of the bank on the pathway near the Forest Hills entrance to the Arboretum, where it is now the only plant with perfectly green leaves.

The only shrub now in flower in the Arboretum is the Witch Hazel of the northern states (*Hamamelis virginica*) which is covered with its yellow flowers.

Leonard Sutton of the firm of Sutton & Sons, Reading, Eng., has been elected Mayor of the Borough of Reading. Mr. Sutton visited the United States four years ago on an inspection of the State Agricultural Colleges on behalf of the Reading University College.

CLUBS AND SOCIETIES

AMERICAN ROSE SOCIETY.

The executive committee of the American Rose Society held a meeting on Nov. 18th, at the office of Traendly & Schenck, New York City. Considerable business was transacted. Treasurer May reported that the permanent investment of \$3,000 for three guarantee mortgage certificates would be due on Jan. 15th. It was directed that the money be re-invested in guaranteed mortgage certificates, the interest thereon being 5 per cent. This security is legal New York Savings Bank investment.

The matter of fixing the time and place for the spring show was carefully gone over. Letters were received from Baltimore and Chicago, bearing on the matter. President Pierson had visited Chicago and had a conference with some of the leading florists, and it was moved that action for the present as to the time and place for the annual meeting and exhibition be deferred until later.

The Test Gardens at Washington and Cornell University, at Ithaca, N. Y., have been well gotten under way this season. Those at Hartford and Minneapolis were in prime condition. Vice-President Pyle brought up the desirability of general affiliation with local Rose Societies. To the members of the Syracuse Rose Society have been sent some 300 bulletins for 1913. Mr. Pyle had given an illustrated lecture on Roses to the Brookland, D. C., Society.

The list of roses as originated in America was a subject for consideration; the effort being to gather together as near a full list as can be done and make it a matter of official record; this has been under way for some two or three years. Last year the official list as entered with the Society of American Florists was tabulated and printed in the bulletin. To get out a more complete list, as a matter of historic data, it was moved that the committee on nomenclature be instructed to prepare and submit to the Executive Committee, a list of all roses of American origin.

The annual bulletin for 1913 was the largest edition of the Society's records ever issued. It is proposed this year to increase the number. The bulletin goes far and wide and will be ready about the first of the year 1915. Adjourned to meet second Monday in December.

B. HAMMOND, Secretary.
Beacon, N. Y.

AMERICAN ASSOCIATION OF NURSERYMEN.

We are now able to report that the Hotel Cadillac, Detroit, Mich., has been chosen by the committee on arrangements, Thomas I. Ilgenfritz and Secretary Hall, as convention headquarters for the fortieth anniversary of this Association. The accommodations for meetings, exhibits, committees, and for social purposes are unexcelled, and have been generously placed at our command by the management.

It will be our aim from time to time to keep members posted regarding

progress made in the development of all efforts to have the program, general arrangements and entertainment of the very highest quality. What we now ask of members is that they shall become so enthused that they will importune nurserymen who are at present in the cold to become members before the cold storage doors shut them up beyond the possibility of thawing. The convention of June 23-25, 1915, will go down in American Association history as a phenomenal event.

JOHN HALL, Secretary.
204 Chamber of Commerce Building, Rochester, N. Y.

PACIFIC COAST HORTICULTURAL SOCIETY.

The annual ball of the Pacific Coast Horticultural Society in San Francisco on the evening of Nov. 14, was the most successful event of the kind ever held, and great credit is due to Frank Thatcher, who had charge of the arrangements. About 350 people were present, and spent a most enjoyable evening.

Several matters of interest came up at the last regular meeting. Daniel MacRorie reported on his visit to the California Association of Nurserymen convention at San Diego, announcing its decision to convene in this city at the time of the S. A. F. convention next year. President H. Plath announced that he would shortly take up the appointment of the S. A. F. program committee to look after the preparations at this end. It was decided to organize a bowling club among the members, to compete at the S. A. F. convention for the Ebel trophy next year, Friday night being set as the time for practice. It was voted that the Pacific Coast Nurserymen's Association be invited to convene here at the time of the S. A. F. convention, and steps were taken toward organizing a local branch of the Ladies' Society of American Florists. Messrs. Gill, Pos and Hofinghoff being named as a committee to act in the matter. D. Raymond, chairman of the field day committee, reported an invitation from the MacRorie-McLaren Company for the Society to visit their plant at Beresford late in November, the date to be set later.

The bowling club has just been organized, holding its first trial game on the evening of Nov. 20 at Schroeder's alley on Turk street. The team includes Daniel MacRorie, H. Plath, M. Pos, R. McArthur, B. Meyer, Victor Podesta, D. Raymond and J. A. Axell.

CHAS. W. JOHNSON, Sec'y.

LANCASTER COUNTY FLORISTS CLUB.

Our visiting committee planned a trip for us to points not easily reached by trolley, and a party of 35 with eight autos was the result.

The first point visited was that of Elmer Weaver where we found carnations better than they have been at this place for the past three years. At Charles Weaver's the sweet peas were just getting into action and the calendulas and mignonette were in the highth of vigor and the out enormous. At Harry Weaver's, in addition to carnations, was a house of tomatoes in full crop and one of stocks coming on for later blooming. At Jacob Weaver's in addition to the usual carnations there was a batch of seedlings among which was a very promising yellow and a fine salmon pink. At Elias Lefever's we were treated to the best lot of Gloriosa and by all odds the finest house of Pink Delight we ever saw, a peculiarity of this house being the fact that the flowering stems were full of good cuttings, an unusual condition with this variety. At John Shreiner's we found the usual stock of market pot plants along with cut flowers. By market here is meant a city market and that this end of the business pays a reasonable profit is shown by the fact that Mr. Shreiner is continually adding to his place and his personal comforts, even to the lighting of his greenhouses by acetylene gas. At A. W. Denlinger's we found several new houses of up-to-date type and the stock accordingly. At Enos K. Lefever's, among the chrysanthemums was a beautiful pink that will be just about right for Thanksgiving and could even be held until Christmas. Just what the name was no one seemed to know but one party made a guess that it was "Patti". Wade Galey's was the last place visited and here we found as at all of the places touched, excellent carnations as the principal product. Every establishment has one or more modern houses and others will be added as the older ones get worn out so that eventually Lancaster County will be up-to-date in every way and greenhouse builders are keeping right with us to see that we do not fall behind, as witnessed by the fact that both Lord & Burnham Co. and the King Construction Co. were represented on this trip by Dennis T. Connor and T. J. Nolan, respectively.

At the regular meeting in the evening the Flower Show committee reported having had a successful show from every point of view and having a balance of some \$375.00 over and above all expenses. A. K. Rohrer read a paper giving a list of the most profitable chrysanthemums to grow for the various seasons, which was very instructive as the Rohrers do not hesitate to cut out any variety that does not come up to standard. A committee was appointed to arrange

for a stag social in January and an attempt made to put life into the Co-operative Buying Committee which, through lack of enthusiasm on the part of the members had about ceased operations.

By a vote of forty-three to two, smoking will be cut out in the future during the business sessions of the club. Next meeting, Dec. 17th.

ALBERT M. HERR.

GARDENERS' CONVENTION.

The Committee on Arrangements of the convention of the National Association of Gardeners reports that the annual banquet of the Association will be held in Horticultural Hall, Philadelphia, Pa., on Wednesday evening, December 9, (following the annual meeting which will occur in the afternoon in the same hall), to which ladies and all friends of the members will be welcome. Those intending to attend the banquet will please advise David Rust, Horticultural Hall, Philadelphia, Pa., the number of tickets they desire to have reserved. All reservations must be made in advance of the dinner.

The committee also invites exhibits of novelties, specimen plants and cut flowers from both private and commercial growers. The Association's certificate of merit will be awarded to meritorious exhibits of the newer varieties. Exhibits can be sent, (express prepaid) to the National Association of Gardeners, care David Rust, Horticultural Hall, Philadelphia, Pa., to arrive on Wednesday morning, December 9.

M. C. EBEL Sec'y.

CLUB AND SOCIETY NOTES.

At the chrysanthemum show held last week at Syracuse, N. Y., the florists decided to organize, and will be known as the Syracuse Florists' Club. The officers are Henry Youell, president; L. E. Mulhauser, secretary; James Sullivan, treasurer.

A free illustrated lecture under the auspices of the Newport Garden Association and Horticultural Society was given by J. Otto Thilow, of Philadelphia, on Tuesday evening, November 24, in Music Hall, Newport, R. I. Mr. Thilow's subject was the Yellowstone National Park.

At the adjourned meeting on Nov. 19, of the Chicago Florists' Club, nomination of officers was the special order of business. The list as nominated is as follows: President, W. J. Keimel; vice-president, James Morton; secretary, T. E. Waters, Michael Fink, Guy W. French; treasurer, Paul Klingsporn; trustee, C. L. Washburn. The election will take place at the regular meeting in December.

J. B. FOLEY, Sec'y.

The monthly meeting of the Nassau County Horticultural Society was held at Glen Cove, N. Y., on Nov. 11. J. W. Everitt and F. Honeyman won in the chrysanthemum competition. President Gant's prizes for table decorations were won, 1st by Robert Jones, assistant on the Percy Chubb estate; 2nd, Chas. Parr of the John T. Pratt estate; 3rd, Arthur Cook of the H. L. Pratt estate. F. Honeyman got a cultural certificate for Radiance rose. Henry Gaut, certificate of merit for seedling chrysanthemums. A. Fournier showed new

NEW DAHLIA ALBERT MANDA.

The new dahlia herewith illustrated is one of a set of seedlings raised by W. A. Manda from crosses of Imperialis and Juarezi. The plant is a

rampant grower and the flower is of enormous size, creamy white with a flush of pink. It has been exhibited at several of the fall shows this season.

French chrysanthemums. The silver cups won at the Fall Show were presented to the winners. A cup for the next fall show contributed by Mrs. W. D. Guthrie and cash prizes from John Sheepers were accepted with thanks. After the meeting there was a very enjoyable smoker. Next meeting will be election of officers, 2.30 p. m.

The forty-eighth annual meeting of the Minnesota State Horticultural Society will be held in the Auditorium, Main Building, at University Farm, St. Anthony Park, Minn., on Tuesday, Wednesday, Thursday, Friday, December 1, 2, 3, 4.

The Minnesota Garden Flower Society, the Plant Breeders' Auxiliary, the Woman's Auxiliary, the Minnesota State Florists' Society and the Gardeners' Associations of St. Paul and Minneapolis meet and will be found to have some part on the program.

On Thursday evening at 7 o'clock the annual society banquet will be held at the State Agricultural College in the main dining hall.

There will be an exhibition of flowers and vegetables. W. H. Bofford, 1221 Washington avenue No. will be superintendent of the former, and E. O. Ballard, 2700 Girard avenue No. of the latter.

A GREAT HOLIDAY SHOW.

In order to realize the great improvement which has been made in azalea varieties in recent years one must visit such establishments as the Julius Roehrs Co.'s place at Rutherford, N. J., when the azaleas are blooming. The advancement, which has been accomplished by European horticulturists under the incentive of the tremendous consumption and demand for these showy plants in this country and elsewhere, is especially evident in the evolution of early blooming sorts and

in the production of new tints from which have been eliminated the magenta tones so prevalent in the older kinds. Those glorious light pink varieties Daybreak, Blushing Bride and Roosevelt are to be seen at Roehrs' now in abundance and they surely live up to their names. There is one whole house of Mme. Petrick Superba, a greatly improved form of that much liked variety. Brilliantia Belgica and Fred Sander may be named among the most striking of the dark reds, the latter blooming naturally in early November, a richly colored and very symmetrical double flower.

Ten houses of the best ardisias we have ever seen give evidence that florists who make a specialty of this prime Christmas favorite will be able to set before their customers acceptable plants loaded with richly colored fruit. In cyclamens, too, the stock is superb—6,000 plants in profuse bloom and representing the finest improved type of German seed and including that charming variety Glory of Wandsbek. There is a whole range of houses filled exclusively with Begonias Lorraine and Cincinnati which at the present time present a picture which once seen will never be forgotten. Camellias full fill two houses and their charm is irresistible. Certainly, any florist who can find opportunity to go and visit this notable establishment now in its holiday exuberance will enjoy a glorious treat.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

Faulty Conclusions.

The Country Gentlemen of Oct. 31st contained an article on the European seed situation which shows that the writer went to considerable pains to fortify his position with statistics, but like most persons who undertake to treat a matter they are not familiar with, this writer's conclusions are in many instances misleading.

We have pointed out in HORTICULTURE that the seed situation another year is liable to be embarrassing to dealers in this country, especially on biennials, but we have not looked for any very serious difficulty in meeting all ordinary demands the coming season. If one were to take the conclusions of the writer of the article in The Country Gentleman as facts, it would certainly be cause for one of anxiety on the part of the American seed trade, but ways and means sometimes quite unexpected have been found to meet nearly all situations confronting the trade from time to time, and we believe they will get by the present crisis without any great demoralization. We expect to see prices very materially higher but not so high as to constitute a very serious hardship, and should the European war continue for two or three years this country would be in position to supply all standard and necessary varieties of seeds, especially in the vegetable line. There are a few varieties of flower seeds that require so much patience, care and experience to produce successfully that we have doubts whether any of our growers would be quite equal to meet the demand. None of these matters are necessities, and can readily be dispensed with. Only those seedsmen who make a specialty of dealing in this class of goods would feel the loss seriously.

Canners' Convention Matters.

We are advised that at a recent meeting of the Board of Directors of the Canning Machinery and Supplies Association, it was decided by resolution of the Board to prohibit the giving away of souvenirs at Machinery Hall during the period of the annual Canners' Convention. This prohibition applies to only one year and will be open to discussion before the Convention of 1916 is held. Very few of the seed trade will be affected by this decision and we imagine it will meet with the general approval. A test vote was taken of the members, and those who favored the giving of souvenirs proved a very small percentage of the total membership and it is believed that after one year's trial that this small number will be converts to the present decision. There were many protests against the adoption of the uniform booth but we are told that after one year's trial not one of the exhibitors would care to go back to the old style. It is impossible to adopt any new or radical change that will be unanimously approved, but if the proposed change is practical and beneficial as a whole, it will generally commend itself even to the original objectors.

The Bean Situation.

About the only important crop concerning which there is any doubt is beans. We have once or twice called attention to the wide differences in the percentages which the various growers estimated they would be able to deliver, and as the situation develops it turns out much as we expected, that those who estimated high percentages have been compelled to lower their figures, not once but several times, many dropping fully 50 per cent. from the original estimates. Undoubtedly this will satisfy even the doubters that beans are really very scarce, particularly wax varieties, the stringless green-pods and the Black Valentine. This latter variety we are informed has been quoted recently as high as \$7.00 per bushel and it is thought that this is not yet the top of the market. Several of the wax varieties have been quoted at even higher figures and are not procurable excepting in very limited quantities.

San Francisco's Prospects.

We have been endeavoring to learn the sentiment of the trade with refer-

ence to holding the next Convention of the American Seed Association in California. While the information we have is not conclusive, it shows that the west is pronouncedly in favor of California, while the east is about equally divided. The executive committee which has power to decide the matter does not meet until sometime in January and it is not known how the members feel individually about going to California, though it is believed the majority of the committee favor it. Some fears have been expressed of extortions being practiced by hotels in San Francisco (as the convention would undoubtedly be held there) but we believe these fears are not well founded. President Morse will, no doubt, make all necessary arrangements to locate the members at some first-class hotel where the rates will be about normal and most certainly he would not tolerate anything approaching extortion; therefore we believe the members may divest themselves of all fears in this respect.

California Seed Notes.

California seed dealers report a strong demand from the east for string bean seed. The crop here has been light, and as they have little to offer, high prices prevail. Red onion seed is also scarce and high. Most of the bulb houses are getting well cleaned up on Dutch bulbs, and say the business in this line has been very satisfactory. Stock is now coming in of some Japanese iris, Japanese lilies, etc. These are meeting with a good demand, and it is expected that practically everything will be cleaned up within another month. Planting has been quite heavy, for private gardens and public parks, as well as by the market nurseries. Some of the nursery firms across the Bay have made arrangements with many owners of

vacant lots in Berkeley to plant such areas with bulbs, paying a rental about sufficient to cover the taxes in return for the privilege of taking the cut flowers, for which they have a market. It is said that some Oakland people are also getting interested in this proposition, though conditions in Berkeley make it especially attractive for such work. Many of these lots are now being planted.

Cold-Storage Lily of the Valley

Owing to war conditions, good stock is scarce. Secure your requirements for holiday forcing at once. Finest selected pips, packed in cases of 250, 500 and 1000 each.

AZALEAS

RUTHERFORD, NEW JERSEY

EXHIBIT OF J. BOLGIANO & SON

At Maryland Horticultural Society Exhibition in Baltimore, November 16 to 21.

SEED TRADE NOTES.

For the week ending November 14, imports into the port of New York were: Fertilizers, \$5,354; clover seed, \$1,193; grass seed, \$2,253; palm seed, \$2,751; sugar beet, \$24,000; trees and plants, \$32,126.

Charles J. Bolgiano, the proprietor of the seed establishment of J. Bolgiano & Son, has been critically ill at the Union Protestant Infirmary, Baltimore, Md., since Nov. 8th, at which time he was operated on for appendicitis by Prof. R. H. Follis of the Johns Hopkins University, assisted by Dr. Austin F. Robinson. While Mr. Bolgiano's condition was for a time extremely critical, there being grave danger of peritonitis setting in, he has during the past few days shown a marked improvement and his speedy recovery is now looked for.

CATALOGUES RECEIVED.

Henry A. Dreer, Philadelphia, Pa.—Dreer's Bird Book. An illustrated list of bird houses, feeders, etc., to which has been added some interesting notes on the more useful of our common wild birds.

John Lewis Childs, Flowerfield, N. Y.—Trade Price List of Choice Gladioli and other Summer-Flowering Bulbs and Plants. No less than thirty-three of the finer varieties of gladioli are illustrated in this very complete descriptive list of this favorite summer garden flower. Prices by dozen, hundred or thousand are quoted.

Sunnyside Gladiolus Garden, L. Merton Gage, proprietor, Natick, Mass. Gladiolus Price List for 1915. This is the first catalogue sent out by Mr. Gage since his establishment in Natick. Naturally he devotes particular attention to the greatly improved varieties of recent years, in the introduction of which he has taken an active part. Any gladiolus literature that the sunny secretary of the American Gladiolus Society puts forth will always find eager readers.

PUBLICATIONS RECEIVED.

The annual report of the Special Park Commission of the City of Chicago for 1913 has recently come to hand, and it will be found a veritable gold mine of statistics and information for all those who are interested in the great work of providing recreation, rest and healthy surroundings for the people, old and young, of a great community. The report is a 70-page pamphlet richly embellished with fine engravings. A complete directory of all parks, playgrounds, bathing beaches, squares and comfort stations in Chicago is included in the contents.

The fifty-fourth annual report of the Board of Park Commissioners of the City of Hartford, Conn., in keeping with the reports of preceding years, is a splendid publication typographically and in its contents. It is replete with useful information, not the least of which is a list giving the botanical and common name of all the trees and shrubs growing in the various parks of Hartford. A portrait of the late William Moore, park commissioner from 1906 until his death, January 31, 1914, forms an appropriate frontispiece for the book. The sixth annual report of the public cemeteries of the city is included.

The tenth annual report of the Canadian Seed Growers' Association, covering the year ending March 31, 1914, has been issued. It comprises 122 pages, Part 1 being the minutes of the annual meeting at Ottawa, March 5, 1914, and Part 2 the addresses and communications. The latter are very valuable scientifically and practically and give some idea of the attention and study being given to the improvement of agricultural seeds and the development of high grade strains in Canada.

NEWS NOTES.

Kansas City, Mo.—Willard Bush, Sr., has sold his greenhouse property, 2215 Jackson avenue, to John R. Hanley.

Philadelphia, Pa.—L. P. Vollers has purchased the business of Robert Kift, 1725 Chestnut street, and will do business under the name of Vollers' House of Flowers.

Of Interest to Retail Florists

In trying to become artistic and in attempting to show the public his skill in the use and arrangement of flowers, the ordinary florist often forgets to become a flower merchant. Not all florists consider the customary business methods as necessary to their work. But any man who thinks he can be successful in the conduct of any retail business without a great deal of hard work and without going after business, instead of waiting for it to come to him, without adopting modern methods, such as advertising, and, in a sense, scientific salesmanship, takes unwise chances. The easy, indifferent way in which so many successfully conducted the retail florist business in the past will hardly succeed today.

Retail florists spring up everywhere under present conditions. New enterprises come and before we realize it they are gone, sometimes with a large part of their debts unpaid. It is an easy trade for the inexperienced, capital-less man to enter. Growers and wholesalers stretch out their wares to him and plead with him, "Buy our goods; we don't care when you pay." Until the existing evil of long, and in a majority of cases, foolhardy credits is abandoned, losses from bankruptcies and failures will continue to pile up.

Put your business on a better business basis and you will make a more efficient business of your business. Get the "efficiency bug." Few florists can state definitely the outgo necessary to produce their income. We like to use the term "merchant" in preference to storekeeper, as "merchant" carries with it the idea of the business builder. The business builder is a general; he plans at least a year ahead, if not for a lifetime. He endeavors to build his business on the concrete foundations of confidence, cemented with the cement of satisfaction. He realizes that every customer or patron is but a link in a chain to innumerable other patrons. The florist who condemns the public for its reluctance to trade with him, should first consider whether there is not some justification for their attitude. If he does not get ahead as rapidly as he expected, it may be that he expected too much or that he tried too little. The man who thinks that he can continually accept favors and reap advantages at the hands of others without giving anything in return does not know what a sponge is. If it is an effort to be pleasant to customers, just remember that one is being paid good money just for making that effort. Don't make excuses for the things you are not doing—make good.

ACCIDENT TO THOMAS F. GALVIN.

Boston Park Commissioner Thomas F. Galvin is resting comfortably at his home, where he is recovering from the effects of a severe fall received last Saturday at Coolidge Corner, Brookline. Mr. Galvin while running for an electric car slipped and fell on the icy pavement. He received a bad scalp wound and was rendered unconscious. He also suffered from shock.

NEWS ITEMS FROM EVERYWHERE

BOSTON.

Harry Sedar, who has been with Wax Bros. for the last five years, is now connected with Harry Quint.

Harry Levis and T. J. Gough of Watertown are progressing with their new dovetail sectional bench, for which patents are pending. They are negotiating with several construction firms for the sale of their rights.

The wholesale houses have been quite busy this week, especially the shipping departments. There seems to be no limit to the distance some of them are sending stock. Local trade has also taken a sudden turn for the better and the Thanksgiving business is expected to be about normal.

N. F. McCarthy & Co., report plant trade as being very good, the auction rooms providing an acceptable outlet for stock this season. It is hoped that a repetition of last year's craze for artificial materials will not occur. All the wholesale houses are receiving large advance orders for supplies.

There are indications of a full supply of roses this Christmas. Most of the local growers are pinching back their stock to a greater degree than last year in order to come in for the holidays. One big grower states that Beauties will be the only roses that may shorten up.

Galvin's Tremont street store windows are very attractive just now. We noted an artistic and tasteful display of cattleyas and cypripediums in baskets in one window, placed on a ground of light gray velvet. In the other window was an effective arrangement of orange trees and cybotiums.

The annual influx of pot plants is making itself felt to a marked degree. Cyclamens are finding a ready outlet. Azaleas and begonias are also coming into their own. Among those who have made extensive preparations to meet the demand for these two popular plants are A. Leuthy, W. W. Edgar Co., A. M. Davenport, Thomas Roland, The Mishawum Flower Co. and others. In a recent visit to the latter firm the writer noted a splendid lot of azaleas just arrived safely from abroad. Few local growers seem to have suffered losses or extreme delays in foreign shipments on account of the war.

CHICAGO.

The sweet peas which were so badly affected by the warm fall weather are now blooming again.

Ernest Oechslein is so far recovered from his recent severe automobile accident as to be able to visit his greenhouses.

A. L. Vaughan says that if he could contract for the growing of ten thousand Bonaffon chrysanthemums for Thanksgiving week, he would feel satisfied to see that day come. That is the variety which he depends upon for that time.

R. G. Kootz, manager for Marshall-Field's late venture into the cut flower business, has now opened a retail store at 121 N. Dearborn street. The new firm bears the name of Kootz & Natorp.

Poehlmann Bros. are now cutting gardenias and the stems measure as long as 12 and 14 inches. These houses of gardenias are among the latest of their ventures and they are pleased with the results.

The general air of an approaching holiday prevails in the downtown flower stores. The redecoration of the windows with blooming plants has given new life to the stores and even the appearance of business is a long step towards getting it.

Thanksgiving week finds the chrysanthemum plant season practically closed. Prices have averaged a little lower than usual this year, but the demand has been fair. The plantsmen as well as the cut-flower growers are, as ever, pleased to see the chrysanthemums come and equally pleased to see them go. In other plants cyclamen and begonias are in good supply. With the prospect of a shortage in azaleas early in the season, larger numbers of cyclamen were started and possibly had extra attention for the stock is unusually fine. Poinsettias are coloring nicely and have reached a good size. Heather has appeared and will soon be in good supply. Boston ferns have been unusually abundant all the fall and are offered at a low price to make room.

Two well-known growers of many years experience are preparing to launch into business for themselves in the spring. Guy French, president of the Chicago Florists' Club, who has had charge of the carnation houses at Poehlmann Bros.' big plant at Morton Grove for many years and Richard Salm who has a like position in the American Beauty houses, will take the new 70,000 feet range at Union Grove, Wis. This was built by Lord & Burnham Co. and was originally intended for the Meredith Flower & Vegetable Co., to supplement their place at Libertyville, but financial entanglements forced the new range on the market. It would be difficult to find two men who would start out better equipped with experience and their friends wish and expect for them, marked success.

SAN FRANCISCO.

The first consignment of plants and bulbs, consisting of 114 crates, for the three-acre Japanese garden at the Exposition, was received at the Exposition nursery Nov. 18.

Dan Lichtenstein, formerly with A. Figone's flower stand in the ferry building, is proprietor of the new Terminal Florist Shop, in a new building on the Embarcadero near the foot of Market street. The shop is a small one, but Mr. Lichtenstein expects to do a lively business with incoming tourists during the Exposition year.

B. M. Joseph's new shop on Grant avenue opened Nov. 16 as announced, and proved a great attraction, as the arrangement is decidedly out of the ordinary. The shop has a very large corner window, which was decorated for the opening with a profusion of stock in great variety. In the decoration, Mr. Joseph secured some bizarre

Oriental effects, and one novel feature was the use of fruits in connection with flowers for decorative effect. The second floor, devoted to pot plants, is most effectively arranged, the floor being deeply sanded and laid off into walks and garden plots in which the plants are displayed. The front is used for ferns, being set off from the rear by the elevator. This is treated in summer-house effect, with a structure of similar appearance on the other side, which is really a small aviary, containing a number of bright-colored birds.

WASHINGTON.

The sympathy of the trade is with Mrs. J. A. Phillips, of The Flower Store, 2820 Fourteenth street, Northwest, who recently met with the loss of her mother.

In order to prevent the introduction into this country of what is known as citrus canker, the Department of Agriculture will hold a hearing in this city, beginning at 10 o'clock, Tuesday, December 8, on the question of prohibiting the importation of citrus nursery stock, buds, scions or seeds.

Maggie Pooley, a member of a gypsy band encamped on the heights of Georgetown has been held under bonds of \$1,000 for the action of the grand jury on the charge of robbery, on the complaint of George A. Comley, a florist. The woman, it is said, entered Comley's store and insisted upon being allowed to tell his fortune. At last he consented and paid the woman fifty cents for so doing. Shortly afterward he found that he had been robbed of two one hundred dollar bills and complained to the police. The woman was quickly apprehended and after a long search the money was found cleverly concealed in a loaf of bread.

Beers, representing Cordley & Hayes, New York, N. Y.

WHERE ARE THE FLOWER BUYERS?

All summer the Chicago florists have arranged tempting window displays and tried to content themselves with thinking of the time when outdoor flowers would be gone and they could make up the deficit of the summer business. After the killing frost of Oct. 26 the writer watched for the flower buyers and they came. Not a retail florist in Chicago reports a marked increase in sales to date, unless for a special wedding decoration or large funeral such as might occur any week in the year. Chrysanthemums are moving unusually slow and now, at the height of the season, counters and ice boxes are filled. What are the people buying? That which has reached as near a state of perfection as the natural article and lasts all winter and costs less. Why should people be expected to buy chrysanthemums at \$5.00 per dozen when the artificial ones must be touched to detect the difference and can be bought for \$1.50? Sprays of berries that rival Nature's work are selling for \$1.00 each and prepared foliage at 50 cents per spray to the people who crowd the department stores. Florists introduced the make-up baskets of prepared materials and now in the big stores they are offered by the hundreds, and cut flowers are passed by. "Air plants," worked off by the florists on a credulous public, a few years ago, have been followed by such a collection of ferns that natural ones are almost eliminated from the homes. Baskets of large plants are now following their lead. Through the wholesale houses which are pushing sales all along this line, the smaller towns are stocking up each year more heavily, and it takes no prophet to see the effect upon the cut flower and plant business. That money which once went to buy flowers now finds its way to the "movies" and automobiles is true, as florists point out, but it is also true that the money now being spent for flowers, etc., is largely going over the counters for the artificial and prepared stock and this can be verified by any one who will take the time to watch the people buy.

M. B. HANCOCK.

OBITUARY.

J. L. Fillow.

J. L. Fillow, senior member of the Fillow Flower Company, died at his home in Bridgeport, Conn., on Monday, November 16. Pneumonia was the cause of death. He is survived by his widow, two sons and one daughter.

Andrew Glorius.

Andrew Glorius, who was one of the pioneer florists of Washington, D. C., and who was for many years associated with his brother, the late George Glorius, as a grower and retailer, passed away at his home in Silver Spring, Md., at the age of ninety-six years. Mr. Glorius was a native of Germany. He came to this country in the late fifties. Some years ago he retired from the flower business and since that time he has been engaged in farming. Funeral services were held at the home of his nephew, Henry Nolte, in Silver Spring.

THE JOHN C. MEYER THREAD CO., LOWELL, MASS.
In writing advertisers kindly mention HORTICULTURE.

BE SURE that you get the MEYER GREEN SILKALKINE, and do not take any other that is sold as an imitation of the MEYER GREEN SILKALKINE, as they do not have the full weight, measure and strength of the genuine article. All our GREEN SILKALKINE is guaranteed up to the high standard and mark. The sizes are F, fine; FF, medium; FFF, coarse. It is for sale by all the best jobbers. If you cannot get it of your jobbers, order direct of the manufacturer.

BRITISH HORTICULTURE.

Items of Interest.

Sir David Prain, Director of the Royal Botanic Gardens, Kew, has sustained a sad bereavement by the death of his son, Lieut. Prain, in the fighting line in France.

Although no big shows are being held by the National Chrysanthemum Society, some excellent displays of this popular flower are being made in the London County Council Parks. By the Council's enlightened policy these exhibitions in the conservatories are opened on Sundays. I attended a display at Battersea Park on Sunday last (Nov. 8th) and was one of a big crowd of interested citizens.

National Dahlia Society.

As previously announced, the National Dahlia Society was deprived of its autumn show at the Crystal Palace by the exigencies of the war. The society is not content, however, to suspend all its operations until the welcome times of peace. Evidence of its activities is afforded by the issue recently of a supplement dealing with the extensive trials concluded during 1913. These were held at Duffryn, near Cardiff, and were conducted by Mr. Cory. They were the largest which have been conducted in a private garden, and were for the purpose of testing the decorative or garden value of the flower. There were between 7,000 and 8,000 plants, representing nearly 1,000 distinct varieties. The full details which are given furnish useful data for the guidance of all dahlia lovers.

War and Horticulture.

The direful results of the war have a far reaching effect. On every hand the fullest sympathy is felt for the terrible experiences which many of the Belgian nurserymen and their employees are experiencing. Every effort is being made to hospitably receive the thousands of refugees flocking to these shores. Another effect of the war is the closing of the German sources of potash supply, from which the British farmers and growers largely used to draw. Various expedients have been suggested as a substitute for this fertilizer, including the use of sea weed. Immense quantities of sea weed have for years been used by the growers in the Channel Islands. Apparently there has been no interference in the shipment of the Dutch bulbs, as the usual auction sales are being held. In certain quarters complaints are being made that some of the smaller exporters of Dutch bulbs are not too careful in their selections,

with the result that daffodil disease is introduced into this country. A Guernsey correspondent writes to a trade paper: "Some of the large and honorable Dutch firms undoubtedly burnt plenty of bulbs, diseased ones, and other unsaleable ones. But the smaller ordinary Dutch bulb firms have carried on a scandalous game for long, and it is high time that this onesided business should be stopped." It is a great shame that there should be this unfair trading on the part of a certain section, for it brings discredit on the whole trade, and gives a bad name to bulbs from Holland amongst British growers.

W. H. ADSETT.

DECORATIVE PLANTING AT THE PANAMA-PACIFIC.

Into the 65 acres of living gardens surrounding the Palace of Horticulture there have been set the enormous number of 704,000 golden-flowered plants under the direction of Donald McLaren, the California gardener. These flowers will occupy sunken gardens in the main entrance facing the Tower of Jewels and in the Minor Courts of Palms and Flowers. Work has begun on the final transplanting of 27,000 yellow wall-flowers, and an equal number of Spanish golden iris in the Court of Palms, which looks out upon the Palace of Horticulture. The Tower Plaza has already been planted with 200,000 yellow pansies, 100,000 yellow daffodils and 100,000 golden poppies. In the Court of Flowers, which opens toward Festival Hall, 250,000 golden poppies, 100,000 daffodils and 50,000 golden tulips will be set this week.

So that the 65 acres of flowers and plants will be kept constantly in bloom during the ten months of the Exposition, it is planned to replace this first setting with other flowers when the first cycle has lived its life. Mr. McLaren believes that three plantings will be required to keep the vast gardens ever in bloom. An unusual decision was made by Mr. McLaren this week to plant no palms in the Court of Palms, the space being given over to acacias, towering Italian cypresses and low-growing eugenias. The balustrade surrounding the pool will be overhung by low-trailing muehlenbeckia, or maiden-hair vines.

The Exposition's horticultural gardens became international in scope this week when entries of roses from Belgium and Holland were planted in the rose gardens. These are government exhibits of these two countries and are entered in the competitions, one of which has as a prize \$1,000 for a new, un-named rose.

Flower Market Reports

BOSTON As we go to press activity in the market is almost what it should be at this time of the year. Retailers have been holding back until today, Wednesday, and are now buying in large quantities. The supply just about meets the demand and there is consequently no marked raise in prices. Carnations and roses are the only crops that have shortened up to any considerable extent, good roses and carnations securing satisfactory figures. Chrysanthemums are still plentiful, yellows and whites selling in large quantities, although quotations are only normal. It is only the exceptional lot here and there that is receiving more than \$3.00 per dozen. Violets continue to be scarce, as well as sweet peas. Orchids and gardenias have advanced slightly.

CHICAGO The middle of the week before Thanksgiving brought a shortening up of the chrysanthemums. This was partly accounted for in the probable holding back of stock that there might be no shortage for Thanksgiving week. Shipping began to distant points on Monday and the supply of the largest chrysanthemums was used up to good advantage. The week of cold weather had made the flowers firm and the large shipping houses were rejoicing in the fact that orders could be filled with good stock. It is expected that each day will bring in a sufficient amount of the big favorites to care for all orders but there is a possibility of running short. Local trade at this writing is slow. Home grown gardenias are coming now and some fine pink and white bouvardias are also offered. Sweet peas are now seen again, with rather short stems but they are of the butterfly varieties and sell well. The rose supply is very good and all kinds are now in the market. The carnation will soon come into its own again with the passing of the chrysanthemums and some splendid stock is offered this week. Some especially fine Mrs. Ward were noticed at Poehlmann Bros.

NEW YORK Tardy but all the more welcome comes the improvement in the flower trade conditions. Seasonable weather has helped, Thanksgiving Day has helped and the gradual retirement of the chrysanthemum has helped. Anyway, it is high time that everybody "got a move on" and most of the talent—retail, wholesale and speculative, as well as the patient and unobtrusive grower—has started to do what he regarded as the proper thing to do on this auspicious occasion. Not everybody was looking for this revival; it is almost the happening of the unexpected, for the interim of hoping against hope has been long drawn out. But it's here—for long or for short duration—so let everybody make the best of it while it lasts, pray that it may never end and then—lay in a good substantial Thanksgiving Day dinner, with gratitude that things are not half as bad as they might be.

PHILADELPHIA End of last week here witnessed quite a revival in the tone of the market. Roses all along the line advanced—not only one or two varieties but the twenty or

more which now dominate. Every one of these varieties felt the effect, but it was especially noticeable in four or five of the newer sort. It would appear that in these latter the growers are using the stock for wood instead of for flowers. Carnations also went up—probably twenty-five per cent. on an average—and it certainly was about time, for these have been far too low all through this season. Even now they are twenty-five per cent. behind last year. Most other staples felt the stimulating effect of the improved market—not so much in the increase of quotations as in the better clean-up at quoted rates. The flush of the chrysanthemum crop will be over by the end of this week. After that there will be Nonin and the other late ones—and they usually bring better prices. Bouvardia, mignonette, lilies, lily of the valley and paper whites remain normal. For Thanksgiving the price

asked for on violets in advance was about equal to last year but whether it will pan out that way is doubtful. Sweet peas are improving; some fairly good Spencers are now to be had. The improved demand mentioned for stocks in general is gratifying of course, but the better prices may be due also to some extent to the dark, rainy and cold weather we have had recently—which has undoubtedly reduced production.

SAN FRANCISCO The local cut flower market has stiffened up materially within the last few days. A rather abrupt increase in the general demand has coincided with a falling off of supplies in several popular lines, with the result that the daily offerings are cleaning up well at better prices than have recently prevailed. Supplies of chrysanthemums are much lighter,

Flower Market Reports

(Continued from page 769)

as the crop is about cleaned up in several sections. The Japanese varieties are playing out, and while the Chinese are showing up well the supply is very moderate. Violets are scarce. The acreage is larger than last year, but the crop per acre is far short of normal, and nothing extra in quality. A week of rain, however, would bring them out in good shape. Carnations are kept well cleaned up, with a much better demand from the country, and prices have advanced sharply. The supply of roses is still limited, and offerings are quickly absorbed, the quality being very good. There is practically nothing offered in the way of lilies, except lily of the valley, and they are increasingly scarce. Some paper white narcissi have been appearing for the last few weeks, and a few freesias have been seen, with indications of an unusually early crop. Supplies of California holly are larger than usual at this season, and of very good quality. It is finding some demand in the regular trade, besides being used extensively by retail merchants for window decoration. The entrance of a new retail shop on a large scale has caused some stir in the local market, and in addition to a stronger general demand from outside towns, some good sized Thanksgiving orders, especially for violets, have come from the east.

ST. LOUIS Thanksgiving week appeared with the first scarcity of the season and just when the demand was growing better and from a retailers standpoint it looks as if the shippers to this market are holding back for the big day. This caused a scramble for stock and prices are up a few cents on all stock. Chrysanthemums are still in abundance, but are nearing their end. Bonnaillon is still the leading variety, with Chadwick, Mrs. Jones and Eaton following. Carnations and roses are up too. The wholesalers say there will be plenty of stock at reasonable prices and the retailers expect good business for this week.

WASHINGTON Cooler weather and curtailed production has caused prices to stiffen to a small extent. Business continues poor and while the growers are not so apt to accept what is termed the "buyer's own price," they will take anything that looks like fair money for their stocks. The main increase has been on chrysanthemums which are always in exceptionally good demand for Thanksgiving Day. Orchids are by no means plentiful yet they are in greater supply than necessary. Sweet peas are more plentiful and are good. In the lavender shades these have been very popular and at times have sold out to good advantage. Violets continue scarce and the few that are received move well. Paper white narcissi are increasing both in quantity and quality but some of the growers having found that its production costs more than its sale brings have discontinued it. Carnations are coming in good and some varieties of roses are of exceptional quality. Gardenias are more plentiful and are cheap.

"Little Benny" ON FLOWERS.

The prinsepil way to tell wen summir is heer is by the flowirs. Wen it stops beeing cold and the furnace goz out, peepil begin to think wintir is ovir, and wen the berds fly back from the south and try to remembir ware they bilt thare nests, peepil begin to think the seezons must be changing, but wen they look erround and see awl the different flowirs growing, they say, G, summir is heer.

Only this is a funny time to rite about flowirs, bekause if you want to pick eny flowirs now you haff to go in a florist stoar, and pick them, or elts climb up and open sumboddys parlor window and pick sum awf of the flowir pots standing thare to be showed awf. The 2nd way beeing the leest expensive.

Akkording to poetry, sum flowirs is born to blush unseen, sutch as the violet by a mossy stone wasting its fragments awn the desert air.

Uthir flowirs are born to blush seen, awn akkount of costing so mutch, sutch as the krisanthemum awn a gerls chest.

Sum flowirs are usefill awn akkount of there bewty, sutch as the rose and the lilly in a pot, wile uthirs are usefill awn akkount of there usefillniss, sutch as the buttircup, wich you can tell by holding it undir a persins chin weathir a persin likes buttir or not.

Most fellos dont think mutch of flowirs, but awl gerls love them, wich iplanes wy most fellos haff to buy them weather they like them or not.

Wild flowirs is considered the most bewtifill, the reezin they are not so pupuler beeing bekause they dont cost enything.—Little Benny's Note Book, in Boston Traveler.

William Plumb, formerly representing the horticultural department of the Panama-Pacific Exposition is now employed in a large development enterprise in Cuba. His address is Ingenio "Santa Gertrudis" Banaguises, Cuba.

MITES ON MUSHROOMS

I have a mushroom bed, already bearing mushrooms, and I find they are covered with something like a mite. I would like to know what to do for them.

J. M. S.

Growers of mushrooms are often troubled by flies or "mites" attacking the fungi and unless prompt measures are taken to rid the beds of them serious trouble sometimes results. The best method of getting rid of these pests is by fumigation and hydrocyanic acid gas is the surest remedy, but this gas has to be used with great care and unless the building can be made air-tight it is not advisable to employ it. Two fumigations of a good tobacco preparation, such as Nicofume, with an interval of two or three days between each, will put an end to the flies and do no harm to the crop.

GINKGO FROM SEED.

Dear Sir:—

I have one tree of Salisburia, or maiden-hair tree, that has fruited this year for the first time, and I have saved some of the seeds. Will you kindly advise me as to how I will grow those seeds—whether I will plant them in the greenhouse or outside in the border?

P. B. F. F.

Wash the seeds and plant them in a box and place in the cool end of a greenhouse or other place where severe frost will not reach them. About the end of January or the first of February bring them into a warm place and they will germinate the first year if they are properly fertilized which is not always the case with seed from young trees.

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Two volumes have now been issued and the others will follow in succession. Order from

and Discounts**A. H. HEWS & CO., Inc., Cambridge, Mass.**Warehouses:
CAMBRIDGE, MASS.,
LONG ISLAND CITY, N. Y.**FRUIT-BEARING SHRUBS TO AT-
TRACT DESIRABLE BIRDS.**

In a new Farmers' Bulletin, entitled "How to Attract Birds in Northeastern United States," by one of the biologists of the United States Department of Agriculture, especial attention is given to the value of certain fruit-bearing shrubs and trees as a means of attracting desirable birds about the home. The choice of this vegetation to give protection to the farmer's bird neighbors varies considerably with locality, and the new Farmers' Bulletin (No. 621) deals particularly with such as would thrive along and near the rocky coasts of New England.

Juniper is one of the shrubs most highly recommended for the New England bird lover to use to attract his feathered friends. Other suggestions are as follows: Common barberry; English thorn; Hybrid crabapple; European and American mountain ashes; Smooth and staghorn sumacs; Privets; Buckthorn; Red-berried elder.

Where the soil is chiefly sand, and that often shifting conditions are not suited to many plants. Selections may be made, however, from the following, all of which are known to thrive in such surroundings:

For Seed Eaters—Beach grass, and sunflower. For Fruit Eaters—Bayberry; Sea buckthorn; Sand cherry; Beach plum; Cranberries; Bearberry. The Department's Bureau of Biological Survey will be glad to receive further information regarding similar plants which actual trial has shown to be valuable as bird food.

The new publication contains many suggestions on methods of protection for the purpose of increasing the number of birds in any area. A cat-proof fence is suggested as one means. Other suggestions are made regarding breeding places, water supply, and food, and reference is made to Farmers' Bulletin No. 609, entitled, "Bird Houses and How to Build Them," which makes numerous similar suggestions.

**Wild Shrubs Protect Cultivated
Varieties.**

The bulletin contains a table of wild fruiting trees and shrubs suitable to growth in New England, giving their scientific names and their fruiting seasons. If these wild varieties are grown each will fruit just in time to protect certain cultivated varieties that are grown, nearby. For instance, if wild strawberries are grown, they will ripen at the same time as do cultivated strawberries in the same garden. The birds will eat the former in preference to the latter, and meanwhile they will be helping the whole garden by ridding it of many insect pests. Other wild shrubs may be planted in the neighborhood of apple, pear, and cherry trees to serve as a protection to these during their fruiting season.

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Ea.	Doz.	100
10	20 in.	\$1.45	\$18.00	\$130.00
20	18 in.	1.30	14.00	115.00
30	16 in.	1.00	11.25	92.00
40	14 in.	.65	7.00	56.00
50	12 in.	.45	5.00	40.00
60	10 in.	.38	4.00	32.00
70	8 in.	.30	3.50	28.00

Manufactured for us exclusively. The best tub ever introduced. The neatest, lightest and cheapest. Painted green, with electric welded hoops. The four largest sizes have drop handles.

HENRY A. DREER, Seeds, Plants, Bulbs, and Supplies, 714 Chestnut Street, Philadelphia, Pa.

The bulletin may be had by any bird lover on application. Many of the suggestions which it contains are of general interest throughout the country, although the suggestions regarding the wild shrubs are more especially applicable to New England.

THE SHAW BANQUET.

The annual Shaw banquet takes place Friday night, Nov. 27, at the University Club, St. Louis. This banquet is for florists, gardeners and nurserymen. This day is also set aside for a reunion of former Garden pupils who will be the guests of the directors. An automobile ride, lunch and meeting at the Garden and the banquet at night are on the program.

FIRES.

Central Falls, R. I.—A fire in the Littlefield Building on Wednesday morning, Nov. 18, damaged the flower

shop of E. J. Tucker to a considerable extent.

West New Brighton, N. Y.—Fire destroyed the greenhouse of Thomas Decker, on Lambert's lane, near Bulls Head, Saturday morning, Nov. 7. The loss amounted to \$2,000.

Beverly, Mass.—An investigation is being conducted today as to the cause of the fire at Cedar Acres, the gladiolus farm of B. Hammond Tracy at Wenham, where, on Monday, Nov. 23, the big barn, bulb house and show house were destroyed, and the bulb product of 20 acres, two horses, a mule and a cow lost their lives, and the mansion house narrowly escaped destruction. Cedar Acres was one of the show places of the North Shore. Just how the fire started is a mystery. It was discovered by a watchman on the Burnham estate. Mr. Tracy estimates his loss at not less than \$10,000.

Cent a Word Undisplayed**

Unequalled for Greenhouse and
Landscape Fertilizing

THE PULVERIZED MANURE CO.

31 Union Stock Yards, Chicago

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

IF YOU ONLY KNEW what a good leave the **METROPOLITAN PATENT-ED** is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the glue is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

An Opportunity: The Kind That Don't Knock Often

IN another month, the freezing weather will drive in our outside erecting men. We don't want to see any of them laid off, if we can possibly help it.

The only way we can prevent it is to get some extra work for the factory so these men can be used getting out greenhouse materials, during the Winter months, for erection as soon as it's warm enough next year.

When the Spring rush is on everybody wants to have their house as soon as possible, which means we have to rush it. Why not order it now and get the benefit of a *non-rush* job, when our best men are on the job and can take care of it right?

Furthermore, we have decided to give a special price on all Winter work.

It's an opportunity well worth considering. Tell your employer about it.

With business conditions looking so very much better, he no doubt is feeling entirely different about spending money.

It would do no harm to at least mention to him the special Winter price.

The special price will hold good on orders placed before January first.

Our catalog shows two other views of this beautiful circular Palm House, with its connecting houses and wings. Send for it.

MATCHLESS

A GREAT SUCCESS

This remarkable new white carnation has made good every prediction that we made when we disseminated it last year.

Reports that come to us from all over the country are all to the effect that **MATCHLESS**, because of its vigorous constitution, freedom of growth, earliness and wonderful production, is the greatest advance obtained in carnations in many years.

Many of the growers commenced cutting high-class flowers as early as Aug. 20th. One large grower up to November 1st had cut five flowers per plant and reports that his benches are now carrying a large crop of the highest quality of bloom.

Our own experience with **MATCHLESS** during the four years we have been growing it for the New York market, has proved to us that **MATCHLESS** is as productive as any existing variety and can be grown to perfection by the ordinary grower. These characteristics, together with the high quality of flower and the fact that **MATCHLESS** is non-bursting, making it possible to market 100% of the blooms, make **MATCHLESS** one of the most profitable varieties to grow.

Consensus of opinion is that **MATCHLESS** has taken its place as the leading white carnation in all respects.

Recognizing that there will be an enormous demand for **MATCHLESS** this year, we have devoted two houses entirely to stock plants and will be in position to fill every order that comes to us with cuttings of the highest quality.

Rooted Cuttings for December and January delivery.

\$ 6.00 per 100	\$ 50.00 per 1000
112.50 per 2500	200.00 per 5000

Prices on larger quantities will be quoted on application.

Mrs. C. W. WARD

The Standard Dark Pink

Since we disseminated **MRS. C. W. WARD** in 1909, every year has added to its popularity and today it stands easily at the top of the list in its color. Its high quality of bloom and wonderful keeping qualities have become a byword with the trade.

Owing to the increasing demands made upon us for stock of this variety, with which we have often heretofore been unable to keep pace, we have planted more **WARD** than ever this year and have also improved our propagating facilities so that we are now in position to care for a largely increased trade.

Rooted Cuttings for December and January delivery.

Miscellaneous Stock

A few items every florist needs. For complete list send for catalog No. 5. Send us your list of wants.

CALADIUM ESCULENTUM—Good bulbs with sound centers: 5 to 7 in. circumference, \$2.00 per 100; 7 to 9 in. circumference, \$3.00 per 100; 9 to 11 in. circumference, \$6.00 per 100.

BEGONIA, TUBEROUS ROOTED—Bulbs large from one of Belgium's best growers: Single Separate colors, \$2.50 per 100, \$22.50 per 1000; Single Mixed colors, \$2.25 per 100; \$20.00 per 1000; Double Separate colors, \$4.50 per 100, \$40.00 per 1000; Double Mixed colors, \$4.00 per 100, \$35.00 per 1000.

GLOXINIAS—Fine sound bulbs in separate colors, \$4.00 per 100, \$35.00 per 1000.

RHODODENDRONS—A fine lot of hardy sorts, in plants full of buds and with good foliage, 18 in. high, 8 to 12 buds, \$9.00 per doz.; 24 in. high, 12 to 14 buds, \$12.00 per doz.

AZALEA MOLLIS—Bushy, well budded plants, 15 to 18 in. high, \$35.00 per dozen.

DUTCHMAN'S PIPE—Aristolochia Sipho, tops 4 ft. long, a grand vine for shade and cold exposure, \$3.50 per dozen, \$25.00 per 100.

MAGNOLIA—Fine well budded plants, with ball of earth, burlapped; all varieties, White, Pink and Red, 4 to 5 ft. high, \$1.50 each. Stellata or Halleana, early star shaped white, 2½ to 3 ft high, at \$1.50 each.

ENGLISH IVY—Two or more shoots, 3 ft. long, \$12.00 per 100.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Far

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil."—/ p.

Azaleas for Christmas

To have these plants right for Christmas they should begin to show color about the middle of December. Keep them in a temperature of 60 to 65 degrees until it is evident that they will be in on time. See that none of them become dry at the roots. Give a spraying also at least once a day, but stop this as soon as they show color. Any growth ahead of the flower should be rubbed off. Keep them well up to the glass and turn them around once in a while to expose all sides to the sun. It is well to have azaleas in bloom ten days or a week before Christmas which will give time to harden them up. This should be done gradually until they are in a temperature of 50 degrees.

Care of Violets

Do not keep the temperature too high as violets are cool loving plants. Do not let the temperature go over 45 degrees at night and see that the soil is always kept in a moist state. Watering should be done early in the morning so they will have a chance to dry out before nightfall. Attend to ventilation with extreme care as on this depends much of the success with this crop. See that the plants are kept clean of spotted leaves. These leaves left on are sure to spread disease.

Christmas Talk

Give all foliage plants a good sponging off so they will be thoroughly clean for the holiday trade. The Yuletide festival calls for plenty of holly, laurel, lycodium, boxwood and mistletoe. Secure plenty of stock to fill pans, baskets and other receptacles. Be sure to include all the appropriate plants such as ardisias, Jerusalem cherries, oranges, lilies, cyclamen, azaleas, Ericas, callas, ferns, araucarias, palms, primulas, poinsettias, Lorraine begonias, etc. All this stock will need lots of care. They should never be allowed to suffer for want of water. Ventilate with caution when flowering

plants are out in bloom. A cooler house will finish them up in good shape.

Hybrid Perpetuals for Easter

These roses are sure to sell well at Easter. Now is the time to make a start by getting some and potting them up. For a potting mixture use any good rose compost. Pots from 7 up to 10-inch will do, according to the size of the roots. Give good drainage and work the compost well all around the roots and leave the soil well firmed. They can be placed in a deep frame until they are wanted. Of course later on they will need some strawy manure over them to keep the frost from breaking the pots. Good varieties are Captain Christy, Margaret Dickson, Fran Karl Druschki, Gloire de Burgh, La Reine, Captain Hayward, Mrs. John Laing, Baroness Rothschild, Anna de Diesbach and Magna Charta.

Lilies for Christmas

All lilies that are intended for Christmas should now have their buds on the point of opening. Where they are not thus far advanced give them heat, up to 70 or 75 degrees at night. For lilies that are sure to be out in time 60 to 65 degrees will be all right. It is always better to have them out in time so they can have a hardening off in a cooler temperature for four or five days. See that they are kept moist at the roots by frequent waterings. As the flowers open enough the pollen should be removed before it falls over the petals. Keep the lilies clean of green fly by proper fumigation, done lightly so as not to spoil the blooms.

Christmas Greens

Do not fail to have a plentiful supply of Christmas greens. It always pays to offer Christmas greens of the highest quality and now is the time to place your order. When received give it a cool moist place.

Next Week:—Chrysanthemum Stock Plants; Winter care of Palms; Orchids; Propagating Bouvardias; Winter Protection; Making Flats.

Arenaria

Courtesy of Harry A. Dror

ARENARIA MONTANA

Belonging to the order Caryophyllacæ the genus *Arenaria* comprises a remarkable number of handsome garden species of highly ornamental merit. In the main, being hardy herbaceous inhabitants of the high altitudes of European mountain regions, their characteristics consist of a low creeping growth and a wonderful resistance of the dense verdure of a diminutive foliage. All the cultivated kinds have been, for the principal part, inmates of the rock gardens. Today the advanced class of American garden lovers more and more realizes that the only opportunity for enjoyment of a host of extremely attractive hardy flowering perennials is the rockery and to a lesser extent the dry-wall. Not the customary stone heap on the open lawn or in the shade of a tree-grove but the rock garden ascending along a natural slope or an embankment; the rockery in rugged but nevertheless artistic construction by its irregular pockets and nooks, by its boulder-strewn declivities, serving as a fitting receptacle for a wonderful variety in rich beautiful colors and interesting forms of ornamental plant life. Not the rock garden of Japanese make with Oriental stone idols and foreign inscriptions, with a vegetation restricted to the native plants of the land of its name, but the American rockery, built by ourselves as the sanctuary of the plant lover in which he may, without the least restriction, cultivate and enjoy a wealth of blossoms of fairest hues regardless of their nativity. Experience in this field soon reveals the fact that self-interest, self-action and the exercise of individuality on the part of owners is the best guarantee for success. For this reason it becomes at present part of our business to crystalize interest and kindle the enthusiasm in this direction among our garden owners.

Of the *Arenarias* in cultivation the variety *grandiflora* is covered with snow-white blossoms during May and June. *Arenaria Rosani*, syn. *A. graminifolia*, mid-summer-flowering, is distinguished by hirsute foliage; likewise appear the dark-green leaflets of *A. rotundifolia* highly attractive. When in flower they are buried under a cover of white. The blossoms of *A. rupestris* remind us of those of *Gypsophila repens*. *A. caespitosa* resembles a vivid green carpet bedecked in spring with legions of small white flowers. The best of all the sand-worts, however, is *Arenaria montana*. Our illustration shows a single specimen in full bloom. This variety with its abundance of large white flowers is a gem for

the rock garden and proves invaluable for the dry-wall.

Arenarias require full sun and prefer a light sandy soil. Beware of excessive moisture, particularly during winter. Protect by a light leaf covering. Propagation is mostly done by division.

Glenside, Pa.

Richard Rothe

Caryopteris Mastacanthus

Caryopteris Mastacanthus, the Blue Spiræa, a member of the family Verbenacæ, was introduced into this country from Europe where it was first disseminated by Messrs. Veitch. In Japan it is said to grow on the borders of old fields and on the summits of mountains. The plant belongs, however, to China where it was discovered by Robert Fortune many years ago.

Although more in the nature of an herbaceous perennial the Blue Spiræa is really a sub-shrub, and it should have a trial everywhere. It is a much branched shrub resembling the *Ceanothus* in look. One of its greatest attributes is the fact that it blooms so late in the season, flowering profusely during September and until heavy frosts, when other plants are beginning to look "seedy." Its flowers are borne in large clusters in the axils of the leaves and although individually small the corymbs are sufficiently large and abundant to be conspicuous. The flowers are of a lilac-blue shade, a color hard to find on other plants at this season of the year. The inflorescence is slightly fragrant. The leaves are of a good green above and hoary white beneath. When bruised they give off a strong aromatic odor.

Caryopteris has a reputation of not being any too hardy in the neighborhood of Boston, but with slight protection in ordinary winters it will survive in this latitude. Even if one has to go to the trouble of lifting the plants and storing them in a pit every winter they are well worth the trouble, for their character is so distinct and striking. As far south as Philadelphia it has been known to kill back but this is not to be feared as the flowers appear on the present season's growth and the killing back merely acts as a severe pruning and tends to make the plant more bushy and, of course, makes more flowers the following autumn. If it is feared that the stock will not survive the winter it pays to take in the young plants or only a few of the collection, for as it is easily propagated, a new collection can be quickly produced. If plants are brought in they should be wintered in a cool frame or cool storage pit.

This plant is easily propagated by cuttings, by division or by seed, and thrives in any good garden soil. It requires plenty of water during the summer, but when in flower it succeeds without any water whatever. Instances have been cited where there was no water applied to the plant during a drought of nine weeks in August and September, and still it came into bloom and the flowers were as beautiful as if the plant had received its full complement of moisture.

The shrub attains the height of three to four feet and is of spreading habit. For use where its color is needed in the shrub border or in selected places in the garden it will be found very valuable. It is sometimes surprising that a shrub of this character is so often overlooked when a planting scheme is being made out.

Hubert H. Canning

Jamaica Plain, Mass.

Beauty is Wealth—Therefore Raise a Lot of It and Be Rich

The love of the beautiful is ingrained in the soul. It is a prophesy of our resplendent future. For when we stand on the margin of the glorified vastness of the universe, which will rise before us as Canaan rose to the view of Moses on Pisgah, we will find all things created on the lines of harmony and beauty. We find many things to feed the soul as well as the body. A kind Providence looks beyond our material wants to minister to the immortal within us.

The beautiful dawning of the day which broadens over the earth, uncovering its loveliness, revealing the landscape, forest, and plain, and the glowing sunsets when the western sky is painted with molten gems, the sweetness of the garden and the gentle wooings of Nature are all for the soul. Had God looked simply to feeding the body He might have left out these embellishments with which he has adorned the earth. Much of the world's wealth ministers to our higher natures. We might live on in sod or log houses, and eat and toil and sleep and be strong and plod on with no higher aims. But we can't do it. There is that within us which is clamoring for more.

I have visited many of the estates of the rich and what immense sums are expended for the adornment of home and the home grounds. Every flower which can be made to bloom, every tree and shrub suited to the climate is procured. The most skillful gardener has charge and he is never stinted in his work. And God loves it all and sets the secret forces of Nature to work and there is bloom, beauty and gladness everywhere.

We need to urbanize the country and the time is not far off when the farm will be a suburban estate on a grand scale. The home will have the comforts of the city with the addition of all out-of-doors—with broader vistas, plenty of room, and no such sense of suffocation as you feel in the city.

If you have a home and grounds you cannot get rich faster than by raising beauty. I have known instances where men have refused \$100 for a silver blue spruce which cost but \$5.00. A neighbor has one six years old which flashes its silver sparkles in the sunlight. He paid only \$1 for it. I have seen the shapely silver cedar from the Rockies the sheen of which was of daz-

zling brightness, beautiful and symmetrical. It won exclamations of delight from all that saw it. Money could not buy it. Years ago the Thurlows of Massachusetts paid \$20 for 1,000 seedlings of the concolor. In 11 years three of them were sold for \$100 each.

There is a Rocky Mountain silver fir growing on the Hummewell grounds at Wellesley, near the college—one of the most charming trees that ever grew. Money could not buy it, yet \$5 would put a two-foot tree of the same variety on your grounds. I look out of my window and see three trees I myself brought from the mountains and gave my son and those trees add hundreds of dollars in value to the place. There is that famous Japanese tree lilac at the Arnold Arboretum at Boston. When 20 years old from seed it measured 30 inches around, three feet from the ground. Could anyone buy it? A gentleman in St. Joseph has a Chinese tree lilac 17 years old. It is eleven inches through and 25 feet high. It is destined to be over a foot through and 50 feet tall. It is often overwhelmed with great masses of snowy white and sweet-scented flowers. The man would as soon think of selling his home as that tree.

When we come to perennials we find that there are Golcondas and Eldorados in the floral world. Grand Festiva maxima now 60 years old has been worth much more than a million dollars. Other peonies of rare merit bring fabulous prices and as they double every two years you have a splendid investment. A gentleman bought the famed Monsignor Iris which originated in France. He got three for three dollars. In four years he had 50 which he sold for \$1 each till he had to stop. The Iris is the flower of the future. Take some of the new varieties and they are of bewitching loveliness. And you get ten from one in two years, often more. Flowers, shrubs and trees have not only a cash value but a sentimental value which it is hard to estimate. It goes away beyond dollars.

So we repeat our slogan, *Beauty is wealth.*

Valueless diplomas

Judging from the freedom with which some of our generously disposed horticultural societies and florists' clubs are dispensing certificates of merit and other diplomas of high degree to all sorts of exhibits it will

not be long before all the value of these once-prized honors will have vanished. There was a time when such winnings were proudly displayed by a grower as indisputable proof of exceptional skill. Now, as passed around in some places, they may mean that or they may mean nothing more than a pleasant little compliment on the part of the judges. It is not well to cheapen such trophies until there is no longer any incentive to work for them. If you give the highest award in your power to some common production, what form of outstanding approval can you bestow upon an exhibit of remarkable merit? We think there is room for vast improvement in the methods of some organizations in this respect if they expect their diplomas to be regarded as worth the paper on which they are printed.

The fertilizer problem

An interesting note on the foreign potash supply will be found in another column of this paper. As the writer of that communication truly says, "the interruption of traffic has not made American soils or crops any less hungry for potash," and explanations of the causes of the present scarcity of this material will not satisfy the plant's hunger. Among the many effects, direct or indirect, of the war in Europe none have so important a bearing upon the horticultural industries of our country as this almost complete stoppage of the potash shipments from Germany. At present it is true that a small quantity is coming forward and these receipts have been looked upon as indicating an approaching return to normal conditions but when we consider that at this season of the year the German Kali people should be shipping about 175,000 tons a month the arrival of a few tons more or less is of small moment. So the problem is still with us, a minor matter commercially as compared with the needs of the great agricultural interests, but still serious enough in horticulture to cause much trouble if other sources of this indispensable plant food are not found.

Potash resources of the United States

The American people have been very wasteful of their natural resources, and in none more than in the rich top soil of their lands, the fertility of which has been exhausted, one section after the other. From now on great crops can only be assured by more scientific culture and restoring to the soil those essential elements of which it has been robbed so recklessly. Nitrogen, phosphorus and potash must be had for this purpose. All these elements are present in enormous quantities, the great problem being to get them in practical available shape. The Department of Agriculture at Washington has been working to this end for some time past and with results more or less encouraging, even to the extent that it is confidently asserted that it is a matter of time only until there will have been developed a great American industry on the Pacific coast capable of producing over six times the present consumption of soluble potash salts in the United States, or something more than the world's present total production. An enterprise at Searles Lake, California, promises that when appliances now in course of construction are completed the output will be between 30,000 and 40,000 tons a year. The most promising American source of potash, however, according to official information sent out this week by the U. S. Department of Agriculture, is the annual crop of giant kelps aggregating an area of nearly four hundred square miles. Full details on this and other American fertilizer resources are given in the report of the Bureau of Soils, which has just been issued.

Personal

Thomas Henderson, formerly at Mendon, Locust Valley, N. Y., has accepted a position on the Eastman estate, Tarrytown.

Mr. and Mrs. S. J. Reuter of West-erly, R. I., returned from their stay in Germany on the Rotterdam, on Tuesday, last week.

Paul Berkowitz, of H. Bayersdorfer & Co., Philadelphia, has just returned from a highly successful business trip almost across the continent.

We regret to say that Patrick Welch, president-elect of the Society of American Florists is still confined to his home in Dorchester, Mass., with a severe rheumatic trouble from which he has been suffering for several weeks past.

Last week Mr. and Mrs. Harry Balsley of Detroit enjoyed a honeymoon trip which included a stay in Boston, New York, Philadelphia and other eastern cities. While in Washington they were guests of William F. Gude and saw most of the points of interest.

George Waldbart, one of St. Louis' well-known retailers, was held up on Saturday night, Nov. 28, near his home by robbers, who got \$45 in bills but overlooked \$300 which he had secreted in an inside pocket. George got a scalp wound that will keep him indoors, so the doctor says, for about ten days.

George M. Stumpp, Sr., who was in southern Germany at the time the war began is still there and writes that he will remain through the winter. His auto has been returned to him. He has spent most of the time this fall working in the fields helping his neighbors gather in their crops.

TRANSPLANTING AMERICAN HOLLY.

Editor HORTICULTURE:

I have a friend, head of several large manufacturing plants, who has cared for plants and flowers from boyhood. For years he has had holly plants transplanted from the wild state. I do not remember of his loss of even one. The plants have averaged over six feet. His place is situated just over the ridge of the bluff, 225 feet above the north end of Narragansett Bay, the ridge sloping for one-half mile to the water, at the west, and exposed to the full blast of winter wind. Beside good care, he removes all foliage at time of transplanting.

His holly plants show as large berries as I have ever seen come from Maryland or the Carolinas.

FRANK BUFFINTON.

Fall River, Mass.

NEWS NOTES.

Hartford City, Ind.—Robert M. and Henry B. Henley have purchased the Leach greenhouses.

New Rochelle, N. Y.—Mayor Griffing has appointed a new park board with J. H. Troy as chairman.

A MODERN HITCHINGS HOUSE.

EXTERIOR VIEW.

The accompanying illustration gives exterior and interior views of the modern house recently erected by Hitchings & Co., of Elizabeth, N. J., for G. H. Sinclair of Holyoke, Mass., at his new place in Smiths Ferry, Mass.

The house, which is of the most up-to-date construction in every particular, is 60 feet wide and 400 feet long. On one side it is connected to the service building by a 10 feet by 25 feet passage. Directly opposite this passage a gable was built for future connections, as it is Mr. Sinclair's intention to erect several more houses of the same size parallel to the one shown.

The house is of flat-rafter iron-

thick concrete wall to the ground. There are two lines of roof ventilating sash which are both operated from the same walk throughout the house. An important feature of the ventilating apparatus is the Tell-Tale Device which is attached to each machine directly above the hand-wheel. This device shows accurately in inches the amount of opening being given the roof sash.

The house is heated by a gravity steam system, and as it was possible to place the boilers, of which there are two, below the greenhouse floor level there was no necessity of installing traps or any other mechanical means of returning the condensation to the boilers. One-half of the house is

INTERIOR VIEW.

frame construction and there are only two supports across it, giving an unbroken space 34 feet wide between the columns. The central span is supported by a compression truss composed of double angles. The columns are of double angles riveted together, and all of the different members are connected to each other by steel gusset plates. The side posts and rafters are in one piece from the ground line to the column; the roof pitch being obtained by bending the rafters while at white heat. The side posts are bolted to heavy flanged bases.

The galvanized "Z" shaped eave plates are 7 feet high, and the sides are arranged for continuous side ventilating sash directly below the eaves, solid glass below the sash and 5-in.

benched for carnations, and in this end the heating pipes are placed under each bench, and along the sides. The other end of the house was left open for sweet peas, and the heating coils are carried on the side walls and columns; the returns being placed in a trench which runs both lengthwise and across the house.

The service building and boiler house is built of cement blocks, and the chimney is of radial brick. The service building contains ample working and storage space, and also very commodious quarters for two men. Hitchings & Company had the contract for the entire job, with the exception of the service building and chimney, which were built by a local contractor.

CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS & ORNAMENTAL HORTI- CULTURISTS.

Affiliation.

At the convention of this Society held in Boston last August, the following recommendation of the Executive Board was adopted, and added to the Constitution and By-laws of the Society:

"1. That clubs, societies or kindred organizations of professional florists, gardeners and horticulturists, having a paid-up membership of one hundred or more members in the S. A. F. & O. H., shall be entitled to one representative on the Board of Directors of the S. A. F. & O. H.

"2. Such representative shall be the president of such organization and must be a member of the S. A. F. & O. H.

"3. Any elective officer or appointed director of the S. A. F. & O. H. shall not be eligible as a representative of such organization.

"4. When the president of any such organization is already a director, the vice-president shall be eligible for the office.

"5. Any organization applying for representation shall submit to the secretary of the S. A. F. & O. H. a complete list of its membership. It shall be the secretary's duty to confirm same and submit it to the presi-

dent for final confirmation. Such list shall be in the hands of the secretary by December first of each year. Announcement of such director shall be made by the president-elect on January first of each year."

A number of florists' clubs and horticultural societies having a membership which would allow of their becoming affiliated with the Society, have already made application for affiliation, and have filed the necessary list of membership. Any eligible organization not already affiliated should lose no time in complying with the above rules.

Department of Plant Registration.

Public notice is hereby given that Charles Borrmann, 338 High street, Buffalo, N. Y., offers for registration the seedling Geranium (zonal pelargonium) described below. Any person objecting to the registration, or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Description—Seedling Geranium, La Favorite x Detroit; color, the same shade as Bridesmaid rose; habit dwarf; leaves stocky, having a deep zone.

As no objections have been filed, public notice is hereby given that the registration of the Begonia Mrs. J. A.

Peterson by J. A. Peterson, Cincinnati, Ohio, becomes complete.

JOHN YOUNG, Sec'y.
53 W. 28th St., New York.
November 28, 1914.

NATIONAL ASSOCIATION OF GARDENERS.

A meeting of the executive committee of the National Association of Gardeners, consisting of its trustees and directors, will be held at the Hotel Walton, Broad street, Philadelphia, Pa., on Wednesday forenoon, December 9th, at eleven o'clock.

The bowling committee announces that all members intending to enter the bowling tournament at the convention of the National Association of Gardeners must register at the business meeting in Horticultural Hall on Wednesday afternoon, December 9th. The business meeting will be called to order promptly at 2 o'clock. The bowling tournament will take place Thursday forenoon, December 10th.

The dinner committee has set the price at \$2.50 per person for the annual banquet of the association, which will occur in Horticultural Hall on Wednesday evening, December 9th. Mr. David Rust, Horticultural Hall, Philadelphia, Pa., should be advised without delay by those members who will attend the banquet so that proper provision can be made for them.

Exhibits of novelties, specimen plants and cut flowers of the newer va-

rieties, should reach Horticultural Hall before noon on Wednesday, December 9th. They should be sent, express prepaid, to National Association of Gardeners, care David Rust, Horticultural Hall, Broad and Locust streets, Philadelphia, Pa.

Several of the prominent horticultural firms in and about Philadelphia are arranging to entertain the visiting members at their establishments during the members' stay in Philadelphia.

The Hotel Walton will be the official headquarters of the association during the convention.

M. C. Ebert, Sec'y.

AMERICAN SWEET PEA SOCIETY.

A meeting of the executive board of the American Sweet Pea Society was held at the offices of Peter Henderson & Co., New York City, on Tuesday afternoon, Nov. 24th, with W. Atlee Burpee in the chair. The principal business was the arrangements for the shows to be held during the coming summer. It has been arranged that two shows be held; one in San Francisco, the other in Newport, R. I. The dates for the San Francisco show have not yet been fixed. The Newport show which is to be held under the auspices of the Newport Garden Association and the Newport Horticultural Society, in the Newport Casino, will open on July 8th, and continue through July 9th. A very liberal preliminary premium list has been prepared and issued by the Newport organizations, which includes a large number of open classes. Copies of this preliminary schedule may be obtained of the secretary, Harry A. Bunyard, 342 W. 14th St., N. Y. City. The preliminary schedule of the American Sweet Pea Society will be issued about January 1st.

HARRY BUNYARD, Sec'y.

W. Atlee Burpee & Co. have offered the following special prizes, open to private gardeners and amateurs, to be awarded at the American Sweet Pea Society's show at San Francisco, next summer:

For twelve vases of Sweet Peas in twelve distinct varieties, to include at least three of the following: Burpee's Florence Nightingale, Burpee's King White, Burpee's Orchid, Burpee's Wedgewood, Burpee's Illuminator and Burpee's Mrs. Rautzahn; 1st prize, \$25.00; 2nd, \$15.00; 3rd, \$10.00.

FLORISTS' CLUB OF PHILADELPHIA.

Professor Sheldon, The Area Institute of Technology, Area, Illinois, was the speaker at the regular monthly meeting of the Florists' Club of Philadelphia, held December 1, his subject being "Business Building." The lecturer was introduced in a few eloquent and inspiring words by Charles Henry Fox, and held his audience for two hours. A resolution was passed extending privilege of membership during their convention this month to the National Association of Gardeners and the Society for Horticultural Science. The gardeners will have their annual meeting in the lecture room at 2 P. M. on the 9th. At 7 P. M. the annual banquet will be held in the foyer. The following day there will be bowling games for the ladies in the Florists' Club, and later at the same place for the gentlemen. The next day (Thursday) will be devoted to visiting nearby places of interest. It is under-

stood that Andorra Nurseries is one of the special places that has extended a welcome; but we have not heard authentic details. John C. Gracey, one of our newly elected officers from the retail end of the business presided in the absence of president George Burton and performed his duties with much tact and dignity. The meeting was held in the lower hall instead of the club room—this no doubt being inspired by a feeling of courtesy from the hall management.

ST. LOUIS CLUBS AND SOCIETIES.

The St. Louis Florist Club holds an important meeting Thursday afternoon, Dec. 10, in Odd Fellows Hall. All members are requested to attend as the discussion and final vote on the Spring Flower Show will be held.

The Lady Florists' Home Circle will meet at the home of Mrs. G. B. Windler, 4059 Delor street, Wednesday afternoon, December 9, for their monthly Coffee Klatch.

The City Park Department employees have organized a club with 250 members enrolled. All members must be connected with the department. The officers are L. Kittlous, president; Joseph Peisch, vice-president; Hugo Schoff, secretary; John Moritz, secretary. Monthly meetings will be held.

The regular bi-monthly meeting of the Southampton (N. Y.) Horticultural Society was held Thursday evening, Nov. 19th. This was to have been a sort of opening meeting for the season, a starter for next summer's show. Plans were to have been discussed

looking forward to that event but owing to a very severe storm there were only a few present. Notwithstanding that fact we had a very interesting and profitable meeting. W. L. Jagger, head of the local weather bureau, read a paper on the horticultural and general growth of Southampton. He compared the place fifty years ago with today, dotted over with fine summer residences. Mr. McCullam, a professional tree mover, gave us a very interesting talk on moving large trees. After the business was over refreshments were served and we spent a very pleasant social hour.

D. T. WELLS.

KNOXVILLE, TENN., NOTES.

C. L. Baum expects to disseminate Dr. Sam, his white seedling carnation, next year. He is also much pleased with his new yellow sport from Chas. Razer chrysanthemum, Lena Baum.

C. W. Crouch, who has been in Louisville, Ky., for some time, has returned home and is making arrangements to spend the winter in Florida.

As a specialty, A. H. Dailey has on display in his window an assortment of baskets filled with roses, which are no doubt finding ready sales as different baskets appear in the window every day.

Addison J. McNutt's place being in the City Market house, he was forced to close about 11 o'clock, but this did not injure his Thanksgiving business any, as all stock was gone before this time.

GROW NURSERY STOCK IN THE UNITED STATES

Editor HORTICULTURE:

Mr. Benard's paper read before the California Association of Nurserymen at San Diego, set me thinking. I said, Why not grow nursery stock in Massachusetts? The opportunity is just as good here, and for some kinds, much better. We have an example of what can be done near Boston—the Little Tree Farms of So. Framingham. Although this farm grows large quantities and sells them cheaply, they are specialists in a few things, conifers, mostly pines, spruces and firs—large quantities of these are still imported from Europe.

The European war is not the sole opportunity. It has been a long time, and foreseen; not the war, but the opportunity. In one department of horticulture,—the raising and culture of carnations,—we have led the world for a long time, and we are rapidly becoming leaders in sweet peas and gladioli. We are sadly behind, however, in the raising of nursery stock. Two reasons have been given; one is the cheapness of labor abroad, and the consequent cheapness of stock; the other is the difficulty of getting experienced help. There should be no difficulty in getting experienced help. There are plenty of men in the country ready to take up such work, and competent men, too. If such men be well paid,—and they should be,—I am sure I could find plenty of them.

I presume in this work, as in all such work, you would need what we call specialists. All-around men are not just the right sort. One man may be specially clever in raising seedling stock, another, cuttings, grafting and budding, although this work can be readily done under the oversight of a competent man, with inexperienced help. The matter of raising seedlings, however, is a more scientific operation, and needs a little more than oversight; it needs knowledge and skill by a greater proportion of those who may be employed in the work.

Raising plants from seeds is, in a way, an intuition. We have got to feel, besides know, and the operations attending the work must be well up in details. As an illustration, a batch of seedlings may be ruined by half an hour's sunshine, or too much water, and by lack of air.

The Arnold Arboretum, I think, may be rightly called a school of horticulture, and among schools of horticulture it occupies the premier place. The master minds are Prof. C. S. Sargent and Jackson Dawson. In this connection it is not necessary to do more than mention them. In their field of work they are known the world over. Nearly all trees and shrubs that are hardy in Massachusetts and farther north, are represented here, and a large majority of them have been raised here. The work is still going on as vigorously as ever. Horticulture is benefited throughout the civil-

ized world and representatives from all the countries come here for study. Alfred Rehder, one of the greatest authorities on plant nomenclature, was a student here and is still here—a professor in this part of the work.

As to those who have forseen the opportunity I could mention one Boston firm. About ten years ago one of the partners of this firm spoke to me about raising rhododendrons from seed, and I had the pleasure of co-operating with him in the beginning of this venture. Now the firm raise azaleas and rhododendrons by the tens of thousands. Incidentally, I would suggest that raising rhododendrons from seed saved here, will (and I believe from my experience that it does) tend to harden the type. And in time to come we shall depend altogether on American raised rhododendrons.

It appears to me, however, that the nurserymen of the United States are not taking advantage of what is done for them at the Arboretum. To repeat, propagation and cultivation from the very start is practiced here, and the methods employed are open to investigation. So here, if any nurseryman wants to know what is best to grow, and how to grow it, he can find out.

A propagating department should be an annex to every well-managed nursery. With this idea in view, I suggested to Prof. Bailey, when he talked about revising his Encyclopedia of

WOODROW & MARKETOS

Wholesale Plantsmen and Decorators

37 and 39 W. 28th Street : : NEW YORK

American Horticulture, that he have two departments relating to the propagation of plants; one from seed, the other to include all other methods. The propagating department should be in charge of a well-equipped superintendent, who besides following the lead of his employers, should be unhampered as to methods,—be given a free hand, so to speak,—experiment with new subjects, ultimately or not to be added to the regular list. Sometimes subjects have to be abandoned, but it is a progressive way, and every enterprising firm should encourage such a forward move. If you look at nurserymen's catalogues, you will find practically the same things offered in each. I claim the reason for this is to be found in the dependence of all on a common source of supply—Europe.

The man who raises seeds must know when and where to get his stock supply. He will have to do some collecting himself. An interested man will always be on the lookout for new, rare or valuable kinds. He must know how long they take to germinate, how and when to sow them, whether in heat, or cold, and especially those that need freezing.

The care of young plants should be his, until they are ready for permanent quarters. There is a time in the life of seedling stock when the mortality is great. From freezing and thawing in winter time many are lost, not because they are not hardy, but because they need protection to carry them along until they have a permanent foothold. Unfortunately, the need of this extra care is given, indirectly, maybe, as an excuse for not venturing in this field of activity.

For these and all other methods of propagation, proper quarters should be found.

T. D. HARTFIELD.

Wellesley, Mass.

CHRYSANTHEMUMS FOR EXHIBITION.

A Paper by William Verr, of Castle Gould, Port Washington, N. Y., read before the Chrysanthemum Society of America, at Indianapolis, Ind.

After the shows are over, look to your stock for the coming year. Select as many good healthy shoots as required, seeing that each variety is labelled correctly; keep clean from mildew and fly; and when the propagating time is at hand select the sturdy cuttings and insert in the bench already prepared, watering in thoroughly. This will carry them for a few days, besides firming the cuttings. Keep them sprayed lightly to guard against wilting. They should be rooted in about three weeks; then pot up in two or two-and-a-half-inch with a nice light compost, but do not firm sufficiently to injure the roots. As soon as they are established give an abundance of air to keep them firm and sturdy, but never allow them to become root-bound.

It is essential to have the pots thoroughly clean in order to transfer them without injury. Repot into 4-inch pots with a nice compost consisting of three parts fibry loam to one part leaf soil and one part decomposed manure, adding charcoal, wood ashes, sand, etc. Place in a house or frame and keep closed for two or three days. Many people bench from 4-inch pots, while others prefer the pot-grown, which latter I am strongly in favor of. When

they become nicely rooted, repot into 6-inch pots, using practically the same compost, but coarser, besides adding a little bonemeal. Keep a sharp lookout for mildew and fly; also to the disbudding. Should they not show a natural break at this stage, it is policy to pinch in order to encourage next break.

When the pots become well filled with roots an occasional watering with diluted liquid manure, or soot water may be given with advantage. A spraying overhead with the latter is also beneficial as an insecticide and stimulant.

See that the plants are hardy and well-rooted before placing into final pots (7-inch to 9-inch). Perfect drainage is most essential. The soil should be well rammed, allowing a space of 2 inches for watering and top dressing. For compost use four parts fibrous loam, one part leaf soil, one part decomposed manure, adding lime rubble, wood ashes, charcoal, sand, soot, and allowing a 6-inch pot of bone or bone meal to each of loam. Feeding may be commenced as soon as the roots are found to be running freely, by applying weak doses of liquid manure water. Change the feed sometimes as time goes on, using chemical manure such as Clay's, Bon Arbor, etc., which will be found most beneficial if used with care and according to directions. Never apply manure when a plant is dry.

About the middle of June some varieties not making a natural break such as F. S. Vallis, Harry E. Converse, Mrs. Lopes, etc., will need pinching to make them produce bud early in August. This allows about six weeks for the last break; later varieties should

HOOSIER BEAUTY

The New Rose for 1915

If you need a more profitable red rose than the one you are growing, Hoosier Beauty is your variety. It is as fragrant as Richmond. Has more petals. A stiffer stem. A texture like velvet. In color glowing crimson scarlet with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into magnificent bloom, quite dazzling in brilliance.

As soon as thoroughly established in the soil it sends out long stiff growths with a bud on every shoot. It does not need to be pinched like Killarney or Richmond but produces naturally, stems 2 to 3 ft. in length; each plant keeps up a very close succession of bloom, and again unlike Richmond it is a good summer rose.

It is a clean grower, shows very little inclination to "spot" or mildew; indeed the variety is quite clear of both. It is an easy doer, grows side by side with Richmond and Killarney, and has become instantly popular and in heavy demand in the four cities where the blooms have been sold, flower-buyers through the section calling for it by name.

We are describing the rose very fully in response to questions asked us by intending purchasers. So free in both growth and production of bloom is it that it is already recognized as having the qualities of a

Great Commercial Cut Flower Variety.

We have splendid own root stock propagated in September and now in fine condition for distribution, while our grafted stock is worked on the highest grade of British manetti procurable.

PRICE

RICHMOND, IND.

F. Dorner & Sons Co.
LAFAYETTE, IND.

be timed accordingly. About the tenth of August many of the buds will be ready for taking. About this date it is safe to take all buds as soon as they become large enough to handle without injury. In disbudding discretion must be exercised by removing a few at a time. Keep the plants nicely staked, tied and clean.

After the buds are secured look out for their worst enemy, the red spider, which will give considerable trouble if they once get into the blooms. To avoid this fumigate once a week until buds show color; continue spraying foliage on bright days, avoiding the buds, which will rot if the water is allowed to settle in them. Also beware of the hairy caterpillar which will ruin the foliage. Shade is sometimes necessary to guard against the burning of the petals during hot bright days, the bronze and red varieties being more susceptible to burning than the other colors.

Cut blooms intended for exhibition are greatly benefited if put in water twenty-four hours before shipment. In packing, the blooms travel much better if wrapped with a full sheet of soft tissue paper, which is quite easily done by slitting the paper at the fold, inserting the stem in the slit just below the bloom, then gathering the folds and fastening at the top of the bloom with a gentle twist. For blooms intended to travel a distance, it is policy to wrap the end of the stems with wet moss, or use the regular Wells' patent tubes. I find the most serviceable box for shipping to be 6 feet long, 22 inches wide, and 12 inches deep.

In staging see that all blooms are

fresh, unblemished, and preserve as much foliage as possible in the long stem classes, as fresh blooms with good foliage generally capture the most points. Make sure that each variety is correctly labeled.

OBITUARY.

David Y. Mellis.

David Young Mellis, president of the Greater New York Florists' Association, and widely known in the florist business for more than thirty years in Flatbush, Brooklyn, N. Y., died Saturday night, Nov. 21, at his home, 3421 Snyder avenue, after a long illness. He was born at Stanley, Perthshire, Scotland, April 19, sixty years ago and came to Brooklyn thirty-five years ago. He built up a prosperous business, being adjacent to Holy Cross Cemetery, and at his death left a very large estate as the result of his good business methods and industry. Dave Mellis made friends at once wherever he introduced himself. He was a typical Scotchman of unwavering integrity and straightforward in manner and method. He often bowled with the Flatbush Club in years past and was a prime favorite at the S. A. F. conventions and elsewhere among the active florist fraternity. He leaves his wife, three daughters and two sons.

Cincinnati.—J. T. Conger, opened his temporary Third street salesroom last week. He had an excellent display of begonias, cyclamen and ferns.

JULIUS ROEHRS CO., Rutherford, N. J.

MARYLAND WEEK IN BALTIMORE.

The 17th annual meeting of the Maryland State Horticultural and allied societies held in the 5th Regiment Armory, Baltimore, Nov. 16-21, proved a great success.

The floor space of the building being 60,000 square feet unobstructed, afforded every facility for an effective and spacious display of all exhibits. The horticultural exhibits occupied the center of the hall, being dissected from other sections by a 360-ft. circular southern smilax hedge. A pergola entrance and three exits of 15 feet each guarded by four 2-foot hollow posts, crowned with cybotiums, Phoenix Robellini, etc, were additional features.

One of the chief features of the show, a decided novelty of much merit which occupied the center of the enclosure, was the Baltimore Florists' Club vase of red cedar bark, standing 11 feet on the pedestal empty, and when furnished with 350 white and yellow specimen chrysanthemums attained a height of 15 feet and a spread of 10 feet, the base of this wonderful vase being a five-pointed star design filled with highly colored crotons and other exotics from the Baltimore Park Commissioners. The club members contributed the flowers.

The credit of designing, building and decorating the club vase all belong to Mr. Feast. The vase of 20 white, won by Chas. Siquard with Wm. Turner, proved the best in the show, the same variety being well shown also by Geo. Morrison and Gus Lotz. Wm. Turner was the peer of all the chrysanthemums. Odessa in yellow and Glenview in bronze were the best in competition.

Pompons were displayed to great advantage and their unique colors and decorative utility well demonstrated by several exhibitors, notably R. Vincent, Jr., & Sons with four standing wreaths; E. A. Seidewitz in basket and novel design competition were winners and A. N. Pierson had three large baskets well arranged for display. Maryland, the new scarlet geranium of Vincent's in wreath form proved an attraction. Well grown bush chrysanthemums in 12 inch pots were shown by Mrs. W. F. Cochran, ward. Mac Richmond.

Palms, window boxes, fern groups and miscellaneous stock were well displayed by the many Baltimore flor-

ists. The genial president, R. L. Graham, sent daily contributions of floral work not for competition. Among roses, American Beauty, White and Pink Killarney, Killarney Brilliant, Francis Scott Key, Radiance and Maryland won in their respective colors. In carnations, Georgeous, Enchantress, White and Pink, Mrs. C. W. Ward, Benora and Beacon were winners in their colors. A. N. Pierson made a glorious display of chrysanthemums and roses. Julius Roehrs Co., Rutherford, N. J., staged palms, azaleas and begonias of high merit.

T. B. Symonds, secretary of the society, was a busy and able show superintendent, being ably supported by Messrs. Geo. Morrison, Wm. Feast, I. H. Moss and Jas. Toone.

HARRY TURNER.

SIMPLICITY IN FLORAL ARRANGEMENT.

Among the recognized points of excellence in any arrangement of flowers simplicity counts strong. Too much elaboration is a common fault with florists' decorative work and in our public exhibitions, displays which are crudely overdone are always in the majority. We present the picture which appears on our title page this week as a good example of extreme simplicity in form and color arrangement no wires or other unnatural material having been used. It tells its own story.

Rumson, N. J.—The old greenhouses on the H. S. Borden estate have been pulled down and a sunken garden will take their place.

Two Favorites

"Variety is the Spice of Life." Give your customers, wholesale or retail, more variety. Remember—You may deduct 5 per cent. if cash accompanies the order.

GLADIOLUS, Colvillei and Nanus

Plant some of these among your Carnations; they will come in handy at any time.			
ACKERMANIL. Salmon orange, with white blotches, edged scarlet; very pretty	100	1000	
	\$1.00	\$7.75	
BLUSHING BRIDE. Flowers are large, pure white, with delicate pink spots. Useful for early forcing.		.60	5.00
DELICATISSIMA SUPERBA. Pure white, bright, large carmine blotch.		1.50	12.00
FAIRY QUEEN. Carmine red, white blotch.		.75	6.00
FIRE KING. Orange scarlet, purple blotch, purple bordered.		1.75	16.75
PEACH BLOSSOM. The most beautiful of all the Colvillei type of Gladiolus; the color is a lovely soft pink, on the order of the Killarney Rose.		.60	5.00
QUEEN WILHELMINA. Blush white, with conspicuous blotches of cream, with scarlet margin.		1.75	16.00
THE BRIDE (Colvillei alba). True. This lovely white miniature Gladiolus makes a useful cut flower for early Spring use; will stand forcing.		.60	5.00

SPANISH IRIS (Iris Hispanica)

You will miss some of the older varieties from the list below. It has been revised to your advantage. They are the finest varieties for all purposes.

	Top Roots		1st Size	
	100	1000	100	1000
BELLE CHINOISE. Pure yellow.	\$0.75	\$6.00	\$0.50	\$4.00
BRITISH QUEEN. Large white; very fine.	.75	6.00	.50	4.00
CAJANUS. Deep golden yellow.	.75	6.00	.50	4.00
CHRYSOLOREA. Pale yellow.	.75	6.00	.50	4.00
CZAR PETER. Porcelain blue; extra fine.	.75	6.00	.50	4.00
DARLING. Blue; very fine; early.	.75	6.00	.50	4.00
KING OF THE BLUES. Finest blue.	.75	6.00	.50	4.00
LA GRANDESSE. Best and purest white.	.75	6.00	.50	4.00
LOUISE. Pale blue, slightly spotted; fine flower.	.75	6.00	.50	4.00
MARIE. One of the best blues.	.75	6.00	.50	4.00
SNOWBALL. Very large white.	.75	6.00	.50	4.00
MIXED, ALL COLORS.	.60	5.50	.40	3.50

These prices are for The Trade only.

ARTHUR T. BODDINGTON

Seedsman 342 West 14th Street, NEW YORK

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

Chicago Seed Notes.

The Leonard Seed Co. is quoted as saying that all seed crops are coming in short, with the exception of onion seeds, of which there are plenty. In the case of beans, there was an abundance of pods but they did not fill, which explains the way early prediction came to be so favorable to a large crop. Weather conditions which, of course, could not be foreseen, prevented the filling of the pods and changed a big crop to a small one. Onion set conditions are normal. Quality has never been better. High prices are looked for after Jan. 1st.

As this country is not growing one-half the beet, carrot, radish and spinach seeds that it uses, a shortage in European seed crops will mean a shortage here, though the usual quantity grown here is as large as usual this year. Mr. Clark says that no seeds are being imported for the garden, that could not easily be grown in this country, and the shortage bound to come next year and in following years, on account of the war, could be taken care of here, if planned for in time.

The advance guard of the salesmen for the California seed houses have reached Chicago, and many of them finished their work and started eastward. Among the houses represented were Kimberlin Seed Co., Santa Clara, Calif.; California Seed Growers' Ass'n, Santa Clara, Calif.; Pieters, Wheeler & Co., Hollister, Calif.; C. C. Morse Co., San Francisco, Calif.; Mrs. V. Johnson, Los Angeles, Calif.; W. J. Fosgate, Santa Clara, Calif.

Mrs. Victor Johanson, Los Angeles, Calif., whose husband died two years ago, is making her first trip in the interests of the business. She is meeting with success and had some good orders on her books while in Chicago.

Notes.

For the week ending November 21, the receipts of grass seeds into the port of New York were valued at \$11,856; sugar beet seed, \$195,638; trees and plants, \$49,837.

Chicago.—A. Henderson, who has had years of experience with the selling of bulbs and was in Holland among the bulb fields when the war broke out, says that he feels sure that should we never import another bulb, the United States could produce enough to supply the trade. He says it is not a condition of soil or climate that is keeping us from bulb growing but lack of capital and the high prices of labor here. Mr. Henderson says that their business is about equal to that of last year and that his salesmen are working the field now for next year, determined to be optimistic.

THE POTASH SUPPLY.

To the Editor of HORTICULTURE:

Judging by the numerous inquiries received, we believe that a statement of the potash situation may be of interest to your readers.

At the outbreak of the war the shipping season for potash from Germany was at its height, but since then the shipments have been made only in limited quantities. The prospect, however, is that they will increase as time goes on. Potash is not contraband of war and none of the nations at war objects to its movement in neutral ships. There is, however, great difficulty in securing railway and river equipment to move it from the mines and storehouses to the coast. The mines are in good condition and enough workmen not subject to military service are available to keep them in operation.

The interruption of traffic has not made American soils or crops any less hungry for potash. Most of the leading fertilizer manufacturers have agreed to utilize their present supplies of potash in the effort to supply fertilizers with at least 2 or 3 per cent of potash next spring and the supplies on hand at the outbreak of the war were said to be sufficient for this purpose. There is, therefore, no reason why farmers should not secure some potash in their goods, although the usual 5 to 10 per cent. might not be obtained.

H. A. HUSTON.

COLOR DISCORDS IN GARDEN FLOWERS.

The following communication comes from one of our readers who has been for many years, as he states, "a fairly successful decorator."

Editor HORTICULTURE:

In the article by Mr. Rothe on *Lychnis*, I understand his idea to be that many plants are neglected on account of shades of color not harmonizing. For many years I have had the idea that different shades of the same flower harmonize. We see all shades of geraniums together without any serious shock to our nerves. At the exhibitions of chrysanthemums, dahlias, gladioli, are we shocked at the proximity of any of the colors of the same flower? Do not many of the new varieties of chrysanthemums, dahlias, gladioli have, within a single flower, combinations we would not arrange together? Let the gardeners beware how they try to combine the same shades we see in above flowers, in different species of plants. Also they should remember that white harmonizes with all shades, and can be used to tone any objectionable color, that for other reasons should be used. We would not dare to question the good taste of the Creator, in assembling the colors and shades in the autumn foliage of our forests, swamps and thickets.

Of Interest to Retail Florists**THE RETAILER'S BUSINESS CALENDAR.**

Dec. 5, Sat. Service and success go hand in hand—and always will. Service, next to honest merchandise, is the most important thing in the commercial world. Service begins with the head of the business, and doesn't finish till it reaches down to the lowest man on the salary list. The firm that has fixed a pin to this idea, and attached it to every desk, is the firm that wins.

Dec. 6, Sun. Sunday morning is a good time to look over one's store and see if the interior arrangement of plants cannot be improved. Few things so detract from the well-kept display of a florist shop as a lot of palms and ferns crowded promiscuously into one corner. Make use of pedestals and try to give a "leafy-bower" appearance to the whole establishment.

Dec. 7, Mon. The enthusiast is the original little sunbeam. He simply exudes prosperity and good tidings. After a session with him you wonder why everyone doesn't grab a million—it looks so easy. He is the planner, the dreamer, the projector of big things. He realizes that there is a vast difference between living and merely being alive. If he were to measure success by inches he wouldn't get very far.

Dec. 8, Tues. A splendid opening exists for some one to start a horticultural cold storage plant for the stocks of firms which do not advertise. Mr. Retail Florist, your harvest is here and if you will not take the trouble to let people know you're alive, don't be surprised if they overlook you when they play Santa Claus. More money is lost by preparing for calamities than in taking chances on getting business that is apparently within reach.

Dec. 9, Wed. Put in a new window display. It's time to give the windows and interior a Christmas and general holiday effect. Decorate the store with simlax, holly and other seasonable greens. Specimen conifers are excellent to show in doorways or on the sidewalk these cold days. Take a tip from some of the big department stores. Impress upon the public the fact that what you have to sell will make very fine and appropriate gifts.

Dec. 10, Thur. See if you can't secure some of these Christmas decoration orders that your competitor is going to get if you do not wake up. Use the telephone to advantage. Start a careful canvass of prospects and follow them up with a second talk if you do not get them the first time.

Dec. 11, Fri. Pay your bills and "get in" on the discount. These little sums mount up considerably and help add to the profits for the year. The wholesalers and growers to whom you owe money also need to pay their bills. Your credit will be all the better if you do not ask for too much of it.

Dec. 12, Sat. Take a few minutes to read your copy of HORTICULTURE. This will be the Anniversary and Christmas number and worth reading from first to last page. It will have some-

NEWS NOTES.

 The store of James T. Silman,
Moody street, Waltham, Mass., was
entered some time Sunday evening,
November 22d, and \$10 taken from the
cash register. There is no clue to the
robber.

 New York—One of the most sightly
of the retail stores of this city is the
remodelled establishment of Myer on
Madison avenue, corner of 58th street.
Mr. Myer bought the building in which
his store is located and after an exten-
sive overhauling and new exterior, has
rented the upper stories to advantage.
Myer's success has come about in the
right way—painstaking application
and hard work.

NEWS ITEMS FROM EVERYWHERE

BOSTON.

Cattleyas received from F. J. Dolansky are among the best ever seen in Boston. Mr. Dolansky ships over 75 blooms to his salesman, A. G. Pembroke, daily, and is the only local grower of gardenias and cattleyas cutting in large quantities.

Henry J. Haas, market salesman for W. H. Elliott, for several years, has started a very promising career as commission merchant this week, selling the product of Elijah Cartwright and A. G. Cartwright of Waltham, N. F. Comley of Burlington, and others.

Violets at 50c. per bunch seem to strike the popular fancy. The Boston Cut Flower Co. say they have tried selling them at larger figures, but have come to the conclusion that when the retail price does not exceed the fifty-cent limit they give greater satisfaction to the buying public and to the dealer also.

Wax Brothers make a special feature of displaying pot plants on the sidewalk under their show window, when weather conditions allow—an excellent business help when a store is so located as to have this privilege. Wax Bros. have made a number of progressive innovations which we may have occasion to mention in detail later on.

Bachelor Buttons do not seem to be as favorably received here as they are in New York and some local growers ship the best part of their corn flower crop to other markets. This is especially so with Louis Small of Tewksbury, one of our "Bachelor Button" experts, who finds Boston a very poor outlet for his specialty. Mr. Small also grows carnations of fine quality, which he markets through W. R. Holden.

The get-rich-quick men seem to find Boston and vicinity a prolific field for crooked operations. This time it is a man, light complexioned, weighing about 160 lbs., and wearing a Spanish War Veteran button who is working the check game. His practice is to order a design or box of cut flowers and offer to pay for it with a check on the Lowell National Bank larger than the amount of the order, asking for the difference in change. Several local florists have already been stung. The checks are signed with the name of Baker.

Again we hear of a retail florist brought before the municipal court on the charge of selling flowers on Sunday. This time it is one of the most prominent and successful florists of Boston. Definite concerted action by the trade on this matter might either secure legislation for all florists to keep open or bring about a private agreement for all to keep closed. The prestige of the business is much hurt by these attempts to disregard the law. If the good of the retailers is enhanced by selling flowers on Sunday, let it be done legally and not surreptitiously in street fakir fashion.

ALTAR DECORATION FOR PAN-AMERICAN CELEBRATION.

Washington, D. C.—The floral feature of the past week was the Pan American celebration at St. Patrick's church. For this occasion the church was decorated by Gude Bros. with palms, ferns and yellow chrysanthemums and with these the altar was banked to a height of forty feet. At different points above the altar white

doves, emblematic of peace, were suspended by fine wires. At the elaborate luncheon which followed the table decorations consisted of yellow roses and chrysanthemums and ferns with a white dove as a central figure. The room itself was attractively decorated with palms, ferns and yellow chrysanthemums.

SAN FRANCISCO.

Pelicano, Rossi & Co., the Kearny street florists, are starting a billboard advertising campaign.

Chas. Steppenbach, proprietor of the American Florist shop on Polk street, near Sutter, has just returned from a two months' trip through the Atlantic states.

The San Francisco Seed Company is working on a contract for a large planting of Monterey cypress trees for a new Chinese cemetery at Colma, south of San Francisco.

The Hanford Floral Company, the new shop at Hanford, Cal., held a formal opening on the evening of Nov. 20. The store is under the management of R. D. Paul.

Mr. Prager, in charge of the gardening for the Oakland parks, is moving a lot of shrubbery from north of Lake Merritt to the filled-in ground on the south side. He is also beginning planting operations on several new parks in the eastern part of the city.

The MacRorie-McLaren Company recently received a shipment of six carloads of nursery stock, including hollies, rhododendrons, aucubas and box. This company has been making heavy

deliveries of plants to the Santa Venetia summer residence park near San Rafael, Cal.

Dr. John Nolen, of Boston, Mass., has been conferring with the city commissioners of Sacramento, Cal., in regard to plans for the beautification of the city by landscape work. He has just left on his return trip, and will stop off to look after some work in progress at Kansas City.

NEWS NOTES.

C. E. Critchell of Cincinnati reports that orders for Christmas decorative material are coming in fast.

Minneapolis—Mrs. Mazey, formerly with the R. N. Chapman Co., has opened a new store to be known as The Mazey Floral Co.

CHRISTMAS ORDERS BY TELEPHONE.

Every progressive florist has a telephone directory of his own, consisting of prospects—people who will buy his goods, and who can be reached by 'phone. Why not start an advertising campaign by telephone? You will probably advertise in the newspapers before the holidays. Start now to advertise for Christmas decorations by telephone. Catch a patron at the right time just now and a surprising number of advance orders will result. All it needs is a little telephone stimulus to get your clients to realize that Christmas and its attendant floral decorations are coming and that you are still in the flower business.

In every florist shop there are quiet times. At such times it is well to start a canvass of the district in this way. The flower merchant can do it systematically, recording the results for the future. In making a telephone

canvass similar methods to those used in newspaper advertising are employed. Convince the prospective buyer of the quality of your service and goods and clinch it by quoting a reasonable price. Such a canvass is cheaper than newspaper advertising for your particular purpose. A personal talk with each customer on the list will far outstrip in results any newspaper advertising. Use follow-up methods. If the order is not secured the first time, the way is open for another 'phone talk before Christmas. Retail florists who have systematically adopted this very simple method of getting business find it one of their best investments.

Chicago—A basket of magnificent yellow roses in the show window of A. Lange's store, attracted much attention. They were Souvenir de E. Guillard and were grown by the South Park Floral Co., at Newcastle, Ind.

BE SURE that you get the **MEYER GREEN SILKALINE**, and do not take any other that is sold as an imitation of the **MEYER GREEN SILKALINE**, as they do not have the full weight, measure and strength of the genuine article. All our **GREEN SILKALINE** is guaranteed up to the high standard and mark. The sizes are F, fine; FF, medium; FFF, coarse. It is for sale by all the best jobbers. If you cannot get it of your jobbers, order direct of the manufacturer.

Flower Market Reports

BOSTON The market is again floundering around in a slough of business depression. Stock is good—in fact, excellent; the supply is normal and under ordinary conditions would be considered short, but the demand has decreased alarmingly. Stock of fine quality is again lying in the wholesale markets waiting for the extremely reluctant buyer. The activity caused by Thanksgiving, and it was quite satisfying, has totally disappeared. Roses and carnations are plentiful, chrysanthemums are still hanging on and unless the weather gets colder, summer conditions will almost prevail. Violets are offered in larger quantities. Smilax and other greens have advanced slightly in value. As a contrast to this pessimistic outlook comes a report from several of the larger retail stores, especially those located in the Back Bay district, that business is good, in fact better than last year in some cases. This can well be believed of those stores that are not altogether dependent on transient trade. The weather to-day (Dec. 3) is almost sultry. Overcoats are a superfluity and the seats on the Common Malls are filled with people sunning themselves as in August. The effect of this summary relapse on the holiday crops will be worth watching.

No better weather could **BUFFALO** be expected than we had for the Thanksgiving Day business. The trade had looked forward for extra business and by reports, they got it in due time. There has been so much quietness of late that a lively hustle for a few days had brought an awakening. The receipts were light on Monday, heavier on Tuesday and on the last day, the same old story. For a few days carnation were scarce and orders were cut but later on there were plenty. Roses were not overplentiful and on some lines more could have been at the right time, especially red and yellow varieties. There was a good supply of narcissus paper white, lily of the valley, orchids, violets, mignonette, daisies and other corsage flowers of which all shared in the demand. Of course, chrysanthemums was the flower, and considering the amount handled prices were quite satisfactory. There were a good many of ordinary quality which moved slowly but the best stock had good sales. Pompons were in demand and good varieties were had.

Thanksgiving business **CHICAGO** met the approval of a good proportion of Chicago florists. No one expected to increase the sales of last year and no one, knowing the conditions prevailing all the fall, had a right to feel disappointed when the sales fell below those of a year ago. "A very fair average and better than anticipated," is the general verdict. Reports differ among the various houses as to the supply. Those having a large shipping trade ran low while those who depend principally upon the local market dropped to a low price to move their stock and even then did not clean up on some flowers. Carnations were in this class. The prices quoted in advance could not be maintained and many were not moved at all. Friday and Saturday

after Thanksgiving were not very good and Sunday trade was very light. Monday used up but little stock and Tuesday found the accumulation growing fast. The temperature is that of spring and the air is full of mist, which growers say will soon make stock soft. Some excellent large Chadwick chrysanthemums are still offered and fine pompons of the anemone type, but it is generally conceded to be the last of the season. American Beauties in short lengths are more numerous than can be used. Carnations are far beyond the demand. Lilies, sweet peas, gardenias, bouvardia and violets are all in extra good supply. The Milady rose, as coming into this market now, is very near perfection. In color it is quite equal to Richmond, while in number and length of petals and in foliage and size of stem it surpasses it. At one of the large houses it is stated that when customers have once had Milady, it is hard to sell them Rich-

mond. The 30 and 36 inch bring 25c. The flowering plant offerings are numerous and of fine quality. Some intended for the Christmas trade will be ahead of schedule.

The business for **CINCINNATI** Thanksgiving was fully up to expectations in most lines. The call, while very strong did not clean up everything. White chrysanthemums and carnations were left over and did not sell at any price. Since that time business generally has been pretty fair. Receipts are large and demand active. The rose supply is strong and all varieties are to be had in adequate quantities. The carnation cut, too, is heavy but is not cleaning up very well. Lilies are plentiful but are meeting with no especially strong demand. Lily of the valley and violets meet with only a fair market. Orchids and sweet peas sell well.

Flower Market Reports

(Continued from page 805)

Thanksgiving trade KNOXVILLE was beyond all expectations, the good trade to some extent being due to the foot ball game (University of Tennessee vs. Kentucky State). The University of Tennessee colors, yellow and white, took up all the chrysanthemums of this color that could be obtained, and several hundred more could have been sold. The Kentucky State colors being blue and white, it was impossible to furnish both colors in flowers, and white carnations and chrysanthemums were used tied with blue and white ribbon. On account of the University of Tennessee having a winning team this year, it has made the yellow and white chrysanthemums very popular all season. Chrysanthemums are on their last legs and will be a thing of the past in a few days, but carnations are coming into their own after the cool weather, and the cut is growing heavy.

The Thanksgiving NEW YORK Day business was generally satisfactory, judging by reports from the dealers, both wholesale and retail. Nobody will admit that the business was up to that of last year but, considering the conditions prevailing all through this fall, they all did much better than they had reason to expect. Responding to the suddenly developed demand, prices ascended with a bound, and in some cases to a degree that did the trade no good. This was followed by the inevitable relapse and the opening of the present week sees a very depressed condition in the wholesale district, price slaughtering being a marked characteristic as usual. Among the best sellers thus far are the yellow roses and of these Sunburst deservedly takes the premier place in popularity and standard price. Mrs. Russell is also developing as a great favorite in this market this season. The number of rose varieties offered in quantity has never before been equalled. Besides the foregoing and the several Killarneys there are Prince d'Arenberg, Mrs. Taft, Fire-flame, Richmond, Hadley, Francis Scott Key, J. L. Mock, Mrs. Shawyer, Crimson Beauty, Radiance, Mrs. Aaron Ward, Lady Hillingdon and several others. The carnation has accompanied the rose in its drop in value and lily of the valley, orchids and other choice material move slowly at prices greatly reduced, while violets, which are now of superb quality, find their best outlet through the street vendors. Lots of stevia and bouvardia are coming in and Roman hyacinths are already seen in quantity. Among chrysanthemums Maj. Bonnaffon is easily the best seller, the medium grades having the best of it. Southern asparagus is overplentiful.

PHILADELPHIA Thanksgiving week was on the whole very satisfactory. While there was nothing very startling as to prices or results, the trading was good and stocks were cleaned up in excellent shape. This does not quite apply to Saturday, the date of the big army and navy game.

Rubrum	2.50 to 6.00	2.00 to 4.00
Lily of the Valley	3.00 to 4.00	3.00 to 4.00
Violets	.50 to .75	.35 to .50
Corn Flower	.50 to .75	.50 to .75
Chrysanthemums	5.00 to 20.00	5.00 to 20.00
Sweet Peas per 100 bunches	3.00 to 4.00	2.00 to 4.00
Gardenias	8.00 to 25.00	8.00 to 25.00
Adiantum	.50 to .75	.50 to .75
Smilax	8.00 to 10.00	8.00 to 10.00
Asparagus Plumosus, strings (per 100)	25.00 to 30.00	15.00 to 30.00
& Spreng. (100 bunches)	15.00 to 30.00	15.00 to 30.00

Heretofore that event proved such a fine outlet that unusual preparations were made for it this year and as a consequence it was overdone and the market broke badly. The warm weather of the last half of the week also had its effect. Roses continue in fine form and while prices have eased up somewhat the demand continues excellent. Hadly is a leading favorite and Sunburst is also noticeably fine. There is now a fine list of yellows and a very good demand for all of them. Carnations were about equal to the demand, but there was no surplus and prices held firm. Chrysanthemums were in larger supply than expected and a good many sacrifices of fine stock took place at the windup. Dealers were conservative on the violet situation this year and were able to hit the happy medium—enough. The prices realized were up to standard and all was well. Gardenias sold fairly well. Lily of the valley is very plentiful—rather more than the market can absorb. The orchid situation has improved slightly, the prices realized being considerably better. The cypripedium crop is now more in evidence and quality fine. Some very nice sweet peas are now arriving—especially in the Spencers. The latter, although not very long stemmed as yet, are excellent as to flowers.

SAN FRANCISCO

The Thanksgiving trade in San Francisco developed some unusual features, but on the whole was rather disappointing, and a number of the large retail houses are said to have fallen considerably behind last year's record for the same period. It is impossible to place the blame for this on the street vendors, who are unusually numerous this year; there was no lack of buyers and sales of cheap stuff. Large, important orders, however, were the exception, and the more expensive goods simply did not move. The most notable feature was the enormous

sale of California holly, an extremely heavy supply of which was absolutely cleaned up. This was due to the low price, together with the quality, which is the best in years. A little English holly has appeared, but finds little demand at this time. Last week's shortage of carnations seems to have been artificial, and the attempt to boost the price had little success, values being back to a low level, with heavy offerings. Chrysanthemums are stronger, with gradually diminishing supplies which will probably be further curtailed by a storm which has just started. This, if continued, will help the violets greatly. Shipping stock of the latter is still scarce. More roses are being cut and the quality is improving, but the amount of really first-class stock is small. Supplies are pretty well taken up. Cyclamen plants and flowers are quite plentiful, and sell rather slowly. Orchids are getting a little scarce again with prices well maintained. Current offerings of lily of the valley are light and nothing extra as to quality. Few gardenias have been offered as yet, but there is a very fair crop coming on. Paper whites are appearing in larger quantity.

Thanksgiving week ST. LOUIS trade was good in many respects but the retailers were somewhat disappointed with Thanksgiving business, which was far below that of last year. Stock of all kinds was in plenty and prices lower than at any Thanksgiving heretofore. The only shortage noticed was in roses. Chrysanthemums were in

(Continued on p. 817)

Chicago Bowlers.

The bowling tournament under the auspices of the Chicago Bowling Association will be participated in by five florists, John Huebner, Wm. Lorman, Allie Zech, Fred Price and Peter Olsem, Dec. 10, at 7.30 p. m., at Ben-singer's Alleys. They will take part as a five-man team. Dec. 11, from 6 to 7, the two-man teams play as follows: John Huebner and Fred Price, Allie Zech and Wm. Lorman, Peter Olsem and Wm. Wolf. The individual bowling will follow from 7 to 8 o'clock. Visitors are invited. There are some tempting stakes and the florists are preparing to do their best.

A Magnificent Volume on Horticulture

Originally published at \$2.50 **\$1.50**

KIRKEGAARD'S
"Trees, Shrubs, Vines and Herbaceous Perennials": a book which bids fair to become a classic in its field.

With its 410 pages packed full of garden lore, its 60 beautiful full-page sepia photos and its comprehensive planting list it is a genuine contribution to the literature of Horticulture.

Ideal Xmas Gift

The edition is almost exhausted. We've picked up a limited quantity which we can let our readers have for \$1.50. Send cheque or money order; we'll forward the book postpaid.

Pulverized Sheep Manure

From Big Feeding Barns

No Adulteration—No Weed Seeds

Sheep's Head Manure is the cleanest in America. Here are the big covered corrals of the railroads, where the sheep are unloaded and kept from 60 to 90 days to fatten for the Chicago market.

We Guarantee

our product to be absolutely clean — no pig manure or other adulteration — nothing but sheep manure — dried and pulverized for easy handling, and all the weed seeds killed.

Some of the largest growers in the East have used our product for years.

Shipped in 100 lb. sacks

Flower Market Reports

(Continued from page 67)

plenty, also carnations, violets, lily of the valley, lilies, sweet peas, stevia, and paper whites.

WASHINGTON

The Thanksgiving Day weather was ideal except from the standpoint of those in the flower trade for it constituted a flareback of Indian summer after weeks of lower temperatures, and has resulted in the bringing into the market of quantities of roses and carnations. Thus there are many more flowers to be had than the market can legitimately take care of. Some few really good flowers sell at what might be considered normal prices. Roses are bringing from \$8 to \$15 for prime stock, but there are thousands upon thousands which can hardly be moved at \$3 and \$4. Yet, during the limited Thanksgiving Day rush, there was a scarcity of yellow roses, and two or three days before American Beauty roses were exceptionally scarce, but these latter are now going begging at from \$1.50 to \$3. The demand for Aaron Ward roses of late has been much better than for any of the other yellows. Carnations which early last week were scarce and brought as high as \$4 per hundred now hang fire at half that amount and the stock is good. For some unknown reason, single violets have stopped blooming during the past week or ten days and very few can be obtained. Consequently dependence must be placed upon Rhinebecks which seem largely subject to New York market

fluctuations. Gardenias are more plentiful. Callas have made their appearance with prices from \$1 to \$1.50 per dozen. Paper white narcissus is coming in, but for this flower the market is very sluggish. Stevia is bringing from \$2 to \$4 per hundred.

NEWS NOTES.

New York—All the cut flower commission dealers have handed over to Uncle Sam their contribution of \$20 for the newly imposed special license tax. Should any have neglected to do so there is a heavy penalty impending.

South Orange, N. J.—The jury award in the case of W. A. Manda against the D. L. & W. R. R. for damages caused by land condemnation and track elevation was \$8,000 lower than the amount agreed upon by the commissioners previously, from which Mr. Manda appealed as being insufficient. Mr. Manda has now entered another appeal and nobody who knows the circumstances can blame him.

31 Union Stock Yards, Chicago

SCOTCH SOOT

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

ON GUARD!!

No Greenhouse Man can afford to take the risk of leaving his place unprotected against the possibilities of overheating or frost, when absolute safety against either of these contingencies can be assured by installing the **faithful, sleepless, watchman**, whose portrait appears herewith. All you have to do is to set the hands—one at minimum and the other at maximum temperature limit and the Thermostat will give instant warning if temperature goes above or below.

All This for \$5.00

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

Iron or Steel Posts — Which?

FROM several of the letters that have recently come to us, it is evident that there still exists with some, a rather hazy idea of the difference between steel side posts and iron. The disadvantage of one, and advantages of the other. Some one has evidently told them that "the only difference, is the difference in cost."

It has been stated that we use guaranteed wrought iron posts, "because they were cheaper than steel." This is not so.

Regular commercial iron, which is really steel, costs less than guaranteed wrought iron.

Steel used to be the most expensive, but the improved process of smelting has made building steel the cheapest.

We use guaranteed wrought iron for our posts; because after a 35 years' test, we find it will stand in the ground with only a slight surface rusting.

Ungalvanized steel under similar conditions rusts rapidly through and through. It "eats off at the ground line," just as does steel pipe columns.

You can see when looked at under a powerful microscope that both steel and wrought iron are of a stringy texture, somewhat like a shredded wheat biscuit. The shreds of the steel, lie closely together with nothing between them to prevent the moisture penetrating and starting the eating in of the rust.

But wrought iron is different, due to its different process in making. Each one of the shreds is surrounded by a film of chemical cinder that keeps out the rust just like galvanizing protects anything. To say it another way; it's just like a wire rope, every strand of which has been painted before being made into rope.

Take one of our posts and put four husky men pulling against it edgewise, on a four rope tackle, which would make the strain equal to the pull of 16 men; and you will find they can't bend it a fraction of an inch. This will show you the prodigious strength our posts have, to stand all cross strains.

This edgewise view of our side post, shows you the double gusset plate which bolts the rafter and post together.

All of which is not mere advertising talk, but simple facts well known by all iron and steel manufacturers.

We know that the guaranteed wrought iron we buy, is exactly what we specify; because it is tested by our testing department. If not up to specifications, back it goes.

If you will kindly read the notes under the cuts below you will see why we sometimes rivet angles on both sides of the posts, and at other times do not.

One thing is certain, about every certain thing about our construction—there is absolutely no guess work.

We do not use a thing because some one else does. We use it because we have proven it to be the best thing to use. Tomorrow, for example, after the results of a series of tests and experiments, we may prove to ourselves, that some other thing which we are not using, is better; and it will promptly be adopted.

It may seem sometimes, as if we changed our minds over night. When as a matter of fact, we may have been making tests and slowly changing our minds for months and months.

Our salesmen know exactly why we use the things we use, the way we use them. If you but give them half a chance, they can prove up to you, step by step, why our materials and construction are beyond a question of doubt the very best in the market today.

When you are ready for such a talk—say when and where and one of us will be there.

One man can easily bend over a flat bar post provided he pulls AGAINST ITS FLAT SIDE, instead of the edge. It is to overcome this lack of sideways rigidity, that we rivet angles on both sides of a certain number of posts in our large houses and cross tie them together.

Burpee's Seeds Grow

Confidence

is the one thing that makes possible the commerce of the world. It is the greatest factor that enters into the purchase of seed, because you are not buying a finished product but only the means by which your garden may be either a success or a failure. Seeds—good or bad—may look the same, but their resulting crops,—Never! You cannot afford to risk a season's effort with seeds of unknown quality. When you buy Burpee's Seeds the element of doubt is absent. The confidence of many thousands of pleased and permanent customers has been secured by the Burpee Idea of Quality First,—“to give rather than to get all that is possible.”

THE HOUSE OF BURPEE

has introduced more distinct new varieties of vegetables and flower seeds that are now in general cultivation than have any three other American firms, but never have we catalogued any one of these new varieties until it had passed all the exacting requirements of the Burpee Standard. This Burpee Standard is maintained by rigid tests at Fordhook Farms, America's largest and most complete trial grounds. These tests are made each year for the purpose of strengthening this Bond of Confidence between our customers and ourselves.

WE ARE SPECIALISTS IN SEEDS

Our entire time is devoted to producing and distributing seeds,—seeds only, and only seeds of the best quality. We aim to do this one thing well.

FLORISTS AND MARKET GARDENERS

should write for our “Blue List.” This is our wholesale price list for those who plant for profit.

BURPEE'S ANNUAL FOR 1915

The Leading American Seed Catalog, is a bright new book of 182 pages. It is a Safe Guide to success and of real value to everyone who plants seeds either for pleasure or profit. Write for these catalogs today. A post card will bring them both.

To Insure Big Profits for Xmas Order Craig Quality Stock

LARGEST AND MOST COMPLETE COLLECTION OF CRAIG SPECIALTIES EVER OFFERED

PLANT BASKETS.

Our Plant Baskets have been so well received that they are now a very important feature of our Christmas business. All are first-class, both as to style of baskets and filling. Nothing but highly-colored, well-grown stock is used, such as Dracaenas in variety, Crotons, Pandanus, Ferns, etc. On account of being filled early and becoming established, they are bound to give satisfaction.

Many of the baskets and window-boxes are in two-tone effect. All baskets have zinc (not tin) liners. Window-box shape, 12 in. long, 6 in. wide, 6 in. deep, each \$2.50 and \$2.75; 18 in. long, 6 in. wide, 6 in. deep, each \$3.50 and \$4. 11-lb. baskets in variety, each \$2.50, \$4 and \$5.

POINSETTIAS (30,000).

We have 30,000 plants and can fill orders of any quantity: 5-in. pots, heavy, 100 \$50; 7-in. pans, 3 plants with ferns, doz. \$15; 8-in. pans, 3 plants with ferns, doz. \$18; 9-in. pans, 3 plants with ferns, doz. \$24; 8-in. low pans, 5 plants with ferns, doz. \$15 and \$18; 10-in. low pans, 5 plants with ferns, doz., \$24 and \$30.

BEGONIAS.

Gloire de Lorraine (20,000). The largest and finest stock of this beautiful plant in the country. The plants have been grown cool and are sure to give satisfaction. 2-in. pots, 100 \$12; 2½-in., 100 \$15; 3-in., 100 \$20 and \$25; 4-in., 100 \$35; 5-in., doz. \$7.50, 100 \$50; 6-in., doz. \$15 and \$18; 8-in., doz. \$18 and \$24.

Lonsdale. We have a large stock of this light sprout at the same prices as quoted for Lorraine.

Glory of Cincinnati. This variety will hold the flowers much better than Lorraine. We are particularly strong on sizes to be used in baskets and hampers. 4-in., heavy, 100 \$50.

Florence Davenport. (Introduced June, 1914.) This variety is a great improvement over Cincinnati; freer flowering, more symmetrical, and holds its flowers much longer. 2½-in. pots, 100 \$25; 4-in., doz. \$7.50, 100 \$50; 5-in., doz. \$9 and \$12.

CROTONS.

Special Croton Combinations made up in very attractive birch bark boxes, with handles, each \$7.50 and \$10.

We have the largest and most complete collection of Crotons in the world, carrying at the present time for Christmas sales over 50,000 plants in over 400 varieties, all of the very highest quality and brilliantly colored. 3-in. pots, 100 \$25, 1000 \$225; 4-in., 100 \$30, 1000 \$275; 5-in., 100 \$50, \$75 and \$100; 6-in., doz. \$12, \$15, \$18 and \$24; 8-in. pots, made up, doz. \$24, \$30 and \$36; 10-in. pots, made up, each \$5, \$6 and \$7.50; 12 and 14-in. tubs, made up, each \$10, \$15, \$20 and \$25.

Croton Punctatus. One of the finest varieties for basket work and centers of ferneries. 2½-in. pots, 100 \$8, 1000 \$75; 3-in., 100 \$20, 1000 \$150; 4-in., 100 \$25, 1000 \$225.

DRACAENAS.

There is no variety of foliage plant as attractive as the highly-colored Dracaena. We are now growing more Dracaenas, in greater variety, than any firm in this country.

Massangeana. The variety with the golden stripes down the center of the leaf. We have an exceptionally large stock of the very highest quality. 4-in. pots, doz. \$7.50, 100 \$50; 6-in., doz. \$15 and \$18; 8-in., very fine, doz. \$24 and \$30; 10-in. tubs, each \$4 and \$5.

Lord Wolseley. One of the very finest for Christmas, bright red in color. 4-in. pots, heavy, each \$35 and 50c.; 5-in., each 75c.; 6-in., doz. \$12 and \$15.

Craighii. The first time offered. We consider this variety the most beautiful pink Dracaena ever offered to the trade. 4-in. pots, strong plants, each \$1; 5-in., each \$1.50; 6-in., each \$2.50.

Baptistii. Long, broad foliage; cream, red and orange. 4-in. pots, each 50c.; 5-in., each 75c.; 6-in., each \$1, \$1.25 and \$1.50.

Stricta Grandis. Carmine-red leaves. 4-in. pots, 100 \$50; 5-in., heavy, doz. \$9 and \$12; 6-in. pots, doz. \$15.

Amabilis. Green and pinkish white. 4-in. pots, 100 \$50; 5-in., doz. \$9 and \$12; 6-in., doz. \$15 and \$18.

Shepherdii. Carmine and green. 4-in. pots, 100 \$50; 5-in., doz. \$9; 6-in., doz. \$12 and \$15.

Terminalis. Exceptionally well colored. 3-in. pots, 100 \$25; 5-in., each 50c. and 75c.; 6-in., each \$1, \$1.25 and \$1.50.

Fragrans. Plain, green leaf. 6-in. pots, doz. \$6 and \$9; 8-in. tubs, doz. \$18; 10-in. tubs, each \$2 and \$2.50.

Mandaiana. Large, bright red leaf, beautifully colored. 5-in. pots, 100 \$75; 6-in., doz. \$12 and \$15.

Godseffiana. Green and white leaf, very hardy; fine for baskets. 2½-in. pots, 100 \$10; 3-in., 100 \$15 and \$20; 4-in., 100 \$25.

Gladstone (Rare). 4-in. pots, doz. \$6;

Guilfoylei (Rare). 4-in. pots, doz. \$6;

5-in., doz. \$9; 6-in., doz. \$12, \$15 and \$18.

Titworthii (Rare). 4-in. pots, doz. \$6;

5-in., doz. \$9; 6-in., doz. \$12, \$15 and \$18.

Sanderiana. Small, light green leaves, edged with creamy white. Fine for center of fern dishes or basket work. 2½-in. pots, 100 \$15.

Kelleriana (New). The greatly improved Godseffiana. Fine for combination boxes or baskets. 2½-in. pots, 100 \$10; 3-in., 100 \$20; 4-in., 100 \$30; 7-in. pots, made up, each \$1.25 and \$1.50.

Imperialis (Rare). One of the very best of the bright-colored varieties. 4-in. pots, 100 \$50; 5-in., doz. \$12; 6-in., doz. \$18.

PHOENIX ROEBELENI.

Combining the grace of a Cocos Weddelliana with the hardness of a Kentia; an invaluable plant for the house. 10 and 12-in. tubs, specimen plants, each \$10, \$12.50, \$15 and \$20.

ARECA LUTESCENS.

Perfect plants, with rich, dark green foliage. Our stock has been grown cool and hard. 4-in. pots, single, 100 \$25; 5-in., doz. \$5 and \$6; 8-in. pots, made up, 42 in. to 48 in. tall, each \$2 and \$2.50; 14-in. tubs, made up, 7 ft. tall, each \$10, \$12.50 and \$15.

PANDANUS VEITCHII.

Well-colored plants. 4-in. pots, doz. \$6, 100 \$45; 5-in., doz. \$9; 6-in., doz. \$12; 8-in., doz. \$24 and \$30.

PANDANUS UTILIS.

3-in. pots, doz. \$1.50, 100 \$12; 4-in., 100 \$25; 5-in., 100 \$50.

GARDENIA VEITCHII.

These are very strong plants and will make grand stock for Winter blooming. 2½-in. pots, January delivery, 100 \$8, 1000 \$75; 4-in., 100 \$20, 1000 \$180; 6-in., 100 \$50; 6-in. in bud, doz. \$9 and \$12; 6-in. in bud, will flower for Christmas, each \$2.50.

FICUS PANDURATA.

The plant of the century. Positively the best porch and house plant to date. 6-in. pots, 2½ ft. tall, each \$2; 7-in., 3 ft. tall, each \$2.50; 10 and 11-in. tubs, 5 ft. tall, each \$4 and \$5. The larger plants are unusually fine.

FICUS UTILIS.

A species that came to us through the Botanical Gardens at Washington, D. C. The leaves are thick and leathery, and are from 18 in. to 24 in. long, of a rich, holly-green color, with midrib and veins of ivory-white, which stand out prominently. 6-in. pots, 18 to 24 in. tall, each \$2, \$2.50 and \$3; large specimens, each \$3.50, \$4 and \$5.

BERRIED ACUCBAS.

Beautiful plants, exceptionally well berried. 8, 10 and 11-in. tubs, each \$2, \$2.50, \$3, \$3.50, \$4 and \$5.

BOXWOOD.

Fall importations. 10 and 12-in. bush form, 100 \$20; 12-in. bush form, 100 \$30; 12 and 15-in. bush form, 100 \$25; 15-in. bush form, 100 \$40; 18-in. bush form, 100 \$75; 24-in. bush form, doz. \$18; pyramids, 3 to 5 ft. tall, each \$3, \$3.50 and \$4; standards, each \$2.50.

ABIES NORDMANNIANA.

7 and 8-in., heavy, each \$1 and \$1.25; large tubs, each \$2.50.

ENGLISH IVIES.

Both the large and small leaf varieties. 4-in. pots, 100 \$15, 1000 \$110.

ANTHERICUM BICHETII.

A new variety of dwarf habit, forming a dense, bushy tuft about 6 in. high, with gracefully recurving foliage about ½ in. wide, prettily edged with creamy white. A very useful plant for fern dishes, window-boxes, Christmas baskets, etc. 3-in. pots, doz. \$2, 100 \$15.

NEPHROLEPIS (150,000).

Todeaoides (London Fern). One we think of very highly. 2½-in. pots, 100 \$6, 1000 \$50; 4-in., 100 \$20, 1000 \$180; 6-in., doz. \$6; 8-in., doz. \$12; 9 and 10-in. tubs, doz. \$24, \$30 and \$36.

Elegantissima Improved. This variety is a greatly improved *Elegantissima*, and will prove a valuable addition to the crested varieties. 2½-in. pots, 100 \$6, 1000 \$50; 4-in., 100 \$20; 6-in., doz. \$6; 8-in., doz. \$12 and \$15; larger plants, each \$2, \$2.50, \$3 and \$3.50.

Scholezi. This is an ideal crested Fern, holding the same relation to all other crested varieties that the Scottii holds to the old Boston. 2½-in. pots, 100 \$6, 1000 \$50; 4-in., heavy, 100 \$20, 1000 \$180; 6-in., heavy, doz. \$6, 100 \$45; 7-in., heavy, doz. \$9, 100 \$70; 8-in. three-quarter pots, doz. \$12, 100 \$90; 11-in. tubs, doz. \$24 and \$30.

Elegantissima Compacta. A dwarf, compact form. 2½-in. pots, 100 \$6, 1000 \$50; 4-in., 100 \$20; 6-in., doz. \$6; 8-in., doz. \$12.

Robusta (New). The Silver Medal Fern at the National Flower Show, winning over all competition. It is the strongest grower of all the Nephrolepis Ferns, never reverts and every plant is symmetrical and salable in all sizes. 2½-in. pots, 100 \$10, 1000 \$90; 4-in., 100 \$25, 1000 \$200; 6-in., 100 \$50 and \$75; 8-in. Azalea pots, doz. \$12 and \$15; 11-in. tubs, each \$2, \$2.50 and \$3.

"Teddy Junior." A Grand New Dwarf Fern. The best fern of its type. Fine, young plants from 2½-in. pots, 100 \$8, 1000 \$75; 4-in., 100 \$20, 1000 \$200; 6-in., 100 \$50; 6-in., 100 \$75; 8-in., doz. \$15; 11-in. tubs, each \$2, \$2.50 and \$3.

Scottii. 2½-in. pots, 100 \$5, 1000 \$45; 4-in., 100 \$20, 1000 \$180; 6-in., doz. \$6, 100 \$45; 6-in. pots, heavy, doz. \$9, 100 \$70; 8-in., three-quarter pots, doz. \$12, 100 \$90; 10-in., three-quarter pots, doz. \$18; 11-in. tubs, each \$2, \$2.50 and \$3; 13-in. tubs, specimen, each \$4, \$5 and \$6.

Smithii. It is a compact form, much finer than *Amerpohlii*, and does not break down in the center; particularly showy for basket work. 2½-in. pots, 100 \$10, 1000 \$90; 4-in., 100 \$25; 6-in., doz. \$6 and \$9; 8-in., doz. \$12 and \$15.

Tuberosa Plumosa. This beautiful fern is quite distinct from all of the other varieties. The fronds are long and narrow, the pinnales beautiful plumose, of light color, giving the fronds a beautiful effect on account of the two distinct shades. 2½-in. pots, 100 \$10, 1000 \$90; 4-in., 100 \$25, 1000 \$225; 6-in., 100 \$50; 6-in., doz. \$9; 8-in., doz. \$15.

Bostoniensis. Wm. K. Harris. The finest variety for large plants. 2½-in. pots, 100 \$6, 1000 \$70; 4-in., 100 \$20, 1000 \$180; 6-in., doz. \$6, 100 \$45; 6-in. heavy, doz. \$9, 100 \$70; 8-in., doz. \$12 and \$15; 11-in. tubs, each \$2, \$2.50, \$4, \$5 and \$6.

Bostoniensis Harrisii. A dwarf type of Harrisii. 2½-in. pots, 100 \$6, 1000 \$50; 4-in., 100 \$20, 1000 \$180; 6-in., doz. \$6, 100 \$45; 7-in., doz. \$9, 100 \$70; 8-in., doz. \$12 and \$15; 11-in. tubs, each \$2, \$2.50 and \$3.

ASPARAGUS PLUMOSUS NANUS.

2½-in. pots, 100 \$4, 1000 \$35; 3-in., 100 \$7, 1000 \$65.

ADIANTUM HYBRIDUM.

The best variety for either a pot plant or for cut fronds. 3-in. pots, 100 \$10, 1000 \$90; 4-in., 100 \$20, 1000 \$180; 6-in., doz. \$6, 100 \$45; 8-in., doz. \$12, 100 \$90; 11-in. tubs, doz. \$24.

PTERIS PARKERII.

We have a large stock of *Parkerii* in variety. 6-in. pots, made up, doz. \$6 and \$9.

PTERIS ALBO LINEATA.

One of the very best for fern dishes or combination baskets. 3-in. pots, 100 \$8.

AGLAONEMA PICTA.

4-in. pots, doz. \$6.

HENRY A. DREER, 714-716 Chestnut St., Philadelphia, Pa.

THE ABOVE PRICES ARE INTENDED FOR THE TRADE ONLY.

Our New Rose Mrs. Moorfield Storey

Has a strong upright growth, the wood being very stout and smooth, with large handsome dark green foliage, practically mildew or black-spot proof. The flowers, which are freely produced, are of good size and substance with abundant petals, opening freely. The color is a shell pink deepening toward the centre with the large smooth petals tipped deep rose.

It will be a fine, yet distinct, companion for the Mrs. Charles Russell rose.

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toll, we ought to blame the culture, not the soil."—

LIBRARY
NEW YORK
BOTANICAL
GARDEN

Chrysanthemum Stock Plants

As the chrysanthemum season draws to a close it is time to think about stock for another season. Select up-to-date varieties. Each good stock plant should produce about twenty cuttings, so it is easy to figure out how many stock plants will be needed. A frame that can have plenty of protection during the winter is about as good a place as they can be put in, but be sure it is located where they can get plenty of sun. They can also be wintered in a cool pit where the frost can be kept out. Keep them in a moist state at the roots. Do not let them get overrun with black fly before fumigating.

Palms in Winter

All palms like a short season of rest. This can be brought about by lower temperature and dryer atmosphere with less water at the roots. All tropical palms can have their temperature reduced to about 60 degrees at night while 50 degrees will be all right for the cooler growing ones. This rest is meant more for large palms. Where they are quite small it would be out of place. Most of the palms should have plenty of light during the winter months, only keep enough shade so they will not scorch. Do not neglect syringing. It is a good thing to go over the palms about once a month and give them a good sponging.

Orchids

To counteract the drying influence of the strong fire heat dampen between the plants and under the benches thoroughly two or three times a day. It is better to have a gentle warmth running through the pipes with ventilation than to try to bottle up some heat by shutting down the houses early. Such treatment often produces the right condition for the spread of fungus or spot. During the cold season keep all orchids at their minimum temperature. Particular care should be given in watering. The cool house should have a night temperature of about 50 to 55 degrees; with sun about 65 degrees; without sun anywhere from 55 to 60 degrees. The intermediate house can be kept about 60 degrees at night; 70 degrees with sun; without sun around 65 degrees will do. In the warm house anywhere around 62 to 65 degrees at night will be high enough with a corresponding rise.

Next Week: -Care of Pelargoniums; Lilies for Easter; Propagating Lorraine and Cincinnati; Propagating Carnations; Sowing Primulas; Panax Victorine.

Propagating Bouvardias

Stock plants that have been saved* and rested up can now be brought into a warm house. They will need some pruning to relieve the plants of all the immature wood and the top growth will cut back to the ripened wood. Give a temperature of from 60 to 65 degrees at night. The day temperature can run up 10 to 15 degrees higher. Keep the plants moist at the roots and syringe on all good days to help swell the buds. They will soon break into a fine growth that will make good cuttings. The cuttings can be taken off close to the base of the mature wood. They will root best in a frame, with bottom heat of about 75 degrees. They will have to be kept close and moist until rooted. When potting off use a mixture of loam three parts, leaf-mold two parts, and some sand.

Winter Protection

We are now coming to a period of the year when severe cold weather may be expected at almost any time. So winter protection should be afforded on whatever is really necessary, but do not rush this work too soon. The winter mulch of whatever nature should not be applied until the ground begins to freeze. All hardy perennials should have a winter mulch of coarse manure, straw or some other material. Bulbs and lily beds can be covered with a liberal mulch of leaves or straw, which will tend to keep them from becoming hard frozen. Hybrid Perpetual roses can have the soil drawn up to the center of the plants around the wood, and a mulch of manure later on will prevent them from getting winter killed too far back for pruning. Hybrid Teas will be better and safer if lifted and stored in a cold frame or buried outside in a trench and later covered with a mulch. Some evergreens that are doubtfully hardy will also need some protection in order to carry them through.

Flats

Now is the time to get together a supply of flats for future use in holding and growing on the young plant stock. After the middle of January the rush will start so what is done now will come in handy then.

SHOP EARLY

Can be made by buying the quality of Holiday Plants and Supplies specially offered by advertisers in this paper. Look through the ads. and then order at once.

Don't wait until stock has been all picked over.

BIG PROFITS

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Outside Roses

If not already done it will be well to heap up a little earth to all the tender varieties of the outside roses. Strawy manure will answer this purpose as well, and in some cases better. Wherever there is danger from mice it will be better to use soil, and heap this up about eight inches around the bottom of all the plants. The tall growing kinds will carry through safer if they are tied up so that the snow will have no chance to weigh them down and thus break them. To protect the canes it will be advisable to wrap them up into a little straw, or meadow hay, tying this fast, so that there will be no danger of its blowing away, when the heavy wind comes. As soon as the ground freezes, apply a mulch of strawy manure to all the rose beds so that they will have about three inches of it at least. Horse manure as it comes off the cars will be ideal for this purpose, and will furnish a little food for the plants as well. All tree roses had better be carefully tied up, wrapped into straw, and then tied to heavy stakes so that there will be no danger of their being broken down by sleet and snow. Ramblers that are on exposed rocks or stone walls with a southern exposure, had better have a little protection too, for the freezing and the thawing as the weather changes will not agree with them. They will stand all the frost in the world, and so will other roses, but they had better be kept frozen all the time, after they once freeze, as it is the thawing and freezing that will kill them. Scale will often infest roses outside, and it will be well to watch out for it, and mark well all places where it appears, and see that these are well sprayed with some of the insecticides that will kill scale and that are advertised elsewhere in HORTICULTURE. Wherever any breaks on the grafted or budded stock are found coming up from the roots, they had better be removed at once, for they only prey on the plant, taking the best of all that the roots find, and after a while the plant will die. Tobacco stems form an ideal mulch for outside roses, and can be used summer and winter. They will help keep out many insects that are injurious. They can sometimes be had at a very low cost from the local cigar manufacturer and if not can be bought from seedsmen at a reasonable figure. It pays to use them, if only a little layer over the manure. Wherever the canes are too long and will have to be cut down in the spring, it will not do any harm to clip them off a little now, although we would not advise regular pruning at this time of the year. If pruned now, they will have to be gone over next spring again to remove whatever wood may have perished during the winter, and that will mean doing one thing twice. Another thing that will need attention is the labels. Go over all the labels now, and see that they are O. K. and will be readable next spring. Galvanized iron labels are not very expensive, and when written on with acid the writing will never wear off, and the labels stay put for years.

Electric Light on Roses

There are several electric companies experimenting with various forms of lamps that would affect the growing of the roses, or other flowers. We have tried these lights both on roses and carnations, and so far have not been able to see any better effects. The latest is a lamp of tremendous candle power, throwing a peculiar light, which is free from all red rays. It gives a ghostly appearance to everything around it, and to persons especially, changing the color of their skin to a strange greenish copper. It is very bad for the eyes, as the light is very penetrating, but we are afraid it will not come up to the rays of the sun or take the place of daylight. Although these lights show wonderful improvement, it will be quite a while before someone invents a light that will affect the growing of plants.

About Grafting

Mr. A. C. Ruzicka,

Dear Sir: I am writing to ask you on which is the best stock to graft Mrs. Aaron Ward rose, and also the best way to graft same.

Respectfully yours,

N. Y.

F. C. H.

We would recommend Manetti stock and the ordinary method of grafting, splitting the stock with a very sharp knife, and inserting the graft on either side. Seal well with wax and tie tight with raffia, and apply a little wax or hot paraffine to this with a brush; this will keep all the air out, and will help the two to unite. Never move the plants around directly after grafting, for the slightest touch is liable to dislodge the two back tissues and of course the graft will not take then. Put all grafted stock in a house by itself and arrange to give a good bottom heat, say 68 degrees F. or possibly a little more. Keep the top temperature cool, say 54 degrees F. or even as low as 50, if it can be done, until the stock and the graft unite. The plants can then be brought into warmer quarters, bottom heat done away with, and the plants allowed to make a slow start. Do not hurry them into growing too fast, as it does not pay. Have all the wood that will be produced of good firm texture, and nothing weak that will be subject to every disease that comes along. For our part we would much rather buy the plants already grafted and ready for planting, as it is far cheaper to do so, when only a few are wanted. Firms that make a specialty of this can not only do the work better, but the plants may be better too, as they grow them by the thousand as a rule, and have specially built houses for this purpose.

About Shawyer, Russell and Six-foot Stems

Mr. Ruzicka:

Dear Sir—I am a private gardener, and have a 100 foot house of roses, Killarneys, Richmond, Hadley and Shawyer. All do well excepting the latter, which is usually covered with mildew. My employer has told me to throw it out and grow Russell instead. Will you kindly advise me if this rose is a good continuous cropper.

Also I want to exhibit in the fall. Will you kindly inform me how the long-stem Russell and other roses are

obtained. I have noticed the Russell fully 6 ft. long shown by private gardeners. Kindly tell me when to plant and any advice you can give me in order to produce these long roses by exhibition time, Oct. 25 to Nov. 10. Any information gratefully accepted.

N. J.

Yours truly,
W. L.

Shawyer will do its very best when grown in a house all by itself, or if the house is run to suit it, and let the other roses come along as best as they can. It will do better if grown a shade cooler than the customary rose temperature, as this will make it produce softer growth, which is very apt to get mildew. It will stand a good deal of feeding, but keep stimulants away, using only cow manure if possible. If good conditions are given this rose it will certainly produce some elegant cut blooms, and is very floriferous. Russell is a very nice rose, and we think it will do much better in your house with the other roses, than what Shawyer did. It is a good grower, sturdy, and not an easy subject to disease, producing flowers on nice stiff stems. If conditions are suitable, we are sure you will have no trouble to have a continuous cut of blooms from this variety, and we are sure your employer will like it very much.

Regarding the extra long stems that the stock exhibited possesses, we can safely say that most of it has been pinched once or twice. Some flower shows bar these double or triple-jointed roses, and we would advise you to make sure of your ground before taking these pinched stems to the show. A fancy can be pinched as early as August or even July. Another break will continue up, and as soon as this buds, it is pinched again and so on until the stems get to the length desired. Care should be taken, however, to pinch these buds when they are very small, say the size of a grain of wheat. If they are allowed to get any larger than this the wood will get hard, and it will be a little while before the new break starts up. If they are pinched on time, and the plants kept in a healthy growing condition, they will not stop very long, but continue to grow almost at once. Take at least one leaf with the bud when pinching, for if this is not done, the growth starting up will have a bud before it is more than eight inches long. Two leaves will be better, only be sure it is done on time. The joints will not show much when the buds are taken out very small, and the stems will not get crooked, as they would if the buds are allowed to attain any size. Plant your house early, in May, and you will be sure to have the plants plenty strong enough to give you these long stems, and you will also be safe in feeding a little liquid manure if it should be necessary to give the flowers the proper color and finish. Follow our notes on Rose Growing, and you will hear of the work to be done all along, and you will not be far out of the way if you follow this. Should you wish any further information about your particular case, we shall be glad to hear from you.

Ferns and Roses in Same House

Mr. Ruzicka:

Dear Sir:—Could you kindly answer the following for me: I have just planted one bench and a half of roses in a house where there are some ferns planted, and where there are some palms, crotons, etc., growing. One bench of roses is half Killarney, and the remainder Richmonds, the other half is planted to Hillingdon. The plants are just out of 4 in. pots and some are small. What success would I have with these under the conditions mentioned,

and what would be the best treatment? My idea is that the ferns and palms would require more syringing than the roses, and at times when it would be unsuitable to the roses, especially to the Killarneys. The other matter is that I planted them into soil that is too light for them, as it was prepared before I took them over. It gets very spongy, when I water them. Would it be best to tread the soil in the benches? There is too much stable manure in the soil also.

Maryland.

Yours very truly,

H. W. O.

If all is as you say we certainly feel sorry for you, being compelled to grow the roses under the conditions you mention. They will amount to very little, and if you will have to run the house to suit the palms and the crotons, we would advise you to give up the idea at once, and plant your roses some other place, or else give up growing them. There is only one way to get roses under the circumstances, and that is to have a large number of old plants on hand of all the varieties wanted, and then take a dozen or so of dormant plants into the house every few days. If these are strong, they will send out some nice shoots, and will bear a crop of fairly nice roses. As soon as these are cut off, however, the plants must be thrown out, and new ones brought in. We have had but they were all plants that were taken out of a rose house and grown outdoors one season, allowed to freeze quite a little, and then when they were lifted to be planted inside again they have nice bunches of roots, so they responded to heat and water almost at once. It is very hard to tell you how to treat your roses under these extraordinary conditions, and in fact we would not undertake it, for we would have to advise things suitable to the roses, and this would lose your crotons more than likely, and would burn up your palms and your ferns would be out of color we very much fear, for there would be no protecting whitewash on the glass. From what you say, the soil is not very suitable, and we think it would be best to replant in better soil, or else put them out. There may be a way of screening your house with cheese cloth, using the front benches for roses, and then running the cheese cloth between these and the palms, etc., which would be on the back benches or on the north side if the house runs east and west. By doing this, and managing to run your rose benches the temperature you require for these, your chances for success would be better although they would be none too good at best. If you must grow these in the same house we would do it this way. If you cannot change the soil in the benches, firm the soil that lies directly around the plants, and increase the circle as the plants grow. If you should firm all of it at once, we are afraid it would turn sour, and you could do little with it then. Do not choose a too heavy soil, and do not use up more than four inches of it in the benches, for they will not dry out the way they would in a regular rose house. We would not syringe the roses any more than you have to to keep them clean, as they would get plenty of moisture through the cheese cloth from the palms. The manure will not do so much harm if it is not fresh. Water only right around the plants, and do not water the whole bench until after the plants grow up, and the soil is full of roots. However, if possible at all, move either the roses, or the rest of the stock out of the house for we very much fear that one of the two will come to grief.

An
anniversary

This is HORTICULTURE's tenth annual Christmas number. It also marks the tenth anniversary in HORTICULTURE's career. Many changes have taken place in the ten years which have elapsed since HORTICULTURE's first issue appeared. Of the men who were most active in floriculture at that time a startling number have passed away. Of the varieties of roses, carnations and chrysanthemums which held the leadership in the floral world almost all have been supplanted. The business has grown enormously, greenhouse construction has made mighty progress and great strides have been accomplished in the way of store equipment and selling methods. And—which interests us most of all—HORTICULTURE has entrenched itself more strongly with each passing year and those who at the start could see "no room for another paper" now realize that they were mistaken and are not sorry.

Ten
years

In turning over the pages of HORTICULTURE for the past ten years we quickly find that, in the flower business as in many other respects, "history repeats itself." For instance, it is quite interesting to note how uniformly wholesale prices on certain staples have been maintained for corresponding dates from year to year. Ten years ago the same stagnation followed the Thanksgiving Day activity which we have been experiencing this year, just as it had been in the years preceding and has been in all the years since, although there was no war or notable commercial depression which could be held responsible. The general belief that market prices are lower this year than ever before at this date appears not to be well-founded, if weekly trade paper quotations in the past are any criterion. Indeed, on roses the figures given are in some cases considerably higher than those given years ago, but it must be conceded that the quality of the goods on which the quotations are given is far ahead of that of—say ten years since. With the exception of the violet and the cattleya the standard of value, generally, seems to have been maintained quite well, everything considered.

Looking
forward

What of the next ten years? When HORTICULTURE has reached its twentieth anniversary how will the record of progress read? How many of the present-day favorites in plants and flowers will have passed into oblivion and on what new lines will advances have been made? The writer of these notes hopes to be still able to swing the editorial pen after the lapse of another decade and that in the onward and upward march of advancement in the art to which all its energies are devoted HORTICULTURE may be privileged to take an honorable and honored part. Shall we see the national society quadruple its membership and become a great and efficient bulwark against malign influences and pernicious legislation? Will the paramount problem of flower distribution have come any nearer to solution? Shall we have our home-grown Dutch bulbs, forcing lilies, lily of the valley, rose stocks, rhododendrons, lilacs and azaleas? We should like to see all these things come about and there are many more ideals in every department of horticulture to which we may and should aspire. We do not doubt that the coming years will be well filled out with American horticultural triumphs. No profession offers a fairer field or a more certain recompense. To the work and the workers HORTICULTURE again pledges its best. Look forward, not backward.

To Our Loyal Friends An Appreciation

Nearly two hundred enterprising American business houses in the various horticultural and allied industries are represented by display advertisements in HORTICULTURE each week. Many of these have been doing so regularly for years. Almost without exception these are among our leading and most successful firms who would never be accused of squandering their money in unproductive expenditure.

"There are others" who should be there but are not. They paddle along unknown to or unrecognized by the thousands of readers of HORTICULTURE, and all apparently for the "penny-wise and pound-foolish" saving of a few dollars advertising cost, thus leaving the advantages of this business-getting medium for their competitors to enjoy. When they get ready to "loosen up" HORTICULTURE will gladly welcome them into the fold. We would respectfully urge upon our readers the desirability of their giving as much of their trade as possible to the good friends of this journal, the houses whose advertising support makes HORTICULTURE a possibility and to whom grateful recognition is hereby extended on this, our tenth anniversary.

The Editor

After Adjournment

Send in your subscription now for 1915.

Watch out for red spider on the azaleas. Don't neglect syringing.

HORTICULTURE—They all read it and they read it all. That makes it a good advertising medium.

The most wasteful man we know of is the one who tries to force tulips in to bloom for Christmas.

The holly business in some cities has now gone largely into the hands of the market men and the fakirs.

Keep an eye on the azaleas and remove any young leaf sprouts that start to grow around the flower buds.

Don't allow those poinsettias crowded in pans to suffer from hunger. Give them liberal food or they are liable to shed their foliage.

Clean up, clean up. Holiday customers will now be dropping in to get suggestions and look over your stock. Have everything scrupulously neat.

Prepare for cold weather shipping. Good packing is an essential to a successful flower and plant business and an expert packer is one of the best adjuncts of a store.

Cyclamen plants are very fine this year. Christmas sales of this bright, moderate priced subject should be large. The new salmon colored varieties are in special demand.

A few of those seedling carnations that "run all to grass," if planted in an out of the way corner will furnish foliage which will add 20 per cent. to the value of any bunch of carnation flowers.

Try a few strawberry plants. Now is the time to start them. Set them on a shelf well up to the glass. Have the pots clean at the start. Cleaning after the fruit has formed is sure to damage the berries.

The time is now close at hand when Old Boreas is liable to swoop down with a howling blizzard and woe be to him who is unprepared. The greenhouse owner can have no more faithful friend at such a time than one or several of those Standard Electric Thermostats. They never sleep.

Never before have there been so many varieties of flowers placed before the buyers as at the present time. Calendulas, wallflowers, snapdragons, myosotis, nasturtiums, bouvardias, rubrum lilies, and the little Fireflame and Cecile Brunner roses are found quite generally in the wholesale marts in addition to the time-honored list of standard stock. A few years ago one might have hunted a long time before finding any of the above-mentioned in the month of December.

Anniversary Greetings

To HORTICULTURE:

Many happy returns and may there be success for everyone.

ROBERT CRAIG CO.

Phila., Pa.

Dear Friend:

A joyous Christmas to HORTICULTURE and to you and yours.

ALEX. McCONNELL.

New York.

To HORTICULTURE.

We wish to congratulate you on the tenth birthday of HORTICULTURE, and we wish you the return of many more.

With kindest regards, I am,

Sincerely yours,

W. F. THERKILDSON.

Advertising manager,
W. Atlee Burpee & Co.

Arrangements were last week completed for the paying over of the \$19,000 necessary to give the Maryland Agricultural College a clear title to the property upon which it is located at College Park, Md. Several times legislatures have objected to appropriating money on the ground that the college did not have a clear title to the property. As a means to an end it has been considered advisable for the State to foreclose its mortgage and for the college to buy it in at the foreclosure sale.

Let Brotherly Love Prevail

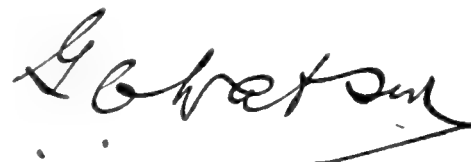

Our esteemed editor thinks a word of Christmas greeting from "the banks of the green Delaware" (as Tom Moore put it)—to his countless readers in the United States and Canada—and the rest of the Anglo-Saxon world—is in order. It's a long way from William Penn to the present minute. But even then (in Wm. Penn's time) they had their troubles. They had to import bricks. Today you can see some of the old relics around Philadelphia, built of the original imported. But William Penn never felt that he had to kill an Indian to get his trade. On the contrary he made friends with the Indian, paid for what he got, and never had to fight anybody. The Pilgrims and Puritans were not nearly as wise. If we may believe history—when they landed—

"First they fell upon their knees and praised the Lord,
And then got up with fire and sword,
And fell upon the Aborigenes!"

There is still a large leaven of the William Penn spirit about Philadelphia, and we trust she will long remain a Beacon and a shining light to the rest of the country. Especially as regards morality in business. In many other parts of the country the Ten Commandments seem to be a dead letter. Of course we do not mean by that, that we refer to any reader of HORTICULTURE. We know very well that they do business differently.

This greeting therefore is:—to gird up your loins—and stand by the Wm. Penn standard! We are all one big family—all friends, and we must be true to the truth and love one another. Cheating, lying, stealing, killing—in all their varied forms and modifications, must be resolutely banished from our daily life and dealings!

Let brotherly love prevail!

THE VALUE OF THE TRADE JOURNAL

The dominating idea of the trade press is greater efficiency. The increased efficiency of the modern business man, and this applies to florists and general horticulturists as well, is due in large part to the Trade Journal. We make the above parenthetical reference to florists, nurserymen, and general horticulturists because it is widely conceded by prominent men in the trade that a majority of its members are poor business men. Why this should be so is difficult to understand, but the fact remains that too many ornamental horticulturists manufacture their product in hit or miss fashion. The same applies to the retail distributors of flowers and plants. The producer who guesses the significance of the term "manufacture," and realizes that his product requires just as much efficiency in its production as that of automobiles, furniture, or any other object in the factory, is the one who is most likely to attain success. Should the reader question the service rendered by the trade paper in this connection, consideration of the facts will demonstrate the truth. In the first place, a medium for the discussion of new ideas is provided; secondly the trade paper has developed new ideas of its own initiative.

The best place to get a clear, authoritative and complete discussion of a new plan for improving methods of production or management is in the pages of the trade paper. You can count on its being there. Any discovery of a better system of production or an improved method of handling material, is fairly likely to find its way into the trade papers sooner or later.

The big men of every business are invariably the men who read their trade papers most closely. Of course we cannot say that they are live wires because they read trade papers; it may be a cause instead of an effect. But it is definitely true and a very significant fact that the men who are making the biggest successes are those who are using the trade papers in a way calculated to get out of them all the value that they possess.

The modern trade paper performs a definite service. It has something of value to say to its readers, be it the experiences of members of the business, news items or market reports. No merely general publication could ever hope to possess the definite value that the trade paper holds for the man in the business it reaches.

Right here is where the trade paper comes in as a productive advertising medium. Grower, wholesaler, retailer, from production to distribution, all are intensely interested in the service each is able to render. The grower and wholesaler are selling their goods to the retailer. The retail florist sells his product to the general public. But the retailer reads his trade papers if he is even only one-half progressive. He reads it for new ideas, for news, and for the

new articles that are being advertised. One grower has something to sell to other growers, a new seedling, a fine strain of flower, or cuttings in quantity. He wants retailers to demand his latest variety or growers to grow it. What better medium for letting the trade know what you have to sell than the papers that cater to the trade? Subscribers and advertisers in the trade papers meet on intimate terms. No wide gulf exists between reader and advertiser as is the case in many daily newspapers, where everything from fake remedies to automobiles is advertised. Only the products that the reader is interested in are advertised in his trade paper and he is going to buy them as a necessary part of his business.

The advertiser in the trade paper has a comparatively easy task by reason of the intelligent receptivity of the reader. His advertisements, if read at all, are bound to be read by those who know and appreciate what he has to sell.

S. L. F.

TEXAS ROSES FOR SAN DIEGO EXPOSITION.

I want to make an appeal to the florists of Texas in behalf of the rose display at the San Diego Exposition.

If we can send 2,000 or 3,000 rose bushes to San Diego, the Horticultural Committee will see that we get a nice space and that they will be well displayed. This is certainly a most economical way of advertising Texas and her products.

Now it is not going to tax any florist very heavily in sending say fifty roses of the best variety to San Diego prepaying the express charges, and addressing them to—J. C. Knox, care San Diego Exposition, San Diego, California. The committee will do the rest. The shipper's name will be displayed in his exhibit and the exhibit, as a whole, will be marked "Texas-Grown Roses."

It seems to me that this is certainly an opportunity for the florists and nurserymen of Texas to show what we grow in this great state in the line of roses, and I certainly hope that this appeal will meet with ready response. I would like to hear from those who expect to send something and would like to be advised time shipment is made. Now don't put this off thinking the other fellow will take care of the shipments and yours may not be necessary, for we all may be of the same opinion and have no display. Attend to this now as this is a good shipping season and by the time they reach California and are planted they will be in just at the right time for the opening of the Exposition.

I trust that every florist will feel that he is under an obligation to respond to this call and make shipment promptly and that we may have a nice display in due time.

Yours respectfully,

R. C. KERR, President,
Texas State Florists' Assn.

THE VALUE OF SODA WHEN POTASH IS SCARCE.

Owing to the European war, farmers may have difficulty in getting their next year's potash from Germany, the natural source of most of it. It is especially important at this time, therefore to know to what extent soda (Na_2O) can replace potash (K_2O). A field experiment which has been conducted for twenty years at the Agricultural Experiment Station of the Rhode Island State College is probably the most important source of such information in this country.

The following results (in pounds), selected from those secured in 1914 will serve to indicate the value of soda.

15 lbs. potash per a. without soda:		
Carrots.	Potatoes.	Onions.
252	153	21
15 lbs. potash per a. with soda:		
Carrots.	Potatoes.	Onions.
306	183	63
45 lbs. potash per a. with soda:		
Carrots.	Potatoes.	Onions.
390	249	138

Each preceding weight represents the total yield from small triplicate areas. Equal amounts of nitrogen and of phosphoric acid were applied in each case. As the crops grew side by side, although not on equal areas, indications are afforded of the relative deficiency of potash, and value of soda, for the three crops.

From three to four tenths of the actual increase caused by both the soda and the additional amount of potash is seen to have been caused by the soda. The deficiency of potash was so great, with only 15 pounds of potash, that the addition of soda did not result in normal yields. Had the deficiency been less and a larger amount of soda been added, it is probable that practically normal yields would have been obtained. Two weight parts of soda are chemically equivalent to three parts of potash and the two materials were added in this proportion in the experiment.

Owing to the fact that the manurial treatments had been continued for a number of years, the potash had not only become very deficient in certain plots, but the soda must have exerted, previously, much of its effect.

The experiment has indicated during its course that an application of soda to most of our granitic soils would insure the production of normal crops, if potash should be unobtainable in 1915.

One weight part of soda is equivalent to about three parts of nitrate of soda and about two parts of either crude soda ash (sodium carbonate) or common sale. Aside from being a source of soda, the soda ash would reduce the acidity of acid soils; for this purpose it is equivalent to an equal weight of ground limestone.

There is soda enough in the moderate application per acre of 200 pounds of nitrate of soda and 270 pounds of soda ash to be equivalent to 300 pounds of potash; so that, if only a third of it really took the place of potash, it would be temporarily equal to adding 100 pounds of the latter.

BURT L. HARTWELL, Director,
Kingston, R. I.

AMERICAN CARNATION SOCIETY

TWENTY-FOURTH ANNUAL MEETING AND EXHIBITION TO BE HELD IN BUFFALO, JAN. 27-28, 1915.

OFFICERS OF THE AMERICAN CARNATION SOCIETY:

President, S. J. Goddard, Framingham, Mass.; Vice-President, S. A. Anderson, Buffalo, N. Y.; Secretary, A. F. J. Baur, Indianapolis, Ind.; Treasurer, F. E. Dorner, Lafayette, Ind.

Directors—Eug. Dailedouze, Brooklyn, N. Y.; Peter Fisher, Ellis, Mass.; F. R. Pierson, Tarrytown, N. Y.; S. J. Goddard, Framingham, Mass.; F. Burki, Gibsonia, Pa.

Judges—R. Witterstaetter, Cincinnati, O.; Peter Olsem, Wilmette, Ill.; C. W. Johnson, Morgan Park, Ill.; Eug. Dailedouze, Brooklyn, N. Y.; Wm. Nicholson, Framingham, Mass.; E. A. Stroud, Stafford, Pa.

OFFICERS BUFFALO FLORISTS' CLUB:

President, Wallace S. Eiss; Vice-President, Rudolph E. Boettger; Treasurer, Emil C. Brucker; Secretary, Wm. Legg.

Directors — Wm. J. Palmer, Chas. Sandiford, Joseph Streit.

Headquarters of the Carnation Society will be at Hotel Iroquois, where the exhibition and meetings will be held. Everything, including the banquet, will be held in this building and the members will find it unnecessary to leave the building during the entire convention.

The exhibition hall and other accommodations compare favorably with any that have ever been placed at our disposal, so that with the accessibility of Buffalo from all directions, this should be a banner convention.

A banquet will be served on Thursday evening, January 28th. Each member will pay for his plate, as was done with very satisfactory results last year. Register as soon as you arrive at the exhibition hall and secure your banquet ticket.

The exhibition will be reserved for the members until 8.00 P. M. on Wednesday and again until 2.00 P. M. Thursday, to enable them to thoroughly inspect the exhibits. The public will be admitted on Wednesday evening and again on Thursday afternoon and evening. No admission will be charged the public at the door.

The first session will be called to order at 8 P. M. Wednesday. Papers are being prepared on live subjects and opportunity will be afforded the members to discuss them fully. Reports will be submitted by the officers and new officers will be elected.

If you have perplexing problems, the most expert growers in the country will be on hand to help you solve them. Submit your questions to the secretary in writing, before the convention, if possible.

THE EXHIBITION.

The exhibition will be staged in the ballroom, which is conveniently located on the mezzanine floor, where it will be of easy access by either stairway or elevator, making it possible to accommodate unlimited crowds. The decorations in these rooms are most beautiful and will make a splendid setting for the exhibit.

There will be ample room to accommodate all the competitive classes, besides any exhibits of novelties the members may wish to show. There will be a number of table decorations, similar to those arranged for the Cleveland exhibition, the necessary blooms to be supplied by the disseminators of new varieties. If you have a new variety you wish to show, please arrange for space in advance, if possible. No charge will be made for such space.

For space for non-competitive exhibits, application should be made to S. A. Anderson, Buffalo, N. Y., stating probable amount of space desired. (See rules governing exhibits).

All express packages should be addressed in care of S. A. Anderson, Hotel Iroquois, Buffalo, N. Y. Express charges on all packages must be prepaid.

Please use regular entry blank in making your entries. Enter in every class in which you are likely to show, as it is easier to scratch an entry than to make a new one at the last minute. A charge of \$2.00 will be made for each entry made after January 17.

Also make out list of name cards wanted, stating how many of each kind.

PREMIUM LIST FOR 1915. American Carnation Society.

SECTION A

Open to All Varieties, Seedling or Standard Sorts.

Class	1st	2nd
1. 100 blooms White	\$10.00	\$6.00
2. 100 blooms Flesh Pink.....	10.00	6.00
3. 100 blooms Light Pink, not lighter than Gloriosa nor darker than Winsor.....	10.00	6.00
4. 100 blooms Medium Pink, darker than Winsor, but not darker than Mrs. C. W. Ward	10.00	6.00
5. 100 blooms Dark Pink, darker than Mrs. Ward and including all so-called cerise not dark enough to be classed as red	10.00	6.00
6. 100 blooms Red or Scarlet	10.00	6.00
7. 100 blooms Crimson or maroon	10.00	6.00
8. 100 blooms Yellow or Yellow Variegated	10.00	6.00
9. 100 blooms White Variegated	10.00	6.00
10. 100 blooms Flaked, Prosperity type	10.00	6.00
11. 100 blooms any other color.	10.00	6.00

SWEETSTAKES

For sweepstakes in Section A, see Section F for special premiums.

SECTION B

Open to All Varieties Disseminated Prior to July, 1914, 50 Blooms to Each Vase.

Class	1st	2nd
12. White Enchantress.....	\$5.00	\$3.00
13. White Wonder.....	5.00	3.00
14. Any Other White.....	5.00	3.00
15. Enchantress Supreme.....	5.00	3.00
16. Pink Delight.....	5.00	3.00
17. Any Other Flesh Pink.....	5.00	3.00
18. Gloriosa	5.00	3.00
19. Any Other Light Pink.....	5.00	3.00
20. Mrs. C. W. Ward.....	5.00	3.00
21. Any Other Medium Pink.....	5.00	3.00
22. Rosette	5.00	3.00
23. Any Other Dark Pink.....	5.00	3.00
24. Beacon	5.00	3.00
25. Any Other Scarlet.....	5.00	3.00
26. Pocahontas	5.00	3.00
27. Any Other Crimson.....	5.00	3.00
28. Benora	5.00	3.00
29. Any Other White Variegated	5.00	3.00
30. Yellow Prince	5.00	3.00
31. Any Other Yellow or Yellow Variegated.....	5.00	3.00
32. Any Flaked Variety.....	5.00	3.00
33. Any Other Color, same as in Class II.....	5.00	3.00

SECTION C

For Varieties Disseminated in the Season of 1913-1914, 50 Blooms to Each Vase.

Class	1st	2nd
34. Matchless, premium offered by Cottage Gardens Co.,	\$6.00	\$4.00
35. Gorgeous, premium offered by Peter Fisher.....	6.00	4.00
36. Champion, premium offered by F. Dorner & Sons Co.	6.00	4.00
37. Princess Dagmar, premium offered by Patten & Co.....	6.00	4.00
38. Philadelphia Pink premium offered by S. S. Skidelsky & Co.	6.00	4.00
39. Peerless Pink, premium offered by Chicago Carnation Co.	6.00	4.00

SECTION D

American Carnation Society Medals.

- Class
40. A gold medal will be awarded to the best vase of 100 blooms of any variety. Must score not less than 90 points.
A silver medal will be awarded to the second best vase in this class. Must score not less than 88 points.
A bronze medal will be awarded to the third best vase in this class. Must score not less than 86 points.
Blooms must be staged in the society's vases until the judging has been finished. After the awards have been made, flowers may be changed to other vases, if desired.

SPECIAL S. A. F. & O. H. MEDALS

For Undisseminated Varieties of American Origin.

- Class
41. A silver medal will be awarded to the best vase of 50 blooms, any color. Must score not less than 88 points.
A bronze medal will be awarded to the second best vase in this class. Must score not less than 86 points.

FRED DORNER MEMORIAL MEDAL

This Medal is Offered Under the Following Conditions:

- Class
42. A gold medal will be awarded to the best vase of 100 blooms of any undisseminated seedling carnation (sports not admissible).
The variety must have been in cultivation not less than three years and must score not less than 85 points, judged by the American Carnation Society's scale of points.
The medal to be awarded to the originator, who need not necessarily be the exhibitor, and can be awarded to the same variety only once.
To be eligible to compete for this medal, 50 blooms of the variety must have been shown at a previous exhibition of the American Carnation Society in a preliminary class and scored not less than 80 points.

TWO PROMISING NEW DAHLIAS.

MRS. ALFRED I DU PONT

GERTRUDE MANDA

The above illustrations show the character of blooms of two of the set of seedling dahlias raised by W. A. Manda, South Orange, N. J., and soon to be disseminated. These novelties have been exhibited at several places this season and have been favorably received wherever shown.

The following varieties have qualified and are eligible to compete for the medal this year:

"Alice," by Peter Fisher, Ellis, Mass.
 "Alice Coombs," by Albert Roper, Tewksbury, Mass.
 "Mrs. C. E. Akehurst," by C. E. Akehurst, White Marsh, Md.

43. A preliminary competition will be conducted at this meeting for eligibility to compete for the medal next year. Fifty blooms must be shown of any undisseminated variety.

SECTION E

Certificate of Merit.

Class

44. New, or undisseminated varieties may enter for this Certificate of Merit, under the following conditions:
 A variety may be entered under a name or number, but a name must be furnished before a certificate will be issued.
 An entry fee of \$5.00 will be charged for each variety entered when entry is made.
 Not less than 50 blooms must be shown and the variety must have been bloomed not less than three years.
 To receive a Certificate of Merit, a variety must score eighty-five or more points.
 Varieties may be staged and judged in this class at any time during the convention. A vase of a variety competing in an open class may also be entered for Certificate of Merit.
 In all other respects, except as stated above, the rules governing the general classes must be observed.

PRELIMINARY CERTIFICATE

Class

45. This may be competed for by a two-year-old variety. Twelve blooms must be shown and a \$2.00 entry fee will be charged for each variety entered. The variety must be properly labeled under name or number. It must score not less than 85 points and may be staged and judged at any time during the convention.

SECTION F

Special Premiums

Class

46. Ten dollars in gold will be awarded to the vase holding in best condition to the end of the exhibition. To be eli-

gible, the vase must have won a premium in its class. Premium offered by Fred Burki.

A silver cup, valued at \$30.00 is offered by Hitchings & Co. as sweepstakes in section A. (No entry required for this).

NON-COMPETITIVE EXHIBITS

Space will be provided for non-competitive exhibits.

Retailers are especially invited to avail themselves of this opportunity to show madeup work in various forms.

Where special location or special arrangement of tables is desired, application should be made to Mr. S. A. Anderson not later than two days before the opening of the exhibition.

BOSTON TO BUFFALO.

Any one in this section contemplating attending the American Carnation Society Convention, to be held in Buffalo, January 27-28, 1915, can receive any information regarding transportation, etc., by communicating with me. I am promised by my friends from around Boston that they are going to exhibit the greatest number and best quality of carnations that was ever taken from this section. I am also hoping to see the largest delegation of carnation growers on my suite that has ever left Boston on a like trip.

Very truly yours,

S. J. Goodard, Pres't.

Framingham, Mass.

NEW CARNATIONS REGISTERED.

By J. D. Thompson Carnation Co., Joliet, Ill.

Superb (Gloriosa X Enchantress). Color deep flesh pink. Size 3½ to 4 inches. Highly built centre, but not crowded. Long strong stem. Non-splitting calyx. Easy grower and splendid keeper. Very fragrant.

Hero (Beacon X White Perfection). Color deep rose pink. Size 3 to 3½ inches. Well formed flower with slight-

ly serrated edges. Non-splitting calyx and wiry stem. Very free bloomer and excellent keeper.

Vera (Beacon X White Perfection). Light pink with rosy tint. Size 3 to 3½ inches. Well formed flower with serrated petals. Free grower and does not split.

Comet (White Wonder X Woden-ethel). Pure white. Size 4 inches and over. Deeply serrated and wavy petals. Very high centre, forming half sphere when fully developed. Very fragrant. Free bloomer and does not split.

By E. H. Blameuser, Niles Centre, Ill.

Cerise Winsor—Sport from Winsor. Cerise pink. Size 3 inches. Habit like Winsor except that the foliage is darker green and the buds are larger.

Note: Sports can be registered only provisionally, until blooms have been submitted to the judges, to determine their distinctiveness.

A. F. J. BAUR, Sec'y.

The monthly meeting and dinner of the Horticultural Club of Boston was held at the Parker House on Wednesday evening, Dec. 2. Guests of the club were L. Merton Gage and A. P. Dewar. Splendid vases of roses, contributed by L. J. Reuter, adorned the table. The varieties were Jonkheer J. L. Mock, Prince d'Arenberg, September Morn and Francis Scott Key. The present unfortunate condition of the American gladiolus growing industry resulting from Dutch competition was a prolific theme for debate. The outlook for home production of many horticultural products now imported and the means whereby this may be promoted also was vigorously discussed.

CLUBS AND SOCIETIES

ALBANY FLORIST CLUB.

The regular monthly meeting of this Club was held on Thursday, Dec. 3rd, at the Cut Flower Exchange. F. A. Danker reported progress, both on the Convention and Flower Show Committees. L. H. Schaefer made an interesting report on the January banquet. The entertainment committee were authorized to invite the delinquent members to the banquet provided that they expect to return to the club and live up to the rules.

J. Snyder read a paper on violets, their habits, care, bunching and delivery to florists. He said there is no plant grown which is as susceptible to changes of conditions as the violet. The light, air, temperature, moisture of soil and atmospheric conditions have to be looked after continually and changed sometimes three or four times a day to meet with the changes of weather conditions, and those growers who do not give these matters attention with vigilance are the ones who have poor weak plants, polluted with disease. The lime shading which remains on the greenhouses in the summer gets black and gives a deep dead shade which is weakening to the growth and should be scraped or brushed off and another coat applied which will give a soft pleasant light.

The main secret of violet growing is in keeping the plants growing all through from the time they are planted until the finish; not an overgrowth in early stages caused by a surplus of water, but a steady even growth and when the plants are not making that steady growth the observant grower will find the cause and remedy it at once. Through the summer in particular it is generally found due to improper shade, when the lime on the glass gets black as before mentioned, causing the soil to become heavy and sour. The appearance of mold on the surface is a warning to the grower that his light is not right and if left, the plants will very soon weaken and grow only short roots near the surface and in these conditions they are bound to turn out a failure and not produce a good crop. Many growers have their picking done by their children before and after school or whenever it is convenient and oftentimes the violets are a day or more old before they are shipped, whereas they should be picked and bunched and have an hour or two in a tank of water and then be on their way to the florist or market. Florists often complain of violets having a bad odor and a smell of the soil. This is caused by foul soil and black rot or black root, which go together.

After the above had been read the election of officers for the coming year was in order. The following were elected: President, F. R. Bilson; vice president, Thomas Tracey; secretary and treasurer, Robert Davidson; trustees, Fred Henkes, Charles Sanders and J. J. Haggerty.

About 40 members were present.

President Henkes announced that the next meeting will be held at the exchange Thursday, Jan. 7th, 1915. After the installation of the officers the members will proceed in a body to Keeler's Hotel to participate in the January banquet of the club.

MINNESOTA HORTICULTURAL SOCIETY.

The forty-eighth annual meeting of the Minnesota Horticultural Society, was held Dec. 1 to 4. This was a notable gathering. This society has the most members—the greatest energy and enthusiasm of any society in America. It now has a membership of over 3,000 and is aiming to make it 3,500 the coming year, it has among its members some of the ablest men in the land.

C. G. Patten is doubtless the world's greatest pomologist. He has been hard at work for fifty years developing fruits suitable to the bleak Northwest. He has succeeded admirably. We have visited his grounds and seen his work. Some of his new creations are wonders of vigor and hardiness. Then there is Prof. Hansen, who has made four trips to Siberia. Prof. Waldron of North Dakota gave a fine paper on laying out the home grounds.

The meeting was held in the large chapel of the Agricultural College, which seats 1,000 persons. The different phases of orcharding, vegetable and flower gardening were discussed. Many of the students attended and three of them gave well prepared and able addresses. The permanent home of the society will probably be located on the college grounds, for the society wishes to keep in touch with the students and secure their energy and co-operation for the future.

Thursday night was the banquet, where men became boys; where wit and wisdom flowed freely. It was a notable time. Altogether the meeting was a feast of good things; everything went off finely. A thousand people listened to the address "The Moral Influences of Horticulture."

C. S. HARRISON.

York, Nebr.

PARK INSTITUTE OF NEW ENGLAND.

HORTICULTURE has been chosen by this Association as its Official Organ.

Program for Second Meeting to be held in Worcester, Mass., on December 16, 1914:

"Park Organization," by Chas. E. Putnam, Engineer of Parks, Boston, Mass.

"Park Administration and Legislation," by Jas. B. Shea, Deputy Commissioner of Parks, Boston, Mass.

"Park Accounts," by G. A. Parker, Superintendent of Parks, Hartford, Conn.

There will be other papers on Recreation subjects.

G. H. HOLLISTER, Manager.
Westland St., Hartford, Conn.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The meeting of this club at the Fort Pitt Hotel on the evening of December 1st was very enthusiastic and quite well attended. Jno. S. Gillespie, State Engineer, gave an informal talk on Good Roads. Early in his remarks he established himself in the good graces of his hearers with his Scotch stories which, being Scotch himself, were given with the added charm of the Scotch dialect. Mr. Gillespie thinks the last word on Good Roads has by no means been spoken. The good road of yesterday is the poor road of today, and while the automobile has been the greatest factor in creating the desire for good roads, the heavy auto truck is the greatest factor in their destruction.

S. S. Pennock-Meehan Co. exhibited roses Prince d'Arenberg, Prince de Bulgarie and Jonkheer Mock, and carnation Mrs. C. E. Akehurst. The opinion of the committee on these blooms follows:

Unanimous thanks to S. S. Pennock-Meehan Co., for a beautiful and liberal exhibition of the following flowers: Roses—Prince d'Arenberg, Jonkheer Mock, Prince de Bulgarie (Mrs. Taft), pale Enchantress pink. A very beautiful and desirable rose, and Carnation Mrs. C. Edward Akehurst.

President McCallum gave an exhibition of a process he learned in Australia for the lengthening of the preservation of the flowers on a blooming plant. Taking a thrifty, blooming plant of *Primula obconica*, he washed the soil from its roots. Then placing some wet sphagnum in a shallow dish he spread out the roots of the plant thereon, and covered them thickly with wet moss, supporting the plant in an upright position as it had been in the pot. It is claimed that a plant treated this way, will remain in bloom much longer than it would surrounded by soil in the pot. Mr. McCallum took the plant away with him and will bring it before the club at the next meeting that all may see the success of the process. This scheme, while not new, is practically new to the florists in this vicinity so far as I know. There were some pleasing poinsettias, begonias and cypripediums exhibited by the Bureaus of Parks, Northside and Schenley. A rising vote of thanks was given Mr. Gillespie for his address, and the secretary was instructed to thank the S. S. Pennock-Meehan Co. for their very fine exhibit.

At the next meeting of the Club in January the nomination of officers for 1915 will be taken up.

H. P. JOSLIN, Sec'y.

NEWPORT HORTICULTURAL SOCIETY.

This society held its annual meeting on Dec. 8th, and the following officers were elected for the ensuing year: President, William MacKay; first vice-president, John B. Urquhart; second vice-president, James Bond; treasurer, A. K. McMahon; recording and financial secretary, William Gray; sergeant-at-arms,

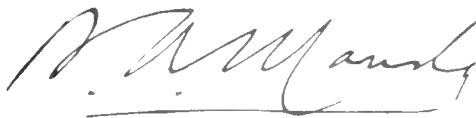

Greetings for the
Tenth Anniversary of
Horticulture

and to its able Editor

Strong and fearless exponent of
the Profession of Horticulture in
all its branches.

Best wishes for the increasing,
continuous prosperity, and moral
support due from the Horticultural
Profession.

Yours very truly,

A handwritten signature in cursive script, appearing to read "R. A. Mandy", with a horizontal line drawn underneath the name.

TWO PLEASING FLORAL ARRANGEMENTS.

BASKET OF DAHLIAS AND AUTUMN OAK FOLIAGE

QUAIL DINNER FAVOR OF ONCIDIUMS

We are indebted to Max Schling of New York for the photographs which appear herewith and which need no description; also for the picture of an

arrangement of roses and Barberton daisies which appears on another page. The Barberton daisy, *Gerbera Jamesoni*, is not grown or raised as much

as it deserves, for florists work. Its scarlet and vermilion tinted starry blooms have a very rich effect when properly used and their keeping qualities are of the best.

James Watt. Executive committee, with the above officers: Richard Gardner, Alexander MacLellan, Bruce Butterson, James J. Sullivan, Andrew L. Dorward, James Robertson, Fred Carter, Andrew S. Meikle and Alexander Fraser. Reports of the treasurer and secretary show the society to be in a very satisfactory condition.

The coming year promises to be the most eventful one in the history of this society, as it has already voted to join with the following named organizations in holding exhibitions in Newport: American Sweet Pea Society and Newport Garden Association on July 8th and 9th; Newport Garden Club in August; also monthly shows through the summer months with the Newport Garden Association. Lectures on gardening subjects are also provided for through the winter months. J. ROBERTSON

FLORISTS' CLUB OF WASHINGTON.

J. H. Van Zant, of the Botanic Gardens, and J. Malcolm Nicholson and R. J. Leimer, both of Hyattsville, Md., were elected members of the Florists' Club at the December meeting. The evening was given over mainly to a discussion of civic matters although some little time was devoted to the matter of the trip to the Exposition in San Francisco next year. This latter is being kept in the limelight with a view to getting together as large a party as possible to form the Washington contingent. Special rates have already been quoted to the club.

William F. Gude entertained those present with an account of the good work being done in Frederick, Md., by Frank Hargett, the originator of the educational garden in that city, and Leonard E. Kolmer, of the Frederick Post, who has been assisting him. He

told of how their efforts were gradually meeting with success in the movement to turn backyards into flower gardens and thus fostering a love for flowers and incidentally creating an additional market for the commercial grower.

NATIONAL ASSOCIATION OF GARDENERS.

The meeting of this association in Philadelphia and the banquet on Wednesday evening were superlatively successful. J. W. Everitt, Glen Cove, N. Y., was elected president; W. S. Rennie of San Francisco, vice president; M. C. Ebel, Madison, N. J., secretary; James Stuart, Mamaroneck, N. Y., treasurer. Full report next week.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public notice is hereby given that the Conard & Jones Co., West Grove, Pa., offers for registration the Cannas described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Description—The large, orient red flowers are borne on firm, upright stems, just enough above the foliage to show the entire head. The foliage itself is a dark bronze-green with emerald shadings, the ribs a darker bronze. Single roots of this canna produce from five to twelve grand bloom-stalks in a season, and each stalk makes two or three bloom-heads, with

from twenty to thirty perfect flowers on each. A truly magnificent sort, an early and continuous bloomer. Height, 4½ feet.

Name—"Pocahontas" (Bronze Olympic.)

Description—A large-flowered, green-leaved, cream-white canna with faint pink dots on each petal and sulphur-colored tongue. When a short distance from the flowers they appear pure white. The heads average eight to twelve blooms on each, and each bloom-stalk generally has three heads of flowers, which bloom in succession, thus keeping the plant in bloom all the time. Height, 4 feet.

Name—"Flag of Truce."

Description—If it were not for "Beacon", which we introduced in 1912, this canna would be in a class by itself. It blooms incessantly and keeps sending up new bloom-stalks about every week, until cut down by frost. Dark ox-blood-red and especially suitable for mass planting. Height, 3 to 4 feet.

Name—"Dragon."

Description—An intense bright yellow flower with a decided dash of red in the throat, extending well up on the petals and showing on the tongue also. Its principal values lies in its ability to resist bleaching better than any other yellow canna. It flowers early. Height, 3 to 4 feet.

Name—"Princeton."

Description—Color is reddish orange, mottled with carmine and edged with yellow. The tongue is yellow and densely spotted with carmine. When planted in solid beds or rows produces a dazzling effect. Height, 5 feet.

Name—"Gaiety."

JOHN YOUNG, Sec'y.

CLUB AND SOCIETY NOTES.

At the meeting of the Holyoke & Northampton Florists' and Gardeners' Club held at the store of R. S. Carey, South Hadley Falls, Mass., the following officers were elected: President, R. S. Carey; vice-president, A. Butler of Northampton; secretary and treasurer, James Whiting of M. A. C.; executive committee, G. H. Sinclair, Holyoke, Mr. Dörner of Smith College and Geo. Rackliffe of Holyoke.

Vice-president Wetterlow presided at the regular meeting of the North Shore Horticultural Society, Dec. 4, at Manchester, Mass. John Kirkegaard gave an interesting lecture on Insect Pests, speaking briefly on the leopard moth, gypsy and brown tail moths, elm leaf beetle, canker worm and many others. A committee of seven was appointed to make arrangements for the annual banquet. The Society adopted a set of rules presented by the library committee. The next meeting will be held Dec. 18 and will be opened at 7.30 sharp.

WILLIAM TILL.

Magnolia, Mass.

The Worcester County (Mass.) Horticultural Society held its annual meeting on Saturday, Dec. 5. Edward W. Breed of Clinton was elected president; Arthur J. Marble, Charles Greenwood and Herbert R. Kinney, all of Worcester, vice presidents; Leonard C. Midgeley of Westboro, secretary; Miss Lucy M. Coulson of Worcester, librarian; Burt W. Greenwood of Worcester, treasurer; Joseph A. Allen of Auburn, David L. Fiske of Grafton,

Henry B. Watts of Leicester, Edgar M. Bruce of Leominster, Henry A. Cook and Fred J. Reed of Shrewsbury, Mrs. J. Frank Record of West Boylston, William McAllister of Whittinsville, William Anderson of South Lancaster J. Lewis Ellsworth, Frederick H. Chamberlain, Mrs. Olive G. Davidson, Walter D. Ross, James E. Draper, Allyne W. Hixon, Simon E. Fisher, Mrs. Percy G. Forbes, Henry H. Browning, Joseph K. Greene, Benjamin M. Chamberlain, Louis J. Kendall, Frank J. Kinney, H. Ward Moore, Burton W. Potter, George C. Rice, Howard E. Sumner, William J. Wheeler, Albert H. Lange and Charles W. Wood all of Worcester, trustees.

Reports showed that the total receipts for the year amounted to \$25,903.29 and the expenditures to \$16,194.30. The society voted appropriations of \$5,500 for exhibitions during the coming year.

At the regular meeting of the Southampton (N. Y.) Horticultural Society held Dec. 3, W. L. Jagger read a paper entitled, "The Past and Present of Southampton on Social Lines," which was very heartily applauded. A discussion followed on perennials and roses, how best to care for them during the winter months, also as to which evergreens were best adapted to this section. The question was asked, "Which are the twelve best perennials blooming in July?" Perhaps HORTICULTURE could help us on that point. The meeting was very interesting and instructive.

We should hesitate about naming twelve "best" perennials blooming in

July. There are so many elegant subjects that would come under that class and then locations and conditions vary so much. Some of the best July blooming perennials are the following: Gypsophila paniculata; Euphorbia corollata; Hypericum Moserianum; Clematis Davidiana, and recta; Salvia azurea; Chrysanthemum maximum Polar Star; Callirhoe involucrata; Malva alcea; Spiraea palmata; Monarda didyma; Pentstemon hybridus; Iris Kaempferi; Aconitum napellus; Achillea ptarmica Perry's variety; Aster alpinus speciosus; Anchusa italica Dropmore; Campanulas lactiflora and persicifolia grandiflora; Coreopsis grandiflora; Delphiniums hybridum, belladonna and chinensis; Hemerocallis aurantiaca major; Hibiscus moscheutos; Oenothera Youngii; Phlox suffruticosa Miss Lingard; Plumbago larpenae; Platycodons grandiflorum and Mariest; Lychnis chalcedonica; Lythrum salicaria; Hardy Carnation Miss Kent; Pentstemon barbatus; Yucca filamentosa; Veronica longifolia subsessilis.—ED.

PUBLICATIONS RECEIVED.

The Practical Book of Outdoor Rose Growing. By George C. Thomas, Jr. The publishers of this beautiful volume, J. B. Lippincott Co., of Philadelphia, have every reason to feel proud of it, and we believe it is destined to meet with a most cordial, popular reception and a large sale. It certainly is well worthy of this, not for its beauty alone, but for the intrinsic value of its contents. We do not believe there has been anything ever published in this country on the subject of roses to compare with this book.

We are told that it has been a life-long hobby with the author to try out all known varieties of his favorite flower, and that he has achieved remarkable success in rose growing, the garnered information with which his pages are teeming is conclusive evidence of the truth of the statement.

In "The Practical Book of Outdoor Rose Growing," Mr. Thomas has put his vast stores of practical knowledge at the service of the rose lover. The directions covering every detail of rose-

culture—what varieties will grow out-of-doors in this climate; when to plant, how to plant, how to prepare the soil, and exactly what treatment should be given each variety—are the result of careful and exhaustive tests and experiments and years of successful practice. In truth the volume is one of exact, complete and authoritative information, adapted to ready reference.

The general scope of the chapters include the Propagation of Roses, by the various methods of cutting, budding, grafting, layering, suckering and by seeds; The Best Varieties with Their Characteristics and a full tabulated rose list of seventeen closely printed pages, giving names, habit, hardiness, color, etc.; Location and Preparation of Soil; Ordering and Planting; Pruning; Cultivation and General Information and Hints on Hybridization. From the standpoint of the experienced rosarian these chapters are practical and strictly up-to-date in every detail.

There are 96 exquisite plates illustrating in natural colors the finest of the modern varieties. These, we are

informed, are the result of three years' work on the part of the author in making and perfecting auto-chrome color photographs from perfect blooms. The greater part of the varieties thus pictured are Hybrid Teas.

These exquisite illustrations in conjunction with fine typographical make-up and artistic binding, render the book a thing of beauty in keeping with the subject of which it treats. As a text-book for the gardener, professional or amateur, a gift-book for the lover of flowers, and an art-book for the lover of the beautiful, we can confidently and enthusiastically commend it. The price is \$4.00 net. Postage extra.

I Want Room

A surplus of S. A. Nutt, John Doyle and Perkins GERANIUMS, in 2½-in. pots, \$15.00 per 1000. Other varieties, 2½-in. pots, \$18.00 per 1000.

ASPARAGUS Sprengerl. 3-in., \$3.00 per 100; 4-in., \$4.00 per 100.

J. E. FELTHOUSEN
154 Van Vranken Ave., SCHENECTADY, N. Y.

Obituary

J. F. Mallon.

Joseph F. Mallon of the firm of James Mallon's Sons, died of pneumonia at his home in Brooklyn, N. Y., on December 1. He was in his forty-ninth year. He leaves a widow. Mr. Mallon was popular and highly respected by the florist trade.

George Cooke.

George Cooke for many years the leading florist of St. Albans, Vt., died at Chula Vista, Cal., on November 4, aged 67 years. Mr. Cooke had been a great sufferer from rheumatism and went to California a year and a half ago, in hopes that the climate might help him. He was one of the early members of the S. A. F. and served as vice-president for Vermont.

Franz Schramm.

Franz Schramm passed away at his home in Park Ridge, Ill., Nov. 25, at the age of 74 years. He was born in Germany and came to this country when a child, taking up flower growing some years later. Ill health compelled him to leave his work, to which he was greatly attached. He leaves a widow, three sons and three daughters. The funeral was from the home and interment was in Park Ridge cemetery.

John J. Connelly.

Mr. Connelly was a well-known florist of Rosemont, Pa. (a suburb of Philadelphia). He died Dec. 5th, aged 61. At one time he was postmaster of Bryn Mawr, which includes the Rosemont district, and was highly respected in the community. His term of office was during the second Cleveland administration. He did a local business only, being a grower and retailer, with a range of glass on the main avenue of the borough.

Joseph B. Robinson.

Many of our readers will be sorry to learn of the passing away of genial Joe. Robinson who, a good many years ago, was connected with the seed house of Parker & Wood in Boston and who was the life of the S. A. F. convention parties in those days. He has been in other lines of business since, his most recent position being on the staff of the paper Practical Politics. He died at his home in Dorchester, Mass., on December 5, aged 65 years. Funeral services were held on Tuesday, 8th inst.

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

Prison for Bogus Seed Man.

Newton, Dec. 5.—Sentences of from one to three years, to run concurrently, on each of eight indictments for selling adulterated clover seed, were today imposed on Oliver J. Rice of Brooklyn, who had pleaded guilty to them.

When Judge Allen R. Shay imposed sentence Rice cried: "Be merciful!" He had previously said he had a weak heart, but an affidavit made by Dr. Bruno Hood, who examined him at the county jail after he was brought here a week ago from Middlesex County, set forth that apparently there was nothing the trouble with him except that he had a defective eye and was forty pounds over weight.

Rice confessed that he had mixed with five and a half bushels of red clover seed and two bushels of crimson clover thirty-four bushels of German millet seed. He offered it for sale late last December for \$9 a bushel when the current price was \$14 and numerous Sussex County farmers availed themselves of the low cost.

The dealings on which the indictments were based were with the following farmers: William A. Farber, Burnett Drew, William Reed, David Roleson, George A. Simmons, Jeptha Randolph and Reed J. Washer.—*Newark (N. J.) News*

Supply of Sugar Beet Seed

There has been a great deal of alarm in this country over the supply of sugar beet and mangel seed which has generally been received from growers in the vicinity of Magdeburg, Germany. It is well known that a large proportion of the Magdeburg supply has actually been grown in Russia from Magdeburg stocks. We are in receipt of reliable information that the Russians are now offering these seeds direct to growers in this country, to be shipped via Vladivostok, and quotations are being made F. O. B. in that port. It will readily be seen that this will greatly relieve the sugar beet situation in our western states.

To Correct Abuses in the Seed and Bulb Trade.

An unknown correspondent has sent in a communication inspired by a recent editorial in this paper relative to the foreign salesmen who ply their trade in this country in a manner detrimental to the established seed houses and dealers here. The writer failed to add his signature, without which we cannot use the article. If he will kindly forward his name and address we shall be glad to give room to his communication.

BUSINESS TROUBLES.

Toledo, O.—Merton L. Bamer has been appointed assignee for the Henry Phillips Seed & Implement Co., 115 N. St. Clair street, with a bond of \$20,000.

NOVELTIES in FLOWERS and VEGETABLES.....

Jas. Carter & Co., of Raynes Park, England, have originated or introduced a large proportion of all new varieties in the last 50 years. That is why Carters' reputation is world-wide and experienced gardeners keep in close touch with Carter productions.

Study the new Carter Catalog for 1915. Among the Flower Seed Specialties you will find our new strains. Many varieties of Asters, Marigolds, Snapdragons, Primroses, Sweet Peas, Pinks and others are listed.

In the Vegetable List are novelties of Beans, Beets, Carrots, Radishes, Cabbages, Celery, Cucumbers, Lettuce, Peas, Tomatoes, etc. This new Catalog Carters "Garden and Lawn" has many wonderful photographic illustrations and valuable cultural directions. Send us your name and address now so we will mail you a complimentary copy.

A NURSERY COMPANY EXPANDS.

The Elm City Nursery Company of New Haven, Conn., finding their present nursery areas too restricted have recently purchased several adjoining farms at Woodmont, Conn., but a few miles from the nursery's present office and grounds. The new purchase adjoins the New Haven Railroad Co.'s station at Woodmont. The character of the soil, together with the transportation facilities, makes the location one hard to beat. Heavy plantings, mostly of popular ornamental stock will be established in the spring, much of the ground having already been prepared. It will be two years before the nursery business will be moved to the new location at Woodmont, in the meantime, up-to-date offices, packing and storage buildings, and a propagating plant will be built near the railroad station on a tract of ground of some twenty-five acres which will be set apart for the purpose and developed into an attractive commercial park where the nursery's products can be displayed to good advantage. The railroad company is to co-operate with the nursery in laying out the station grounds at Woodmont in a park-like style.

At a recent stockholders' meeting, Ernest F. Coe was again elected president; W. W. McCartney, treasurer and general manager and Walter E. Campbell, secretary. Ernest F. Coe has been president of the company since its incorporation in 1901, Wesley W. McCartney has been with the company for many years, previously having been with a number of the largest nurseries. Walter E. Campbell has been with the company for several

years, previously having had a wide training along nursery lines.

Charles J. Bolgiano, of the seed firm of J. Bolgiano & Son, who has been confined at the Union Protestant Infirmary, Baltimore, Md., since November 8, where he was operated on for appendicitis, has improved to such an extent that he has gone to his home, in Roland Park, and expects to be back to business within the next two weeks.

Of Interest to Retail Florists**CHRISTMAS HINTS**

With Christmas only a few days away, any rose grower who does any retail work at all will find it highly profitable to secure some nice flower boxes, some Christmas cards, and tags. Have some red ribbons on hand too, for these will come in handy to tie on bouquets, if there are orders for these. It will set a box of roses off a good deal if they are tied with a clean red ribbon, tying the box with it too. A little holly tied in with it will make it very Christmasy, and will be bound to make friends for you and bring more trade with it next year. These little things are very inexpensive when you figure the advertising that you get from them, besides the well satisfied customers. Advertising is every thing these days, and no matter how good your product is, if you do not tell the people about it they will not come at once. Keep your card always in the minds of prospective buyers, and have a little catch phrase, so that when anyone thinks of roses, they will naturally think of you, and of course you will get the order then. Do not "knock" your competitors. Always put in a good word for them, or speak well of them. If they knock you so much better for your trade. If your customers say that your competitors have good roses, say "yes we do not doubt it, but then we have them too, and perhaps a shade better." Be on time with all your deliveries, for there is nothing that will annoy patrons more than late flowers. These always go right to the masters of the house, and therefore the delay is felt more than a late grocer or butcher would be, for their goods stop at the kitchen first, and there is where the delay is felt. Plants will go well, and if there is any possibility of sales, get some, and sell them. Do not think this is out of your line, for as things are now, everybody is out for all the business that they can get, and if there is money in it, it does not matter if you do sell plants as well as roses, even though you do not grow the former. A. C. RZICKA.

WINDOW ADVERTISING.

In this day of progressive merchandising, with competition growing keener, it behooves the enterprising florist to wake up to the trend of the times. Things that were are no more. The old-school florist is dying a hard death. Even in our large cities and growing towns, can be seen the outcroppings of the methods of cross-road days. The old-time florist still depends on his old-time methods, and allows his more progressive brother to reap the benefits of his modern merchandising—attractively displaying his wares in his windows.

The show windows are the eyes of your business; through them the public sees you as you are. Are your show windows a fair index to your business abilities? Do they attract the passer-by, causing him to stop, look,

NEWS ITEMS FROM EVERYWHERE

BOSTON.

W. A. Riggs, of Auburndale, is recovering slowly from the effects of a recent nervous breakdown.

Wm. H. Elliott, of Brighton, is convalescing from an operation successfully completed at the Charlesgate Hospital on Nov. 23.

Richard Ludwig, manager for N. F. McCarthy & Co., who has been ill for the last few days, is now back again at his old place with redoubled energy for holiday trade.

The Houghton-Gorney Co. are succeeding very well with their new venture. The store is located under the historic Park Street Church, at one of the busiest corners in the city.

Julius Zinn is now remodelling the store on Park street where Houghton-Gorney Co. were formerly located. Mr. Zinn expects to move into his new shop early in January, giving up his old location to Thos. F. Galvin.

The Rosary continues to prosper. Mr. Casey, the head of the firm, was only a few years ago employed as bookkeeper with Thos. F. Galvin. He has succeeded in building up one of the most successful retail stores in the Back Bay district.

The schedule committee of the Massachusetts Horticultural Society has decided to change the name of the annual Chrysanthemum Show held in the fall. This exhibition is to be known hereafter as the Fall Exhibition of Flowers, Plants, Fruits and Vegetables.

The Directors of the Boston Flower Exchange, Inc., and the Boston Co-operative Flower Market, have called a meeting of growers and wholesale dealers in cut flowers, at the American House, Saturday, December 12, 1914, at 10 o'clock A. M., to consider all sides of the question of surplus stock and the best means of disposing of same.

Harry Quint had a very attractive window display this last week, in which "holiday suggestions" were featured. It has been determined by the firm that flowers tastefully displayed in baskets sell better and at higher figures than when placed in vases in the ordinary way. Several contracts for store decorations have been secured, which will keep the force working overtime for several weeks.

SAN FRANCISCO.

G. Rossi & Co. have sold a block of land in Berkeley, on which they have a number of hothouses, to the city of Berkeley for a school site.

R. Groves has sold out his retail flower business at 1457 Haight street to Piccetti & Valmeni. Mr. Groves continues in the nursery business.

Mrs. Chas. Rose, of San Francisco, and Miss Lulu Miles, daughters of the late Morgan Miles, a pioneer nurseryman of San Jose, have decided to continue the business.

L. Ghiotto, who recently took over the New Rosary Flower Shop at California and Devisadero streets, has sold out to Mr. Olson, formerly with the Haight Street Florists.

F. Pelicano, of Pelicano, Rossi & Co., is bringing in some very beautiful cyclamen and primula in baskets, which are finding a ready sale. This house has also received a notable lot of Phoenix Roebelini.

The Peterson Nursery at Burlingame, Calif., is sending in some very fine carnations, especially of the Gorgeous and Mrs. Ward varieties. He is said to be the only grower in this vicinity producing the latter.

J. H. Smith, of Sacramento, has purchased the Murdock ranch, near Orland, Calif., and is putting in a large nursery. While citrus trees are the main item, considerable attention will

be given to ornamental trees and shrubs.

Angelo J. Rossi, of Pelicano, Rossi & Co., is acting as chairman of the committee on tree and decorations for the municipal Christmas celebration to be held in the Exposition grounds. Arrangements have been made to bring an 80-foot tree down from Mendocino county.

The bowling team of the Pacific Coast Horticultural Society is getting out to practice every Friday night, and while it makes a pretty "raw" appearance so far, the members are gradually getting into form, and hope to make a strong showing in the cup contest.

WASHINGTON.

Burch Talbert, a rose grower for M. J. McCabe, in Anacostia, D. C., has returned to work after an illness of fourteen weeks.

Albert Schnell, manager of the local store of the Leo Niesson Company, last week reported to the police that someone had made away with his gold watch. It seems that he took the time-piece out of his pocket and laid it on a desk in his private office. When he again thought of it it was gone, and now the police are keeping a watchful eye on the pawnshops.

Flowers from the White House are being contributed to hospitals and to the many entertainments being given for charitable purposes, for on account of the death of Mrs. Wilson, the state receptions ordinarily held at this sea-

The Florists' Supply House of America

son of the year are being omitted. With the many affairs being given to secure funds to aid the starving Belgians and other needy people in the European war zone, these flowers are in great demand.

Poli's Theatre will give a performance for the benefit of the poor children of the city on Christmas morning. O. A. C. Oehmler has promised to donate the largest tree available, a candy manufacturer has proffered 700 pounds of candy, and the management has placed an order for nearly \$10,000 worth of toys which will go to make 4,000 poor youngsters extremely happy. There were several offers of trees, but Mr. Oehmler got there first.

CHICAGO.

At this writing, Dec. 8, the first snow of the season covers the ground. With it has come that mysterious something, known as the Christmas spirit, and the business world—of the florist—is already responding to it. There is an alertness in his step as he goes to meet his customer and his eye is keen as he sights a good order.

There is less green than usual with the red in the decorations of the big stores this year. The main aisle of the largest store has hollow wire balls four feet in diameter placed at intervals high above the heads and these are covered with bright red sprays of prepared foliage, with festoons to match. The effect is very beautiful, and its simplicity adds to its grace.

Local papers gave considerable space to reviewing the death of Capt. Herman Scheunemann, who went

down two years ago with his ship, laden with Christmas trees from the Michigan woods. Mrs. Schuenemann, who took up the business, has just returned with a load of trees, which she has been cutting since September, and her daughter, Elsie, has again taken up the making up of the wreaths.

Ernest Oechslin continues to improve and is about his plant range, attending to some of the details. His remarkable recovery from his terrible accident is a tribute to his splendid constitution and good habits. Few men would have gone through the wind shield of an auto truck and struck the cement curb and lived. It was twelve days before Mr. Oechslin recovered consciousness. So faithful were his staff of helpers at the greenhouses that everything is in perfect order and stock never looked better. His fine strain of cyclamen are flowering to perfection and the benches are a sea of color. Poinsettias, begonias

and azaleas are all in splendid condition and with the complete line of ferns and decorative plants customers are sure to find plenty to choose from.

Frank Oechslin carries off the honors as the owner of Chicago's exclusive plant range, and its appearance speaks much for his ability as a grower. If there are any secrets in the art of coaxing a plant to do its best, Mr. Oechslin is always willing to pass it on to others. The stock of poinsettias is fitting for the holiday trade and the cyclamen never were better. Indeed it will be hard to excel them in future years, so beautiful are they. The Cincinnati begonia remains the favorite here and the azaleas include some of the choicest of the new varieties. Boston and Whitmani ferns are in prime condition and the araucarias and other Christmas favorites were never better. Mr. Oechslin's place is a favorite resort for out-of-town visitors and

BE SURE that you get the MEYER GREEN SILKALINE, and do not take any other that is sold as an imitation of the MEYER GREEN SILKALINE, as they do not have the full weight, measure and strength of the genuine article. All our GREEN SILKALINE is guaranteed up to the high standard and mark. The sizes are F, fine; FF, medium; FFF, coarse. It is for sale by all the best jobbers. If you cannot get it of your jobbers, order direct of the manufacturer.

They include all sizes and shapes up to the large and very large, from the lowest price through the medium to the costly.

Dinner Ware. On the 3rd and 4th floor will be found an **unequalled exhibit of Dinner Sets** all values from the expensive upwards.

CANTON CHINA PLANT POT

they are always given a hearty welcome

Plants for Christmas.

Retailers are scurrying around among the growers to see what blooming and decorating plants are available for Christmas. It appears that cyclamen are in much larger supply than usual, and plants are in the pink of condition, ranging in size from 5 to 7-in. pots. Begonias also are to be seen in quantity, the Cincinnati taking the lead in numbers, though a good many Lorraines are grown. Begonia Davenport will be tried again next season, when it is hoped it will do better than it has done this year. Azaleas will meet all demand and there is an especially good supply of the medium and small sizes. Heather is in excellent condition and fairly abundant. There are plenty of primulas, mainly obconicas. Dutch bulbous stock will be extremely limited. The foregoing comprises the bulk of blooming plants and with the otaheite oranges and berried plants will serve to brighten up the stores. Kumquats, so much in evidence a year ago, are now among the missing. Araucarias are the leaders in decorative foliage plants and Dracaena terminalis, palms, ferns, &c., are welcome additions.

Another Brick Thrown.

The flower business had another rebuff when one of the incoming county officers tried to prevent the use of flowers when the new officers took their seats Monday. This has been a time-honored custom and not to be given up lightly, so the big floral em-

blems found their ways to the various rooms as before. Peter Reinberg had many remembrances from his political friends as he took his new office as president of the County Board.

An Echo from the Boston Convention.

Among the visitors at the Kroeschell exhibit last August was O. H. Williams, of Olneyville, Providence, R. I. His farewell to Mr. Lautenschlager was, "Some day I will buy a Kroeschell." The other day his boiler gave out and he took the fast train for Chicago, to see the Kroeschell boiler at the factory. He bought a No. 11, which will heat 22,500 sq. ft. of glass when the temperature is 15 degrees below zero. Two hours after the order was placed, the big boiler was on its way East.

Plant Baskets as Funeral Tributes.

Tom McAllister is one of the progressive men in the trade. So carefully does he pilot a customer through the difficulties of placing an order, that very few of the freak funeral designs come his way. A large basket of live plants with bow of ribbon to harmonize, he regards as more dignified and befitting a funeral, and says there is just as much money in it for the retailer as in the ridiculous freak design and far more satisfaction.

THE MID-DECEMBER LULL.

The second week of December has always been a bad one for the flower business. So says a retailer of a quarter of a century's experience, who has kept record day by day, week by week, month by month, and year by year, during all of these twenty-five years. The disappointed ones may

therefore take heart. It's in the scheme of things, and always has been. The proper frame of mind under the circumstances is the old biblical injunction: "Blessed is he who expecteth little: for he will not be disappointed."

If the growing end of the business has had the same careful records kept (from their standpoint) there will be no plaint coming when the returns arrive from the wholesaler. The lull probably comes from the natural tendency of people in general to conserve themselves a little for the Christmas and New Year festivities.

REMEMBER, every customer must be satisfied. If not, either the order will be duplicated or no pay accepted.

CUDE BROS. COMPANY

WASHINGTON, D. C.

NEW YORK NOTES.

All reports from C. H. Totty continue favorable and his complete recovery from his recent illness and operation seems now only a matter of a short time.

Guttman & Raynor have moved across the street to the corner of Sixth avenue and W. 28th street. It is a basement store, but very spacious and well adapted to the wholesale flower business.

The next meeting of the New York Florists' Club will be held on Monday evening, December 14. There will be a big turnout of members undoubtedly, as the election of officers for the coming year will be in order. Harry A. Bunyard and I. S. Hendrickson are the presidential candidates.

Secretary John Young is one of the busiest men in New York these days. What with the preparing of the annual report and other S. A. F. business, his duties in the N. Y. Florists' Club and the multitudinous details in preparation for the International Flower Show which is now only three months distant as well as the requirements of his own business John Young is certainly a very "live wire."

Secretary Young reports regarding

the International Flower Show to be held at Grand Central Palace, New York, March 17-23, 1915, that encouraging progress is being made. Many applications are being received for schedules, showing an increased interest by possible exhibitors in the competitive section. The sale of space is also progressing satisfactorily and orders for space in the official Souvenir program are being regularly received. The guarantee list amounts at the present time to \$6,000.

A LANSDOWNE HOWL.

There are probably more florists to the square foot in this nearby Philadelphia borough than in any other similar community. Our readers will therefore be interested in reading the following amusing squib from the Lansdowne News in re the late boost in commuters' fares.

G. C. W.

THE NEW HOLIDAY

Suggestions are now in order regarding December fifteenth, a local holiday. "Railroad Day" it might be called in honor of former indifferent or careless railroad presidents who failed to make the most of their opportunities.

At the same time a committee could be organized to gather together the loose change, if any, possessed by the commuter and put it in a fund for the relief of the suffering railroad stockholders.

hear much of their troubles and of the evident dislike the public has for them as a class, but nothing of ways and means to relieve their depressed animal spirit nor provide them with gasoline and other necessities. Make a start somebody.

THE WALKING CLUB.

A movement is already on foot to organize the "Anti-Railroad Walking Club of Lansdowne." The organization proposes to unite its members into bands of twenty-five's which will leave Lansdowne at convenient times and march to Philadelphia and back each day instead of patronizing the railroad.

Each member will provide himself with two nickels (saved from the carfare) to be dropped into Cobb's creek as the Club passes through Angora. It is the idea of the organizers that as it becomes known that there is something in the creek in addition to the odor, which, by the way, does not stay in, pioneers will be gradually attracted to the place and in time the board of health will find this out and have the dammed creek filled up—or we should say have the filled creek dammed up. It has been dammed up and down before, but now it is hoped it will be dammed up and filled up so the malaria fearing public may pass that way with less apprehension.

Anybody with two nickels is eligible to membership.

Fitchburg, Mass. Fire which swept through the building at 424-44 Main street damaged the flower store managed by Otto Mallgraw to the extent of \$500.

Personal

Arthur C. Ruzicka has taken the position of head gardener, in charge of the estate of C. Oliver Iselin, Glenhead, N. Y.

Chester I. Campbell, who will be remembered as the efficient manager of the Boston National Flower Show, has been elected mayor of the city of Quincy, Mass., by a big majority.

George F. Chadborn, president and manager of Schaefer's Inc., was stricken in New York City December 3d, and taken to the Lincoln Hospital on 141st street. The exact circumstances have not been learned. Mrs. Chadborn, who was with him at the time, hopes that he will be so far recovered as to be able to return to Newburgh in a few days.

NEWS NOTES.

Akron, N. Y.—Wm. F. Kasting has purchased the Newman Greenhouse.

N. Milwaukee, Wis.—The Eschrich Floral & Nursery Co. has purchased the business of the Sunny Point Floral Co.

Mountain View, Cal.—Wilkins, East & Co. have started in the nursery business here, and have opened an office in San Francisco.

Waverly, Mass.—Poinsettias in "serried ranks," beauteous Lorraines and Cincinnatis, countless azaleas in the brightest colors and all the other stock for which the W. W. Edgar have established a reputation make their

houses well worthy of a visit now. Among the things seldom seen elsewhere are the speciosum rubrum lilies blooming gayly for Christmas and the standard heliotropes, the rich fragrance of which permeates the entire neighborhood.

At the annual meeting of the Paterson (N. J.) Horticultural society held Tuesday evening Dec. 2, at the Y. M. C. A. the following officers were elected for the ensuing year: President, Joseph Ackerman; vice-president, Dr. Thomas Moore; recording secretary, Sebastian Hubschmidt; financial secretary, Francis Bredder; treasurer, Hugh Clark. In the monthly competition the award went to F. Milne of Totowa, who showed a magnificent vase of carnations.

Flower Market Reports

Business is holding its own since Thanksgiving week, and every day seems to be improving as we are nearing Christmas. Orders for wreaths, roping and greens of every description are coming in somewhat earlier than in other years. Palms, ferns and flowering plants have been selling readily. Cut flowers also have had a good run, especially in dollar baskets and boxes. Most of the seed houses have their representatives out soliciting orders for spring delivery. Judging by the way things are going we may expect a prosperous holiday and spring trade.

The local trade is trying hard to take an optimistic view of business prospects, and there is just the least bit of justification for the attempt. Conditions are certainly not what they should be at this time of the year, but there are some firms, both wholesale and retail, who claim to be doing almost normal business. Several of the retail stores have been working on department store decorations, and consequently the demand for greens has been stimulated. All flowers are plentiful, therefore but little increase in prices has been secured. Chrysanthemums are still being cut in large quantities and are selling around the \$1.00 per dozen mark. Stormy weather has helped shorten

up crops a bit. Nevertheless we ascertain from advance orders received by several retailers that business will make a marked change for the better within the next few days. A prominent retailer, who does not care to publish his name, states that he has secured a \$2,500 decoration to be completed this week. This speaks well for increased business in all branches of the trade.

A rainy week, dark weather, lots of stock and no business is the

report of conditions throughout the entire past week. Chrysanthemums have been plentiful, also roses and carnations, the latter having very weak demand. Lily of the valley has never been so slow. Violets and sweet peas are also on the quiet side. Floral work was not in evidence and the surplus had very little or no outlet. Holly and decorative greens have had the call, and considerable laurel has been used by department stores. The time is nearing when all

Flower Market Reports

(Continued from page 855)

should be in readiness for the second holiday rush, and it can not come too soon. The outlook is promising and a heavy business is looked for.

Most of the trade considers business to be little, if any, below normal. None of the conditions are especially favorable and much might be said against them, still a fair amount of stock is disposed of daily and most of it to good advantage. The high temperature of a week ago made stock slightly soft and growers are quite relieved at even a slight reduction in the temperature. Week-end trade was good and the close of the opening week in December showed a very fair sales record. The opening of the second week was even more favorable. Beauties are bringing in the dollars, for both demand and price are good. The short lengths are inclined to be poor. Sweet peas are doing fairly well and lily of the valley is in very good demand. Among roses Mrs. Russell and Milady are outclassing all others. Some of the former sold as high as five dollars per dozen last week. Milady is so large and has such a fine stem and its keeping qualities are so good that it is hard to sell Richmonds to the admirers of Milady. One large house predicts the supremacy of Milady if it proves a good Christmas bloomer. Carnations are of several grades and plenty of each.

Four days of terribly stormy weather has not helped a situation already very disheartening to the flower trade of this city, retail and wholesale feeling the pinch with equal severity. With the exception of perhaps lilies and cattleyas of the best quality the prices prevailing in the wholesale district this week are considerably lower than at a corresponding time last year. If there can be said to be any extra demand on any line it is for American Beauty roses which have stiffened up a little all along the line. Lily of the valley has been given a bad knock, the supply of flowers coming in far exceeding the demand. Southern asparagus is piled up everywhere and is hard to move at any price. Roses, carnations and violets are all in the discard, it would seem. Chrysanthemums still linger on all sides. A few nice white lillacs and fine sweet peas are seen.

More stock and less business is the verdict for the past week. The recession from the Thanksgiving week activity was quite marked. The slump affected no one thing in particular but pretty much everything all along the line. Towards the end of last week prices stiffened a little, but were far from getting back to normal. Saturday was blustery cold and wet, thus closing up one of the avenues for some kind of a clean-up. As a consequence a great quantity of good flowers went out for almost nothing. In roses, the Killarneys are exceptionally good, Richmonds have

& Spreng (100 bunches)	10.00	to 20.00	10.00	to 20.00

greatly improved and American Beauties are splendid quality. Carnations also have shown continued improvement in form. The leader is undoubtedly Gorgeous. There is not a big supply of these, but what there are coming in are certainly magnificent. Close seconds to it are Matchless, White Wonder, Pink Delight and Enchantress Supreme. Triana is now the principal cattleya to be seen. Cypripediums continue plentiful and of unusually good quality. The demand for violets is fair, but the prices have gone down considerably. The late chrysanthemums are still in evidence but in greatly diminished quality. The end of this week will see the bulk of them over. Advance bookings for Christmas plants and greens are reported as very satisfactory.

SAN FRANCISCO

Business was a little quiet right after Thanksgiving, and while it is now picking up again, there is hardly the activity that is usual at this time of year. It is thought that the Thanksgiving trade fairly set the keynote for the whole holiday business; plenty of small business and a large demand for cheap goods, with a slow movement of the finer offerings. California holly is again in large supply, of remarkably fine quality, and finds a large demand. English holly is being offered from several quarters for Christmas, northern stock being preferred. A few poinsettia heads have come in from San Diego. A week of rain has further curtailed offerings of chrysanthemums, though there are still plenty. Appleton and Jeanne Nonin being among the principal varieties. Pompons are disappearing. The violets are now showing up much better, and in larger quantity, but the shipping demand is only moderate. There is a little call for roses in the north. Beauties are improving slowly; Radiance is very nice, and finds a good

sale, and Maryland is holding up very well. Orchids are increasingly scarce. There is an abundance of fine cyclamen, the demand for which is improving. The average Japanese carnations are overfed, and do not keep well, though some growers are offering a little very fine stock. Gardenias are now in fair supply, and are pretty well taken. A lot of the miscellaneous outdoor stock that has figured in the market for some time is now playing out; while offerings of freesias and paper whites are increasing steadily, the season being exceptionally early.

ST. LOUIS

The local market during the last week has been fairly good as to supply and demand and all prices reasonable, but the dark, rainy days all of the past week will no doubt have a telling effect on the supply for Christmas. Business since Thanksgiving has been only fair, as the bad weather had a bad effect with all the retailers on the counter trade. Roses and carnations are fine and not any too many just now. Violets, chrysanthemums, sweet peas, lily of the valley and paper whites are in abundance. Christmas can not as yet be told, but cut stock will be scarce and high and plants will have the call.

WASHINGTON

Continued warm weather, while somewhat beneficial to the retail florist, has tended to bring about an oversupply of flow-

Flower Market Reports

(Continued from page 857)

ers of all varieties with the one exception of violets, and to cause the growers to complain at prevailing prices. The natural result was that considerable stock was turned over to the street vendors for that was the only outlet, with a limited demand from other sources. For the past few weeks the shipping to the southern cities has been very satisfactory and this has been of such volume as to prove quite a factor in this market. Prices are still below what would be termed normal for this time of the year but during the past week they have varied considerably. Taking for instance carnations, the prevailing wholesale price averaged about \$2 per hundred yet the vendors were offering them on the streets at retail at 25 cents per dozen. Of course, there was a considerable difference in qualities but the general public is not sufficiently educated to be able to tell whether or not

they are perfectly fresh, or to judge the stock on the streets with that at advanced prices shown in the stores. There has been a slightly better demand for American Beauties. Other roses are plentiful with little change in previous quotations. A better sale is reported of novelty stock, this due to a number of fine decorations had during the week. Gardenias are selling at from \$1 to \$2 per dozen, although meeting with little demand, and the same applies to orchids offered at 40 to 60 cents each. There is a plentiful supply of narcissus which finds its greatest sale in the public markets; sweet peas are in good supply and quality excellent. A continuance of the present warm weather is bound to put a severe crimp in the violet market for the Christmas trade. The demand is almost entirely for singles which up to this time have been in very limited supply. The Rhinebeck variety, in the opinion of a majority of local retailers, is not nearly so satisfactory as the single.

A Magnificent Volume on Horticulture

Originally published at \$2.50 **\$1.50**

KIRKEGAARD'S
"Trees, Shrubs, Vines and Herbaceous Perennials": a book which bids fair to become a classic in its field.

With its 410 pages packed full of garden lore, its 60 beautiful full-page sepia photos and its comprehensive planting list it is a genuine contribution to the literature of Horticulture. An

NOTABLE INCREASE OF INSECT REMEDIES.

There has been a notable increase in the number and quantity of insecticidal and fungicidal preparations on the market, according to the annual report of the U. S. Department of Agriculture's Insecticide and Fungicide Board. However, there also seems a more general desire on the part of the manufacturers to comply with the provisions of the law, and the Department has made every endeavor to assist manufacturers in this respect by furnishing them scientific information. For this purpose the board has been issuing a monthly publication since last February in which are printed extracts from letters written to individuals by the board. These opinions, it is considered, should be of service to others and aid the public in a better understanding of the law's requirements.

A general outline of the procedure of the board is given in the new report. Besides the administrative work necessary to enforce the act, there are examinations of the various preparations, and tests to determine their strength and efficacy. Materials and proprietary preparations used for agricultural spraying purposes are examined, as are products used to rid the household, garden, etc., of insects of all kinds, disinfectants, germicides, etc., which are claimed to be efficacious to kill or combat bacteria, preparations used on horses, cattle, sheep, swine or goats, as well as on fowls and other domesticated animals. Besides testing an insecticide or fungicide to determine its power to kill insects, tests are also made to determine whether the preparation will injure the vegetation on which it is sprayed.

One duty of the board is to keep imported adulterated and misbranded preparations from entering the country. Of 147 official and unofficial samples received during the year from abroad, it was recommended that 62 be denied entry until they should conform to the law.

Holyoke, Mass.—G. H. Sinclair, whose new greenhouse was illustrated in the last issue of *HORTICULTURE*, has put in, in addition to 15,000 carnation plants, ten 175 ft. rows of sweet peas; also about 10,000 lettuce as an experiment, which he expects to cut in January.

SCOTCH SOOT

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt.

Sacks, at:
\$1.00 per 112 lbs.; \$17.50 per 560 lbs.

CAMBRIDGE, MASS.
LONG ISLAND CITY, N. Y.**MAXIMUM LIGHT IN THE GREEN-
HOUSE.**

The intensity of the sun's rays is greatly modified by the angle at which they strike glass as well as by the thickness and character of the glass itself. It has been proven that about 12 per cent. of the light rays are intercepted. As the amount lost by reflection depends upon the angle at which the rays strike the glass, the careful adjustment of the angle of the roof should be studied.

When rays of light fall upon sheet glass at a right angle, they pass through without being turned from their course and there is no loss save the 12 per cent. absorption. When they meet the glass at an oblique angle, a portion of the rays are reflected and the intensity lessened. The following table shows the amount lost by reflection at the different roof angles:

Angle of ray.... 60°	Light lost.... 2.7%
" " " " 50°	" " " " 3.4%
" " " " 45°	" " " " 4.5%
" " " " 40°	" " " " 5.7%
" " " " 30°	" " " " 11.2%
" " " " 25°	" " " " 16.0%
" " " " 20°	" " " " 22.2%
" " " " 15°	" " " " 30.0%
" " " " 10°	" " " " 41.2%
" " " " 5°	" " " " 54.3%

During the short winter days, when the sun is above the horizon less than 10 hours, as many rays as possible should be trapped, especially before 10 A. M. and after 2 P. M. At the winter solstice the sun rises about 25 degrees above the horizon at noon and the slope of the roof should be such that the amount of light reflected should be the best possible. When the pitch of the roof brings the glass at an angle of 20 degrees, the sun at 5 degrees above the horizon will strike it at a 25 degree angle, and 16 per cent. of the rays will be reflected, in addition to the 12 per cent. absorbed by the glass. Had the roof been given a pitch of 30 degrees, the sun at 5 degrees above the horizon would strike the roof at an angle of 40 degrees, but 5.7 per cent. of the rays would be lost, or only one-third as many as were reflected at a slope of 20 degrees. Other practical things must be considered in determining the angle of the roof. Increasing the angle also increases the height of the ridge and consequently the area to be heated. The south roof is usually at an angle of 30 to 35 degrees.

**COKE FOR GREENHOUSE HEAT-
ING.**

Editor HORTICULTURE:

Dear Sir: I write you to find out about coke for greenhouse heating. Is it any good for heating where you don't have a night fireman? Is it any good to keep up steam? I have one steam boiler and one hot water, but don't have any night man. If you can tell me anything about it I

would be pleased to know how it would work. yours truly,

Conn. W. H. W.
We would not advise the use of coke under the conditions as given. Anthracite coal is your safest fuel. Coke requires much more frequent attention than coal and without a night man to attend to it, would not be reliable. We know that among the greenhouse people around London, England, coke is used almost universally, but they have a much milder climate there than we have in this section of the United States.—Ed.

**IF YOU ONLY
KNEW** what a good save the **METROPOLITAN PATENTED** is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the glue is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

This is an unusually compact and well planned range of houses, and considered the largest MODERN range of glass in the STATE of MASSACHUSETTS, located in the HISTORIC CAPE COD section at MARION, MASS. It is one of the show places of that neighborhood. THERE is a certain distinctiveness to LUTTON HOUSES that is always firmly established in the minds of the visitors. It is our infinite detail and attention to perfecting the greenhouse that has made the LUTTON

REPUTATION. We want to tell you about our work and how much it differs from our competitors.

If you are coming to NEW YORK, be sure and inspect our greenhouse erected complete in the largest RAILROAD TERMINAL in this country, GRAND CENTRAL STATION, 42ND STREET, NEW YORK. To keep a full equipped greenhouse right in the heart of NEW YORK for the benefit of our patrons is only another sample of our progressive methods.

A Repeated Announcement Concerning Our Reconstructed Construction

"THE only difference between a rut and a grave is in the width and depth"—so says Mr. Sefton, our President.

Speaking of ruts: For thirty years, the greenhouse concerns have been building iron frame houses and always spacing the rafters about 8 feet apart and using 16 inch glass. With the one thing constantly in mind—that of making a lighter house—various changes have been made in construction.

In a radical way, different firms have tried various constructions, even to that of the "fiddle string" type of trussing, which requires that every member shall be in perfect tune or unequal strains are dangerously exerted on a few members.

Smaller roof bars have been used and fewer columns. Lighter eaves of differing forms have come and gone—but through all these changes, not a change in rafter spacing took place. So over two years ago we climbed out of the rafter spacing rut and built a house with the rafters 12 feet 4 inches apart, increasing the width between them 50 per cent.

The glass was 20 inches wide. We used just one-third less rafters, one-third less columns. The rafters were made slightly deeper and the purlins were somewhat heavier and special fittings of required strength were designed to secure them to the rafters.

A combination compression and tension truss was scientifically worked out by our engineers, that now permits us to build these houses 60, 70 and even 80 feet wide, with but

two columns across the house. This Reconstructed Construction proved such a success that we began building it extensively.

It has been surprising, however, how many growers at first hesitated at having the rafters spaced 12 feet 4 inches apart, instead of 8 feet 4 inches. It apparently looks to them as if we were "skinning the house down."

They persistently seem to lose sight of our strengthening the important members, and the advance we have made in trussing and bracing greenhouses, which safely permits such a change.

Those of you who know L. B. Coddington, the extensive rose grower, of Murray Hill, N. J., know what a live wire he is. You also know that, alert as he is for improvements in every branch of the

business, he is also conservative. The consistent kind of conservative. The kind of conservative that is safe for a man to follow.

We have just finished for him, four medium sized houses, located down at his old plant. Three are 38 feet wide and 136 feet long, and one 21 feet wide and 122 feet long.

They are all this **Reconstructed Construction**.

For going on 19 years, Mr. Coddington has been buying Hitchings' houses. In all those years, he has diverged just once. Evidently he feels he can depend on Hitchings being dependable, year after year.

Think that thought over. And remember, we go anywhere for business—or to talk business.

View of our Reconstructed Construction with the rafters spaced 12 feet 4 inches apart in L. B. Coddington's last houses, at Murray Hill, N. J.

Our New Rose Mrs. Moorfield Storey

Has a strong upright growth, the wood being very stout and smooth, with large handsome dark green foliage, practically mildew or black-spot proof. The flowers, which are freely produced, are of good size and substance with abundant petals, opening freely. The color is a shell pink deepening toward the centre with the large smooth petals tipped deep rose.

It will be a fine, yet distinct, companion for the Mrs. Charles Russell rose.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil." *Expo.*

Pelargoniums

Plants that have been rested up will very soon be showing signs of new growth. The best time to repot pelargoniums is when they have made about an inch of new growth. It is always better to shake out all the old soil as this will give the roots a chance to have all new food to work into. Give them a compost of turfy soil three parts, well decayed manure one part and some sand. Give each pot plenty of good drainage and pot firm. Keep rather close for a week or ten days and keep the tops syringed twice a day. When they show signs of taking hold of the compost they should be given plenty of light and ventilation. They should have a night temperature of about 48 to 50 degrees.

Lilies for Easter

Lilies for Easter should have immediate attention. Bring in those potted up first. Those that are showing just through the ground will be all right at about 50 degrees during the night. Never place them in too much heat at the start, as this is better later in the season when they have made some growth. In about two weeks give about 5 degrees of a rise and so on until they are in a night temperature of about 65 degrees. Careful watering will count from this out. They should always be allowed to come to the point of dryness before watering. Keep the lilies clean by fumigation at least every ten days.

Propagating Lorraine and Cincinnati

Those who wish to propagate their own stock should begin at once. Of more importance than anything else is an even temperature of about 78 to 80 degrees of bottom heat and clean rather sharp sand. Use clean, healthy leaves, the stems of which are inserted into the sand. With such bottom heat, watering must be properly attended to, so as to keep the sand in a moist state at all times. Select only the firmest and best ripened leaves. The younger and softer ones will be likely to rot. Do not allow the leaves to touch the sand. Do not try daily waterings, as in the case of many other cuttings, or you will lose a large part of the leaves by rot. A little sun will not harm and will help to dry up the bench, but avoid bright sunshine until after the leaves are well rooted.

Propagating Carnations

Carnation propagating usually commences with most growers about December 1st and continues up to well into April. Cuttings taken any time between December 1st and April 1st will make splendid stock, though the last batches may lack somewhat in size. Have the cutting bench in good shape. Clean sand in a clean bench and the bench in a clean house—that and clean cuttings mean the foundation of getting results. Clean out every crack and corner and apply a dose of boiling hot water all over it. This is a splendid purifier, splendid alike for the latest design of a tile bench and the old wooden affair of the man with moderate means. A carnation cutting wants to root quickly. If it remains in the sand for any length of time without root formation you can look forward to a sickly plant. When taking off cuttings try to select a uniform size and be sure they are well matured. If you are short on certain varieties pinch out the flower stems of the blooming plants. Don't allow them to bloom and they will produce cuttings instead.

Sowing Primulas

To have strong fine primulas for the holiday trade next year they should be sown within the next two weeks. Do not get cheap strains, but get the best as they are cheaper in the end. When preparing flats or pans see that they have lots of drainage of crocks, on which place some rough material and then a compost of loam and leaf mold in equal parts and enough of sand to make it porous till to within half an inch of the top, and when they have drained sow the seed but not too thickly. Cover lightly with sifted compost and press firmly all over. Keep shaded and cover with glass until they come up when they should be exposed to full sun. It is always better to start seed in about 60 degrees at night, but when they are up well 50 to 55 will be high enough. Keep growing them on by shifts as they need it.

Panax Victoriae

This makes a fine decorative plant. They will root very well in a warm propagating bed where they can be kept moist and shaded until they have rooted. When potting them use a light compost, say fibry loam three parts, leaf mold and sand one part each. They like plenty of heat so give them at least 65 degrees at night.

Next Week:—Care of Mignonette; Easter Hydrangeas; Sowing Fern Spores; Starting Propagation; Sweet Peas; Wallflowers.

Merry
Christmas
to all

Before the time rolls around for our next weekly salutation the great joyous holiday of the Christian world will have passed, so it is in order for HORTICULTURE, here and now, to extend cordial greeting and good wishes to its numerous and constantly increasing host of readers. HORTICULTURE is particularly fortunate in the character and quality of her supporters, between most of whom and the paper there exists a much

closer attachment than would be developed from any list of subscribers built up merely on ordinary lines of expediency. We are constantly reminded of the fact that the majority of our subscribers are also interested readers of HORTICULTURE's pages and we are happy in the thought of the myriad of reciprocal "wireless" kind responses which our printed Yuletide message of greeting will bring forth from every place where HORTICULTURE finds a welcome, and that means not only every portion of our own country but most parts of the civilized world. This is a time to express our gratitude for life and health and love. But of all our gifts none is so precious as that of friendship. Merry Christmas to one and all is HORTICULTURE's wish.

Good work
and good
consequences

It appears, from the records of the State and Federal inspection officials, that among the dangerous pests intercepted in plant importations of various kinds from foreign countries there have been no less than fourteen instances of brown-tail moth and two of egg masses of the gypsy moth. We are pleased to know that these undesirable stowaways were caught and sincerely trust that no other similar colonies got by the argus-eyed inspectors, for we have some considerable knowledge of the creatures and their abominable work, based on very practical experience. But we would remark right here that it gives us no small satisfaction to call attention to the aforementioned records as evidence conclusive that Massachusetts is not the only place from which the dissemination of the pests may be feared and that if they should yet be found colonized elsewhere, as is quite probable, and the source from which they came not positively known, then the blame cannot be laid at the door of New England. It is a fact beyond question that there are no nurseries in any part of the world where insect existence is so persistently combatted or the stock sent out cleaner than in the nurseries located in New England. This is one good result of the moth scare, the value of which to the buyers of nursery stock cannot be too strongly stated.

"On earth
peace, good will
toward men"

The movement which has now taken form in New York, as mentioned in our notes on the recent meetings of the New York Florists' Club and the Associated Retail Florists, for co-operative action by all the local trade interests to have certain business restrictions removed or modified has one very significant and pleasing aspect. We refer to the manifest cordiality between different departments of the trade which in the past have not always pulled together. It has long been evident to the unbiased observer that the unharmonious and sometimes almost hostile attitude of the various divisions—plant growers, flower growers, market dealers, commission men and retailers—towards each other has been a serious impediment to the proper development of the floricultural industry as a whole, and a handicap to any well-meant society effort to this end. Not only in New York but in other places do we see unmistakable signs of the breaking down of the old barriers and of a gradual tending to line up together for the common good. The possibilities in this convergent predilection, if wisely fostered, are most inspiring. The movement is akin to the society affiliations from which so much of good is confidently expected in the near future. HORTICULTURE has on every opportunity advocated the "get together" policy and will continue to encourage by all possible means every sincere effort with that object in view.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the Editor of HORTICULTURE.

Christmas Notes

A Merry Christmas! Once again the holidays have come around although it seems only yesterday that we said the very words. Time flies, life is short, and the rush of business makes the days appear shorter yet. Therefore, let us all try to cast away any ill feeling that we may possess somewhere in us for any of our fellow men, and make ourselves agreeable even to the most disagreeable persons, and we may add customers. Because one person's nature is to be grouchy, and see nothing but black in everything, is no excuse whatever for us to show these same faults, and then satisfy our conscience with the thought that there are others that are worse, or that we are not as bad as some people we know. "The voice with the smile wins" is a phrase used in advertising, and it contains more truth than we may imagine. Let us not worry about the steam boiler that is liable to blow up, or the glass that the wind is liable to break, or the coal that is delayed and may not arrive on time. There are a thousand other things we might burden our lives with if we chose to, but they will not do us any good. The things that never happen cause some people more trouble than the troubles that really come. Would you worry, sitting down in a bad fit of blues if a storm was raging and threatened to blow one of the houses down, or something of the kind? No, of course not, and neither would any other florist that was worth calling that name, for he would be too busy doing everything possible to prevent the disaster, and would therefore have no time to brood, and after it was all over he no doubt would stop and wonder how he ever got through all of it. This is true of all other troubles, and if they do come we are so busy trying to avert or amend them that we feel little of the gloom that we pictured ourselves surrounded by when we worried over this and that. There is a limit to gayeties but it pays to drop around to see your neighbors right in their greenhouses in the daytime, and perhaps at some quiet social at night. They are not trying to swindle you or get your trade by crooked means; they would not do that, and expect to remain in business long. Neither would any other florist. If in the country, do not be afraid to drop in and see the big florists, such as those on Fifth avenue in New York. They will not snub you in the least, but will be glad to stop for a chat. Of course their time is valuable, but they will not turn anyone down. It is the same all over, and any florist or gardener is glad to see you, if you are glad to see him. We find it so. Therefore let us cast away all gloom and let there be a good feeling and understanding among all of us. Christmas time, and let jealousy, etc., quickly disappear until there is no such thing. The way business is going, it will be necessary for all florists large and small to take

hold of a rope and all pull together toward the one end—better business methods, better distribution of our product, better advertising; everything must improve. But one man or several men will not do this; it will take all of us in the business together, working for the same thing, to bring it about, but it is coming. The progress made in the last few years is wonderful, compared to what things were years ago. But still more wonderful will be the improvements made in the near future. So let us all do our share, and not wait for the other fellow to start something, and then knock it down without even investigating what it really is. May it be a Merry Christmas even though Beauties will not bring \$1.50 per special, for with the improved methods we can grow more of them to the plant, so that we get about the same in the long run. And now for a note on rose growing.

Care of Houses in General

Houses that were in, or rather will be in for Christmas, will need very good care to make them come back. The weather will play an important part in this, and with clear cold weather it will be quite easy. If the wood of the plants cut off is inclined to be a little hard, frequent syringings will help soften the wood, and cause the plants to break. As soon as they are fairly well started, a mulch of manure or liquid will then help lengthen out the stems of the new growths. It would not be wise to start this too soon, for the young growths would then be likely to turn very weak, and on Beauties would be likely to run blind. Wait until they are three inches long or so, and then start the feed, using cow manure if possible. Run the house a degree or two cooler if the plants are badly cut off. This will insure a hardy growth, and that is very essential, for if the houses produce a crop for Christmas and then stop, they will not pay. Stuff along in January, February and even March will count a good deal in the profits. Clean up some of the dead leaves, tie the plants up, especially the Beauties, and they will feel just so much more like growing.

Propagation

In taking Beauty cuttings, do not make the mistake of using all blind wood for this purpose. This would not encourage the plants to become more floriferous, and besides the plants from wood of this kind are weak as a rule, when compared with those taken from selected wood that would set and bear flowers. Make sure that there are no spiders on the leaves and that they are perfectly healthy, and free from spot. Try to use wood that has nice live thorns on it, as this will root easier, and start quicker as well, after the cuttings are potted.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

In point of number of members in attendance, the character and prominence of those present, and in the diversity of horticultural and allied interests represented, the meeting of the New York Florist Club last Monday was exceptional and certainly one of the most significant gatherings ever held by the club.

The great incentive for all this was the annual election of officers and the shaping of the policy of the organization for the coming year insofar as this could be set forth in the selection of its leaders and in its attitude as expressed in various other important propositions. The principal contest, one which in the minds of many overshadowed all other questions, was for the office of president. With the exception of this and the selection of trustees there was no competition, all the candidates with the exception of one for each position having sent in their declinations to run. The presidential canvass was conducted with commendable cordiality and freedom from asperity. When the election of Mr. Bunyard was announced Mr. Hendrickson, his opponent on the ticket, promptly made a motion that the election be made unanimous and this was done. The result of the balloting was as follows: President, Harry A. Bunyard; vice-president, Robert Koehne; secretary, John Young; treasurer, W. C. Rickards; trustees, W. R. Cobb, J. H. Fieser, Emil Schloss.

After the announcement of the result of the voting by W. F. Sheridan as judge of election, President Duckham called the successful candidates to the platform and introduced each in a graceful and most pleasing manner and each responded to the call with a few words of appreciation and the promise of earnest effort in the duties of the year to come. President Bunyard declared this to be the proudest moment of his life excepting when he was being married. Secretary Young said that this was his 25th consecutive election to the office. He hoped he had a few good years left in which to give his best endeavor in the service of the club.

Max Schling presented the draft of two resolutions in harmony with previous action of the Associated Retail Florists, speaking briefly in favor of their adoption by the club and after a few minor amendments suggested by W. H. Siebrecht, Jr., the resolutions were adopted by unanimous vote. Following are the resolutions complete:

Whereas, Florists are not exempted from the provisions of Section 8a of the Labor Law, and

Whereas, On account of the perishable nature of the stock carried, it is necessary to operate on Sundays, and impracticable to give employees twenty-four hours' rest in every seven days; therefore be it

Resolved, That the New York Florists' Club introduce in the next session of the legislature a proposed addition to subdivision 2 of Section 8a of the Labor Law as follows:

"(2) Employees in nurseries and florists'

HARRY A. BUNYARD
President-elect, New York Florists' Club.

establishments, and employees engaged in the plant and flower trade." And be it further Resolved, That the President of this club appoint a committee of three to accelerate the passage of said proposed amendment, and to consult with the N. Y. & N. J. Association of Plant Growers, the N. Y. Wholesale Florists' Protective Association and the Associated Retail Florists, and to obtain their co-operation for the passage of said amendment.

Whereas, Florists are not exempted from the provisions of Section 8a of the Labor Law, and

Whereas, It is necessary for retail florists in the City of New York to operate on Sundays as well as all other days, on account of the perishable nature and growing conditions of the stock carried, and on account of Sunday orders and decorations, for churches and otherwise, which must be executed on Sundays by reason of the perishableness of the flowers and plants used therein, it is

Resolved, That the New York Florists' Club hereby appeals to the Commis-

ROBERT KOEHNE
Vice-Pres't-elect, New York Florists' Club.

sioner of Labor for his approval for the exemption of the florists of the City of New York and their employees from the operation of Section 8a of the Labor Law; and be it further

Resolved, That the New York Florists' Club hereby appeals to the Industrial Board for an order exempting florists of the City of New York and their employees from the provisions of Section 8a of the Labor Law until July 1, 1915.

On the exhibition table were large vases of the red roses, Francis Scott Key and Prince E. C. d'Arenberg, the former shown by F. R. Pierson Co., and the latter by S. J. Reuter & Son. A cultural certificate was awarded to each. Two new members were elected and three more were proposed.

After the appointment of committees on the death of D. Y. Mellis and on transportation to the Carnation Society meeting at Buffalo in January the meeting adjourned.

Harry A. Bunyard is so well known to the majority of our readers that any attempt to describe his qualifications for the high office to which he has been elected would be like trying to paint the lily. Suffice it to say that wherever Harry Bunyard is you will soon know that he is there. His enthusiasm is exhaustless as is also his industry. In all the activities of the New York Florists' Club for many years his name stands pre-eminent among the indefatigable workers. As secretary of the American Sweet Pea Society his record is well known. He has done service on the Executive Board of the S. A. F. in the past as an appointed member and will now go back to that board by virtue of his official position in the N. Y. Florists' Club under the new system of representation. We do not need to remark that he will be a "live wire" as heretofore in his dual responsibilities.

Robert Koehne, the vice-president-elect, is a retail florist of the firm of Wernz & Koehne, 61 Fifth avenue, New York city. Mr. Koehne is a tried and true and ardent member of the club, popular because of his fidelity to any duty imposed upon him and his happy personality.

John Young we need not eulogize. John Young is his own best reason for the unanimity with which for the twenty-fifth time the responsibilities and the honor of the secretaryship have been placed in his keeping. We see no reason why this same position may not be carried on his shoulders for another quarter century. We hope to be on hand at that time and join in the acclaim.

W. C. Rickards, treasurer. The ever-sunny personality of Billy Rickards is a never-failing asset whenever that irrepressible well-spring of good nature wants anything. He creditably represents one of the most highly respected seed houses in the world—Thorburn's. Between the dual honors is it any wonder that he is complacent?

As to the trustees, W. R. Cobb is an executive officer of the Lord & Burnham Company, with rare abilities not only as a business man but as an architect. J. H. Fieser represents the rank and file of the prosperous New Jersey florist growers. He

has long been a loyal member of the club and of the S. A. F. Emil Schloss represents the "allied interests." His specialty is florists' ribbons. For many years his exhibits at the various conventions and shows have been generous and effective and, as a businessman well-known and popular among the entire trade, he will prove a valuable man in the councils of the club.

AMERICAN ROSE SOCIETY.

The executive committee of the American Rose Society had a full meeting at the office of Traendly & Schenck in New York City on December 14th. Thomas Roland on behalf of the Massachusetts Horticultural Society extended an invitation to the American Rose Society to hold their annual exhibition and meeting in Boston on March 25, 26, 27 and 28th, the same being accepted. The exhibit in pots and tubs is to be made on the 25th and cut roses are to be staged on Friday the 26th. The committee to act with the Massachusetts Horticultural Society in preparing a premium list are—Louis J. Reuter, Westerly, R. I., Thomas Roland, Nahant, Mass., and Alex. Montgomery, Natick, Mass.

A special committee was appointed to solicit premiums and is composed of the following—Louis J. Reuter, Westerly, R. I.; E. Allan Peirce, Waltham, Mass.; Eber Holmes, Montrose, Mass.; S. S. Pennock, Philadelphia, Pa.; Wallace R. Pierson, Cromwell, Conn.; Frank H. Traendly, New York City, Patrick Welch, Boston, Mass.; E. G. Hill, Richmond, Ind.; August F. Poehlmann, Morton Grove, Ill.; William F. Kasting, Buffalo, N. Y.

Vice-President Pyle moved the consideration of the appointment of committees for governing Rose Test Gardens, and the following committees were appointed. The central rose garden committee are: Alex. Cumming, Jr., Cromwell, Conn., Chairman; Thomas N. Cook, Watertown, Mass., and Wallace R. Pierson, Cromwell, Conn. The committee for the Washington test gardens are—Robert Pyle, West Grove, Pa., chairman; Admiral Aaron Ward, Roslyn, N. Y., Charles F. Tansill, Washington, D. C. The committee for the Cornell test garden are—A. C. Beal, Ithaca, N. Y., John Watson, Newark, N. Y., and Rev. Dr. Mills, Syracuse, N. Y. The committee for the Hartford test gardens is John Huss, chairman, Hartford, Conn., and for the Minneapolis test gardens Theo. Wirth, Minneapolis, Minn.

Upon motion it was resolved that in recognition of the action of the Syracuse Rose Society in becoming affiliated with the American Rose Society with its over 300 members the president of the Syracuse Rose Society—Rev. Dr. E. A. Mills be chosen an honorary vice-president of the American Rose Society.

The annual bulletin has been started and the intent is to get out the best annual report that has yet been issued. The Secretary reported this work well under way.

The number of members of the American Rose Society who belong to the Society of American Florists and Ornamental Horticulturists is 104, and this number entitles the American Rose Society to appoint one of its number (its president) as a director

on the board of the S. A. F.,—Wallace R. Pierson in this case.

BENJAMIN HAMMOND, Sec'y.
Beacon, N. Y.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The meeting of this club at Horticultural Hall, Dec. 15, was fairly well attended. W. R. Cobb of Lord & Burnham Co., New York, gave a stereopticon lecture on greenhouse construction that proved to be instructive and was well received.

The following were elected to office of the year 1915: Herman H. Bartsch of Waverley, president; James Methven, Readville, vice-president; William N. Craig, Brookline, secretary; Peter Fisher, Ellis, treasurer; Geo. M. Anderson, Milton Wm. J. Kennedy, Chestnut Hill, Peter M. Miller, Boston, Wm. J. Patterson, Wollaston, Andrew K. Rogers, Readville, executive committee.

A discussion on greenhouse ventilation took place after refreshments

HERMAN BARTSCH
President-elect Gardeners' and Florists' Club of Boston.

were served, headed by Wm. Downs. It promised to be lively and interesting, but was cut short on account of the lateness of the hour.

Among the exhibits were five vases of carnations from S. J. Goddard of Framingham, including White Wonder, Pink Delight, Gloriosa, Champion and Gorgeous. F. W. Fletcher showed two vases of snapdragon. A vase of white antirrhinums came from W. N. Craig. One of the best exhibits was a collection of Christmas plants from W. W. Edgar Co.

Herman Bartsch, the newly elected president of the Gardeners' and Florists' Club of Boston comes to this position of honor through the good old practical route of efficiency and integrity in business and faithful service in such duties as the organization has imposed upon him. As manager of the business of the W. W. Edgar Company at Waverley, Mass., Mr. Bartsch has made an unexcelled record not only as an intelligent and

successful plant grower, but as a business man of more than ordinary perception and push. In the club he has been a loyal member, serving with zeal on various committees and as its vice-president, and nobody who knows him will doubt that he will "make good" as its chief official.

NATIONAL ASSOCIATION OF GARDENERS.

The annual convention of the National Association of Gardeners was held in Horticultural Hall, Philadelphia, Pa., on Wednesday and Thursday, December 9th and 10th. The business meeting on Wednesday afternoon was opened by J. Otto Thilow, with an address of welcome to the visiting gardeners, following which he presented a gavel to the association, the head of which was made from a piece of wood from a Cedar of Lebanon, said to have been brought to Washington from Mt. Lebanon, the handle of wood taken from the home of Thomas Jefferson, Monticello, W. Va., the bronze caps from metal taken from the wreck of the Maine, which was sunk in Havana harbor. The gavel is the gift of George W. Hess, superintendent of the Botanic Gardens, Washington, D. C., and is to be used by the presiding officer at future meetings of the association. After the presentation, Mr. Thilow turned the meeting over to President William H. Waite. The secretary's report and those submitted by the various committees disclosed that the year about to close has been an active one in the organization. The treasurer's annual report showed a substantial bank balance to the credit of the association.

The following new officers were elected for the ensuing year: President, John W. Everitt, Glen Cove, N. Y.; vice-president, William S. Rennie, San Francisco, Cal; secretary, Martin C. Ebel, Madison, N. J.; treasurer, James Stuart, Mamaroneck, N. Y. Trustees: William Kleinheinz, Ogontz, Pa.; Peter Duff, Orange, N. J.; George W. Hess, Washington, D. C.; William Turner, Mendham, N. J.; and John Dodds, Wyncote, Pa.

W. Frank Therkindson of Philadelphia, addressed the meeting on "The Progress of Horticulture in this Country." He presented some statistics on the magnitude of the nursery and seed growing industry, his subject being devoted more to the commercial end of the growing than to the private end, but what he related proved interesting to the gardeners as it gave them an insight in commercial horticulture as it is conducted in the United States. Richard Vincent, Jr., White Marsh, Md., presented an interesting paper on "The Gardener of the Past and Future," which was well received. The illustrated lecture by Robert Pyle, West Grove, Pa., on "Roses, and Rose Gardens at Home and Abroad," proved most interesting and instructive. Some fine pictures were shown of European rose gardens, also some excellent views of rose gardens at Portland, Ore.

There were about seventy-five members present at the meeting, the severe storm of the preceding days having prevented many who intended to be at the convention from attending. At the conclusion of the business meeting, the members adjourned to the banquet hall where they were joined by

the ladies, and other friends of the allied horticultural interests. The banquet hall had been beautifully decorated by the local committee on arrangements—Messrs. Logan, Kleinheinz, Dodds and Rust—and the room presented a pretty picture as the guests entered.

After the inner man was well satisfied with the excellent menu which

was served, President Waite, introduced Mr. Thilow as toastmaster, which function Mr. Thilow performed with his usual grace. President-elect John W. Everitt, responded to the toast "The National Association of Gardeners;" Robert Craig, "Our Horticulturists;" James MacMachan, "Our Retiring President;" Wallace R. Pierston, "The American Rose Society;"

William Kleinheinz, "Chrysanthemum Society of America;" S. Mendelson Meehan, "The Nurserymen;" Richard Vincent, Jr., "Several Kinds of Compensation;" John Westcott, "The Florist;" Paul Heubner, "The Railroad Gardener;" Henry F. Michell, "Our Seedsmen;" Arthur Smith, "The Ladies;" Charles Seybold, "The Gardener's Influence in a Community;"

George C. Watson, "The Human Side of the Gardner." W. J. Collins sang some Scotch airs. Dr. P. H. Lane and Robert Craig entertained the diners with a duet which provoked much merriment.

Greetings were received from President Theodore Wirth, President-elect Patrick Welch and Secretary John Young of the Society of American Florists, Charles H. Totty, William F. Gude, J. K. M. L. Farquhar, Frank R. Pierson, William J. Stewart and J. Austin Shaw.

On Thursday forenoon the bowling tournament took place in the club rooms of the Philadelphia Florists Club, the ten high scores, for which prizes were awarded, being as follows:

John W. Everitt.....	167	191	180
John H. Dodds.....	210	148	177
Wm. Robertson.....	178	176	151
Sam'l Batchelor.....	171	154	170
Chas. W. Seybold.....	179	167	132
James Stuart.....	157	142	154
Thos. Aitchison.....	151	118	168
John F. Johnston.....	117	123	161
Joseph A. Manda.....	115	122	144
L. Ottmann.....	122	140	103

John W. Everitt won the president's prize with the highest score.

In the afternoon groups were organized for visits to the Widener, Wanamaker and Newbold estates, the Dreer nurseries at Riverton, N. J., the Andorra nurseries at Chestnut Hill and the Michell trial grounds at Andalusia, Pa.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Lester L. Morse, San Francisco, Calif.; First Vice-President, J. M. Lupton, Mattituck, L. I.; Second Vice-President, E. C. Dungan, Philadelphia, Pa.; Secretary and Treasurer, C. E. Kendel, Cleveland, O.; Assistant Secretary, S. F. Willard, Jr., Cleveland, O.

Low Figures on Peas.

The annual campaign of the seed pea growers among the canners of the country is under full swing and has been running on "high" for some weeks. The prices named are the lowest for several years. Such varieties as Alaska, Advancer, Admiral, Horsford Market Garden, are quoted at \$3.00, white Surprise is generally quoted at \$3.50. Notwithstanding these low prices, one or two of the habitual price cutters who always try to shade the figures made by their more reliable and responsible competitors, have seen fit to cut the present price 25c. per bushel on one or two varieties. It is more than doubtful if they write enough more business to compensate them for the loss of this 25c. and where prices are so close as this year, 25c. per bushel often represents all the profit in a transaction. According to the statements of the more conservative growers, \$3.00 is very close to cost and it is said that Alaskas will cost almost if not quite that figure. This is due to the fact that in Montana and Idaho where the bulk of the seed peas are now grown, it is necessary to pay more for Alaskas than for the other

varieties above named with the exception of Surprise. Strictly on the merits, Alaskas should be 25c. per bushel higher than the other three leading Sweet Wrinkled varieties, as the cost to the grower is estimated at 30c. per bushel more.

Canners Backward.

Notwithstanding these low prices which are so near cost, many of the canners and particularly those in Wisconsin are holding off and not buying their full requirements. Many are only contracting for about 50 per cent., while quite a number have not up to date bought a bushel of future seed and several say they will not, but will take their chance on the open market next fall. To those familiar with the situation, this is a very foolish attitude on the part of these canners. There is hardly one chance in ten that under any circumstances seed will be lower next fall than present prices on futures, while should there be a short crop there is a strong possibility of an advance of from \$1.00 to \$2.00 a bushel. Were prices on futures \$4.00 as they were two or three years ago, or even \$3.50 as last year, there might be some logic in not buying, but the mind of the average canner is a marvelously complex bit of mechanism and usually works in inverse ratio to facts. The seed growers have stated that they will not plant any great excess acreage over their sales of futures, and this decreases any possibility of lower prices after next harvest.

Perhaps a reason for the very erratic course of the canners may be found in the agitation now going on among them over the seed proposition. A large number during the past few years have considered only one factor in their purchase of seed, and that has been the price. They refuse to recognize any variations in quality and all seeds look alike to them. As a result they have bought seed of every conceivable shade of quality, the consequence being the packing of a very low grade of goods, so poor in quality that they cannot get more than about 60 per cent of cost out of them. There is a large surplus of canned peas in

the warehouses of the canners, especially in Wisconsin, where it is estimated that they are carrying at least two million cases. This has, as might be expected, a very depressing effect on values, but were these peas of good quality, all of them would doubtless go into consumption between now and next spring at a figure that would let the canner out, if without profit, at least without loss.

Unreasonable and Unreasonable.

Now for all this the regular seed growers are held responsible by a considerable number of the canners, and aided by a few so-called scientific experts, whose heads are buzzing with theories and with little or no practical knowledge of the matters they are discussing, an agitation has been going on to compel the seed grower virtually to

THESE PRICES ARE FOR THE TRADE ONLY

ARTHUR T. BODDINGTON, 342 W. 14th St., - - NEW YORK

Seedsman

guarantee the quality of the pack. In other words the seed grower must assume responsibility for the poor quality which the canner puts up. A few of these light-headed gentlemen propose to draw up a form of contract for the seed growers to accept, which as stated above, would virtually make them responsible for the quality of the goods packed. Under the present disclaimer which has been in use by the seed trade for the last quarter of a century, the seedsmen are barely able to protect themselves against unscrupulous users of seed, either in large or small quantities, and such a contract, as we have been informed the Wisconsin canners propose to force upon them, would place them completely at the mercy of any unscrupulous individual.

While of course we have no authority to speak for any of the seedsmen, we assume that the conservative, cautious growers, will refuse to accept any such contract, while a small number who are always willing to gamble with fate and perhaps have but little to lose, may take a chance. They are so eager and hungry for business that already they seem to be permitting the canner in some instances not only to dictate the conditions, but to name the prices, at which they will place their business.

Notwithstanding the present commotion and dissatisfaction existing among a considerable number of the canners we believe that the sober, common sense of the more conservative ones will prevail over the ignorance and selfishness of the more radical element and that eventually the seed grower and the canner will find a common ground of agreement.

Our readers will pardon us for giving so much space to this subject but as a considerable number are largely interested in producing seeds for the canners and particularly pea seed, we thought that a word in their defence would be timely.

Improved Outlook.

While the trade as a whole, is not as optimistic as a year ago or for several years past, they are entering the season of 1915 with a better spirit than might have been expected two or three months ago. In fact, many are very hopeful and while they have some misgivings over conditions for another year, they are not borrowing trouble so far ahead. We have referred to the prices generally ruling on canners' varieties of peas but have not seen the full line of prices from any of the leading growers up to this time. It is the general impression, however, that prices on peas will rule lower than a year ago, while beans will go higher. We have already pointed out the probability of these conditions some weeks ago, and are now very confident that our forecasts will be fully realized.

Wholesale Seedsmen's League.

The final meeting of the Wholesale Seedsmen's League was held in New York, November 22, and a general understanding as to prices for the coming season was reached. These prices with the exception of beans, which show an advance of from 50 cents to \$1.00 per bushel, do not vary greatly from the preliminary figures adopted

in October; the general average of prices not being much above those of a year ago, with the exception of beans as already stated.

Notes.

Imports at the port of New York for week ending Dec. 5, show the following values: Fertilizer, \$11,851; manure salts, \$35,119; color seed, \$4,124; grass seed, \$2,627; trees and plants, \$41,179.

Einar Knutsson, representing Hjalmar Hartmann & Co., of Copenhagen, Denmark, sailed from New York on the Christianiafjord of the Norwegian-American Line on December 12, after a very successful business trip in the United States.

The question of whether or not a druggist or other storekeeper selling boxes of assorted seeds upon an agreement or contract that the seeds sold shall be paid for at the end of the season, less certain specified discounts, and unsold seeds returned, is liable for the payment of the special tax to which commission merchants are subjected, seems to have raised doubts in the minds of those catering for such business, and a number of representatives have called at the office of the Commissioner of Internal Revenue for a ruling in the matter. According to a decision of the Supreme Court of the State of Alabama, in which the office concurs, such transactions do not involve liability as commission merchants, and it is held, therefore, that the special tax of \$20 as commission merchants is not incurred by such druggists or other storekeepers doing business under these conditions.

BUSINESS TROUBLES

Boston Frank W. Houghton, florist, has filed a petition in bankruptcy. Liabilities, \$6164; no assets.

Birmingham, Ala.—McVay Seed Co., 2018 First avenue, voluntary bankruptcy; assets, \$19,668.09, liabilities, \$16,290.49.

NEW CORPORATIONS.

Austin, Minn.—A. N. Kinsman, Inc., capital stock, \$75,000.

New Haven, Conn.—Elm City Nursery Company, capital stock increased to \$200,000.

Warwick, R. I.—The Hoxsie Nurseries, Incorporated, was granted a charter by the Secretary of State, Dec. 16. The corporation is to be located at Hoxsie in the town of Warwick and has a capital stock of \$10,000. The incorporators are Ralph M. Greenlaw, Charles E. Tilly and Edward J. Noons, all of Providence.

Rochester, Minn.—The R. Bragg Company has purchased the flower business of the E. L. Lyman Co. They will remove the store fixtures to their new store opposite St. Mary's Hospital.

Of Interest to Retail Florists**WHY SOME SUCCEED AND SOME DO NOT.**

Mere hard work will not bring success. There must be behind the work a "know-how" that will make it accomplish something.

A retail florist kept himself so busy with the little things of his business that he had no time to make money. But when he analyzed his methods, himself, his business, to find the reason he wasn't making money, he found he could unload half the petty work he was doing onto the fifth salesman.

Then he began to understand that it was his business to manage, to think, to plan, to find out why things should be done, and how they could be done in the best way. He found that anybody could do the things that had to be done if he told them how. He quit using the brains, the enthusiasm, the energy of his business for the "fifth salesman's" duties. He devoted himself to the management of his business. Now he is a merchant prince, the head of a great flower business with an income several times bigger than his gross business used to be.

A young German came to this country twelve years ago at the age of eleven, with but \$3 in his pocket and not a word of English in his vocabulary. He obtained employment in a florist shop in the German quarter of a western city. Here he learned the flower business. Before he was twenty he was made manager of the store. When he was twenty-one he was appointed manager of a bigger store in a larger city. Now, at twenty-three, he is manager of the leading store in an eastern city, with thirty employees.

If you would ask him how he succeeded, he would tell you that he always made it a point to know the results of his efforts. When he went into a new store he wanted to know what stock and what methods were paying a profit and how much. And he wanted the information all the time, not merely for a few days. He demanded records that showed him whether salesman No. 1 was producing a profit. When he found out which of the clerks produced the most profit he used him as a standard for the other clerks—or their successors—to work up to.

The florist who succeeds cuts out the unprofitable methods. He knows each day the results of that day's effort. He devotes his time to planning methods for the increase of his business and hires people to work out the smaller details. He knows that anybody can do the things that have to be done if he tells them how. He manages his store with his eyes open.
S. L. F.

Augusta, Me.—George H. Curtis, manager of the Augusta Flower Shop, has bought the store and every one is wishing him success as he is a royal good fellow.

ASSOCIATED RETAIL FLORISTS.

A number of the prominent retail florists of New York City have formed and incorporated a new association called the Associated Retail Florists, Inc. The first meeting was held at the Hotel Woodward on December 8, at which the following officers were elected: Michael A. Bowe, president; Max Schling, vice-president; George E. M. Stumpp, treasurer; William H. Siebrecht, Jr., secretary. The directors are Marshall Clarke, Max Schling, Geo. E. M. Stumpp, Michael A. Bowe and William Burns.

At the first meeting resolutions were adopted, appealing to the commissioner of labor for his approval for the exemption of the florists in the city of New York and their employees from the operation of the rest clause of the labor law, which requires them to give employees twenty-four consecutive hours' rest each week; and also appealing to the Industrial Board for an order exempting florists from the provisions of the said law.

The following resolutions showing the spirit of the Association toward other organizations, was unanimously adopted:

Whereas, It is one of the purposes of this organization to promote a more enlarged and friendly intercourse between retail florists and horticulturists generally, as set forth in the first article of the certificate of incorporation, and more fully set forth in the by-laws:

Whereas, The members of this corporation believes that the true interest of all branches of the trade, including the retail florists, the wholesale florists and the growers are identical:

Whereas, The corporation believes that whatever is for the true benefit of any one branch of the flower business will be for the benefit of all; therefore, be it

Resolved, That this corporation shall, and hereby expresses its intention to work in complete harmony with the other branches of the flower business, namely, the wholesalers and the growers; and further be it

Resolved, That no important action for the benefit of the trade generally shall be consummated until the plan thereof shall have been submitted to the other two branches of the trade, as represented by their organizations, and the results of their deliberations can be placed before this corporation.

A committee consisting of Messrs. Stumpp, Schling and Kottmiller was appointed to confer with the New York and New Jersey Association of Plant Growers, the Wholesale Florists' Protective Association and the New York Florists' Club, and to obtain their co-operation for the passage of an amendment to the section of the labor law above mentioned and to exempt florists from the operation thereof. The matter of closing hours on evenings and Sundays, steamship rates, and many other items came up for discussion and action.

This new association already has over thirty members and new applications are coming in daily.

Buffalo, N. Y.—S. A. Anderson has purchased the flower store of Rachel M. Rebstock, 614 Main street. Mrs. Johnson, formerly Rachel Rebstock, is in charge.

The Hadley rose still continues to be in large demand. Robt. Montgomery is shipping in some of the finest stock seen of this beautiful variety.

The Boston Cut Flower Co. report business as being very good. The sale of their 50c. boxes still holds good and is a favorable indication of the value of this plan of disposing of stock.

George Cartwright, the genial secretary of the Boston Flower Exchange is again ill with severe indigestion. It is sincerely hoped by all his many friends that Mr. Cartwright will be up and doing very soon.

Excellent specimens of *Cattleya Trianae* are being cut by Charles Rapp of Melrose Highlands. Mr. Rapp has been very successful with orchids commercially and claims to use original methods in growing them.

Pot plants are selling well all over the city. The W. W. Edgar Co. of Waverley, A. M. Davenport of Watertown, A. Leuthy of Roslindale and The Needham Conservatories are supplying the bulk of high-grade plants in the markets.

Julius Zinn is now well settled in his new store and has everything in readiness for a big holiday trade. The new location is at 4 Park street, only a short distance from the old store, which was at 1 Park street. The new store is three doors nearer the State House.

Thos. Pegler, one time president of the Gardeners' and Florists' Club of Boston is now located in Brunswick,

Me., where he is carrying on a successful retail store and range. Mr. Pegler was in town this week and commented very favorably upon business conditions in Brunswick and its opportunities for the ambitious florist.

The sale of cut flowers in the big department stores is enormous. The flower departments in Filene's, Bacon's and Shepard's report business as being very good, especially since last Saturday. Filene's have gone into the flower business in earnest, showing the good will of the firm and the permanency of the department by becoming members of the Telegraph Delivery Association.

There were about seventy-five men present at the meeting held at the American House, Dec. 12th, for the purpose of discussing the question of surplus stock and the best means of disposing of same. A spirited discussion took place, in which some very interesting information was brought out, bearing on the problems of wholesale prices. No definite conclusions were arrived at, and another meeting has been voted, to take place Jan. 11. It is expected that city officials will attend, to represent municipal and legal interests.

WASHINGTON.

C. E. Brooks has opened his branch store in the Arcade, on upper Fourteenth street, Northwest, and will continue the main store at 1527 Fourteenth street.

J. M. Rankin, of the plant introduction field station at Rockville, Md., is making a two weeks' trip in Florida, Georgia and the Carolinas, to confer with managers of commercial nurseries on the propagation, planting, cultivation and commercial handling of nursery stock.

Dr. Haven Metcalf, who is in charge of forest pathology for the bureau of plant industry, is making a month's trip through Maryland, Pennsylvania, New Jersey, New York and the New England States studying chestnut bark diseases and white pine blister rust. He will spend the Christmas holidays with relatives in Gardiner, Maine.

J. H. Small & Sons furnished the decorations for the Gridiron Club's annual banquet at the Hotel Willard. As usual, a large electric gridiron flamed brilliantly in a luxuriant frame of

American Beauty roses, while the walls were hidden by a forest of tropical plants and the tables were covered with mounds of flowers. This same firm furnished the cross of pink and white roses, six and a half feet high, for the New York delegation in the House of Representatives, and a standing wreath of white roses and American Beauty roses, of a similar height, for the House of Representatives, which were placed on either side of the casket of the late Congressman Sereno E. Payne which rested in the House chamber. They also furnished a large Roman wreath with orchids and pink roses from an individual.

CHICAGO.

A sudden drop of 40 degrees in temperature on Sunday, Dec. 13, put an end to the warm rainy weather and reduced the amount of incoming stock.

The opening of the New Morrison Hotel gave opportunity for some good local sales, though many more flowers could have been sold without causing a shortage.

Some of the boxes of flowers were not sufficiently protected to stand the zero temperature and stock was found frozen on Dec. 15. Local thermometers were registering 10 degrees below.

Carnation, "Laura Weber"

New York,

December 15th, 1914.

TO WHOM IT MAY CONCERN:

We have arrived at the above address, where our facilities are now tenfold what they were at 102 West 28th Street.

There is no denying that business in general is poor. It would be unreasonable to expect normal conditions to prevail when nearly the whole of Europe is at war.

WE are not afraid! We feel that when a firm makes sincere effort to stop the leakages, that firm is bound to weather the storm and remain secure.

We assure you that no energy will be spared to obtain for you the highest market prices.

The writer fully realizes (as only one can who has been through the mill) that friendship must be continually earned.

Give us a trial. We have twenty years' experience behind us and now have the proper mental and physical tools to turn out first-class work. Your consignments will be greatly appreciated by,

Yours very truly,

GUTTMAN & RAYNOR, Inc.

President.

Merry Xmas
to the Trade

There is a large supply of holly offered here much of it is said to be rather poor, but some offered in the retail stores show up well berried and of good color. Prices range all the way from \$2.50 to \$5.00 per case.

Largely splendidly formed chrysanthemums of the Helen Frick variety were seen in quantity at The Chicago Flower Growers' Association store this week. This beautiful pink seems likely to be in the market till after the holidays.

Frank Oechslein recalls the fact that the change came later last year. He had good reason for remembering, for Christmas week he was in danger of having his place flooded by the rains, something having gone wrong with the street sewerage. The cold wave came on the night of the 23rd of December.

Advance orders are coming in very slowly for Christmas stock, according to the reports of several of the large wholesalers. The result is predicted to be the maintaining of prices rather than lowering, when the rush of late

orders comes, as it surely will. On the other hand, florists supplies have been ordered well in advance and a good season is reported.

Retailers generally are planning for meeting a demand for moderate priced offerings, rather than the expensive gifts of past years. With this in view, even greater preparations are being made for small artistic baskets of

plants and flowers. The basket craze seems to be at its height this year and everything from the tumbler basket to the immense hamper can be had.

The late J. Arthur Beebe of Boston, in his will which has just been made public, left the sum of \$5,000 as a bequest to James Nichol, gardener at his summer estate in Falmouth, Mass.

BE SURE that you get the **MEYER GREEN SILKALINE**, and do not take any other that is sold as an imitation of the **MEYER GREEN SILKALINE**. They do not have the full weight, measure and strength of the authentic article. All our **GREEN SILKALINE** is guaranteed up to the highest standard and mark. The sizes are F, fine; FF, medium; FFF, coarse. It is for sale by all the best manufacturers. You cannot get it of your dealers unless direct of the manufacturer.

Flower Market Reports

BOSTON The conditions here are as changeable and fickle as the weather. Last Saturday gave promise of a boom in all kinds of flowers, but as we go to press everything is flat again. Roses, carnations, violets and narcissi sold well up to Tuesday. Cold weather has helped to shorten up all crops, and in this respect conditions are what they should be. Carnations especially are now securing fair prices running in some special cases to 6 and 8 cents. A few chrysanthemums are still holding on, but are of poor quality. Greens are plentiful and are in great demand. The same is true of pot plants, especially azaleas and poinsettias. The wholesale houses report increased shipping trade. Undoubtedly business will take another quick jump tomorrow or Saturday, and if this seasonable weather keeps up we can expect the regulation Christmas activity.

We are glad to report **BUFFALO** a better tone to the market, the cause being a shortening in receipts, especially of carnations, and as chrysanthemums are about over the sales have been gradually swinging to other stock which had been suffering since the long chrysanthemum season set in. From now on things must turn for the better as the buyers have had a long spell of their own way. Of course, business has been such that stock had to be reasonable in price to be moved. When roses are sold at 50 cents the dozen by the retail merchants on Dec.

12th, it plainly shows the condition of a market. Floral work has been very light and there have been no weddings, consequently there has been a heavy surplus to be carried along. Holiday decorative material has sold quite well so far though there is no special rush but what could be easily handled. The trade is well prepared for the holiday business and stores are decorated very attractively.

CHICAGO The first half of December closes with a rather quiet market. The approach of the holiday season is making itself felt and local sales are said to be very light. Social events have not

started yet and even funerals are not calling for a great number of flowers. Shipping trade is good. Those who compare sales each week with those of a year ago, say there is little difference and give the credit to the out-of-town sales. The supply of flowers has been diminished by the drop in the temperature but the change was so severe that the customers dropped off also. There are still quite a supply of chrysanthemums in the market and they bid fair to be seen till after the holidays. Roses are of an excellent quality and there is everything to choose from, Milady and Mrs. Russell

Flower Market Reports

(Continued from page 88.)

bringing the highest prices. American Beauties are none too plentiful. Orchids are also inclined to be scarce. Gardenias are in good supply and of fine quality. Carnations are improved with the cold weather, and a good supply is expected for Christmas.

It is difficult to foretell at this time what the supply will be for Christmas owing to the various changes in the weather during the last few weeks. We will undoubtedly have the usual large supply of poinsettias, paper white narcissus, stevia, violets, lily of the valley and orchids, but as to roses and carnations, then it is hard to tell. Both were in a very heavy supply until two weeks ago when a rainy, cloudy spell came that lasted until last Friday. This naturally checked the cut. Beginning with this week cold winter weather set in but the sun was shining. If the warm weather had kept up then the crop would have been over for many of the growers by the time the holidays arrived. It remains to be seen if the inclement weather sufficiently checked the cut to hold the crop over for a few weeks and with the blooms from plants not so far advanced insure a good cut of roses and carnations or if the supply will come mostly from the latter and be rather short. At the present time the cut both of roses and carnations is easily sufficient for immediate needs. Besides the list enumerated above other offerings are callas, sweet peas, a few antirrhinums, wallflower, forget-me-not and primroses. Business in supplies is very good.

The most noticeable feature of the flower market situation at the present time is perhaps the entire absence of anything that can be used as a basis for estimating the probabilities for the Christmas trade—either as to its volume, its character or the prices that any of the principal items will command. In going through the wholesale establishments this week we see a very moderate activity considering the presumed influence of the cold weather on production. We find the explanation when we look into the retail stores, for this atmosphere of lethargy is prevalent all through. The plant growers feel the effect in the same way as the cut flower people, this being their first year of a condition which the cut flower men have in recent years become well accustomed to. Most well-balanced observers are disposed, however, to anticipate an average Christmas, with the proviso that the weather is favorable in all particulars. Carnations are said to be not any too plenty but one sees an abundance of white ones in wholesale hands, and many of them not of first quality. The colored sorts are not much in evidence and the question is whether they are in hiding. Roses are generally of good quality especially some of the newer varieties and prices asked at present are very moderate. What they may reach next week is nothing more than a guess, with "the wish often father to the thought." Chrysanthemums are not yet cleaned up and some growers have apparently made a special effort to hold back a portion of their crop. Roman hya-

Asparagus Plumosus, strings (per 100)	10.00 to 20.00	10.00 to 20.00
& Spreu (100 bunches)		

cinths and paper white narcissi are in over supply. The same seems true, for the moment, of lily of the valley. Orchids in light receipts but no fuss is made on that account. Violets are good and more than sufficient in number. Cut boxwood is scarce.

There has been very little change in the market here since last report. Prices remain about the same, and no great advance is looked for until the 21st, when the Christmas demand commences. Most of the authorities consulted look for a good holiday trade. If the weather continues clear there will be plenty of flowers and the present asking figures indicate sane ideas on the part of the cut flower interests. A year ago the general comment was that the cut flower end did much better than expected—all on account of the reasonable prices. The general buyer felt that he was getting a square deal, and did not switch off so much to other things. On most of the popular cut flower items the prices will be even lower this year perhaps 20 per cent. lower than the low level of last year so that all should be well. We trust we shall hear none of the inane talk from the general press about fabulous prices which have originated mostly from inexperienced employees of retail stores, and have done much harm in the past. Proprietors should forestall this error by ordering all reporters seeking information to the main office, or to some person of discretion. Prices of cut flowers of all kinds never were so reasonable as they are today, and the reporter is exactly the fellow to pass that truth along to the public.

ST. LOUIS

The market last week was quite dull as only a limited supply came in of which the quality was not

the best. The dark weather for the last two weeks has caused these conditions and should it keep up cut stock is going to be high in prices and scarce for Christmas. Sweet peas and violets will be scarce and high in price for Christmas. Roses and carnations too will come high. Roses are off color. Paper whites, Roman hyacinths, lily of the valley, lilies and stevia will be in plenty at usual prices. Chrysanthemums are through for the season.

Ten days of rain and snow flurries have worked havoc with flowers in this market, materially shortening the supply. Business is exceptionally slow. Several growers are much concerned over the continued bad weather, stating that the American Beauty will not set buds. Pink roses and carnations are decidedly off color and gardenias fail to open. Sweet peas are quite scarce, but violets are far more plentiful and the singles are of exceptionally good quality. Mignonette is very good and in fair demand. The bottom has dropped out in the narcissus market and this flower can be had at as low as \$1 per hundred. There is practically no call for Lillium rubrum offered at \$8 per hundred. The first cutting of poinsettias has taken place. Some few very good calendulas were offered last week at \$2 and \$3 per hundred and met with a fair sale. Stevia is plentiful.

Compliments of the Season

Horticulture Publishing Co:

Gentlemen — HORTICULTURE has just reached my desk, and I want to congratulate you on the appearance of this Christmas number, and to thank you for the splendid manner in which you handled our page advertisement. It is beautifully set, and in every way most satisfactory.

Very truly yours,

W. F. THERKILDSON,
Adv. Mgr., W. Atlee Burpee & Co.
Phila., Pa., Dec. 14, 1914.

Editor of HORTICULTURE:

Dear Sir: You certainly are to be congratulated on your "tenth birthday," in fact you are to be congratulated every day of your existence as the editor of HORTICULTURE.

HORTICULTURE, to my mind, occupies a unique position among our trade papers, and I believe every florist in the United States would be just a little better fitted for his business if he were a regular reader of its cultural articles and its editorials as well as the occasional "flights" of G. C. W.

Wishing you the success you deserve. I am, Respectfully yours,
ALBERT M. HERR.

Lancaster, Pa., Dec. 11, 1914.

Mr. W. J. Stewart,
11 Hamilton Place,
Boston, Mass.

Dear Mr. Stewart: I congratulate you on the completion of the ten years of HORTICULTURE. They have been ten good years and you have given good service in them. I hope that the journal will continue to keep us in touch with the horticultural interests.

Yours with best wishes,
L. H. BAILEY.

Ithaca, N. Y., Dec. 12, 1914.

COVER ILLUSTRATION.

The illustration on our cover shows a portion of the show room of the floral establishment of "Penn the Florist." It is here that patrons and flower lovers may leisurely view the floral appointments and offerings. Special exhibitions of flowers in season are held in this section. Under ordinary conditions all make-up work is done in another section of the establishment, so that only the finished products are to be seen here.

Rugs and carpets, writing tables and desks, statuary, books, magazines, etc., help to give a comfortable and refined appearance.

Patrons are always invited to make this room their resting places and rendezvous when in town. Wood carvings, mirrors on all sides, choice flowers, and containers are in perfect harmony with the other artistic furnishings that make the establishment one of the model shops of the city.

Pulverized Sheep Manure From Big Feeding Barns No Adulteration—No Weed Seeds

THIS IS THE BRAND
GUARANTEED PURE

Sheep's Head Manure is the cleanest in America. Here are the big covered corrals of the railroads, where the sheep are unloaded and kept from 60 to 90 days to fatten for the Chicago market.

We Guarantee

our product to be absolutely clean — no pig manure or other adulteration — nothing but sheep manure — dried and pulverized for easy handling, and all the weed seeds killed.

Some of the largest growers in the East have used our product for years.

Shipped in 100 lb. sacks

CLUB AND SOCIETY NOTES.

The Lenox Horticultural Society at its meeting on Dec. 5 voted to change the time of its meeting from the first Saturday to the second Wednesday night in each month.

The Chicago Florists' Club at its meeting on Dec. 10th elected new officers as follows: W. J. Keimel, president; Jas. Morton, vice-president; Guy W. French, secretary; Paul Klingsporn, treasurer; C. L. Washburn, trustee.

Ladies' Night at the Sherman House on Dec. 11, proved a very happy occasion. About fifty couples danced in the crystal ballroom and also enjoyed a program, the central attraction of which was the new dances by Virginia Poehlmann. As she and her partner performed them, they were very pretty and enjoyed by all. Wm. Milander contributed to the occasion by giving several recitations and Edward Hunt by singing. A buffet luncheon was served. The party broke up at midnight and all declared it one of the best ever given by the club.

31 Union Stock Yards, Chicago

SCOTCH SOOT

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

\$4.00 per 112 lbs.; \$17.50 per 560 lbs.

Stumpp & Walter Co.

CAMBRIDGE, MASS.
NEW YORK, N. Y.**Obituary****Evelyn Fuller Alward.**

Evelyn, eldest daughter of Mr. and Mrs. Joseph Fuller, of Leominster, Mass., died on December 10, aged 29 years. At the funeral, which took place on Sunday, the church was filled to the limit and there were no less than sixty floral tributes, showing what a favorite this lovable lady had been and how generally the sorrow of Mr. and Mrs. Fuller was shared in by neighbors and friends. She leaves one sister and a son of about nine years.

Joseph G. Harrison.

Joseph G. Harrison, senior member of Harrison's Nurseries, died of Bright's disease at his home in Berlin, Md., on December 12, at the age of 74 years. He leaves a widow, two brothers, three sisters and four children, Orlando Harrison, a member of the Maryland Senate; George A. Harrison, Mrs. W. B. S. Powell, of Ocean City, Md., and Mrs. George W. Purnell, of Berlin. Born in 1840 in lower Sussex county, Del., he and his family moved later to North Carolina, and there he engaged in the lumber business. He came to Berlin in 1884 and engaged in fruit growing. He was one of the pioneer orchardists of the Peninsula, and succeeded in developing the business of fruit growing to a high degree. Five years later, with his two sons, he started a small nursery, which was enlarged from year to year and now is known as Harrison Nurseries. The deceased had been in poor health for 12 years, and the active management of the business was in the hands of his sons, who will continue it.

NEWS NOTES.

Kansas City, Mo.—John R. Hanley has purchased the greenhouse property of W. I. Rush, Sr., at 2215 Jackson ave.

Joliet, Ill.—John Arter, landscape gardener, has started in the nursery business under the name of Riverside Nurseries.

Washington, Ia.—The Keck-Wolf Floral Company has changed its name to the Wolf Floral Co., the interest of E. C. Keck having been purchased by Preston Wolf.

Northampton, Mass.—A gift of \$10,000 to Smith College from Mr. and Mrs. A. J. White of Brooklyn is announced. Half of the money is to be applied toward payment for recent improvements on the Lyman plant house. The remainder will constitute a permanent endowment fund for repairs to the plant house, purchase of new materials and encouragement of botanical study.

The Way "Things" Are Looking

HARDLY a day passes but some one asks us "how are things?" Meaning how is business.

To which we are glad to say we can answer: "Things are looking up. We are very optimistic. Lots of new things are turning up and several of the postponed jobs are waking up again."

Several of our customers have taken advantage of our special Winter prices.

If "things are better" with us they must be better with everyone, because greenhouses are more or less of a luxury and we are apt to be among the last to feel a return of good times.

If you want to get the advantage of our special Winter prices you will have to step lively. You can depend on us doing our part to hustle matters along for you.

Send for catalog. Or send for us. Or both.

Don't Worry ABOUT LILY OF THE VALLEY

Our pips have arrived from Germany as usual. They are in prime condition. Prices not advanced.

R. J. FARQUHAR & CO.
BOSTON, - - - MASS.

EVERY PRIVATE GARDENER should grow my NEW CARNATION "ALICE"

Because its exquisite shade of clear light pink (mid-way between Enchantress and Gloriosa) charms all who see it, and where limited space counts, it will prove a boon, as it is easily the most productive Carnation I have offered to date.

Rooted Cuttings, \$2.25 per doz.; \$16.00 per 100
Pot Plants, \$3.00 per doz.; \$20.00 per 100

Order NOW to prevent disappointment, as the demand is very heavy.

PETER FISHER, - - Ellis, Mass.

MATCHLESS A GREAT SUCCESS

MATCHLESS is the best and most profitable white carnation to grow, having no equal in earliness, vigor of growth and production. It is superior in size, fragrance and keeping qualities and is non-bursting. It is a continuous bloomer and is handled with ease by any grower.

Fine Rooted Cuttings for Immediate Delivery

\$ 6.00 per 100	\$ 50.00 per 1000
112.50 per 2500	200.00 per 5000

We also offer MRS. C. W. WARD and BEACON.

\$3.00 per 100	\$25.00 per 1000

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the Editor of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil." / 6

Mignonette

If there is one thing that is very important in the culture of mignonette it is a fresh and bracing atmosphere. Take advantage of every good day and give ventilation to this crop, but always avoiding chilling drafts. Do not keep the house too damp during dull weather as it tends to make a very soft growth. A mulch of half manure and soil about every four weeks will be advisable but do not put it on any deeper than half an inch. Mignonette likes to be moist at the roots so look to the watering. See that they have proper supports to keep the shoots straight. They do not like heat. A temperature from 42 to 45 degrees at night and from 10 to 15 degrees higher with sun will be all right. Disbudding once a week improves the flower and stem. Keep them clean by light fumigation.

Easter Hydrangeas

It is none too early to bring in hydrangeas intended for Easter trade. They can be brought into a house that stands at about 45 degrees at night. This will just start the roots into slow action which is better at the start. Give them a place near the glass. When they show signs of top growth you can give them a temperature of about 50 degrees at night and on sunny days let it run up to 65 to 70 degrees. This increase in heat should always be done very gradually. Give them plenty of water at the roots and on all clear days give them a good syringing overhead. As they make growth give them more room.

Fern Spores

To keep up a steady supply of small ferns for the filling of fern pans one should sow spores about every five or six weeks. To bring these up to good sized seedlings requires watchfulness. One point to be remembered is to have everything very clean. All seed pans should be well cleaned, so as not to leave any germs of moss or fungus which are sure to ruin the young ferns when they begin to show. Use plenty of crocks on the bottom of the pans to insure good drainage. Some moss can be spread over the crocks to hold the compost from choking up the drainage. A good compost for this work will be equal parts of loam, leaf mold and some sand. These pans can be filled to within an inch

of the top. Over this put about half an inch of finely sifted compost, press firmly and sow the spores; press the spores in and place pans in a temperature of 65 degrees and cover with glass.

Start Propagating

To get the propagating house or bed in good condition, see that everything is made thoroughly clean, by washing down with strong force of water, all benches, walls, etc. Give the entire surface of sides and bottoms a good whitewashing of hot lime. Be sure that you have enough of bottom heat. This bottom heat can be increased by boarding in the sides all around which will throw the heat right up to the bottom of the benches. It is always better to place about an inch of coarse material on the bottom, which will secure good drainage. You can place some moss on this, and then about three or four inches of clean sharp sand. Spread all over even and press down firm. Give a thorough watering and then you will be ready to start.

Sweet Peas

Where plants are showing up well with buds, and the small fibrous roots are working to the surface a light mulch will help greatly. Mix half cow manure and soil together or when using sheep manure use double the quantity of soil. This mulching should be kept up until we run into the longer days, as the plants are unable to assimilate liquid feed when we have so much dull and dark weather. Sweet peas should always be kept moist at the roots. Do not try to force them too much as it will surely work ruin later. They flower and grow best when the temperature does not exceed 50 degrees at night, 55 on cloudy days and 65 to 70 during bright days. See that they are kept in a straight growth at all times. Give light fumigation about every ten days so they will be free from fly. On bright days give a syringing in the morning.

Wallflowers

Plants that were raised from seed sown during May or June and grown on will be fine plants by this time. Give them a good light bench in a cool house and you can get a good many flowers. The seeds I bought in 1901, in the quantity of about 48 ounces were all good. There is always a market for these fragrant flowers.

Next Week:—Care of Antirrhinums; Ferns; Rambler Roses; Propagating Fuchsia, Rose and Begonias; Propagating Lobelia.

Publicity among the kind of readers reached by this paper is THE SORT OF PUBLICITY THAT PAYS.

Cattleya Hardyana var. Rutherford

Cattleyana Hardyana, one of the most beautiful of all cattleyas, is a natural hybrid between *C. Warscewiczii* or *grigas* and *C. Dowiana aurea*. It is somewhat variable but the original type has deep rose pink sepals and petals. The variety illustrated herewith has light yel-

low sepals and petals and the Julius Roehrs Company, of Rutherford, N. J., who are the fortunate possessors of this unique novelty, are very proud of it and have given it the name Rutherford. It has not yet been exhibited anywhere.

Papaver orientale

During the beautiful month of May when the incomparable radiance of the vernal glory is at its height the oriental poppies represent a conspicuous note in the floral aspect of the garden. A few warm days and the large green egg-shaped buds bursting again bring to light the intense shades of orange-scarlet, fiery red, crimson maroon and beautiful salmon pink of masses of huge flowers which for strong, near and distant effect prove invaluable. It is the brass tone of festive jubilant color fanfares in the great color symphony of our herbaceous gardens. We have seen those silky-lustrous petals time and again, but their beauty exerts its charm anew every ensuing season. In character it is fleeting—oriental, hailing from the land of the wonders of Arabian Nights, the land of gay colors in apparel and flowery language. The sudden bursting forth of glory and its

equally quick vanishing away seems the inside feature which, perhaps imperceptibly intensifies our admiration.

Oriental poppies are indispensable inmates of American gardens. Being familiar with their habit of growth we know that their weak point consists of the withering and gradually drying up of the otherwise highly ornamental foliage during midsummer. To avoid unsightly bare spots during this time it is necessary to plant something else between; gladioli, for instance, prove serviceable. In the fall the poppies form their new ground foliage, which in turn requires air and light for normal development.

The proceedings in raising oriental poppies from seed during early spring are so well known to horticulturists that I need not dwell on it. To avoid the otherwise heavy losses in the transplanting of seedlings in the open ground it is best to sow in small pots. Remove the weaker ones and after the plants have attained sufficient size set them out where they are to flower the following season.

Of the comparatively new salmon pink varieties I

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Syringing

There may be considerable cloudy weather from now on, and any chance that is offered should be taken, and the plants well syringed. This will help wonderfully to keep the houses clean and free from spider when the work is most rushing in the spring. It is then that the spiders increase in numbers so fast that it is often a hard job to control these troublesome pests. Go well into all corners, and watch all places where the hose ends meet. As suggested before in these columns, mark all places where there happens to be a nest of spider, and give these an extra syringing, and if possible a little good insecticide applied so that it will go well under the leaves. This will help clean them out, when followed by a good syringing. Be sure to give the plants a vigorous shaking right after syringing, so that they will dry off well before night. Then do not neglect the lime, dusting it freely underneath the plants.

Selection of Wood for Cuttings

This work should be done very carefully, for the plants' vigor depends largely on the stock the cutting comes from, and the kind of wood that the cutting is made of. Select clean wood, not too hard, that has nice live thorns on it. This will insure the proper state of softness, and there will be little danger of getting any wood that will be too hard to root well. It is still quite early for propagation, and growers who require only a small number of plants will do well to wait until about the first of February before starting in propagating. However, there are places where this is already well under way, and will continue for quite a while to come. Running a great many plants several seasons has done away with a good deal of this work, and there is considerable saving in this, too. Even Beauties will do well the second year if they are handled right, and this reduces the cost of production a good deal. It will not pay in the long run to use blind wood to propagate from, even though the plants are to be sold and not to be used on the place. It will not take very long for growers to find out what kind of stock is produced on the place, and once anyone feels that they were stuck, they will never send in another order to that place. We would all do the same, and that is why it will pay to use only the very best of wood for propagation. Make sure that the wood in question is free from spider, as there is nothing worse than spider on cuttings, where it will be impossible to check it for six weeks or more. Should

it be necessary to use wood that is infested, dip it in some of the insecticides advertised to kill spider, being careful not to make the solution too strong and burn the foliage. In dipping do not let the cuttings soak in the solution, as that is not only unnecessary, but dangerous as well. Push the cuttings into the pail, and stir them around, after which they can be removed, and then washed with clear water. With Killarneys, and other roses of this type it will pay to pinch a lot of the short stuff to make wood, and wood of this kind will be the very best that can be had.

Making Cuttings

This ought to be a well-known branch of rose growing, and yet there are places where the methods used could be improved a good deal. A very sharp knife is essential to the successful making of the cuttings, and the sharper it is the better. Have it so sharp that it will shave. The idea is to make a very smooth cut, free from all bruises. If a dull knife is used, the wood will bruise, as can be seen with the aid of a powerful microscope, and wood like that will be more apt to rot than to root. Cuttings should never be made with a pair of scissors, or shears, for these will bruise no matter how sharp they may be. With Beauties, we like to make only one-eye cuttings; that is, only one eye with a leaf above the sand. Cut as close as possible to the eyes without hurting them, for the cutting will root easier if the cut is made close to the eye on the bottom, than if cut a little below. Do not cut into the eyes by any means, and use a slanting cut with the eye on the longer end on the bottom and the same way on the top. If the top is not cut near the eye it will look very bad, and we find it hinders the eye from starting, and growing well after the cutting is rooted. It is not necessary to leave a whole leaf, as this would take too much space in the bench, and at the same time would be harmful to the welfare to the cuttings. With Killarney, Shawyer, Russell, and other varieties similar, leave the first two leaflets, and half of the second two, unless the first two are of fair size, and then they will suffice. With Beauties it is much the same, and it is best to give the cutting only as much foliage as is needed to keep it alive. Many growers will separate the cuttings into two or more grades, according to the hardness of the wood. This method is all right where it can be worked out, but as a rule we find no time for work like this. Instead we use a little care when putting the cuttings into the sand, pushing the harder wood a little deeper where it will get a little more bottom heat, and then we keep the softer wood nearer the surface, where the sand is a little cooler. This way we find that the cuttings will root almost evenly, and with little trouble.

mention Queen Alexandra, Mrs. Perry, Silberblick and as leader, Princess Victoria Luise, the subject of our cover illustration. Among the fiery scarlets, Goliath is the most robust growing one, producing immense large flowers on long erect and stiff stems. Trilby is bril-

liant red, Oriental King blood crimson and Mahogany a dark crimson maroon.

until it is all over. So there is nothing for us to say about Christmas until next week.

"In the wrong pew"

A reader of HORTICULTURE calls our attention to a paragraph in the Pittsburgh notes in a recent issue of one of our esteemed contemporaries in which it is stated that "at the request of William Falconer" a member who does a large business in selling artificial flowers to undertakers and others had promised to make a display of artificial flower work at the next meeting of the Pittsburgh Florists' Club. Alas, poor W. F.! "Imperious Caesar, dead and turned to clay, might stop a hole to keep the wind away." But this—this is the limit and, like our correspondent who also knew the W. F. of bygone days, we stand dumbfounded and can only gasp, "Can this be true?"

To popularize the flower shows

HORTICULTURE's friends are full of suggestions these days. Here comes one who writes, "How goes your campaign now for more decorative features in our flower shows? You keep at it every year and I see it is beginning to bear fruit." In reply we would say that we are greatly pleased to see that this subject, so vital to the advancement of the popular knowledge and appreciation of floral art, is finding a place in the reflections of our thinking men. We have on so many occasions expressed our own views in a general way on this subject that we hesitate to do more now than urge that flower show committees apply to this particular feature of their work their keenest wisdom. It is one of the liveliest of live topics and will not be put down. There is plenty of time for a thoughtful discussion before the schedules for next year are made out. We know it would be very interesting to a large circle of our readers to hear different opinions as to how we may proceed to make our exhibits of greater interest to the general public and still be within the scope of the average exhibitor. "Don't all speak at once."

Seedlings vs named varieties

A valued correspondent of HORTICULTURE questions the soundness of our opinion, expressed in these columns a few weeks ago, as to the likelihood of any grower getting as good chrysanthemum flowers of the single early type from seed as could be produced from expensive named varieties. He is of the opinion that either the growers about Boston must have better success with their seedlings than do those in other parts of the country or else that the Boston men do not buy the best varieties. Our views were not based alone on our own judgment but also reflected the views of some well-known gardeners of whom the last thing that could be said of them is that they do not buy the highest priced named varieties. The highest priced varieties would have no terrors for such men but that the expensive varieties are the "best" seems open to considerable doubt. It would be very interesting to hear from some of the successful exhibitors at the recent Boston show and learn whether, in their unbiased opinion, the seedlings they staged there surpassed or even equalled such varieties as Joan Edwards, R. B. Burge, Golden Mensa, Sylvia Slade, Mary Richardson and numerous others that have been classed as leaders in their special colors. The subject is one that should interest many of our readers and we hope that some of them will come forward with an expression of their conclusions. Our columns are open to them and our mind is also open to enlightenment.

Christmas This is Christmas week. It happens, however, that predictions are useless and material facts impossible as to the success or otherwise of the florists' big harvest day, for this paper must be in type before the Christmas trade has developed its volume and it will not reach our patrons

BRITISH HORTICULTURE.

German Roses.

It is not surprising to find that on this side there is a bitter anti-German feeling prevailing on every hand. Everything Teutonic is being rigidly boycotted. Judging from some of the correspondence which has appeared in the papers there are some fervent Britishers who would exclude German roses from their gardens. This has emphasized the fact that many of the best roses in cultivation owe their origin to the fatherland. Take Frau Karl Druschki, the favorite white for exhibition purposes. This was raised by Herr Peter Lambert, of Trier, Germany. Its origin is interesting to recall at this stage. In 1896 Herr Lambert crossed the rose *Merveille de Lyon* with the pollen of *Caroline Testout*, raising only one plant from the resulting seed. In 1899 he was able to propagate about a hundred plants, and to stage some excellent specimens at Stuttgart and elsewhere. The name of *Snow Queen* was first suggested, but eventually it was christened after the wife of Herr Karl Druschki, the President of the German Rose Society. In 1901 some plants were sent to France. Some plants also found their way to America, in order to be tested by the United States growers. The result, however, was not altogether satisfactory. Some of the growers wrote to say that the rose was "no good, and not worth anything to them." The same unfavorable impression was created in Britain when the rose was first tried. But on both sides of the Atlantic it was found that too hasty a judgment had been passed, for this superb white soon became the queen of the exhibition tables. Another of the newer introductions from Herr Lambert in favor on this side is *Trier*, a pale salmon pink, produced from a cross between *Aglaiä* and Mrs. Sharman Crawford.

Other roses from the same source are *Kaiserin Augusta Victoria*, *Gustave Grunerwald* and *Papa Lambert*.

The Cult of the Orchid.

Mr. Gurney Wilson, editor of the "Orchid World," recently gave an informative lecture on the aristocrats of the conservatory before the members of a London Horticultural Society. There is no doubt that orchid culture is no longer confined to the rich amateur. The bargains at the sale room, with the chance of securing a prize unawares, has stimulated this branch of horticulture among the garden-lover with a small purse and great ambition. The cool greenhouse of the villa gardener will sometimes contain a gem amongst the other floral treasures. In the early days many mistakes were made in their cultivation, the general idea being that exotic heat must be provided for all species. Growers paid dearly for their experience. The expert advice given by the collectors showed at once from the experiences gained in the home of the orchid the diversity of temperatures required. Mr. Wilson eulogized the skill and enterprise of

PLANT HOUSES OF ANTON SCHULTHEIS.

The extensive range of A. Schultheis at College Point, N. Y., has been enlarged and greatly improved by the addition of two large modern houses and connecting house in which the builders, Messrs. Hitchings & Co., did a notable piece of work overcoming in a very clever manner the irregularity of grade, etc. A new office building was also added. Mr. Schultheis, who had

an excellent training and experience in Germany and England before coming to this country, established himself in College Point in a small way and in 1889 bought the place on which his greenhouses stood. Five years later he went into plant growing and has been eminently successful, building up a large holiday and Easter plant trade especially.

the Belgian growers, who are considered some of the best cultivators of the orchid-alas, that their years of patient toil should be ruthlessly destroyed!

W. H. ADSETT.

GROWING ROSES FROM SEED.

I want to grow roses from seed. Would you kindly give me a brief idea as to

1. How to ripen seeds?
2. What soil to plant in and how deep?
3. How long does it take seed to germinate?
4. What treatment should be given to a rose grown from seed to make good result?

Yours truly,

S. A. H.

1—Rose seed will ripen in any ordinary greenhouse or may be set out of doors during late summer then brought into a cool house before frost and allowed to finish.

2 Soil for seed should be rather light; a little leaf mold or other light material so that seedlings may be removed without breaking the small roots. Cover to about the depth of the seed, and firm lightly.

3—Seed will take anywhere from two to twelve months to germinate. If the seedpans are placed in a frame and allowed to freeze slightly it will hasten germination very much after they are placed in heat.

4—Treatment after the plants are up is about the same as any ordinary seedlings. Be careful not to keep too hot or too wet else they will damp off.

ALEX. MONCKEY.

To HORTICULTURE, Boston, Mass.

With best congratulations to the Tenth Anniversary. May you be spared for many more years of useful work, and may HORTICULTURE flourish and continue to grow in its influence upon the refined and aesthetic side of our trade, the only one devoted entirely and truly to the civilization and betterment of mankind.

Here is to health and happiness in this, the coming, and many other coming New Years.

Sincerely and truly yours,

WINFRIED ROELKER.

New York.

BELGIUM'S PLIGHT.

The following is a copy of a personal letter just received by one of HORTICULTURE'S subscribers from a friend in Belgium:

"How long, O Lord, is this situation going to last here? Our lower class people are suffering awfully; the weather is very cold; no heat because coal is too scarce and dear. The authorities of the city (because our Government doesn't exist now) collect money from others to give them soup and some coal, but only just enough to prevent starvation. Everything is so dear. Very little news about the war, newspapers are mostly suppressed and those which come out say only what the Germans like, but once I bought 'The Times' in Holland. It is very risky, though, so we get very little news. Here on the North Sea the Germans say themselves they are going to their graves. If this situation continues two months more and no food is coming in, we must all die from hunger. We commence to see now that the war will last for a long time."

PERSONAL.

John Kiessel, florist, of North Bergen, N. J., was quite badly hurt by being thrown from his wagon on December 15, by a runaway horse.

Robert Jackson, salesman for A. H. Langjahr, New York City, was operated on at the New York Hospital on Monday last, for appendicitis. Outlook favorable.

Frank J. Barris, superintendent on Col. W. W. Castle's place at East Weymouth, Mass., has been obliged to discontinue on account of a serious ailment of the heart, and is going to Ohio for a rest.

One square yard of greenhouse soil one year old and compacted in the usual way, will contain about 2.00 lb. of nitrogen, 2.00 lb. of potash, and 16.00 lb. of phosphoric acid.

CLUBS AND SOCIETIES

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The December meeting of this society, held at Greenwich, Conn., Friday evening, Dec. 11, was also the annual meeting and the fourth anniversary of the society. The personnel of the officers elected at this meeting for the ensuing year assures the society of a continuation of the remarkable successes of the past. The writer had the pleasure of being present at the first meeting of the society on the 14th of December, 1910, in the office of the Fremd Nursery at Rye, N. Y., starting with a membership of fourteen names. Today we have an enthusiastic membership of 280 active horticultural workers, 8 life members and 20 honorary members. The financial statement of the treasurer shows the society to be in a very flourishing condition. During recess the members were entertained by several accounts of the convention of the National Association of Gardeners at Philadelphia, at which this society was well represented. There was a fine display on the exhibition tables. The judges' awards are as follows: Cultural certificate to Thos. Ryan for poinsettias, Anton Peterson for Shawyer roses. Vote of thanks to Robt. Grunnert for White Enchantress carnations, Jas. Foster for poinsettias, grapes Gros. Colmar, and potatoes Carman No. 3. A. Wynne for carnations Sport of Harlowarden, Anton Peterson for carnations Matchless. Thos. Ryan for assorted carnations, and P. W. Popp for Narcissus Grand Soliel D'Or.

An illustrated lecture is scheduled for the next meeting, to be held Jan. 8, 1915. The subject—The Conservation of Our Wild Birds—should appeal to all. There will also be offered at this meeting special cash prizes for 18 carnations in three vars, six of each.

P. W. Popp, Cor. Secy.

PACIFIC COAST HORTICULTURAL SOCIETY.

The Pacific Coast Horticultural Society had its field day on Sunday, Dec. 6, at the nurseries of the MacRorie-McLaren Company in San Mateo county. It was a decidedly wet day, but the guests were given something to warm them up, and altogether had quite an enjoyable time.

The membership of the Horticultural Society is growing right along. Three new members admitted at the last meeting were Prof. Gregg and Prof. Stevens, of the landscape engineering department of the University of California, and Mr. Frasher, of the Luther Burbank Company. Officers for the ensuing year will be elected at the next meeting, nominations having been made at the last meeting. Practically all the more prominent members were nominated for the exhibition committee, ten of whom will be chosen. H. Plath had the unanimous nomination for president; Tom Taylor and Joe Thompson

are up for vice-president; Mr. Hofinghoff for corresponding secretary; B. Meyer for financial secretary; J. Jacques for treasurer; John McLaren for trustee; D. Raymond and Mr. Pos for ushers; Mr. Greaves for librarian. The next meeting, following the usual custom at elections, will be a smoker, with Messrs. Thompson, Raymond and MacRorie in charge of arrangements. The only exhibit at the last meeting was a specimen of Begonia Lorraine, by the MacRorie-McLaren Company, rated at 98 points. The award on exhibits for the year was: MacRorie-McLaren Company, 541 points; Dr. Parker, 190 points; Mr. Shillig, 165 points. Cups were awarded to these three, but it was decided in future to award no cup to any exhibitor making less than 400 points.

CONNECTICUT HORTICULTURAL SOCIETY.

This society held its annual meeting on Friday, December 11, in the County Building, Hartford. Before proceeding to the election of officers, President Huss requested that a new president be elected in his stead, inasmuch as he felt that a change was desirable and that he had held the office for six years and should therefore be released. The result of the election was as follows: President, Warren S. Mason, Farmington; first vice-president, George H. Hollister, Hartford; second vice-president, Carl Peterson, West Hartford; third vice-president, Oscar F. Gritzmacher, New Britain; secretary, Alfred Dixon, Wethersfield; treasurer, W. W. Hunt; librarian, William T. Hall; botanist, C. H. Siernan; pomologist, G. H. Hollister. County vice-presidents: Middlesex, Alex. Cumming; Fairfield, Charles H. Plump; New Haven, John H. Slocombe; Windham, Frank M. Smith; Tolland, Theodore Staudt; Litchfield, Walter Angus. The president will announce the executive committee at the next meeting.

Mr. Mason is the grandson of C. S. Mason, who held, in New Britain, in 1882, the first flower show ever given in Connecticut. He was born in Meriden, in 1879. For the past fourteen years he has had charge of the conservatories and grounds of the late A. A. Pope of Farmington, which are conceded to be among the best in this section of New England.

The next meeting will be held January 8, 1915, when a program for the first half of the year will be presented.

ALFRED DIXON, Sec'y.

Wethersfield, Conn.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

As no objections have been filed, public notice is hereby given that the registration of the seedling geranium by Charles Borrman, 338 High St., Buffalo, N. Y., becomes complete.

JOHN YOUNG, Sec'y.

Dec. 19, 1914

LANCASTER COUNTY FLORISTS' ASSOCIATION.

On Dec. 17 an unusual thing happened in Lancaster—a meeting of the Association and only half of their members in attendance. This was explained by the fact that it was the coldest night of the season and many of our members do their own firing and a few others when interviewed pleaded the mad rush for dollars just preceding Christmas.

After the usual routine of business M. J. Brinton of Christiana read a paper on Lilies and other bulbs for winter blooming. I. Rosnosky of the H. F. Michell Co., Philadelphia, pretty nearly fell off his chair when Mr. Brinton began to quote figures as to the quantity of bulbs he planted—over a million lilies, and other bulbs by the half million and hundred thousand. Mr. Brinton is a man of affairs in his town, a keen business man, and gave us a practical business paper of much value. In the discussion that followed Mr. Rosnosky gave some very interesting and instructive ideas on the lily question.

This was followed by a paper by Chas. B. Herr of Strasburg on carnations from the field to the present time. In the discussion of Mr. Kerr's paper the growers present all seemed very favorably impressed with Gorgeous on account of its remarkable keeping qualities. A number are on the fence between Matchless and White Wonder, the latter having made good to such an extent in this section that it will take considerable time for any other to replace it. Beacon had but two strong advocates—the writer and the reader of the paper. One of the growers present could not say enough in favor of Champion as a scarlet or red. We expected some of the novelties on exhibition, but they were sidetracked somewhere and did not arrive. There seemed to be a general inclination to try out Alice and Mrs. Akehurst pretty extensively.

B. F. Barr was nominated for president; Lemon Landis for secretary and Harry K. Rohrer for treasurer. One of the visitors made the remark that "Penrose had nothing on this club when it came to nominations." We argue on the principle that when you have a good secretary and treasurer it does not pay to make a change and that the president does not have time enough in one year to work out his theories and ideas, so we give him two years, but look out for the steam roller if he tried for a three-year term. Dennis Connor was on hand to see that no building got past the Lord & Burnham people.

The next meeting will be an informal social (stag) at a cost not to exceed \$1.50 per. There will be plenty to eat, plenty of water to drink, duck pin contests and other sports from 6.30 P. M. to 2.???. Previous to this at 1 P. M. we will take the Strasburg car for a trip to see Chas. B. Herr and Amos Rohrer. This will be a good time for visitors to get acquainted with us and we will not embarrass them by insisting on paying their expenses, hav-

ing adopted what we call "a dutch treat."

The writer, a member of The Lancaster Advertisers' Club, invited the members to attend the Pure Food Show.

ALBERT M. HERR.

ST. LOUIS FLORIST CLUB.

The Florist Club held its meeting on Thursday, Dec. 10. When President Bourdet opened the meeting there were some 35 members present. After all the usual preliminaries were disposed of the reports of all the committees were heard which brought forth lively discussions and especially on the Spring Flower Show report. The discussion showed that the members present were generally favorable and they would have so voted had not Chairman Smith asked for more time to show that it could be placed on a paying basis, so the time was extended until the next meeting. The trustees' report on entertainment also brought out some lively tilts among the members. Their plan as adopted is to give a dance and entertainment at Westminster Hall on Wednesday, January 27th, tickets to cost 50 cents a person.

It was voted to give all delinquent members one more month in which to pay last year's dues and a committee was appointed to call on each one and report at next meeting. Prof. H. C.

Julius Roehrs Co.
Rutherford, N. J.

Irish thought it advisable to ask at the State Board's next meeting for an appropriation of \$10,000 for floriculture for the next two years and the club agreed to assist him in this. An employment bureau was formed and a committee of five, one from each wholesale house with the secretary of the club, was appointed. Those seeking employment and those wishing to employ should apply to this committee.

AMERICAN ROSE SOCIETY.

The schedule committee of the American Rose Society at a meeting held in Boston, December 18, adopted the following list of prizes for roses in pots or tubs. The classes for cut blooms will be arranged later.

It has been practically decided to hold the annual meeting and exhibition in Boston, March 18 to 21, 1915, in connection with the Spring Show of the Massachusetts Horticultural Society.

Plant Schedule of the American Rose Society.

Best Specimen Plant, any variety other than Rambler.....	Silver Medal	Silver Medal

CLUB AND SOCIETY NOTES.

Farmers' Week at the State College of Agriculture and Experiment Station, New Brunswick, N. J., will be held Dec. 28 to Jan. 2 inclusive.

The eleventh annual meeting of the Society for Horticultural Science will be held at the Botany Building, University of Pennsylvania, on December 29 and 30.

The following named officers have been elected by the Hampden County, Mass., Horticultural Society: President, J. Alden Davis; vice-presidents, W. H. Porter of Agawam and E. C. Coburn; treasurer, Joseph Aumer; secretary, Marshall Headie.

John Young, R. T. Brown and Thos. Boothe De Forest have been appointed by President Duckham of the New York Florists' Club as transportation committee to make arrangements for the trip to the Carnation meeting in Buffalo next month.

The adjourned meeting of the trustees of the Worcester County (Mass.) Horticultural Society was held on Dec. 9. Appropriations were as follows: Flowers, \$1200; fruit, \$1000; vege-

tables, \$650; winter meetings, \$300; publications, \$500; children's exhibitions, \$100. The committees appointed are identical with those of last year, no changes having been made.

The annual meeting of the New London (Conn.) Horticultural Society was held on the 10th inst., when the following named officers were elected for 1915: President, Alfred Flowers; first vice-president, Donald Miller; second vice-president, Gustave Neumann; secretary, John Humphrey; financial secretary, William J. Morgan; treasurer, S. L. Ewald; librarian, H. E. Lickman. There were two plants of Glorie de Lorraine Begonia and three vases of sweet peas (Yarrowa, Mrs. M. Spanolin, Lavender Nora) on the table from the Harkness estate. H. L.

The North Shore Horticultural Society held its regular meeting in Manchester, Mass., Dec. 17. It was decided to have the annual banquet in the Town Hall, on Jan. 27, 1915. Further notice of this event will be published at a later date. The speaker for the next meeting, Jan. 1st, will be Frank S. Gifford of the Essex County Agricultural School who will lecture on breeds of cattle.

A smokefest followed an early adjournment. All members are earnestly invited to attend the course of lectures during the winter.

WILLIAM TILL.

The Knoxville Florists' Society, on invitation, met Monday night, December 7th, at the Board of Commerce rooms with a committee from the Board of Trade. This being the last meeting night of the year officers were elected for the ensuing year, as follows: President, Chas. L. Baum; vice-president, Mrs. Edith Crouch, secretary and treasurer, A. J. McNutt. The meeting time of the society was changed from the first Tuesday night to the second Monday night of each month. The first year of the organization has been a very successful one, and the coming year has the promise of being much better.

At the regular semi-monthly meeting of the Southampton (Mass) Horticultural Society held December 17, Mr. Frankenbach gave a short talk on his experience in cultivating some of our native wild bushes and advised their use among other shrubbery. Treasurer Wm. McLeod read an interesting paper on conifers, their culture and care, and those best adapted to these parts. A representative of Bosnett Bros. happening to be here was present by invitation and gave a short talk on the general outlook on gardening. He spoke of the difficulties under which many foreign grown seeds had been harvested, and asked due consideration from gardeners and planters.

It was a very well attended meeting that the New Haven County (Conn.) Horticultural Society held on Tuesday evening, Dec. 8. The chair was occupied by Vice-president H. F. Clark in the absence of the president.

After the routine business had been transacted, the election of officers for the ensuing year was taken up. H.

F. Clark was unanimously elected as president. Wm. J. Rathgeber, vice-president and chairman of the Board of Managers. W. C. McIntosh and David Kydd were re-elected as secretary and treasurer of the society.

Exhibits of carnations were made by H. P. Brooks, florist, of West Haven. Awards were made by the judges as follows: Enchantress, 6 points; White Enchantress, 6 points; Winsor, 7 points.

The annual meeting of the Nassau County Horticultural Society was held in Pembroke Hall, Glen Cove, N. Y., Dec. 9th. A communication was read from A. Fournier, Glen Cove, offering a prize of \$10 to be competed for at our fall show, 1915. The president then presented the society's cup and the Stumpp & Walter cup, won at the recent shows, to F. Petroccia. It was decided to hold our annual dinner on January 25, 1915. The judges made first prize awards as follows: Vase of carnations, F. Honeyman; Brussels sprouts, T. Twigg; cauliflower, F. Petroccia with certificate of culture. The treasurer's report was very favorable. Election of officers resulted as follows: President, Ernest Westlake; vice-president, James McCarthy; treasurer, Ernest J. Brown; recording secretary, Harry Jones; corresponding secretary, James Gladstone; trustee for three years, James Duthie; executive committee: Wm. Gray, James McDonald, Angus McGregor, George Ashworth, Jos. Adler, John Fogarty and Robert Jones. Exhibits for next meeting: Three poinsettias (cut), three heads celery, three heads lettuce.

JAMES GLADSTONE,
Corresponding Secretary.

NOVELTIES in FLOWERS and VEGETABLES.....

Jas. Carter & Co., of Raynes Park, England, have originated or introduced a large proportion of all new varieties in the last 50 years. That is why Carter's reputation is world-wide and experienced gardeners keep in close touch with Carter productions.

Study the new Carter Catalog for 1915. Among the Flower Seed Specialties you will find our new strains. Many varieties of Asters, Marigolds, Snapdragons, Primroses, Sweet Peas, Petunias and others are listed.

In the Vegetable List are novelties of Beans, Beets, Carrots, Radishes, Cabbages, Celery, Cucumbers, Lettuce, Peas, Tomatoes, etc. This new Catalog—Carter's "Garden and Lawn"—has many wonderful photographic illustrations and valuable cultural directions. Send us your name and address now so we may mail you a complimentary copy.

Lilacs, Lily of the Valley Roses and Pansies, Loechner & Co., New York, American agents.

Samuel Murray, Kansas City, Mo.—Folder in colors, listing desirable Christmas plants for retail trade. A very catchy proposition.

Scott Bros., Elmsford, N. Y.—Price List of Chrysanthemums, Roses, Carnations, etc. Here are listed all the desirable novelties, chrysanthemums especially. Interesting to the trade and growers for exhibition.

Burnett Brothers, New York City—Annual Seed and Bulb Catalogue for 1915. Early in the game and a worthy advance herald of the annual catalogue host. Bound in royal purple, gold embossed. Well printed and fully illustrated. An unique map of the United States in gold lines on the back cover tells its scope.

H. G. Hastings & Co., Atlanta, Ga.—"Hastings Seeds" catalogue No. 49, spring, 1915. Not only a handsomely illustrated catalogue but full of snap and go and original in many of its features. A cotton picking scene on front cover and the Watson Watermelon in natural colors on back cover give a distinctively southern exterior to this representative catalogue.

PUBLICATIONS RECEIVED.

Two very valuable bulletins have been issued for October and November, 1914, by the Massachusetts Agricultural Experiment Station, Amherst, Mass. Bulletin No. 156 deals with electrical injuries to trees, the effects of alternating and direct currents and the methods of preventing injury to trees from wires, etc., by Dr. George Stone. The subject is covered in Dr. Stone's painstaking and

thorough style and has a number of pertinent illustrations.

Bulletin No. 157 is on the Marguerite Fly, by M. T. Smulyan. This is an exhaustive treatise on the life history, habits and methods of control of this destructive greenhouse pest, filling 60 pages, including several plates showing the insect in its various stages and its work. Every greenhouse, man who grows the marguerite will need this bulletin. It may be had for the asking.

Of Interest to Retail Florists**FLORISTS' TELEGRAPH DELIVERY.**

To the Members of the Florists' Telegraph Delivery and all Retail Florists in the United States and Canada.

In view of the war conditions in Europe there will undoubtedly be an increase noted in the sending of flowers by telegraph in this country during the holiday period.

Much advertising has been carried forward by individual members of the Florists' Telegraph Delivery; special window displays have been in order from New York to San Francisco showing the advantages of sending flowers by mail or telegraph at a distance with no added expense. Thousands of people are being appealed to in person by the better class of shopkeepers, who have in a measure installed confidence with the flower buying public so that friends may be remembered at a distance with nature's wares safely and promptly. Surely these earnest efforts have not been wasted, and thousands of dollars are reaching florists' channels; indirectly, the wholesaler, grower, tradesman, and directly the shopkeeper.

The opportunity of testing out this comparatively new but important phase of our welfare is at hand. Advertise flowers by telegraph during the coming holidays—in the newspapers, in trade papers, on sign boards or automobiles, special pamphlets, on billheads or telegrams if you like, but do try to persuade some of the prospective thousands into using this convenient phase of the flower business and reimburse yourself as well as your brother florist.

The officers and directors of the Florists' Telegraph Delivery wish to thank those whose constant efforts in this direction are bringing in such handsome returns, and extend to them a Merry Xmas and a Happy New Year.

NEWS ITEMS FROM EVERYWHERE

BOSTON.

J. Newman & Sons have taken on extra help and are working overtime to meet the holiday demand.

The mother of Fred Roberts died this week. Fred Roberts is connected with Cassidy of Beacon street.

W. H. Spring of 443 Tremont street, is receiving expressions of sympathy on the death of his wife who passed away this week.

George Cartwright, secretary of the Boston Flower Exchange, is back again at his old post, ready to meet the holiday rush.

Penn the Florist ran a half-page Christmas advertisement in a Tuesday morning daily newspaper. Penn sets the pace in advertising, for the Boston florists.

B. A. Snyder Co., are completing the first year of their business life and from all reports it has been a very successful year. The force for the rush season has been tripled.

The increase in holiday business has made it necessary for Harry Quint to take on an extra store during the season. Millard Ricker, for eight years with Wax Bros., has joined the force, and is turning out some very tasty work.

J. W. Rogers of Summer street is receiving her full share of holiday business and has doubled the working force in order to meet the demand. This enterprising lady florist is located very advantageously, directly in the path of the thousands who daily ride home from the South Station.

Some specialties that are finding favor in the markets this week are camellia plants and araucarias from Kamayama & Serada, of Cambridge; Cattleya Trianae, from F. J. Dolansky, of Lynn; yellow tulips, from A. M. Davenport, of Watertown; carnations from Wm. R. Nicholson, Hanover greenhouses and Thos. Capers and especially Peter Fisher whose novelty Alice is going at a lively clip in this market. Lily of the valley from Carl Jurgens at Welch Bros. and from Wm. Jurgens at Alfred Walsh's are keeping up Newport's prestige for this important flower.

PHILADELPHIA.

The Burpee employees were given the week-end off, commencing at 12 noon Friday the 18th, so as to give them a chance for Christmas shopping. The same liberal policy prevails for Christmas week, the holidays extending from noon Thursday the 24th to Monday the 27th. At 2.30 P. M. Thursday, occurred the annual Santa Claus act to the children of Philadelphia by Mr. and Mrs. Burpee, at the Burpee Buildings. If each of the hundreds of children were made half as happy and glad as their hosts over the affair; then joy was unconfined.

Elmhurst, N. Y.—Alexander Donaldson is having the same trouble from a leak in the gas main which his father experienced last winter, three houses of lilies and callas being practically ruined.

WASHINGTON.

The S. S. Pennock-Meehan Company has been granted a permit to remodel their store at 1216 H street, Northwest. The firm has recently placed an order for an automobile delivery wagon and it is its intention to change over that part of the store at the rear of the icebox into a place suitable for the storage of the machine when not in use.

An examination for gardeners will be held by the Civil Service Commission in Alexandria, Va., on Jan. 20. Further information concerning this examination can be had upon application to the Commission.

The Department of Agriculture is about to make a study of pond lily diseases, and Frederick Rand, assistant in the laboratory of plant pathology, will secure suitable material therefor while on his present trip through New York, New Jersey, Delaware and Maryland.

Gude Bros. Co. accomplished a novel wedding decoration last week when they transformed the dining room of the residence of Mr. and Mrs. Frank B. Noyes into a chapel on the occasion of the marriage of their daughter. The front of the impromptu chapel was formed by two large Italian columns entwined with smilax. The front was decorated with cibetium ferns and at the alter were masses of lilies and lighted candelabra. The wainscotting was separated from the asparagus covered walls with an enormous quantity of paper white narcissi. The bride's bouquet was a shower of orange blossoms and camellias, that of the bridesmaid was of gardenias, while the little flower girl carried a prim bouquet of rosebuds.

J. Harper Hetherington, manager of the store of the Washington Florists' Company, last week complained to the police of the theft of a diamond ring, the property of Miss Alice Craemer, bookkeeper at the store, which was taken from a pocketbook in the cloakroom. The police found the ring hidden in some material at the rear of the store and the theft was laid to a negro employee.

The store of Fred H. Kramer presented a very attractive appearance during the holiday season, the center of the establishment having been covered with an archway of red and green trimming, from which was suspended a large number of miniature figures of Saint Nicholas.

Knoxville, Tenn.—Addison J. McNutt is somewhat discouraged about his crop of sweet peas, which has been practically ruined by the recent cloudy weather.

Chas. L. Baum has a very attractive F. T. D. window, which brings out the idea to the public that flowers can be delivered to any part of the United States or Canada on very short notice, and with the assurance that the order will receive the same care and attention as if it were to be delivered in Knoxville.

SAN FRANCISCO.

The Art Floral Company, of 255 Powell street, has just opened a branch for the holiday season at 156 Powell.

The upper three doors above B. M. Joseph's new shop on Grant avenue will be opened Dec. 21 as afternoon tea rooms, which is expected to make this location quite a gathering place for fashionable people. Mr. Joseph says the results of his first month in business have greatly exceeded his expectations. He is preparing to install a large Christmas tree, with elaborate decorations, on his second floor for the holidays. John R. Sievers, formerly of Sievers & Uzick, who has been for some years in the nursery and cut-flower business, is acting as chief salesman at Joseph's.

Three carloads of rare varieties of rhododendrons for the decoration of the Panama-Pacific International Exposition grounds have been received yesterday from England. Among them are one thousand Rhododendron cornu, which comprise the largest shipment of the kind ever sent to this country. The plants will blossom early in February. For this reason they are to be used as the first of the series of floral decorations that are to keep the exposition grounds in continual bloom throughout the ten months of its existence.

The past few days have been marked by the influx of great quantities of exhibits and shipments of various kinds to the exposition grounds.

St. Louis, Mo.—George B. Windler's greenhouses on Delor street, were visited by fire on Friday night which caused considerable damage to flowers and plants. The fire started in the sheds and spread to the greenhouses and also caused the boiler to crack. Oil stoves were put in use and these will save some of the Christmas plants from freezing. The loss has not been estimated yet.

Of Interest to Retail Florists

THE RETAILERS' BUSINESS CALENDAR.

Dec. 26, Sat. Christmas and another year gone by! Let us hope that you have added materially to the strength of the business house you are building. Dedicate next year's structure to the following purposes:

To enthusiasm in business, to inspiration in work and to harmony in life;

To good fellowship among yourselves and among those with whom you associate;

To the establishment of higher business ideals in the industrial and commercial life of your community;

To the better understanding and promulgation of the principles of service;

To the development of initiative and efficiency in the world of affairs;

To a bigger, better and broader vision of the business world and of life in general.

Dec. 27, Sun.

A—lways on hand, and ready for work;

G—ood for his duty, and never a shirk.

Q—nly an eye on the good of the store;

O—rderly, neat, and never a bore.

D—uly employed, from morning to night,

S—elling flowers, at prices just right!

A—fter work hours, ready for play,

L—ooking for vigor for the next day.

E—ver an honest, industrious man,

S—eeking for business wherever he can.

M—aking of labor a loving devotion;

A—lways a hustler; ever in motion;

N—eedless to worry—he's sure of promotion!

Dec. 28, Mon. There is a florist shop downtown in New York, where the clerks are in danger of getting cross-eyed.

They keep one eye on the job upon which they are engaged, and the other on the door. The moment a customer comes in, those who are not waiting on someone else, make a dive for him. Why?

Because each salesman, in addition

to his salary, receives a percentage on his sales. One cent on every dollar.

A cent is not much on a sale of one dollar. But if the clerk pushes out a hundred dollars' worth in a day, he has made a dollar.

There is no holding back, to let some one else wait on him. No pretending to be busy. That one cent on the dollar makes every clerk a real Johnny-on-the-spot.

Dec. 29, Tues. Your busy season is at its height, but that is no excuse for neglecting the little things that become big things in the aggregate. Did many of your orders go astray last week? In the rush and bustle you probably neglected to write the addresses plainly on all parcels of goods sent out. An order mislaid or delayed in shipping will eventually reflect on the good will of your business. Few customers are willing to appreciate the strain upon the florist at this season and consequently it is absolutely essential that such misunderstandings be avoided by paying just a little extra attention to the little things.

Dec. 30, Wed. Post the books today. The close of the year brings with it the question of how successful your business was during the past fiscal period. Be sure to learn from what your books tell you and profit thereby, if the story is at all negative. Reflect upon your mistakes and—don't do them again!

Dec. 31, Thur. Spend a few minutes today writing copy for an appropriate New Year's card, to be inserted in the newspapers tomorrow morning. Get intimate with your buying public. Most people like to see a little of sentiment and the finer feelings rule the conduct of a busi-

ness house and especially so at this time.

Jan. 1, Fri. The starting post in another lap of life's race! Forget the troubles of the past year and start afresh with a determination to win and gain the goal. HORTICULTURE will do its best to aid and spur on to higher endeavor all that heed the treasure of knowledge and wisdom stored within its pages. The plans for the new year include contributions from the men who have something worth while to tell, who have learned their lessons thoroughly in the hard school of experience and who are willing to ease the upward path of their younger fellow members.

Jan. 2, Sat. Here are some resolutions that one might paste on the inside of his mind for use during the coming year:

(1) Keep out of the ruts. It is mighty easy to get into them, and easy travelling while there; but once you try to get out, you've got a hard job before you.

(2) Keep everything about your store in a neat, clean, and well-ordered condition. Keep the cobwebs not only out of the store windows, but out of the business—especially in the buying and selling departments.

(3) Kindness, courtesy and attention to all who come in, should be cultivated as among the cardinal virtues.

Flower Market Reports

BOSTON The Christmas rush and its attendant joys and troubles are on. The retail stores are crowded with flowering plants and extra help. The wholesale houses are extremely busy with shipping trade. Nevertheless complaints are rife among the salesmen in the wholesale markets. They all agree in deploring the abnormal apathy in their part of the trade. Business is undoubtedly much better than it has been for some time, but the fact still remains that it is below that of former years. Roses, carnations and pot plants seem to be in greatest demand and are fetching good prices. Orchids and gardenias are being called for favorably, but are not receiving top notch figures. There are still some chrysanthemums to be seen, with few buyers. The local retailers are again cutting into the sale of natural cut flowers by actively pushing the basket combinations of bayberries, elderberries, pine cones, etc. This latter feature is very discouraging to the growers of natural flowers. Snow, rain and slush was the order of the day on Monday, but at this writing, Wednesday, the weather is propitious, and the florists are willing, so here's hoping that the buying public will do its share to round out a perfect holiday season.

BUFFALO About the only business that has been done for the past week was in holly, boxwood, laurel and decorative material and a good lot of artificial stuff which the trade calls for. The shop windows are well decorated and attractive and the greater portion with this artificial material which seems to have a large sale each season. There was very little cut-flower trade. Social entertainments were very quiet, as was plainly seen by the stock of corsage flowers in the market, together with plenty of rose and other stock, Saturday being about the only day that a flurry was had and there being sufficient stock except possibly a slight shortage in carnations. The chrysanthemum season is over, which is a good relief, a benefit to other stock. The outlook for Christmas is promising and from all indications the volume of business should be larger, though prices may not be as high as heretofore. The Beauty crop is good and the quality fine. Roses will be in good supply, also violets. At this time carnations looks much like a scarcity, though it may be a case again of the same old story. Let us hope the holiday business will equal previous years and that the merchants may say that they had a real hustle on for a few days, which would offset those many dreary ones had during the fall.

CINCINNATI The market for the past fortnight has been very weak and any attempt, so far, to raise prices by the individual wholesalers has resulted in an accumulation in the particular line and a consequent drop to the former level to effect any sort of a clearance at all. The rose cut is large and has been more than sufficient to take care of the recent demand for them. American Beauties are fairly plentiful. The carnation supply is large but has been having a very indifferent call. There are plenty of

poinsettias for the Yuletide demand. Lilies are plentiful and the same is true of lily of the valley. Violets and orchids, paper white, narcissus and stevia are coming in strong. Other offerings are Roman hyacinth, calla, forget-me-not, wallflower, primroses and a few antirrhinums.

NEW YORK This week started off badly, with a very inclement Monday, but Tuesday showed up clear and cold and the retail flower stores filled up quickly with customers, since which time until present moment the retailers have had all they could attend to. Plants have been selling well better than appeared likely a few days ago. As to the final outcome with the cut flowers, little can be told at this time (Wednesday) and the story will have to wait until next week. Prices asked in advance are lower on most things than has been the case in past years. One retailer is advertising American

Beauty roses, five-foot stems for Christmas delivery at \$1.00 each, which hitherto was considered a low price at wholesale. Carnations are very plentiful with prices sagging, but this does not apply to the red varieties, which are being held at high figures. Red roses are also favorites and of these Prince d'Arenberg seems especially popular, with asking prices about double those asked for Richmond. Hadley is, of course, peerless, but the supply is limited. There are plenty of poinsettias. All green material is overabundant.

PHILADELPHIA continued normal here. There was a fair amount of business done last week, but no great lifting of the market. Prices generally were low and a good deal of the business was done at the wind-up. Flowers of all kinds very plentiful. The prospects for

Flower Market Reports

(Continued from page 921)

Christmas week at this writing, Monday the 21st, are quite rosy. If the weather proves favorable, we will have a good story to tell in next issue.

Retailers report **SAN FRANCISCO.** an improvement, due to the increasing number of social events. Wholesalers, however, find it necessary to go out actively after business instead of having it come in as usual. There is more shipping demand for violets, which are still rather scarce, as the temperature accompanying the rain has been too cold to bring out the flowers. It looks as if the shortage may continue through the holidays. Many advance orders are being received. Shipping orders for roses are also increasing. The stock is very fair, and in ample but not in excessive supply. Ophelia and Hadley are well received, the limited daily offerings being closely cleaned up, and it is probable that planting of these, as well as of Russell, will be more extensive next year. Red roses and carnations are expected to run a little short at Christmas, as usual, though the stock is being held back for that time as much as possible. Carnations of fair quality are plentiful and rather cheap, but an advance is expected. *Lilium giganteum* is appearing in many of the shops, and a good many Roman hyacinths are coming in. Cardenias are showing up nicely, and still improving, with prospects of a fine cut for Christmas. The supply of orchids is improving, both in quantity and quality, and is pretty well absorbed. Chrysanthemums are showing the effects of the rain, but the smaller varieties are still fairly plentiful and cheap, and some of the Chinese varieties are of very good quality. English holly is coming in more freely and promises to be fairly plentiful, with offerings from California as well as northern points. Southern California poinsettias are becoming more of a feature and a good Christmas demand is expected. Azalea plants are appearing everywhere, and are very fine.

Business has been **ST. LOUIS** quiet as usual just before Christmas, with stock not any too plentiful among the commission houses with prices rather high. As to Christmas supply it is not possible to say this early how it is going to be, but there will be a decided scarcity in peas and violets and Beauties will come high. The dark weather for the past three weeks has surely got our growers up in the air as to Christmas stock and if business is going to be brisk there will not be enough stock coming in to go to fill advance orders.

According to state-
WASHINGTON ments made to the Washington correspondent of *Horticulture*, the Christmas business for 1914 will surpass that of last year to quite an extent. The advance orders for cut flowers and blooming plants have been exceptionally heavy, giving a feeling of confidence to the growers. Conditions are such that the people of Washington

& Sprengeri (100 bunches)				

are not spending the money that they have in previous years for jewelry and other luxuries of that type and thus the demand for cut flowers and plants will be increased to no little extent. American Beauty roses are coming into Washington in large quantities and this has had a tendency to force down prices to some extent. Roses of other varieties and carnations in all colors are plentiful. There will be more than enough orchids and gardenias to fill all demands. Single violets have been meeting with a very ready sale since first coming in. Some exceptionally fine sweet peas are offered at reasonable prices. The expected shortage of Christmas trees and greens has not materialized and the production of blooming plants is heavier than in recent years.

NEWS NOTES.

Alton, Ill.—The Alton Floral Co. has purchased the greenhouse property of O. B. Rynders, and will shortly erect another greenhouse.

Plymouth, Mass.—Fritz Schlecht, proprietor of the Allerton street greenhouses, has opened for the holiday season a store at 11 Court street.

New York—Lecakes has opened a wholesale greens and cut flower establishment in the store formerly occupied by Guttman & Raynor, at 102 West 28th street.

New Bedford, Mass. John J. Leal, a florist, who lives at Ash and Union streets, was found in his bed last Saturday morning overcome by coal gas. He was revived by the pulmotor and rushed to St. Luke's hospital.

Cincinnati—Among the local retailers having very attractive window displays for the holidays are Miss Edith

Kyck, Avondale Floral Co., E. G. Hill Floral Co., Hardesty & Co., Fred Gear, Max Rudolph and Julius Baer.

VISITORS' REGISTER.

New York—L. W. Wheeler, Pieters-Wheeler Seed Co., Palo Alto, Cal.

Cincinnati—Miss Fannie White, Lexington, Ky.; E. J. Fancourt, representing S. S. Pennock-Meehan Co., Philadelphia, Pa.; Fred Rupp, Lawrenceburg, Ind.

Cohasset, Mass.—Ernest Howes, who bought the Col. Albert A. Pope estate on Jerusalem road, is preparing ground for a \$25,000 flower garden, besides several greenhouses. It is said the estate will become the floral show place of Jerusalem road.

Washington.—Charles E. Meehan, of the S. S. Pennock-Meehan Company, Phila, Pa.; Julian Dilhoff, of Schloss Bros., New York, N. Y.; Robert Shoch, with Rice & Co., Phila, Pa.; J. E. Peterson, Westwood, Cincinnati, Ohio; G. G. Stumpp, of Stumpp & Walter Co., New York; Joseph J. Goudy, with H. A. Dreer, Philadelphia, Pa.

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Two volumes have now been issued and the others will follow in succession. Order from

THE PRACTICAL BOOK OF Outdoor Rose Growing

FOR THE HOME GARDEN

by
GEORGE C. THOMAS, JR.

Elaborately Illustrated with 96 Perfect Reproductions in Full Color of All Varieties of Roses, and a Few Half-tone Plates. Octavo, Handsome Cloth Binding, in a Slip Case. \$1.00 net. Postage Extra.

ITS SPECIAL APPEAL

As a Practical Working Manual for Outdoor Rose Growing in America This Volume Contains Several Features Which Make it Exceptionally Valuable:

First, plain and careful thought out rules, which have proved successful for many years in actual practice.

Second, a list of roses made only after the entire best quality list of varieties has been systematically tried for years in this country in testing beds.

Third, sixty six remarkable illustrations in color reproduced from autochrome color photographs made from the varieties tested.

In addition, chapters devoted to general information are added as of interest, and books going further into detail on the various subjects are suggested.

Don't overlook the appropriateness of this beautiful volume as a gift to any friend who loves Roses.

U. S. DEPARTMENT OF AGRICULTURE.

Report of Government Entomologist.

The control of such dangerous insects as the gipsy moth, cotton-boll weevil, alfalfa weevil, green bug and potato tuber-moth, has kept the office of the United States Department of Agriculture's entomologist busy during the past year, according to the new annual report. The gipsy moth campaign, waged also against its cousin the brown-tail moth, has been very encouraging, there being a marked decrease this year in the numbers of both these pests. Parasites and beetles that attack these dangerous insects have been introduced and have been largely instrumental in bringing about good results. Colored posters were prepared by the office illustrating the gipsy moth and its natural enemies and these were posted in all post offices and town offices in the infected districts and copies were sent to granges and public libraries. The campaign has also been waged by mail and Boy Scouts who have distributed cards bearing the same illustrations.

Ornamental Plants from Belgium.

Shipments from Belgium of ornamental plants containing from two or three plants to one thousand plants in each shipment have been coming into the United States at the rate of about 50 a day, according to the Federal Horticultural Board. While France sends us more nursery stock during the year than all the other European countries combined, during October and November more ornamental plants have come from Belgium than from all the others combined.

The Belgian shipments come via Holland, the territory where they originate being on the Dutch border. France, which sends us much of our imported fruit stock as well as ornamental trees, also continues to ship, the territory where these stocks originate being west of the war zone. The Federal Horticultural Board has cabled the French Government regarding the maintenance of the inspection service and has received through the French Ambassador information that the service is being maintained. Large importers of French stock have since confirmed this advice.

Under the existing European conditions there may naturally be expected some irregularity in compliance with our inspection regulations, and certain leniency may occasionally be necessary, especially where safety can be fully insured by adequate inspection on this side. Among the plants that need especial attention in this line are azaleas, which come in great numbers from Belgium. Gipsy-moth egg-masses are occasionally found in these plants, but in all cases the plants are rigidly inspected and affected plants are destroyed. Azaleas and similar plants are often set out in gardens after their house use is over or they are thrown out in yards or vacant lots. If such azaleas harbor eggs of the gipsy moth, the hatching larvae may easily gain access to surrounding vegetation.

A Magnificent Volume on Horticulture

SCOTCH SOOT

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:
 \$3.00 per 112 lbs.; \$17.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

HENRY A. DREER, Seeds, Plants, Bulbs, and Supplies, 714 Chestnut Street, Philadelphia, Pa.

TO COMPUTE AMOUNT OF PIPING.

The available temperature should be from 5 to 10 degrees higher than that actually used. Determine the number of square feet of glass in the roof. Compute the same for the glass on the four sides, also determine the area of the foundation walls and doors and take 1/5 of the latter amount, as only 1/5 of heat radiates from the foundations as from the glass. Then add these amounts.

To estimate the radiation surface one square foot of pipe will heat:

35°-40°	1.51	sq. ft. glass area
40°-45°	1.47	" " "
45°-50°	1.4	" " "
50°-55°	1.346	" " "
55°-60°	1.3	" " "
60°-65°	1.262	" " "
65°-70°	1.28	" " "
70°-75°	1.8	" " "

Divide the number of square feet of glass and equivalent by 2.62 and you will have the number of square feet of pipe surface required to heat a house from 60° to 65°, or divide by 3 and you will have the figures for heating a house from 55° to 60°.

Find the number of linear feet of 2-inch pipe required:

1	in. pipe	3.44 sq. ft. per linear foot.
1 1/4	"	4.64 " " "
1 1/2	"	4.97 " " "
2	"	6.21 " " "
3	"	1.05 " " "

Divide the number of square feet of radiating surface by .621 and the result will be the number of linear feet of 2-inch pipe required.

If the houses are to be heated by steam, deduct 1/4 of the radiating surface.

IF YOU ONLY

KNEW what a good save the **METROPOLITAN PATENTED** is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the glue is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

FULL
SIZE
No. 2

It is 60 feet wide and 400 feet long. The sides are 7 feet high with 18 inch transom sash, operated with our close working apparatus. The power plant is a model one—in fact, one of the finest in New England. It is connected to the greenhouse by a glass passage house 10 feet wide and 25 feet long.

First Big House of The New Sinclair Range at Smith's Ferry, Mass.

ON starting off on my vacation this fall, I promised myself that never a greenhouse would I visit. "Business to bally-hack, for all me" was to be my motto for two whole weeks. You have many a time determined to do exactly the same thing, and you know just what has happened time after time. So I might just as well own up that when burning up the gasoline, whizzing along that beautiful road between Northampton and Holyoke, Massachusetts, saw that big greenhouse across the fields on the left; automatically, I shut off the gas and before my partner could successfully protest, was over the fence and scooting across the lots to the fine big house of Sinclair and Son.

I can turn down invitations to ball games; decline the offer of my friend's Packard even when he furnishes all the gasoline; I can resist all kind of tempting things, but it's all up with me, when a greenhouse looms in sight. Something just makes me go and look it over. It's a pretty sight, one of these big Iron Frame Houses such as we are building these days.

It's a lot of satisfaction to squint your eye along the eave and see how it runs straight the full length.

It's a genuine pleasure to go inside and see the engineering skill shown in a big house like this of Sinclair's; and see how very little detail has been carried out exactly "according to specifications" and finished up with greatest care.

"There's no camera made, that can do such a house justice." At least that's how Mr. Sinclair feels about it.

When I got back to the buzz-wagon, my partner had a fierce grouse on. I didn't give a hoot. Any fellow who isn't interested in a house like this one of Sinclair's isn't to be scolded. He needs to be pitted.

That night, however, at the Hotel Kimball, in Springfield, he good-naturedly stood for a couple of hours of my talk on our Reconstructed Construction.

If you would like to know some of the things we talked about, send for our Reconstructed Construction circular. It doesn't say so much, but the illustrations show a lot.

The greatest lengthwise sway strain on a house is brought against the columns. That's why we brace-tie them to each other, every so often. It's the simplest, most effectual way of making the house solid. All Mr. Sinclair's ridge vent gears are equipped with our Tell-tale device, showing exact opening in inches of the sash.
